Abstract

This thesis is a study of the urban sporting culture of Middlesbrough between c.1870 and 1914, a period that witnessed an enormous expansion in participant and spectator sports. It examines the impact of industrialisation and urbanisation on the town’s sporting culture, and explains how its social and economic structures shaped the development of sporting organisations. In light of a population dominated by working class men, the thesis contextualises the growth of recreational football into the town’s most popular sport. Through a detailed examination of local newspapers and archival sources, this thesis reveals the depth and diversity of the town’s sporting culture. In particular, it illustrates the role of the middle classes in the development of clubs and the importance of class and social relations in determining an individual’s access to sport. As a consequence, the thesis will demonstrate both how the town’s working class populace were often excluded from the sporting culture, and the lack of sporting opportunities for women. Clubs were given further importance by the involvement of members of Middlesbrough’s elite, and allows for an exploration of the notion of elite withdrawal. The role played by employers in providing leisure opportunities for workers in the early twentieth century was also one of the most important developments in Middlesbrough’s sporting culture. Amateurism is also explored through the initial rejection of professional football, but the thesis will illustrate the increased popularity of the professional game during this period. In addition, in view of Middlesbrough’s migrant population, the extent of football’s role in forming and reinforcing identities will be examined. This thesis offers an original contribution to knowledge by examining the largely unexplored social and cultural history of Middlesbrough and the leisure habits of its people, as well as adding to existing studies of urban sport.

Acknowledgements

First and foremost I must thank my supervisors Neil Carter and Dilwyn Porter for their support, feedback and advice.

I would also like to thank the other members of the International Centre for Sports History and Culture for their words of encouragement along the way.

I am also grateful to the Faculty of Humanities at De Montfort University for granting me a bursary which allowed me to study full-time.

Thanks are due to a number of individuals who allowed me to consult archival material – Anthony Emmerson for facilitating access to the minute books at Middlesbrough Football Club; Graeme Moir for allowing me to take the minute books of Middlesbrough Bowling Club home; Jonathan Still at the River Tees Watersports Centre for the minute books of Middlesbrough Amateur Boating Club; and to David Hunter for his hospitality, a copy of his book and access to the minutes of Middlesbrough Golf Club.

The advice and friendship offered by the PhD students and historians I have met during the course of writing my thesis have proved invaluable, and have kept me going when I really needed it.

I must thank my friends (old and new) and family for their help and support, in particular Alex and Liam for vital IT assistance, my Dad, my sister Helen and my niece Martha for providing a welcome distraction from studying.

Introduction

This thesis traces the development of a sporting culture in Middlesbrough from c.1870-1914. It assesses the effects of the town’s industrial and urban expansion, the influence of its class structure, the role of the middle classes, access to and provision of sport, and the popularity of sport, most notably, football. The thesis views the town’s sporting history alongside the development of the town itself and within the context of the growth of sport in Britain more widely. Furthermore, as a study in urban history, this thesis will address existing gaps in our knowledge of the development of towns and cities through an examination of Middlesbrough’s sport.

As well as providing a case study of urban sporting history, the thesis challenges or questions a number of existing ideas. First, it has been claimed by a number of historians that from the last quarter of the nineteenth century, the physical withdrawal of Middlesbrough’s elite was accompanied by a marked decrease in their influence and philanthropic activity. This thesis suggests that the number of roles occupied in sporting organisations by members of this elite indicates that their withdrawal has been overstated. Secondly, Middlesbrough is characterised as being dominated by working class, disorderly leisure, but it will be shown that when it came to the town’s sport, it was the domain of the respectable lower-middle and middle classes. Third, the thesis challenges the view that the north unreservedly embraced professional football and the payment of players in sport more generally. By examining the town’s first attempt to establish a professional football club, the strength of opinion in favour of amateurism will be demonstrated. Finally, the thesis examines the notion that football provided a
vehicle for civic pride and the formation of local identities. By examining the place of football in Middlesbrough and the roles played by the town’s smaller clubs, the links between the sport and identity will be explored.

The period covered in the thesis witnessed the expansion of spectator and participant sports in Britain, and it has therefore attracted a great deal of attention from historians of sport. Whilst there already exists a substantial historiography of sport in the Victorian and Edwardian periods, that for Middlesbrough in comparison is very small. Much of the literature on the town relates to the town’s economic and industrial history; there are considerable gaps in the existing historiography with regards to the social and cultural history of the town, and an examination of sport in Middlesbrough will add to the current literature on the town.

**a. Literature Review**

Middlesbrough was established in 1830, and by the 1860s, when the population was growing rapidly (almost 19,000 in 1861 and almost 40,000 by 1871 – see Appendix 1), was already crucial to the country’s economy. The town’s particular social structure — no landed class, a small middle class, and a large population of migrant workers — indicates that the town is worthy of further study. However, even though Herbert Gladstone proclaimed in 1862 that the burgeoning town was “an infant Hercules”, much of the work on north-east England sees Middlesbrough receive far less attention than Tyneside, Newcastle or Sunderland. An example of this is McCord’s article ‘Some Aspects of Change in the Nineteenth-Century North East’ which, despite the title, only
details economic developments in Tyneside and Newcastle.\footnote{1} Rowe has discussed the problems associated with defining the region, suggesting that some of Teesside may have stronger ties with agricultural North Yorkshire than to the industrial heartlands of the north-east. He argues that even though Middlesbrough developed at the southern end of the region, due to “dictates of industrial logic” a partly rural North Riding was subsequently included with Northumberland and Durham.\footnote{2} Recently, Linda Polley has also made this point, stating that Middlesbrough was “an industrial enclave within an agricultural landscape”,\footnote{3} and the town’s place within Yorkshire \textit{and} the north-east is noted throughout the thesis, particularly in relation to Yorkshire County Cricket Club. Bill Lancaster, who in asking whether the north-east can be described as a particularly distinctive region, fails to find a place for Middlesbrough or Teesside in it, paying little attention to either place, ignoring the nationally important industries to be found there.\footnote{4} Graeme J. Milne meanwhile argues that though Tyneside “dominates perceptions of the entire North East, both now and in the past”, different towns have been prominent at various times; Middlesbrough, Newcastle, South Shields and Sunderland having at some point been dominant in the regional economy.\footnote{5}

\footnote{1}{N. McCord, ‘Some Aspects of Change in the Nineteenth-Century North East’, \textit{Northern History} 31 (1995), pp. 241-266}
\footnote{4}{B. Lancaster, ‘The North East, England’s Most Distinctive Region?’ , in B. Lancaster, D. Newton and N. Vall (eds.), \textit{An Agenda for Regional History} (Newcastle, 2007)}
The starting point for any history of Middlesbrough is Asa Briggs’ essay “Middlesbrough: The growth of a new community”. First published in 1963, it was reproduced in its entirety in A. J. Pollard’s edited volume *Middlesbrough: Town and Community 1830-1950* in 1996. Briggs describes the early development of Middlesbrough, outlining why it received so much praise as a Victorian success story. He suggests that the interest in Middlesbrough’s history lies in “the speed with which an intricate and complex economic, social, and political sequence was unfolded”. He goes on to describe the town’s unplanned expansion, the decline in involvement of the ironmasters and the increasing influence in local politics of a ‘shopocracy’, a group of individuals who also played an increasingly important role as officials of sports clubs. Briggs argues that as the size of local industry increased, “the contribution of employers to the life of the community outside the factory was inevitably curtailed”. Furthermore, he claimed that the subsequent generations of ironmasters and managers did not share the “feelings of the older generation about the links which bound them to the town”. This assertion will be tested by the growth of work-based clubs, as well as by the positions taken up by members of the local elite in various organisations. That Briggs’ essay was published without any reassessments or additions has allowed his account to become the history of Middlesbrough with little re-evaluation. His arguments have remained unchallenged and further examination of the town is overdue.

A study of the history of Middlesbrough’s sport will demonstrate the important role played by members of the town’s elite in the development of clubs and organisations.

---

8 Briggs, ‘Middlesbrough’, p. 23, p. 30
9 Briggs, ‘Middlesbrough’, p. 16
Briggs’ contention that the town’s elite retreated from the town and its inhabitants has been reiterated by other historians. David Hadfield has examined the attitudes of the town’s ironmasters and their role in local government. Like Briggs, he concludes that they took part in few philanthropic activities, arguing that the ironmasters “remained largely wrapped up in their own affairs”, and “exhibited a singular lack of interest” in seeing their workers provided for.¹⁰ Richard Lewis contends that the ironmasters enjoyed popular support, but like Hadfield, suggests that they only took a part in municipal affairs to protect their personal commercial interests.¹¹ Anne Orde’s work on the Pease family has shown that despite the financial interests the Middlesbrough Owners had in the town, they were not concerned with its development.¹² Rowe has also pointed out that throughout the region, when urban leaders moved out of their towns, it became “very easy to do nothing about them”.¹³ In contrast, Tosh Warwick argues that Middlesbrough’s elite continued to play an active role in the town, and has detailed subscriptions and donations made to a number of charities and voluntary organisations.¹⁴ A major theme of this thesis is the significant and recurrent involvement of a considerable number of the town’s elite in sporting organisations, which would suggest that the notion of withdrawal has been overstated. Ironmasters and industrialists continued to be associated with clubs and leagues throughout the period. For example, Isaac Wilson a first generation ironmaster, was a patron of Middlesbrough Cricket Club and a vice-president of the athletic club, whilst Lawrence Farrar Gjers of the third

¹³ Rowe, ‘The North-East’, p. 462
generation, was involved with ten clubs. This indicates that clubs looked to such individuals as representatives of the existing hierarchy of the town. That members of the elite accepted the positions may suggest that they regarded the roles as part of their wider responsibilities to the community.

Much of the history written about Middlesbrough has concentrated on the economic development of the town. In 1971 D. J. Rowe pointed out that the north-east had been neglected by economic historians and proposed a number of areas that required further research, such as transport, specific industries and the impact of immigration. Following this, Rowe and McCord examined the development of various industries in the region from the late eighteenth century onwards, but they only skimmed the service of the area’s social history. A recent addition to Middlesbrough’s historiography is the work by Minoru Yasumoto, who states that the town offers “one of the richest fields within which to study those forces operating and interplaying in the making of modern British urban society”. Yasumoto suggests that though there was a sense of “rootlessness” among much of the town’s immigrant population, this was also a feeling

in which they could all share. He argues that Middlesbrough offers a case study of “a rapidly forming urban identity”. Both these points can be applied to an examination of the role played by sport in forming local identities amongst the town’s migrant population. Furthermore, Yasumoto argues that by the end of the nineteenth century “a working class culture dominated social life in the town”, though as his study concentrates on economic history he does not explore the social aspects of the town in any depth. In concentrating on industrial growth, Yasumoto’s research stops before the end of the nineteenth century as does much of the writing on Middlesbrough, leaving considerable gaps in the historiography of the town.

It is only relatively recently that aspects of Middlesbrough’s social history have been examined, though it becomes clear that it is impossible to divorce the town’s history from its industry. David Taylor has asked whether Middlesbrough’s economic advances were matched by social developments, remarking that progress coexisted alongside poverty. He argues that Middlesbrough’s “reputation for lawlessness has given it a distinctiveness that sets it apart” from many other British towns, but that it had been the intention of the town’s founders to “create a morally, as well as a physically ordered society”. This thesis will show how these two conflicting aspects of Middlesbrough

18 Yasumoto, The Rise of a Victorian Ironopolis, p. 107, p. 188
20 He also describes the more neglected aspects of the town’s economy, such as retail, as well as outlining increases in wages and stagnation of living standards – D. Taylor, ‘The Infant Hercules and the Augean Stables: A century of economic and social development in Middlesbrough, c.1840-1939’ in Pollard (ed.), Middlesbrough: Town and Community; Taylor offers further details on social aspects of the town as background to his work on the police, as well as information on levels of crime – D. Taylor, Policing the Victorian Town: The development of the police in Middlesbrough c.1840-1914 (Basingstoke, 2002)
society influenced the ways in which sport developed. Peter Stubley’s research documents the concerns of the church in Middlesbrough, suggesting that the main interests of the clergy were peoples’ morals and the effects of industrialisation rather than social reform. Stubley has also described the provisions made by the church for the working classes and attitudes towards temperance. The existence of a number of church-based sports clubs and organisations, and the accompanying rhetoric, does suggest a concern about the behaviour of the working classes. Linda Polley’s discussion of Middlesbrough’s urban and suburban growth offers another perspective on the town’s social development and related problems. Her work allows for comparisons between the areas inhabited by the workers and those populated by their employers and managers. She states that Middlesbrough was already experiencing problems with overcrowding and pollution in the 1850s, and has documented the suburban expansion of the town, showing how business connections were reflected in the physical connectedness of individuals’ homes. Whilst it is evident that there are many aspects of the town’s social and cultural history still to be examined, such work helps to shape this thesis, giving context to discussions of immigration, middle class suburban sport and working class access to leisure.

Whilst it is evident that there are a number of gaps in existing histories of Middlesbrough, the history of the town’s sport remains virtually unwritten. It is at present difficult to ascertain who was involved in clubs, or how and why certain sports

23 L. Polley, The Other Middlesbrough: A study of three 19th century suburbs (Middlesbrough, 1993); L. Polley, ‘Housing the Community, 1830-1914’, in Pollard (ed.), Middlesbrough: Town and Community; See also Polley, ‘To Hell, Utopia and Back Again’
grew in popularity. Only Mike Huggins’ essay in Pollard’s edited volume covers a range of sports and other aspects of leisure in Middlesbrough. Huggins describes the development and growth of sport, increasing commercialisation, and the divide between middle class respectable leisure and more disreputable working class pursuits. He states that Middlesbrough aspired to respectability, and that in the 1860s and 1870s there was a “strengthening of independent, respectable middle class leisure forms”. From then on, however, the town was “dominated by commercial leisure forms which placed a premium on short-term, immediate excitement”. Though Huggins places a great deal of emphasis on commercialised leisure in general, this thesis will show that apart from football, there was little commercial sport. Huggins concludes that working class forms of leisure came to dominate, and though sport was still segregated by gender, space, time and class, it offered a diversion from the realities of working life. As forms of leisure such as music halls, the theatre and day trips have also been included in Huggins’ essay, it is very much an overview of Middlesbrough’s sport, and does not allow for a detailed examination of those who participated in or administered leagues and clubs. It also does not illustrate the sheer number of sports and clubs that existed in the town as will be demonstrated in this thesis.

Some other aspects of Middlesbrough’s sport have also been examined. James William Leonard’s thesis on the development of the town from 1831-71 examines

---

24 M. J. Huggins, ‘Leisure and Sport in Middlesbrough, 1840-1914’ in Pollard (ed.), Middlesbrough: Town and Community
26 Huggins, ‘Leisure and Sport in Middlesbrough’, pp. 150-151
27 For the increasing popularity of daytrips see M. Huggins, ‘“Fashionable Watering Place” or “Popular Resort”: Residential visitors and day trippers to Redcar and Coatham, 1865-90’, Journal of Regional and Local Studies December 1983, pp. 56-57; M. Huggins, ‘Social Tone and Resort Development in North-East England: Victorian seaside resorts around the mouth of the Tees’, Northern History 20 (1984), pp. 193-194
leisure more generally, noting the influence of the environment and physical landscape, and the part this played in recreational activities. Huggins has researched the growth of football across the north-east, and the ways in which it spread throughout the region. He outlines the change from an amateur game to a professional spectator sport. The shareholders of Middlesbrough Ironopolis, alongside those of Newcastle West End and Sunderland Albion, have been researched by Pamela Dixon, Neal Garnham and Andrew Jackson who examined the backgrounds of shareholders including occupation and class, which allows for comparisons between the clubs. The only other individual sport to have been studied is cycling. Robert Goodall has researched cycling clubs in North Yorkshire and South Durham, examining a wide variety of clubs, looking at professionalism, temperance and the decline in popularity of the sport.

b. Historiography of Sport

This thesis expands upon the existing knowledge of British sport in the late Victorian and Edwardian period, but also adds to the literature on British urban sport generally, and more specifically, sport in a classic Victorian boom town. The history of sport has

---

attracted considerable attention in recent years and, as Jeffrey Hill suggests, it is no longer a neglected aspect of history. Nevertheless, Hill has also argued that sport and leisure history are still “on the margins of academic discourse” despite the fact that such areas “have a determining influence over people’s lives”.\textsuperscript{32} Richard Holt’s \textit{Sport and the British} attempts to locate the ordinary participant in the history of sport, and to identify both changes and continuities,\textsuperscript{33} and this is an important text for the thesis, as Holt’s assertions on the place of sport in an urban environment can be tested. Holt demonstrates the popularity of sport, stating that the “vigour and scope of Victorian sport was quite remarkable”, whilst new games were “well suited to the life of the large industrial city”\textsuperscript{34} He describes the process by which organised sports were spread amongst the working classes, and suggests that games such as rugby and football were adopted by workers because participating was “a way in which men created and sustained close-knit groups in the context of unprecedented urban upheaval”.\textsuperscript{35} Holt suggests that the large numbers of spectators at sports like football and rugby “posed a serious threat to governing bodies established on firm amateur principles”; sport “reflected and reinforced the ambiguities of an increasingly democratic society”.\textsuperscript{36}

The role of industrialisation and urbanisation in the development of sport has been well documented, and as Middlesbrough’s population and industry grew at the same time, this thesis documents how this influenced the town’s sport. Wray Vamplew has argued that the process and effects of industrialisation had a huge impact on the development of sport. The growth of the railways, increased wages and changes to

  \item Holt, \textit{Sport and the British}, p. 153
  \item Holt, \textit{Sport and the British}, p. 104, p. 117
\end{itemize}
working patterns alongside an increase in entrepreneurship, led to a rise in commercial, professional and spectator sport. As Vamplew states, there was a belief that “money could be made out of man at play as well as man at work” and so “sport became an industry in its own right”.\footnote{W. Vamplew, ‘Sport and Industrialization: An economic interpretation of the changes in popular sport in nineteenth-century England’, in J. Mangan (ed.), Pleasure, Profit and Proselytism: British culture and sport at home and abroad 1700-1914 (London 1988); W. Vamplew, Pay Up and Play the Game: Professional sport in Britain, 1875-1914 (Cambridge, 1988), p. 54. Neil Tranter also describes the reasons behind the rise in sport and its popularity with particular reference to the effects of industrialisation – N. Tranter, Sport, Economy and Society in Britain 1750-1914 (Cambridge, 1998)} As is evidenced in this thesis, Steven A. Riess suggests that sport was “shaped, reshaped, and further moulded by the interplay of the elements comprising the process of urbanisation”. He suggests that the city should be viewed as both “the site of sport and also as an organic environment whose changing elements shaped and were shaped by sport”.\footnote{S. A. Riess, City Games: The evolution of American urban society and the rise of sports (Chicago, 1991), p. 2, p. 259} W. F. Mandle places the growth of sport firmly within the context of Victorian society, stating that, as was the case in Middlesbrough, the entrepreneur, inventor, employee and class conflict can all be found at the centre of sport’s development.\footnote{W. F. Mandle, ‘Games People Played: Cricket and football in England and Victoria in the late nineteenth century’, Historical Studies 15, 60 (1973), p. 512}

Key to the development of sport in Middlesbrough and in Britain more widely was the role played by amateurism, the strength of which is evidenced throughout this study. As is demonstrated by the debates surrounding the introduction of professional football in the town, amateurism was not just concerned with the payment of sportsmen, and instead involved a particular ethos. Holt states that amateurism “comprised a set of distinctive sporting practices and values”, emphasising “voluntary association, active and ethical participation, and repudiating both professionalism and gambling”. Instilled in to the middle and upper classes in public schools, amateurism also represented
Victorian ideas of ‘manliness’ and muscular Christianity. Effort was prized over winning, thus pitting the amateur sportsman who played for the love of the game against the professional who played for money.\textsuperscript{40} Amateurism embodied issues of inclusion and exclusion, and as Huggins states, it was “emblematic of class”. Amateurism was a middle class way of “marking social difference, confirming class boundaries, controlling property, organisations and membership and asserting power”.\textsuperscript{41} Norman Baker has pointed out the contradiction in the distaste for professional sport amongst the members of the professional class, “for whom meritocracy was central to their class ideal”, and states that amateurism allowed gentlemen to avoid physical contact with the lower classes.\textsuperscript{42} In a town with a relatively small middle class, amateur sport gave Middlesbrough’s elite another means of differentiating themselves from the large working class populace, and it was also hoped that the values of amateurism could be used to ‘civilise’ the workers.

This thesis adds to existing case studies which examine leisure in an urban setting, and the relationships between leisure and urbanisation. In 1983 Walton and Walvin called for the themes of the history of leisure to be tested at the local level in order to provide a more informed and contextually-aware synthesis. They also noted that at that point, case studies had been patchy geographically with most urban and industrial environments having been neglected thus far.\textsuperscript{43} More recently Peter Bailey has noted

\begin{flushright}
\textsuperscript{40} Holt, Sport and the British, chapter 2; R. Holt, ‘The Amateur Body and the Middle-class Man: Work, Health and Style in Victorian Britain’, D. Porter and S. Wagg (eds.), Amateurism in British Sport: It matters not who won or lost? (Abingdon, 2008), pp. 8-9

Walvin (eds.), Leisure in Britain, 1780-1939 (Manchester, 1983), pp. 3-4; In 1996, Holt also stated that there was a lack of good studies of sport in the cities of the Industrial Revolution, despite there already being equivalent studies for American
\end{flushright}
that local studies are capable of revealing “the considerable diversity of working class leisure well past the supposed inception of its massification”. Bailey argues that local studies challenge the representation of a homogenous working class in the late nineteenth century. Furthermore, the study of local and regional identities demonstrate the diversity of working class cultures “in the face of standardizing pressures” from education, the press and commercialised leisure. Such case studies allow for an investigation of the effects of leisure on different communities and classes, and demonstrate the “staggered rhythm” of continuity and change. Likewise Hill suggests that local case studies emphasise the diversity of working class sports, “reminding us to be wary of over-simple generalisations”. Case studies can therefore demonstrate variations in society such as the pace of change, the timings of the adoption of particular sports, and the behaviour of different social groups.

The thesis draws on a number of existing case studies which have looked at the place of sport and leisure in various urban environments, the impact of economic development, the influence of class structures on the provision of sport, the role of rational recreation, the position of local elites and working class cultures. Such case studies and that of Middlesbrough, demonstrate how sport developed in different locations, and how sports were influenced by the specific environments in which they were played.

Like Middlesbrough, Merthyr Tydfil has been described as “the quintessential ‘frontier town’”, its development being “determined by the exigencies of the iron industry”. Through an examination of its culture and spaces, Andy Croll has documented the efforts by Merthyr Tydfil’s elite to both civilise the town and build a civic landscape, through the regulation of drinking and of public spaces, and by controlling working class leisure. Jeremy Crump’s thesis on recreation in Leicester also examines the demands of social reformers, and the use of sport as a form of social control. With particular reference to Coventry, Brad Beaven’s Leisure, Citizenship and Working-Class Men in Britain considers issues of rational recreation and its failure, the problems associated with male leisure and ideas of citizenship. Beaven’s study follows the changing patterns of leisure from that offered by rational recreationists to the growth of mass commercial leisure, alongside issues relating to the suburbanisation of towns. He argues that working men showed “a remarkable propensity to manipulate the entertainment offered to coincide with their own cultural preferences”, and this thesis will ascertain the extent to which Middlesbrough’s working classes were able to control their own leisure. Alan Metcalfe’s research on the mining villages of East Northumberland, also examines the role played by the workers in their leisure activities. He examines the relationship between such activities and the villages’ economic and social structures, as well as the roles that leisure played in peoples’ lives. Metcalfe states that a number of meanings were ascribed to sports – self-improvement, entertainment, promotion of community, tradition – which can also be seen in

46 A. Croll, Civilizing the Urban; Popular culture and public space in Merthyr, c.1870-1914 (Cardiff, 2000), p. 1
48 B. Beaven, Leisure, Citizenship and Working-Class Men in Britain, 1850-1945 (Manchester, 2005)
49 Beaven, Leisure, Citizenship and Working-Class Men, p. 39
Middlesbrough’s sporting culture. Helen Meller’s study of Bristol covers a range of cultural institutions and leisure activities, and outlines the attempts by elites to “improve the social environment of the city”. Meller also looks at the provision of facilities by local government, the efforts to ‘civilise’ the poor and the impact of religion and temperance.

Studies of sport in North American cities show similarities (and differences) with those in Britain. Steven A. Riess outlines how economic and social factors influenced the development of sport in the American city, through an examination of industrialisation and urbanisation, technological innovation, the class system and the role of ethnicity. Riess makes a direct link between urban growth and the development of sport, arguing that the characteristics of modern sport first emerged in cities. He also points out that urbanisation shaped the rise of both organised and recreational sport, and that sport in turn influenced urban development. Boston, Massachusetts has been examined by Stephen Hardy, who uses sport as way of assessing the “meaning of life in the city”. As can be seen to be the case in Middlesbrough, sport offered an “escape from the humdrum of daily living”, as well as providing “order, identity, stability and association”. The relationship between sport and commercialisation in a growing urban environment is also examined in Tony Joyce’s study of Toronto, where he outlines the change of sport from “social pursuit to business enterprise”.

56 T. Joyce, ‘Sport and the Cash Nexus in Nineteenth Century Toronto’, Sport History Review 30 (1999), p. 152
Worcester, Massachusetts\textsuperscript{57} shows a distinctive working class culture. He explores issues similar to those in this thesis – drink and temperance, the effects of immigration, the growth of open spaces and parks, and increases in commercialised forms of leisure. Such examples give the case study of Middlesbrough further context, and make it possible to identify and explore the unique elements of the town’s sporting history. Moreover it is evident that in many studies the emphasis is placed on the provision of leisure \textit{for} rather than \textit{by} the working classes, and this was also the case in Middlesbrough.

c. Themes

A number of themes dominate the study of sport in Middlesbrough during this period. Firstly, the particular class structure of the town – the influence of the elite, the dominance of sport by the small middle class and the large working population demonstrate that class is key to the development of sport. Secondly, given Middlesbrough’s industry and large working class the role of the workplace emerges as an important related theme. This can be seen in the large sports clubs of the various works and the provision of sports days and other events, as well as in the smaller clubs with their roots in places of work. Third, it is clear from studying the growth of Middlesbrough’s sporting culture that football quickly became the most popular sport in the town. Often at the expense of other sports and smaller football clubs, the town’s preeminent team drew large crowds and dominated newspapers’ sports pages. It has been suggested that sport, and football in particular, enabled people to create and strengthen their local identity. This thesis will ascertain whether this was the case in

\textsuperscript{57}R. Rosenzweig, \textit{Eight Hours for What We Will: Workers and leisure in an industrial city, 1870-1920} (Cambridge, 1983)
Middlesbrough. A final key theme is the growth of clubs. A huge number of clubs, organisations and associations existed whose origins are to be found in a range of backgrounds.

Class is one of the dominant issues in the historiography of British sport, and was the most influential factor in determining the way Middlesbrough’s sports developed. Whilst there was often a clear distinction between the sports and clubs of the workers and those of their masters, participant or spectator sport was nevertheless popular with much of the population. In addition, the involvement of the town’s elite and middle class as club presidents and vice-presidents meant that sport could be used to underline or define an individual’s position in local society. However, whilst class remains key to our understanding of the development of sport and an individual’s relationship with it, the use of social class categories are not always regarded as fundamental to the study of history. Increasingly, historians have sought to assess the importance of culture itself, having previously regarded it as “the product of economic and social change”, rather than “the arena in which political battles were fought”. There has been a move away from explaining attitudes and behaviour solely in terms of class. Instead, class is regarded as just one way in which people defined themselves. 58 David Cannadine argues that it is too simplistic to categorise an individual as working, middle or upper class, and suggests instead that there are “a limitless number of individual self-categorisations and subjective social descriptions”. 59 Whilst Patrick Joyce does not entirely dismiss the place of class in the study of history, he points towards a need to

“move more deeply into its real historical manifestations”.  

In addition, he states that an individual’s position within the class structure was often “exceedingly diverse and fractured”, and it is therefore difficult to speak of a working class. Joyce has posed questions over the relative importance of class alongside other sources of social and political identity, and notes that class is always “integrated in other sources of identity”.

Instead of ‘class’ Joyce uses the term ‘populism’, which encompasses discourses and identities that are “extra-economic in character, and inclusive and universalising in their social remit”. The emphasis that historians have placed on class has meant that alternatives have been omitted and “historical situations are correspondingly misread”. In contrast, Mike Savage and Andrew Miles state that the turn against class in favour of the linguistic and cultural turn favoured by Joyce and others, can be “profoundly disabling, not to say misleading”. They stress that the meanings that a text might possess depend on the context in which it was created and understood.

Despite such ongoing debates, Cannadine states that class is still “one of the most important aspects of modern British history”, and that “the most important and immediate task is... defining the subject afresh and envisioning it anew”. In relation to the study of sport and leisure, it has been acknowledged that historiography has relied heavily on class. As Murray G. Phillips has noted, the study of sport history has not reflected changes in social history more widely, failing to encompass the cultural and

postmodern turns. Hill has argued that sporting preferences have been “very clear signifiers of class position” since the second half of the nineteenth century, and it is therefore unsurprising that British sport history has been written from a class perspective. Furthermore, Holt points out that the first academic sports histories were more concerned with the economic, social and ideological context than with the physical activities themselves. Peter Bailey suggests that historiography has been limited by preoccupations with class, derived from the roots of sports history in labour studies and the subsequent emphasis on examining working class activities. As with other aspects of social history, Bailey argues that sports history cannot be divided into neat class-based categories and suggests instead that it should be ordered “according to a compound scheme of various leisure cultures”. Whilst Bailey maintains that class is still “a major interpretive category”, it is one that needs to be used “within a more pluralised experiential landscape in which all identities are contingent constructions”. Holt points towards the importance of examining the complexities of local, regional and national affiliations in addition to the study of class relationships. This is confirmed by Andrew Davies who argues that the diversity of leisure within working class communities has demonstrated “a growing recognition of the limitations of a class-centred approach”. Though Hill suggests that class will continue to influence the study

69 Bailey, ‘Politics and Poetics’, p. 159
70 Holt, ‘Sport and History’, p. 244; Beaven notes that strides have been made in recent local studies to break the “causal relationship between working class leisure and working class politics” – Beaven, Leisure, Citizenship and Working-Class Men, p. 5
71 Quoted in Beaven, Leisure, Citizenship and Working-Class Men, p. 4
of sport, its limitations are becoming ever clearer as the emphasis on social class has left a number of areas unexplored.\footnote{Hill, ‘British Sports History’, p. 11}

Whilst acknowledging the debates surrounding the use of class-based categories and the study of class relations, the role of the class structure in this thesis necessitates further discussion of class within the historiography of sport. Huggins has argued that Victorian sporting culture “provided a crucial way in which class was articulated in the nineteenth century”. The middle classes regarded amateur sport as a tool for “personal, communal and national virtue”, but it was also a form of entertainment and a means of socialising.\footnote{Huggins, The Victorians and Sport, p. 21, pp. 31-35} This can often be seen to be the case amongst the middle class in Middlesbrough, particularly with regards to the number of social events associated with some clubs. He has suggested that the role of the middle classes has not received the attention it deserves.\footnote{M. Huggins, ‘Second-Class Citizens? English middle-class culture and sport, 1850-1910: A reconsideration’, International Journal of the History of Sport 17, 1 (2000), pp. 1-35; Huggins has also questioned the notion that middle class sport should always be equated with respectability – M. Huggins, ‘More Sinful Pleasures? Leisure, respectability and the male middle classes in Victorian England’, Journal of Social History 33, 3 (2000), pp. 585-600} The role of the middle class in Middlesbrough is crucial to understanding the growth of clubs and organisations, and it is this group that enabled sport to flourish. An examination of the town’s middle class will therefore add to our understanding of their input in sport in general. It has been shown by John Lowerson that the growth of sport in Britain coincided with the expansion of the middle class, and he has outlined the factors which came together to enable greater participation.\footnote{J. Lowerson, Sport and the English Middle Classes 1870-1914 (Manchester, 1993); Riess outlines arguments put forward by academics, assessing the role of class in the growth of sport – S. A. Riess, ‘From Pitch to Putt: Sport and class in Anglo-American sport’, Journal of Sport History 21, 2 (1994), pp. 138-184} Peter Bailey suggested that although Victorian sport offered new opportunities to members of
the middle class, this was not necessarily met with unanimous approval as some sports had “a disturbing impact on middle-class sensibilities”, as demonstrated by Middlesbrough’s first attempt at professional football.\textsuperscript{76} Holt argues that the new professional middle classes were willing to invest in clubs or become directors, and “achieve the prominence and respect he felt his wealth entitled him to”, and this will be demonstrated by the continued input of Middlesbrough’s elite and middle classes as club officials.\textsuperscript{77}

It will be shown that in Middlesbrough, there were only limited opportunities for members of the working class to participate in sport. Stephen G. Jones suggested that some members of the working class adapted middle class sports and incorporated them in to their own culture, often leading to separate working class sports and organisations.\textsuperscript{78} Bailey has outlined the ways in which the working class “realised the freedoms of modern leisure amid the unique complex of opportunities and constraints” of society, as well as the role of rational recreationists,\textsuperscript{79} whilst Huggins argues that for the skilled working class, sport provided access to “self-esteem and higher community standing”.\textsuperscript{80} Holt has also demonstrated how members of the working class were encouraged to play particular sports by rational recreationists, whilst continuing to play their own traditional games, and shows how certain sports became entrenched in working class culture.\textsuperscript{81} It has been suggested by Hill that “the control of people’s

\textsuperscript{80} Huggins, The Victorians and Sport, p. 43
\textsuperscript{81} Holt, Sport and the British, chapters 2 and 3
leisure could never be entirely separated from the improvement of their minds”, as attempts to improve leisure was connected to the need to ‘civilise’ the workers. This is evidenced by the formation of the Cleveland and Middlesbrough Athletic Institute, though the fact that this was only short-lived may suggest a rejection of such attempts to ‘civilise’. It is pointed out by Holt that efforts to use sport as a means of social control failed as workers made their own leisure, “rather than having their play organised for them or sold to them”. 82

It is evident that in Middlesbrough, large employers increasingly thought it necessary to provide sporting facilities for the workers and it is apparent from membership numbers that such facilities were popular among employees. It should be noted however, that the sporting opportunities provided by employers were sometimes the only forms of organised leisure open to workers. It has been pointed out by Roger Munting that many larger employers saw it as their duty to provide recreational facilities for their employees, and by doing so sought to extend the public school ‘games ethic’. Such provisions were often based in a desire to increase profits, being used to recruit and hold on to workers, which may have influenced the formation of such clubs in Middlesbrough. Munting also suggests that sport was important in “extending a broader company culture”. 83 Tranter notes that it was hoped that sport would lead to increased productivity by improving physical health, it being regarded as a complement to the world of work. 84 The recreational and educational facilities that were provided for men and women at Cadburys and Rowntree’s have been examined by Kathleen

82 Hill, Sport, Leisure & Culture, p. 167; Holt, Sport and the British, p. 135
84 Tranter, Sport, Economy and Society, pp. 58-59
McCrone, who argues that these companies promoted “equalitarian and cooperative relations in the workplace”, and encouraged a company culture and identity.\textsuperscript{85} From his examination of the provision of recreation and welfare by Boots, Simon Phillips suggests that the company’s approaches to sport can be regarded as part of the agenda of British employers to inculcate “a morality of the sports field to match the wider morality of the workplace”. Furthermore, he suggests that studying the interaction between different work clubs, sheds light upon “the contributions made by and between local industries to improvements to working conditions in the city”, and this contention in particular can be tested by an examination of Middlesbrough’s works clubs.\textsuperscript{86}

Football was undoubtedly the most popular sport in Middlesbrough, and this study will explain how and why this became the case.\textsuperscript{87} The popularity of the sport is evidenced in the increasingly large numbers of spectators that watched Middlesbrough FC play, the crowds that turned out to celebrate victories for this and other clubs, and the reaction of the public and press to developments in the game. The first attempt to establish a professional football club in Middlesbrough provides a case study in which

\textsuperscript{85} K. E. McCrone, ‘Class, Gender and English Women’s Sport, c.1890-1914’, Journal of Sport History 18, 1 (1991), p. 178; See also C. M. Parratt, “More Than Mere Amusement”: Working-class women’s leisure in England, 1750-1914 (Boston, Massachusetts, 2001), chapter 6

\textsuperscript{87} Despite the importance that has been attributed to football, there is little academic work on specific clubs or on the sport in particular locations. Notable exceptions are N. A. Phelps’ work on Portsmouth which examines the ways football defined local identities in the post-war period, and David Kennedy’s research on Liverpool which includes an analysis of support, directors and governance – D. Kennedy, ‘Locality and Professional Football Club Development: The demographics of football club support in late Victorian Liverpool’, Soccer & Society 5, 3 (2004), pp. 371-391; D. Kennedy, ‘Class, Ethnicity and Civic Governance: A social profile of football club directors on Merseyside in the late-nineteenth century’, International Journal of the History of Sport 22, 5 (2005), pp. 840-866; Special Issue: The Split: A social and political history of Everton & Liverpool football clubs, 1878-1914, Soccer & Society 12, 4 (2011); N. A. Phelps, ‘Professional Football and Local Identity in the ‘Golden Age’: Portsmouth in the mid-twentieth century’, Urban History 32, 3 (2005), pp. 459-480
to test the debates surrounding the sport’s development. The subsequent progress of Middlesbrough FC and the growth of smaller clubs and local leagues will add to the existing historiography of football.

In addition to an examination of the progress of the town’s premier club and its relationship with professionalism, the thesis also examines the diffusion of the sport in the town and district, and will account for the failure of rugby. It is suggested by Tony Collins that it was hoped that the increasing popularity of football amongst the working classes would “help reassert the social exclusivity of rugby”, and the sport’s exclusivity contributed to its lack of progress in Middlesbrough. He has suggested that football came to dominate over rugby in some parts of England because of its place as “a truly national sport”, football’s more open style of play, and because it was “a game of all the classes”, and the last two reasons were both given for the lack of success for rugby in Middlesbrough. In addition, Eric Dunning and Kenneth Sheard suggest that football had a head start over rugby as it spread beyond the public schools earlier and more quickly. They have also argued that the game’s ‘roughness’ made it more appealing to some groups, but that this aspect of the game may also have disadvantaged rugby when attempting to find favour with muscular Christians. Whilst the diffusion of football was assisted by the church, schools and the workplace, rugby clubs were far more socially exclusive, as will be demonstrated by those involved in Middlesbrough Rovers Rugby

---

88 Similarly to Middlesbrough, both Sunderland and Newcastle had two professional teams, but neither place were big enough to sustain two senior sides – P. Joannou and A. Candlish, Pioneers of the North: The origins and development of football in north-east England & Tyneside, 1870-93 (Derby, 2009)
89 T. Collins, Rugby’s Great Split: Class, culture and the origins of rugby league football (Abingdon, 2006), p. 32
90 Collins, Rugby’s Great Split, pp. 144-147
That Middlesbrough identified more strongly with the football-playing north-east than with Yorkshire (where rugby was more popular) also contributed to the failure of Middlesbrough rugby. The popularity of football in the town is demonstrated by Huggins who notes that the number of football clubs in Middlesbrough grew from two in 1878 to 44 eight years later; in contrast, the number of rugby clubs decreased from just three to one. However, Huggins does not account for rugby’s lack of popularity in the town.

As well as looking at the growth of football and the expansion in the numbers of clubs, the examination of football in this thesis will also include the commercialisation of the game. The contemporary debates surrounding the relationship between football, money and business are demonstrated throughout the thesis, particularly in relation to Ironopolis. Moreover, concerns about finances, the need to boost attendances and the election of business-minded directors were stated by Middlesbrough FC after joining the Football League. Whilst the amateur elite abhorred the idea that football clubs should be run as businesses, Vamplew points out that the primary concern of clubs soon became increasing gates and attempts at ‘profit maximising’. This is demonstrated by the improvements made to grounds, the use of advertising and the renting out of grounds for other purposes as was done by Middlesbrough FC. It has been argued by Steven Tischler that it was “the commercialisation process which would exert an overriding influence on professional football”. He points out the great number of

92 For the geographical spread of football and rugby see A. Harvey, Football: The first hundred years – the untold story (Abingdon, 2005), chapter 7
93 Huggins, ‘The Spread of Association Football’, p. 300
94 Vamplew, Pay Up and Play the Game, pp. 80-87
industrialists and merchants whose civic and philanthropic image could be boosted by involvement with their local football club, as well as those directors whose work in the drinks industry could also benefit from club involvement. With reference to the motivations of club directors, Mason has noted the secondary profits that could be made from a club through building or catering for example. Football clubs were rarely run like other businesses, and Matthew Taylor states that on a number of occasions profits were sacrificed in order to improve squads and ground facilities.

It has been argued that sport, and football in particular, played a key role in the formation of local identities. This study will ascertain the extent to which individuals identified with particular clubs or teams and how this affected local identities, or indeed whether sport was simply a means of entertainment and escape from work. In addition, the thesis will also look at the influence of two local successful sportsmen, Robert Boyd and Jack Hatfield, in the strengthening of a local identity.

Holt argues that team sports were capable of inculcating a strong sense of local identity in spectators, as clubs and teams were able to represent both place and pride. Jack Williams suggests that supporting a club was “an expression of a town identity”, and Huggins also states that ‘place’ was integral to the development of sport, as it “provided one way of facilitating and renewing strong community allegiances and

---

96 Mason, Association Football, p. 48
loyalties”. He points out that during a time of mass migration, sport supplied a new focus for old rivalries between towns and regions.\textsuperscript{100} Given that the majority of Middlesbrough’s population were new arrivals to the town, the assertion that sport could assist in the creation of local loyalties can be examined in this thesis. As Huggins has stated in his examination of the effect of sport on the formation of identity in the north-east, some communities in the region took time to find their own identity and sport helped them to do so. Indeed, he stresses the importance of football in creating “the myth of a united community”.\textsuperscript{101}

As well as helping to form a local identity, sport could also contribute to the formation of a larger regional identity, as is demonstrated by the support for football teams in the Amateur Cup from elsewhere in the region or district. Whilst Mason argues that rather than contributing to a northern identity, football served to strengthen local loyalties,\textsuperscript{102} Dave Russell argues that sport provides “a powerful means of expressing a body of supposed northern values” and facilitates the “expression and construction of a range of personal and collective northern identities”.\textsuperscript{103} Harvey Taylor argues that popular culture and sport in the north-east equates to a working class culture, and suggests that the importance placed by the working class on strength and skill was given “popular expression in sporting heroes”.\textsuperscript{104}

It has been claimed by a number of historians that football in particular helped to form local identities. This thesis will assess the extent to which this was the case in Middlesbrough, and whether the celebrations of football teams’ victories can be regarded as celebrations of the town. Holt has suggested that football’s ability to express “a sense of civic pride and identity” contributed greatly to the sport’s appeal to the working classes, and that by following a team within the national league, people could assert their “membership of the city”.  

Furthermore Holt argues that football provided a means by which “men could come to terms with the reality of the late Victorian city”. Similarly Beaven claims that football allowed working men to foster “a sense of place and belonging”. He attributes this to the process of socialisation and citizenship that was taking place in growing cities as football developed. Indeed, he argues that for working class men, football defined their citizenship. Mason has stated that football helped to develop and reinforce local consciousness, not only for those who attended matches but also through conversations and press coverage, the latter being particularly important in relaying opinion on local football in Middlesbrough. Ross McKibbin, in demonstrating the role of football in English culture, suggests that clubs were “the focus of powerful personal and collective loyalties”. It has been suggested by Nicholas Fishwick that the fortunes of a football club “were commonly taken as reflecting the vitality and prosperity of the locality itself”, and in a town effected by periodic economic boom and bust this thesis will locate football within the

107 Beaven, Leisure, Citizenship and Working-Class Men, p. 74, p. 79  
108 Mason, Association Football, p. 234  
town’s development.\textsuperscript{110} Dave Russell argues that football “has been shaped by, and has in turn shaped, the power relations” between different social groups,\textsuperscript{111} and this can be tested when examining the role of different class groups in the administration of the game in Middlesbrough. Whilst football was the most popular spectator sport amongst the working class, there was also a great deal of involvement in clubs and leagues by the elites, middle and lower-middle classes.

One of the most significant themes of this thesis is the formation of a large number and range of sports clubs during the late nineteenth and early twentieth centuries. The proliferation of clubs in Britain has been documented by Peter Clark. He states that clubs and societies “catered for a growing plurality of interests... propelled by fashion, competition, commercialism and specialisation”.\textsuperscript{112} As large-scale industries grew, clubs offered relief and independence from the monotony of factory work.\textsuperscript{113} The notion that sport could act as an antidote to the world of work is certainly applicable to Middlesbrough, as a town that was defined by its industry. Simon Gunn argues that whilst gentlemen’s clubs remained exclusive, new organisations provided “a gateway for middle-class men to other opportunities and pleasure that the city had to offer”.\textsuperscript{114} The role that voluntary organisations played for the middle classes has been outlined by R. J. Morris. The hierarchical structure of club officials was the “perfect compromise between middle class people striving for self-respect and independence” and the

\textsuperscript{110} N. Fishwick, \textit{English Football and Society, 1910-1950} (Manchester, 1989), p. 26
\textsuperscript{112} P. Clark, \textit{British Clubs and Societies 1580-1800} (Oxford, 2000), pp. 470-472
\textsuperscript{113} Clark, \textit{British Clubs and Societies}, p. 476
\textsuperscript{114} S. Gunn, \textit{The Public Culture of the Victorian Middle Class: Ritual and authority and the English industrial city, 1840-1914} (Manchester, 2000), p. 84
realities of British society with its inequalities of wealth and power.\textsuperscript{115} The number of clubs in Middlesbrough that catered solely for the middle class and elite suggests that such arguments are valid. That so many clubs existed, offering a range of activities and means of diversion, from the Cleveland Club to the cricket and golf clubs, point towards an acknowledged need for leisure and for opportunities to socialise with other men from the same social class.

Clubs are central to the development of Middlesbrough’s sports, and for Stefan Szymanski, the tradition of forming clubs and associations was fundamental to the growth of sport; all modern-day sports owe their existence to the “hierarchical systems of clubs and governing federations”. The ways in which sports were played were dictated by the rules of governing associations, and those rules also “played a powerful role in creating bourgeois sports”. As will be shown to be the case in Middlesbrough, Szymanski points out that club development was led by the middle classes as they were able to share the costs of running clubs.\textsuperscript{116} Hill has stressed the role of voluntary associations in the growth of sport, stating that they were “not only an important ingredient of sport and leisure, but a vital feature of community life in general”.\textsuperscript{117} By adhering to the procedures of subscriber democracies, Hill points out that organisations were subject to a transparent process, being run by voluntary committees and reliant on the willingness of members to take part. However, such structures inevitably lead to social differentiation or exclusion, with clubs emphasising amateurism and being

\begin{flushleft}
\textsuperscript{116} S. Szymanski, ‘A Theory of the Evolution of Modern Sport’, Journal of Sport History 35, 1 (2008), p. 3. He also argues that when the working classes found themselves excluded, they were able to form their own associations instead, Szymanski, ‘A Theory of the Evolution of Modern Sport’, pp. 3-8
\textsuperscript{117} Hill, Sport, Leisure & Culture, p. 137
\end{flushleft}
defined by class, gender, status or ethnicity.\textsuperscript{118} Lowerson suggests that increases in middle class involvement meant that clubs spread out from town centres and pubs, and in to suburbia, acting as instruments of “social differentiation and arbiters of public custom”.\textsuperscript{119} Huggins has noted that in Victorian Britain there were more clubs dedicated to sport than to any other pastime. When young men gathered together, suggests Huggins, it was almost inevitable that a sporting organisation would be formed.\textsuperscript{120} Holt has described the formation of elite organisations, suggesting that sport allowed members of the professions to climb the ‘social ladder’.\textsuperscript{121}

d. Sources

This thesis uses both primary and secondary source material, including a number of archival sources, held both privately and at Teesside Archives. These include the minute books of Middlesbrough’s boating, bowls, football and golf clubs. Some minute books included more information on the day to day running of the club than others, whilst many of the entries in that of the golf club for example, simply listed new members or resignations. However, such information, coupled with that of the bowling club meant that a record of their memberships could be compiled. Similarly the Ironopolis FC Register of Members and Memorandum of Association have been used to analyse the shareholders of the club. Minute books have also allowed for an examination of wages paid to club employees and footballers, as well as a study of the reaction from the boating and bowls clubs on being forced to leave their premises.

\textsuperscript{118} Hill, \textit{Sport, Leisure \& Culture}, pp. 131-138
\textsuperscript{119} Lowerson, \textit{Sport and the English Middle Classes}, pp. 96-98
\textsuperscript{120} Huggins, \textit{The Victorians and Sport}, pp. 99-101
\textsuperscript{121} Holt, \textit{Sport and the British}, pp. 110-114; In comparison, Mason points out that it was not necessary to form clubs in order to play football, but that organisations were needed so that it could be played regularly – Mason, \textit{Association Football}, p. 21
As archival sources are limited, the thesis uses a large number of daily and weekly newspapers. As well as those published in Middlesbrough, this also includes titles printed in Darlington (*North Star, Northern Echo*), Hartlepool (*South Durham & Cleveland Mercury, Football Mail*), Newcastle (*Northern Athlete*) and Manchester (*Athletic News*) which reported on sport in Middlesbrough. Hill points out that the coverage of football was sometimes “an intriguing mixture of the factual and the inventive”; local newspapers were prone to bias and there can be inaccuracies in reporting. Moreover, there are sporting activities that go unreported, such as grassroots and unorganised sports and games. In contrast, the Annual General Meetings of many clubs are reported in great detail (though of course some incidents may have been omitted), including the particulars of balance sheets. Bias is demonstrated by the identification of the *Northern Review*’s principal football writer ‘Rambler’ as a member of Middlesbrough FC, and his vocal distaste for professionalism. As journalists rarely used their real names it is difficult to ascertain whether other writers were also members of sports clubs, and whether their reporting was equally biased or prone to omissions. In contrast, it is possible to assess the importance placed on local sport by the sheer number of column inches devoted to it, including editorials on the wider impact of sports and clubs in the town (such as during the Gibson-Poole scandal), and by noting which sports received the most coverage.

Middlesbrough’s press changed markedly during the period under examination, reflecting the changes that took place in the British press during the period of ‘new journalism’. From the 1880s, newspapers underwent both journalistic and typographical

---

changes, and the new style of journalism reflected the evolving relationship between
readers and the press.\textsuperscript{123} Alan J. Lee suggests that whilst these changes did not represent
a break with tradition, the newspaper of the 1850s did look very different from that in
the 1890s.\textsuperscript{124} Martin Conboy argues that the changing relationship between reader and
newspaper was encapsulated in the new style and rhetoric of the press, as well as by
advances in technology, commercialism and advertising; new journalism was marked
by “a deliberate policy of appealing to the masses”. Furthermore, Conboy states that the
changes to the press can be attributed just as much to the changes in aspirations of
readers as to those of newspaper owners and journalists. The ability of the press to
appeal to a wider market was matched by readers’ desire for a popular press.\textsuperscript{125} As well
as the professionalization of journalists, and an increased use of illustrations,\textsuperscript{126} there
was also a growing use of the front page for news and an increasing emphasis on news
over opinion. Therefore the relationship between newspaper and reader changed from
“the ideal one of a tutorial and intellectual nature, to one of a market character”. Indeed,
Lee argues that the press was less of a political, civil and social institution but “a
business almost entirely”.\textsuperscript{127} Similarly, Mark Hampton suggests that the press became
increasingly depoliticised, and that the politics that was reported was done so in the
form of entertainment or spectacle, or in terms of personalities.\textsuperscript{128} Whilst it has also
been suggested that the press was also able to act as “an educational agent”, echoing the

\textsuperscript{123} L. Brake and M. Demoor (eds.), Dictionary of Nineteenth-Century Journalism in Great Britain and
Ireland (Gent, Belgium, 2009), p. 443
\textsuperscript{125} M. Conboy, The Press and Popular Culture (London, 2002), pp. 94-95
\textsuperscript{126} Wiener suggests that by the early twentieth century, the textual and visual aspects of the popular press
began to complement each other, showing the way for a “dominance of the visual” – J. H. Wiener, ‘How
New Was the New Journalism?’, in J. H. Wiener (ed.), Papers for the Millions: The new journalism in
Britain, 1850s to 1914 (New York, 1988), p. 52
\textsuperscript{127} Lee, The Origins of the Popular Press in England, pp. 120-121; Quoted in Wiener, ‘How New Was the
New Journalism?’, p. 49
\textsuperscript{128} M. Hampton, ‘Rethinking the “New Journalism,” 1850s-1930s’, Journal of British Studies 43, 2
(2004), p. 282
wider issues of education during the late Victorian period,\textsuperscript{129} at the same time the commercialisation of the press lessened the educational effects of newspapers. It seems more likely that the press played a greater role in “conveying rather than influencing public opinion”.\textsuperscript{130} Conboy emphasises that the period saw “a new readership for a new sort of popular publication”. New journalism witnessed the blending of existing features in a commercially attractive and more appealing way to a wider readership.\textsuperscript{131}

The expansion of local evening newspapers meant that by 1900 there was a split between the political news of the national daily press, and the reporting of local matters in the local evening newspapers.\textsuperscript{132} It has been argued by Lee that if the 1870s and 1880s are to be described as a ‘golden age’ for the British press, then this can be attributed to “the status and even influence of the provincial press”. Lee points out that when national morning or evening newspapers had local competitors, it was invariably the latter which came out on top.\textsuperscript{133} Andrew Hobbs’ work on newspapers in Preston demonstrates that the local press could be “a mirror, magnifier and maker of local culture”. He suggests that newspapers “became part of the loop of making and re-making culture, giving them a status of a local institution”. Local identities guided the selection, interpretation and presentation of local content in the press.\textsuperscript{134}

\textsuperscript{129} M. Hampton, \textit{Visions of the Press in Britain, 1850-1950} (Chicago, 2004), pp. 75-76, chapter 3 passim
\textsuperscript{130} Hampton argues that this was indicative of an “increasing pessimism about the possibilities of integrating the ‘masses’ into a cohesive politics by public discussion” – Hampton, \textit{Visions of the Press in Britain}, pp. 106-107
\textsuperscript{133} Lee, \textit{The Origins of the Popular Press in England}, pp. 74-75
Hampton points out that in the 1880s, editors and journalists came to recognise that the readers of the popular press did not want to “plough through a dull mid-Victorian paper”. It was evident that readers were less interested in politics, and more inclined to read about crime, gossip and sport. It was the latter in particular that boosted sales of newspapers; as Lee states, by the start of the twentieth century, gambling and sport were “inextricable parts of the new journalism”. The football and sports specials that were produced by local newspapers had two major selling points – their emphasis on the local and the speed with which they were able to present results and comments. Hobbs has highlighted the symbiotic relationship between the press and sport in Preston. He points out that newspaper editors “played upon notions of identity” and “reinforced a sense of local distinctiveness”. Sport provided an ideal way for them to utilise these themes. The local press was “absolutely indispensable” in the organisation and popularity of football, as is shown to be the case in Middlesbrough throughout this thesis. As Hobbs argues, the coverage of football in the local press allowed newspapers to “package together many other elements of local identity into one topic, making local patriotism more intense and emotional”. Furthermore, local newspapers deliberately promoted local identity, regarding this “as part of their cultural role”, whilst at the same time being aware of the commercial benefits of doing so. Hill states that the voice used by the press was “the voice of ‘us’, the locality; the local paper spoke, or was felt to speak, for the people of the community”; when newspapers described events they

---

135 Hampton, *Visions of the Press in Britain*, p. 119
137 Hobbs, ‘Reading the Local Paper’, p. 141
138 Hobbs, ‘Reading the Local Paper’, p. 140
139 Nevertheless, Hobbs also points out that there is little evidence that boosterism in newspapers had any direct impact on readers – Hobbs, ‘Reading the Local Paper’, p. 145, p. 156
140 Hobbs, ‘Reading the Local Paper’, p. 247
“became the chief agency for communicating the ideology”.\textsuperscript{141} Similarly Andrew Walker suggests that by the early twentieth century local sports coverage was “intimately associated with expressions of pride in the locality”, and was less concerned with reporting actual sport.\textsuperscript{142} Mason has also suggested that the press “was itself part of the sporting sub-culture”, helping to “shape identities and boost partisanship”.\textsuperscript{143}

Reflecting the changes outlined above, some of Middlesbrough’s newspapers included whole pages on sport, whilst newspapers devoted entirely to sport were also established in Middlesbrough (\textit{Sports Gazette}) and elsewhere in the region (\textit{Football Mail}, \textit{Northern Athlete}). There is little discernable difference in the ways that newspapers of different political persuasions covered sport, and all of the newspapers had one or more daily or weekly sports columnist writing under a pseudonym. Many newspapers only lasted for short periods of time, but the town’s principal newspaper, the \textit{North-Eastern Daily Gazette}, as well as Darlington’s \textit{Northern Echo}, continued throughout the period. Both newspapers were Liberal in politics, indeed it is suggested that the \textit{Gazette} “sustained the Liberal creed” on Teesside. Attempts to establish Conservative publications failed to break the local domination of the \textit{Gazette} and \textit{Echo} until the \textit{North Star} was founded after the Home Rule/Unionist split.\textsuperscript{144} An advert for the \textit{Daily Exchange} (established as the \textit{Middlesbrough Exchange & North Ormesby News} in 1869) in \textit{Kelly’s Directory} for 1885 stated that it was “the only Conservative daily paper

\textsuperscript{141} Hill, ‘Anecdotal Evidence’, pp. 121-122

published in Cleveland”, but it was disbanded in 1887. The Unionist *Middlesbrough & Stockton Evening Telegraph* was created in 1897 and was said to have “a special circulation” amongst the district’s industrialists, as well as including the best of “the enterprise of modern journalism”. In contrast, the *North-Eastern Weekly Gazette* included “gossipy notes... serial stories, complete tales, literary selections and a mass of interesting information”, and the *Northern Review* contained “literature of an interesting, humorous and instructive kind”.

**e. Structure of the Thesis**

The starting point of this thesis is c.1870 because of the formation of Middlesbrough Football Club in 1876. By examining the town’s sport and leisure prior to the establishment of the club, it is possible to see how football fitted into Middlesbrough’s early sporting culture. It also allows for an examination of the development of the football club from its inception, until 1914 when the club was firmly established in the Football League. The period covered in the thesis also saw the growth of sport nationally, and thus developments in sport on a local level can be contextualised.

The first chapter of the thesis outlines the establishment and early history of Middlesbrough, its rapid growth and the expansion of industry, and the rhetoric that extolled the town’s development. With the history of the town in mind, the early forms of leisure available to the population are examined. Besides the public house and parks, there was little organised leisure for most members of the working class. In comparison,

---

146 Newspaper Press Directory, 1899 quoted in Dixon, ‘New Town, New Newspapers’, p. 113
this period saw an increase in the formation of middle class clubs and organised sports, some of which attracted relatively large crowds. The popularity of sports days amongst a cross-section of society is also demonstrated.

By examining Middlesbrough Football Club between 1885 and 1894, the second chapter acts as a case study for the development of football and the debates that surrounded the professionalisation of the sport. This chapter demonstrates the popularity of the sport, the expectations of the public and press, and the role of the middle class in Middlesbrough FC. The formation of a professional club, Ironopolis, was accompanied by initial success, greater working class involvement as well as increased expenditure, but ultimately ended in failure. This chapter will demonstrate the strength of amateurism in the town and the arguments that were generated in the press over the payment of footballers.

Chapter three documents the expansion of Middlesbrough’s sporting culture, taking into account the detrimental effects the popularity of football and the town’s continued growth had on the progress of some clubs. This chapter shows the key role played by the middle class, and identifies a great number of individual participants and club officials, and in doing so demonstrates that there were few instances of working class sport. The chapter details a range of sports that experienced varying degrees of success, from cycling to baseball, and also shows that there was little commercial or professional sport. An attempt at rational recreation is demonstrated by the formation of the Cleveland and Middlesbrough Athletic Institute. In documenting the sporting
opportunities available to the female population, it will be shown that women’s limited leisure was only available to the middle classes.

The fourth chapter will demonstrate the ways in which the growth of Middlesbrough’s lower-middle class was reflected in sports clubs. The increase in cross-class and lower-middle class clubs is viewed alongside elite organisations like the boating and golf clubs. This chapter details the important development of workplace-based sports clubs with large numbers of working class members, and the formation of church-based organisations. The fluctuating popularity of cricket is evidenced, including the disbanding of the town’s principal club. In contrast, it will be shown that some new sports involved a degree of commercialisation, whilst other sports were promoted because of their health-giving aspects. This chapter will demonstrate that whilst an increased number of sporting activities were regarded as acceptable for women, sport remained closed off to working class women.

The final chapter of the thesis demonstrates the place of football in Middlesbrough’s sporting culture. This will be shown by the reaction in the town to victories in the FA Amateur Cup, and by the column inches generated during Middlesbrough FC’s progress as a professional, Football League club. Furthermore, reaction to the club’s scandals demonstrates the importance attributed to the club by many. That football was firmly entrenched in the town’s sporting landscape will be demonstrated by the great number of smaller clubs and variety of leagues in existence throughout the town and district.
This thesis not only fills the gaps relating to the growth of Middlesbrough’s sporting culture, but also sheds light upon the social history of the town through the exploration of social and class structures. The thesis adds to our understanding of the development of urban sport, as well as providing a case study of the effects of urban growth.
Chapter 1. *An Emerging Sporting Culture, c.1870-1884*

Within a few years of Middlesbrough’s establishment as a port in 1830, it had grown from a hamlet into a celebrated industrial metropolis. It was the epitome of Victorian industry, the personification of enterprise and modernity, a town which had “won a name without a history... and commands the attention of statesmen”. This chapter explores the growth of sport and leisure within this expanding urban environment and alongside a growing working class population. What opportunities were available for the town’s inhabitants to participate in sport? Did the development of sport in Middlesbrough follow the same patterns as in other towns in Britain? This chapter also examines how the continued expansion of the town impacted on sport and will consider whether the town’s class structure was reflected in its sporting organisations.

a. The Economic and Social Development of Middlesbrough

When William Gladstone (the then Chancellor of the Exchequer) visited Middlesbrough in 1862 he proclaimed,

> This remarkable place, the youngest child, as I may call it, of England’s enterprise... ‘tis I think possible that you are destined to become, as you already are, one of the first in energy and rapidity of progress, so you are destined to become also in the extent of your operations and the vastness of your resources, one of the very first among those commercial and industrial communities of England which have contributed so much to the strength and safety of the Empire... I believe it is but an infant compared with what it is destined to become hereafter. It is an infant, but it is an infant Hercules.²

---

2 *The Times*, 11th October 1862
Middlesbrough was regarded as “an addition to the riches of the world... It’s very name comes down upon the imagination with the thud of a forging hammer”. Though the town could not boast of “ancient and valuable institutions”, greater pleasure was taken in “seeing those institutions rising up in the midst of us, by our own industry and exertions”. The establishment and expansion of the iron industry in Middlesbrough was coupled with a dramatic increase in the population. From 150 inhabitants in 1831, the population had increased to 39,284 in 1871, reaching 55,934 ten years later (see Appendix 1). Whilst in-migration was crucial in maintaining industrial progress and success, Middlesbrough had not been built to accommodate such numbers of workers, and as the town grew “its original spacious centre was quickly turned into an unhealthy, overcrowded and neglected slum”. The utilitarian nature of the town meant that there were high levels of poverty and ill-health, but this was regarded as the price to be paid for progress and prosperity. The Middlesbrough Owners had envisaged a town of only 5,000, designed with “some uniformity and respectability”, but instead there were comparisons with the American Frontier due to the continuing immigration from almost every county of England and Wales. Indeed Minoru Yasumoto notes that the town displayed problems of social cohesion and segmentation, particularly relating to

3 L. Praed, History of the Rise and Progress of Middlesbrough (Newcastle, 1863), pp. 3-4
5 W. Lillie, The History of Middlesbrough (Middlesbrough, 1968), pp. 473-474
7 The partnership organisation, the Owners of the Middlesbrough Estate, was formed to develop the hamlet of Middlesbrough into a railway town to transport coal. The Owners bought the Middlesbrough Estate of 527 acres for £35,000 in 1829 – Joseph Pease (merchant), Edward Pease (merchant), Thomas Richardson (bill broker), Henry Birkbeck (banker), Simon Martin (banker) and Francis Gibson (brewer) – Lillie, The History of Middlesbrough, pp. 48-49; M. Yasumoto, The Rise of a Victorian Ironopolis: Middlesbrough and regional industrialization (Woodbridge, 2011), pp. 2-3
rootlessness and alienation.\textsuperscript{9} The respectability that had been hoped for became increasingly difficult to attain and David Taylor suggests that though the Owners and many of the early ironmasters had “sought to create an ordered and decorous society”, this was at odds with “the habits and values of the ever-increasing number of working class people”. In 1841, 40\% of the male population were aged 20-40, many of whom had arrived in the town without their families, and had to adjust to this “coarse and demanding environment”. Middlesbrough found it difficult to shake off the image of an unforgiving, working class, frontier town, with an ethos of hard work and hard play, and disproportionately high levels of crime.\textsuperscript{10} James W. Leonard attributes the lack of law and order as much to “an inadequate system of local government as from inhabitants wishing to live without the law”, whilst Linda Polley suggests that early Middlesbrough was a relatively “well-ordered and regulated environment for anyone adventurous enough to accept the challenge of living there”.\textsuperscript{11} Importantly, there was also a distinct imbalance in class composition with no landed class and only a small middle class, who eventually “moved out into whichever suburban neighbourhood was appropriate to their means and social status”.\textsuperscript{12}

By the 1870s Middlesbrough’s industry was producing more than a third of the national output of iron ore, worth more than £1 million, and contributed a quarter of

\textsuperscript{9} Yasumoto,  \textit{The Rise of a Victorian Ironopolis}, p. 1
\textsuperscript{12} Polley, ‘To Hell, Utopia and Back Again’, p. 230; With reference to the town’s small middle class, Yasumoto notes that 85\% of the working population were employed in manufacturing, and only 10\% worked in the commercial sector – Yasumoto,  \textit{The Rise of a Victorian Ironopolis}, p. 195
Britain’s export of pig iron. Hugh Gilzean Reid, the editor of the *North-Eastern Daily Gazette*, outlined the international importance of the town’s iron,

> It furnishes railways to Europe; it runs by Neapolitan and Papal dungeons; it startles the bandit in his haunts in Cicilia; it crosses the wild jungles of Africa; it streaks the prairies of America; it stretches over the plains of India; it surprises the Belochees... every articulation in its burnished body bears throughout remotest lands the stamp of the industrious and energetic hands of Middlesbrough.

Almost half of the population of the town were employed in the manufacturing industry, of which a third worked in iron and steel. The dependence on a narrow industrial base left the town at the mercy of both national and international fluctuations in trade, and whilst the output of iron on Teesside increased during the 1870s, its actual value failed to grow at the same rate. The boom in the industry was followed soon after by a fall in demand, and an increase in the use of steel. Not only was local iron ore unsuitable for conversion into steel, the ironmasters were slow (and initially reluctant) to address the problem. Despite this, that the town was able to recover was regarded as further proof that the town’s leaders were “men of energy and foresight”. However, the steel industry could not reach the levels of prosperity experienced by the town’s iron trade. In the coming decades Middlesbrough’s industry and population continued to be at the mercy of fluctuations in the trade cycle.

The town had been founded on ambition and optimism, with the ironmasters dominating the town and determining its success. They were described with reverence

---

14 Reid, *Middlesbrough and its Jubilee*, p. 1
and respect, and controlled both industry and local politics. But by the early 1880s, prominent members of the community were beginning to despair of Middlesbrough’s progress. The founders moved away from the centre of the town, and it is suggested that neither their descendants nor the managerial class that followed them had the same desire for political or civic involvement. As Asa Briggs argued, “improvements had depended for so long on the paternalism either of the Owners or of the ironmasters that once their influence was removed the zest for improvement was reduced”. Similarly, David W. Hadfield argues that the vast majority of ironmasters “remained largely wrapped up in their own affairs”, whilst Jim Turner states that the ironmasters only took part in municipal affairs when their own business interests were at stake.17 Middlesbrough’s previously “small and recognisable hierarchy of businessmen” was gradually replaced by “a more intricate economic and social structure” which included those in professional and clerical occupations.18 Indeed from the 1870s, the ‘intermediate social classes’ became increasingly important in local politics. Only two of the town’s 18 mayors between 1893 and 1912 belonged to the traditional group of large manufacturers.19 In 1872, there had been ten ironmasters and seven shopkeepers on the council, but by 1912 this had changed to only one ironmaster and 15 shopkeepers.20 As Richard Trainor argues, for local businessmen, civic involvement “provided a way to confirm and justify their respected places in local society”.21

18 L. Polley, The Other Middlesbrough: A study of three nineteenth century suburbs (Middlesbrough, 1993), p. 43
19 The ironmaster Hugh Bell and chemical manufacturer Samuel Sadler.
20 Briggs, ‘Middlesbrough’, p. 16; Lillie, The History of Middlesbrough, p. 339; This demonstrates Doyle’s suggestion that by the start of the twentieth century, urban politics was shaped by “consumption, diversity and democracy”. Doyle also argues that the growing influence of shopkeepers “reflected their increasing social, economic and political relevance in an urban sphere shaped by consumption, modernity and spatial change” – B. Doyle, ‘Rehabilitating the Retailer: Shopkeepers in urban government, 1900-
The celebration of the town’s jubilee in 1881 (a year late) was “designed primarily as a public relations exercise”, and it was hoped that it would renew interest in the area and its industries and allow Middlesbrough’s unique history to be recounted in the press. The town was held up as “a model of public and private prosperity, and as stable a fabric of social happiness and national grandeur, as the world has ever seen”. Reid, like many others, applauded the town’s founders, and suggested that there existed a harmonious relationship with the people of the town in spite of the difficulties the workers were experiencing; the town’s history afforded “a striking example of the associative principle”. The “thought and capital of one man, or a few men, led to the establishment of a blast-furnace; but thought and capital... were not sufficient in themselves: skilled labour was required to turn them to productive account”. Despite the celebrations and the accompanying confident, idealistic rhetoric, three years later the town was still to recover from the latest trade depression. However, one Alderman noted that in the town’s brief history “they had passed through season[s] of great prosperity and the reverse” and with “perseverance, and industry, and courage hoped that they might yet weather the storm”.

23 Reid, Middlesbrough and its Jubilee, pp. 5-7
24 Alderman Matthew George Collingwood in Cleveland News, Ayton, Broughton, Bilsdale, Hutton and Swainby Record, Yarm and Stokesley Advertiser (hereafter Cleveland News), 17th May 1884
b. Early Forms of Leisure

In Middlesbrough, an individual’s access to leisure was very much determined by their class and the amount of free time at their disposal. The nature of heavy industry often meant working 24 hour-long shifts, and it was suggested in 1865 that employers should “grant time to the working men to read the books and enjoy the parks”. A letter to the Middlesbrough Exchange in 1869 pointed out that workmen were unable to “enjoy the physical and religious benefits of the Sabbath”.\(^{25}\) Furthermore, the Middlesbrough Temperance Society argued that the “intellectual, moral and religious elevation of the people has not been in proportion to the material progress of the town”.\(^{26}\) Exclusive members-only organisations were formed such as the Cleveland Club (established in 1868). With annual subscriptions of more than £10, the use of its rooms was confined to “a society of gentlemen connected with each other by a common bond of professional acquaintance”. Similarly the Erimus Club (founded in 1873) was “chiefly intended for gentlemen connected with the iron and coal trades”, with annual subscriptions of five guineas. In comparison, the ironmaster Henry Bolckow opened a working-men’s club in 1873 which had a quarterly subscription of 2s and offered opportunities for “rational and civilising pleasures”.\(^{27}\) Parks offered some of the first opportunities for the workers to partake in recreation. Though a small park had already

\(^{26}\) Quoted in M. Huggins, ‘Leisure and Sport in Middlesbrough, 1840-1914’, in Pollard (ed.), Middlesbrough: Town and Community, p. 130

\(^{27}\) Cleveland Club Rules and Regulations, U/CLB 1/1, Teesside Archives; Briggs, ‘Middlesbrough’, p. 15; Kelly’s Directory of Middlesbrough, 1885 (London, 1885), p. 133; ‘Erimus’, latin for ‘We shall be’, is Middlesbrough’s motto.
been laid out in between two railways lines at the docks, in 1859 the *Middlesbrough Weekly News & Cleveland Advertiser* stated that,

The want is felt by all classes in the town [for a park]. No place is so badly provided for in the recreative department as ours. Sickly-looking youth and pallid manhood would receive a boon indeed by the establishment of some recreative institution or the enclosure of some ground where cramped limbs might be exercised, and the mind be dragged from the everlasting monotony around us.

When Bolckow announced his intention to buy land for a park in 1864, the same newspaper thought that “of all [the] gifts that could have been imagined this will confer the greatest happiness on the greatest number of inhabitants”. At the opening of Albert Park in 1868, the Archbishop of York stated that he hoped it would be “a place of innocent and healthful recreation” that would “diminish intemperance”. The park included a croquet land, bowling green, a maze, cricket, exhibition and archery grounds, providing space “for out-door recreation of all kinds”, whilst drinking, swearing and brawling were prohibited.

It had been noted as early as 1863 that there was a keen interest in sport in Middlesbrough. Landor Praed remarked that “on the day of a [horse] race, a crowd of workmen may be found in the market-place, marking up their betting-books, just as they congregate in the Haymarket or in St. Bride’s passage in London”. Indeed it was reported that at a horse race at nearby High Leven, “a great amount of money depended

---

28 Jowsey Park was described by the *Darlington & Stockton Times* in 1856 as “delightful a retreat and pleasure ground as in this part of the country”, though in 1889 the *North-Eastern Weekly Gazette* suggested that it had been “a murky paradise” to juveniles – N. Moorsom, *The Story of Middlesbrough Dock in Greater Middlehaven* (Middlesbrough, 2006), p. 45
29 Quoted in N. Moorsom, *Middlesbrough’s Albert Park – History, heritage and restoration* (Barnsley, 2002), pp. 17-20
30 Quoted in Metcalf, ‘Albert Park’, p. 17
upon the result... the bulk of the money going from Middlesbrough”. However, the *Middlesbrough Weekly News & Cleveland Advertiser* suggested in 1859 that the working man ought to spend “a great deal of his spare time to enlighten and instruct the mind”, rather than on “the gratification of his purely animal nature”. Nevertheless, an attempt to introduce horse racing to Middlesbrough one Monday afternoon in 1875 proved popular. The five races had been “most anxiously looked for”, and the event attracted a “large concourse of people... the grand-stand and every available inch of vantage ground was taken up”. By the early 1880s the local press were reporting on a diverse number of sports, many of which were becoming increasingly associated with gambling. An editorial in the *North-Eastern Daily Gazette* argued that as long as the aristocracy partook in gambling, “so long will the working man claim the privilege of posting his shilling at Stockton [races]”. The *Northern Echo* argued that whilst it was perfectly acceptable “that the natives of different localities should be proud of the proficiency in a manly and healthy pursuit of the men they produce”, the practice of betting was leaving “its evil impress on every grade of society”. The newspaper concluded that this led “the moralist to look askance upon many pursuits [that are] otherwise innocent and hearty”.

c. The Growth of Organised Sport

It is against a backdrop of economic boom and bust, and within the town’s working class-dominated social structure that Middlesbrough’s sporting culture developed and opportunities to partake in leisure gradually increased. From the middle of the nineteenth century, forms of rational recreation were emerging to counter less respectable activities. The physical conditions of Middlesbrough were thought to breed intemperance and immorality, and the Middlesbrough Temperance Society was formed just four years after the town was established. However, efforts of temperance groups were met with little permanent success.\(^{37}\) In 1873 Middlesbrough was described as “godless, gambling, [and] tipsy”, alcohol remaining central to the culture of the town’s working class men, there being few alternate forms of leisure.\(^{38}\) Indeed Wray Vamplew points out that in the industrial city, drink “provided an escape from the monotony and regimentation of work and from the squalor of the urban environment”.\(^{39}\) Peter Bailey argues that drinking was “an activity often relished in itself”, and whilst working class leisure was recognised as necessary, “without moral vigilance its practice would threaten the priorities of work and social discipline”.\(^{40}\) Therefore, as Richard Holt states, sport was used as a means of creating a healthy and orderly workforce, often acting simultaneously as a form of social control, but it was also a source of “polite sociability between equals”, offering an opportunity for like-minded middle class gentlemen to socialise together, and this would certainly appear to be the case with many of

\[^{37}\] Huggins, ‘Leisure and Sport in Middlesbrough’, pp. 129-130
\[^{38}\] Huggins, ‘Fashionable Watering Place’, p. 59; Taylor, Policing the Victorian Town, p. 72; Andrew Davies suggests that drinking, gambling and sport were “the cornerstones of ‘traditional’ working-class culture” – A. Davies, Leisure, Gender and Poverty: Working-class culture in Salford and Manchester, 1900-1939 (Buckingham, 1992), p. 30
\[^{39}\] W. Vamplew, Pay Up and Play the Game: Professional sport in Britain, 1875-1914 (Cambridge, 1988), pp. 45-46
Middlesbrough’s clubs. From the 1860s, Britain experienced a sporting revolution, and in documenting the growth of commercialised leisure, Vamplew suggests that one of the reasons that the working classes were so accepting of new leisure opportunities was that these were not offered in opposition to their traditional activities, but instead were able to accommodate or tolerate drinking and gambling. A number of factors have been identified (rising incomes, increased spending power and free time, transport improvements, urbanisation, the growth of the middle class and entrepreneurs) that together laid the foundations for the growth of commercial spectator sport, all of which we can see at play in the development of sport in Middlesbrough. Holt has noted that the sports that emerged in Victorian Britain were particularly suited to the city as they required only limited time and space, and both factors become increasingly important to the growth of Middlesbrough’s sporting culture. Meanwhile Mike Huggins’ statement that sport came to personify excitement, social prestige and modernity can also be demonstrated here. Conversely, because Middlesbrough was a young, immigrant town it did not possess indigenous working class sports or pastimes, though those new arrivals to the town may have brought their own sporting traditions with them. The town did not possess an aristocracy or upper class, and did not have any established amateur tradition to contend with before professional, commercial sport could come to the fore. However, it might be argued that some members of Middlesbrough’s elite embraced, albeit later than elsewhere, amateur sport and its ethos, as a counter to the pastimes of the town’s unruly working class.

42 Holt, Sport and the British, pp. 148-151; Vamplew, Pay Up and Play the Game, p. 70
43 Holt, Sport and the British, p. 74; M. Huggins, The Victorians and Sport (London, 2004), pp. 14-17; Vamplew, Pay Up and Play the Game, p. 73
44 This point is made about the town in general by Yasumoto who states that the town was “inadequately provided with fixed or disposable old endowments and legacies, whether spiritual, physical of institutional, from the past”, and thus people had to fill that vacuum themselves – Yasumoto, The Rise of a Victorian Ironopolis, p. 107
A number of competitive sports developed in Middlesbrough, some attracting considerable crowds, such as cricket, football and rowing. Whilst cycling and rowing drew large numbers of spectators for professional contests, most sports adhered to the tenets of amateurism, and there were few opportunities for members of the working class to participate. Cricket was well established in Middlesbrough by the mid 1870s, the first team having been founded more than thirty years earlier by the Mechanics’ Institute.45 In 1875 Middlesbrough Cricket Club (established in the mid-1850s) were able to open a new ground at a cost of around £1,000, evidently with some commercial interests and profits in mind; it included a “grand pavilion... which, having an open front, can be used either as a grandstand or a dancing saloon”. There was also a high wall “so that they who wish to see a good game will be compelled to pay for the privilege”, whilst one side of the ground was to be fitted with seats to allow ladies to watch in comfort.46 Many of the club officials were members of the town’s elite, and the presence of two ironmasters contradicts the notion of elite withdrawal (though it is unclear how much actual input such officials had in the club) –

45 The Mechanics’ Institute Cricket Club had were three levels of membership with subscription of 2s, 1s 6d and 1s for the season. The first rules of the club stated that “all improper language and the use of intoxicating drinks be strictly prohibited”, whilst “no matches shall be allowed to be made for money” – Middlesbrough Mechanic Institute, Rules for Cricket Club 1849, U/MI/6, Teesside Archives

\(^{47}\) 1871 and 1881 census; *Daily Gazette*, 12\(^{\text{th}}\) March 1875; *Northern Echo*, 8\(^{\text{th}}\) March 1877
Such was the standing of the game in the town that a match against a Middlesbrough and District Eighteen was included in a tour by an Australian Eleven in 1880. The popularity of the sport for spectators was evidenced as the match was well attended on all four days and the Australians visited the town again two years later, completing a victory over Yorkshire in front of a crowd of around 3,000. The Weekly Exchange noted that, “Middlesbrough itself turned out almost to a man to witness the tournament, and during the afternoon the streets have worn an almost deserted appearance”.

In the early 1880s cricket was the preserve of the middle classes in Middlesbrough. In 1881 the president and captain of the cricket club was a solicitor and coroner who was said to have “assisted the club both with his time and purse”. The deputy captain and one of the secretaries were accountants, the treasurer was a banker, and committee members included two clerks, and an iron and lumber merchant. In contrast, the club’s professionals during this period were a cricket outfitter, an ironworks labourer and a joiner. That these players had other jobs suggests that the money they were paid from playing cricket only supplemented their regular income, but also indicates that the players were able to spare the time away from work. It is safe to assume that for many working men, it would have been almost impossible to take the necessary time off from work to play cricket, it was after all (in theory) a game “played solely for its own sake, and of which honour is the only prize”. The following account of a cricket match in 1882 between Constable Burton in the Yorkshire Dales (more than 30 miles away) and Middlesbrough, demonstrates the relaxed attitude of those playing as well as the amount of time spent away from the town.

48 Northern Echo, 8th July 1880; Weekly Exchange, 22nd July 1882
49 North-Eastern Daily Gazette, 2nd November 1881
50 Anon, ‘Cricket’, Quarterly Review 158 (1884), p. 467
Starting by the first train (6.30) the party arrived safely at their journey’s end... having beguiled the time, some with the usual packet of books, provided on all such occasions, and the morning papers. After strolling leisurely down from the station, admiring the scenery, passing through the little village of Constable Burton... they arrived at Burton Hall... where breakfast was waiting for them... The party wandered through the woods and gardens and green and hot houses, admiring the fruits and flowers, till the time fixed for starting, when a march was made to the scene of action about 10.30...51

In comparison, Ironopolis Cricket Club (founded in 1880) was based in Eston next to the ironworks. It was noted in the press that “some of its most promising bats have not been able to devote that time to its interests which they would have desired”, presumably due to a lack of leisure time. However, details of their matches show that this club was also able to employ the same professional as Middlesbrough.52

The number of cricket matches reported in the local press increased as the game maintained its popularity; as the Daily Exchange stated, there was “scarcely a club which does not possess a strip of perfectly level sward where wickets can be pitched”.53 Aside from the bigger, more important games of the day, the reporting of many cricket matches consisted solely of a final score, and it is difficult therefore to accurately identify the origins of many clubs or teams, or the backgrounds of players. The names of most clubs suggest their origins are to be found in location, though the names of some clubs suggest roots in the church or the workplace. For example, of the 37 cricket matches reported in the North-Eastern Daily Gazette on 23rd June 1884, only nine team names suggest origins in a place of worship, and only four team names place the club

51 Weekly Exchange, 19th August 1882

53 Daily Exchange, 15th June 1882
definitively within the workplace. Nevertheless a game between the foremen of two steelworks was described as “the cricket match of the season”, there being a crowd of nearly 1,000 present. The match was evidently taken very seriously, it being reported that both teams had been in training for three weeks, with the result that “the Middlesbrough men had no chance whatever with the heroes of the Steelworks”. In contrast the North-Eastern Daily Gazette reported on the “annual match amongst the youths who are home from school on their holidays”, where the teams were captained by a solicitor and an ironmaster, and two years later a game between a team of clowns from a visiting circus and members of the Royal Antedeluvian Order of Buffaloes was reported on. Drawing a large crowd of 2,000, “the fielding of the clowns attracted considerable attention, inasmuch as they turned somersaults, and performed various other feats of the ring during the course of play”.

Though a relatively new game to Middlesbrough in comparison to cricket, football was already beginning to establish itself in the early 1880s as one of the more popular spectator sports in the town and quickly “got its hold of the people”. The number of football clubs on Teesside increased from nine in 1877-78 to 35 by 1880-81, and the

58 Sports Gazette, 2nd November 1912
number of spectators watching the town’s principal team, Middlesbrough Football Club (founded in 1876), grew so much that the club was forced to move its games from a local park to the grounds of the cricket club on Linthorpe Road. It was felt that football “brought out the best points in a young man’s character, especially when he was associated with young men of his own class”. Football offered “the means of employing leisure time profitably and pleasantly, keeping young men from bad associations”, therefore making it an ideal game for the men of Middlesbrough. Whilst the origins of the sport and a number of clubs owed their existence to alumni of public schools, it soon became apparent that football “belonged to the people not to any public school”. That the sport rapidly attracted large numbers of spectators, was at odds with the game’s original amateur principles. As Holt points out, spectatorism was regarded as “no more than mindless fanaticism, obstinate and arbitrary partisanship devoid of sense, morality or self-restraint”. Those members of the middle classes that favoured the game were of the opinion that football could improve character, that it gave the working classes a valid pastime and could also help to bring different classes together. Though the Northern Athlete suggested that football in Middlesbrough was cross-class, as it brought together men “of every grade, from the prosperous iron master to the humblest riveter”, in the early 1880s the administration of Middlesbrough FC was in the hands of the middle class –

65 North-Eastern Daily Gazette, 13th September 1881
Increases in both local interest and in the standards of the game can be gauged in the local press, which devoted an increasing number of column inches to the sport and reported it in ever greater detail.66 An estimated 2,500 spectators watched the Sheffield Association Challenge Cup tie between Middlesbrough and nearby Redcar in October 1880.67 In 1881 the Cleveland Football Association was formed68 with a cup competition beginning a year later, and Middlesbrough went on to beat Redcar in the first five finals, and the resulting rivalry between the two clubs helped to generate interest in the sport. In 1882, the final attracted 1,000 spectators including various Middlesbrough dignitaries and industrialists. Ending in a draw, it was said to be “the most scientific display of football which has ever been seen in the district”.69 After Middlesbrough won the replay, the Weekly Exchange reported on the growing interest in the game,

During the past week the final tie has been an absorbing topic of conversation in the iron town and adjacent villages, and partizan [sic] feeling ran very high. Every scrap of news relative to the training and composition of the respective teams was eagerly seized upon and discussed... To attempt to describe the play is well-nigh impossible, the intensest [sic] spirit of rivalry affecting both players and spectators alike, and the match will long be remembered and fought peacefully in words over and over again.70

66 Huggins argues that there existed a symbiotic relationship between sport and the press. The press provided “a stimulus to the growth and popularity of many sports, and supplied a flow of sporting statistics and records of achievement” as well as publicising when and where events took place – Huggins, The Victorians and Sport, pp. 141-142
67 Middlesbrough Daily Exchange, 18th October 1880; Northern Echo, 18th October 1880
70 Weekly Exchange, 8th April 1882
In 1884 the final was played at Redcar and attracted between 3,000 and 5,000 spectators. After Middlesbrough’s victory the club’s president remarked that, “every member who took part in the competition and won those extraordinary series of matches, would wear these [winning] medals on his manly bosom, remembering the part he had to take and the manly fellows he had to beat in order to win”.  

In 1884 the club were growing so rapidly as to necessitate the construction of a new grandstand at their Linthorpe Road ground. The Cleveland News commended the club on the newly built stand as it would satisfy “a much-felt want, and will no doubt tend to the further patronage of a pastime that is becoming ever more and more in favour”. However, the cost resulted in so much debt that the club debated withdrawing from the Sheffield Association Cup as they could not afford the travel expenses to the semi-final. The popularity of the sport was demonstrated in an editorial in the Daily Exchange which expressed dismay at the decision to withdraw. It was suggested that a victory in the cup would be valued by spectators and that the public would “readily contribute to free the club from the responsibility of incurring further debt, in order that they might have a fair chance of bringing to Middlesbrough the high honour which a cup victory would gain”. This statement proved correct as the prospect of withdrawal prompted donations “from the humble but useful sixpence to a sovereign”, but the club “told them to keep their money, the offers of which had afforded much gratification as proving the hold of the club on a kind but critical public”, and proceeded in the competition.

78 1881 census; *North-Eastern Daily Gazette*, 25\(^{th}\) September 1883; South Bank FC were formed in 1868 – B. Hunt, *Northern Goalfields Revisited: The millennium history of the Northern League, 1889-2000* (Shildon, 2000), p. 456
Like the roots of both cricket and football in Middlesbrough, those of Middlesbrough Rovers Rugby Club would also appear to be middle class. The club’s president was a doctor, whilst the club’s captain from 1881-1884 was a solicitor. However, whilst football flourished, rugby’s popularity declined as clubs struggled to attract spectators. In 1878 there had been three rugby clubs and two football clubs in Middlesbrough, but by 1884 there were four rugby clubs and 45 football clubs. In 1882 the principal rugby teams in the town, Middlesbrough Rovers and Tees Wanderers, met in front of “a good attendance” despite the game taking place at the same time as a home game for Middlesbrough FC against Redcar. Reports of fixtures for both Rovers and Wanderers continued to be reported in the press, albeit with rugby referred to as “the old-fashioned game”, a notion that no doubt contributed to the game’s decline. Whilst Middlesbrough Rovers were watched by a sizeable crowd of 1,000 for a Yorkshire County Challenge Cup tie in 1884, a month later Middlesbrough Football Club had a much bigger crowd of between 3,000 and 5,000 for the Cleveland Cup final.

The reasons for rugby’s comparative lack of support are unclear. The Cleveland News covered the difficulties of Middlesbrough Rovers with some interest in 1884. The newspaper wondered whether the reason that no new clubs were being formed was because of “the difficulty experienced by beginners understanding the very many points

82 Weekly Exchange, 25th November 1882
83 Cleveland News, 15th March 1884; Introduced in 1877, the Yorkshire Challenge Cup was popular with spectators, and Tony Collins points out that the competition brought with it “new players, new spectators and new playing methods”. Furthermore Collins argues that, “the Yorkshire Cup now meant that football and civic honour were now tightly bound together” – T. Collins, Rugby’s Great Split: Class, culture and the origins of rugby league football (Abingdon, 2006), pp. 20-22
required to be known by a player under this code”. Rugby was thought to be “uninteresting to a spectator who imagines it to consist chiefly of scrimmages and running with the ball”. Though the club “had its interests well and substantially looked after by a gentleman who is a staunch supporter of out-door sport”, Rovers struggled to find a ground on which to play. The *Cleveland News* surmised that should the club succeed in obtaining one, “no doubt the Rugby game will be clearer exemplified and become much more popular”. It was also reported that Rovers were “going on a different tack to what they have hitherto done, and are opening their club out more for new members”. It was noted that though expenses had been steep, “these have been cheerfully borne by the players, and the public of Middlesbrough have never yet been asked in any way to help it pecuniarily”. It is safe to assume that despite this ‘opening out’ of the club, the playing membership was still largely middle class; team members in the early 1880s included four clerks, a solicitor, a mechanical engineer and a gas manager’s assistant.

After a deal with the cricket club to use their field fell through, Rovers were left without a ground, and the *Cleveland News* stated that “much sympathy is felt for the rejected club and their supporters”. The newspaper evidently regarded the game particularly favourably, often devoting more column inches to rugby than to football. In October 1884 there appeared a report of Rovers’ home game against Northern of Newcastle-upon-Tyne. Though there were only 200 to 300 supporters present this was thought to be “a sign that the ‘carrying game’ is becoming more popular in the town”.

The *Cleveland News* was pleased to note that “the play was void of all roughness, and

the two teams seemed to leave the field as sound in body and limb as they entered it, which is something to mark in favour of the Rugby rules”.  

As was the case with cricket, football and rugby, both in England generally and in Middlesbrough in particular, amateur rowing was dominated by the local elite, though the sport did co-exist alongside popular professional competitions. In England, a large number of amateur rowing clubs were formed and regattas organised, from the middle of the nineteenth century. Dominated by members of the middle class, clubs emphasised good behaviour and high standards, and were often socially exclusive. Eric Halladay notes that clubs needed to maintain relationships with potentially generous local elites (as is demonstrated in the case of Middlesbrough below) as well as with the wider community. Halladay suggests that rowing clubs were able to demonstrate to the local populace that their sport could add “something to the pleasure and quality of life”. Regattas were the only public demonstrations of the merits of the sport, which at the same time offered respectable entertainment, which Middlesbrough still lacked. Indeed in 1878 the Daily Gazette hoped that occasional rowing events would be held in Middlesbrough “giving the public something wherewith to be entertained”.

The Middlesbrough Amateur Boating Club was formed in 1866 with a naval architect as president. A boat house was erected at a cost of £86, and a trainer was appointed from April to October for 30s a week. Membership was exclusive with annual subscriptions, entrance fees and the mandatory purchase of expensive club uniforms,

91 1871 and 1881 census; *Daily Gazette*, 2nd March 1875
The first Tees Amateur Regatta was held in August 1874, established “under the auspices of the nobility and gentry of the district, and heartily nurtured by gentlemen well known as ardent supporters of aquatic amusements”. Advance tickets for the enclosure were priced at 1s (or 1s 6d on the day), and the banks of the river were “crowded with spectators”. The fees for entering the seven events ranged from 7s 6d for the canoe steeplechase (“one mile over land and water”) to £2 2s for the Tees (“for gentleman amateurs”) and Ironmasters cups.\(^92\) The *Northern Echo* pointed out that the regatta was only open to amateurs, races by “ships’ boats, fishing cobles and other craft... were conspicuous by their absence”, and suggested that in the future such races should be included “as a means of varying the sport”, as races would have been opened out to working men.\(^93\)

The costs involved in participating in rowing kept membership numbers low\(^94\), and it was felt by some that the sport was not as popular as it ought to be. In 1875 one member stated that he was disappointed that a town the size of Middlesbrough devoted only one day a year to rowing. He thought “it was a standing disgrace” that these proponents of muscular Christianity “could not give one half day to a regatta”.\(^95\) In 1877 the club’s secretary stated that he had found it difficult to get subscriptions from ironmasters “who were always ready to give in prosperous times”, and a year later the *Daily Gazette* suggested that given the depression in trade, it would not have been surprising if the club had “gone the way of many men and some institutions of this once thriving

\(^92\) *Daily Gazette*, 10\(^\text{th}\), 12\(^\text{th}\) August 1874; *Northern Echo*, 8\(^\text{th}\) August 1874; The event was organised by Middlesbrough Amateur Boating Club, Tees Amateur Boating Club (Stockton) and Stockton Amateur Rowing Club, and Tyne Amateur Rowing Club also competed in some of the races.

\(^93\) *Northern Echo*, 12\(^\text{th}\) August 1874; The London Rowing Club also differentiated between “gentlemen amateurs” and “tradesmen” amateurs, and stipulated that the “barriers between them were not broken down” – Huggins, *The Victorians and Sport*, p. 56

\(^94\) In 1876 the club had 87 members – *Daily Gazette*, 14\(^\text{th}\) March 1876

\(^95\) *Daily Gazette*, 27\(^\text{th}\) April 1875
borough”, and folded. The newspaper hoped that the club would continue as “the sports of the district are none too numerous”. At the annual meeting of the club in 1883, there were only 50 ordinary members, whilst at the regatta a year later there were complaints about the organisation of the event. The races had not finished until 8 o’clock and the Cleveland News complained that no band had been provided “to wile away the tedious hours”, so that “spectators gradually thinned off, and very few were left to witness the final contests”.

“Following the example of other districts”, the Middlesbrough Bicycle Club was formed in 1877 and had 20 members within a few weeks. As was the case with the other clubs already identified, this club also benefitted from the patronage of members of Middlesbrough’s elite. The first president was John Gjers (a Swedish ironmaster) followed later by Sadler and Dixon (though it was reported that the latter “did not ride”), and the club’s officials included two further ironmasters and other individuals with middle class occupations. Four of the officials lived in the suburban and affluent Southfield Villas, giving a further indication of the exclusivity of the club –

\textsuperscript{99} 1881 census; \textit{Daily Gazette}, 23\textsuperscript{rd} April 1877

82
By 1881 the club had 80 members, and its own premises with smoking and reading rooms, and a billiard table that acted as a means of “keeping them together in the winter months”\(^{100}\). Cycling’s increasing popularity was evidenced at the fourth north-eastern bicycle meet held in Middlesbrough in 1882. More than 260 cyclists from 23 clubs across the region cycled through the town, ending at Gunnergate Hall in Marton to be met by Raylton Dixon, who proclaimed that the procession “had given the people of Middlesbrough satisfaction and much gratification”\(^{101}\).

Despite the assertion of the president of the National Cyclists’ Union that cycling “opened out a new and very enjoyable form of recreation to a class of the community whose means of enjoyment are by no means too numerous”, it required time to partake in events such as that described above, and money, and the poorest residents of the town were inevitably excluded\(^{102}\). Advertisements from 1883 and 1884 in the *North-Eastern Daily Gazette* for second-hand bicycles show a range in prices. For example, one bicycle which had been “scarcely ridden” was for sale for £13, whilst another was advertised for £10 10s and other second-hand bicycles ranged from £2 10s to £4 10s\(^{103}\).

An advert for R. W. Huggins & Co stated that the company had “genuine bargains at extremely low prices”, and prices ranged from £2 15s to £11. Another advert for Young’s Bicycle Repository included boy’s bicycles for £2 15s, and adult bicycles from £3 10s to £11 10s\(^{104}\).

\(^{103}\) *North-Eastern Daily Gazette*, 26\(^{th}\) January, 26\(^{th}\) April, 13\(^{th}\) October 1883, 10\(^{th}\) March, 17\(^{th}\) April 1884
\(^{104}\) *North-Eastern Daily Gazette*, 10\(^{th}\) June, 2\(^{nd}\) September 1884
There was little public provision of leisure at this time, though the public swimming baths were opened in October 1884. The *North-Eastern Daily Gazette* thought this facility was long overdue, suggesting that the baths would be of benefit to working men,

```
The nature of the work in which the great majority of the inhabitants are engaged, the absence of a safe and suitable place for bathing in the river, and the frequent occurrence of persons being drowned whilst bathing from dangerous spots on the bank, are circumstances that point plainly enough to the necessity of providing Public Baths.  
```

The baths also involved elements of exclusivity and exclusion. One Alderman proposed that in order that the baths “be made as popular as possible”, on one day a week only 1d should be charged. He hoped that the baths would “not be kept for the exclusive use of the ‘upper ten’”. It was decided that 1d would be charged on Saturdays, whilst 6d was charged on the day the pool was filled with fresh water, 4d on the following day and 3d for the remaining days. On the second Saturday that the baths were open it was reported that 1,500 people visited. An amateur swimming club was formed in September 1884 (a month before the baths opened) with a civil engineer and secretary of the North Riding Infirmary appointed secretary. The club proposed to have exclusive use of the baths for one afternoon and one evening per week. The *Daily Exchange* published a letter from ‘SWMR’ who complained that the club were asking too much. The writer claimed that “in time we shall find a large majority coming to the public baths after a day’s work and seeing a placard with the word ‘Private’”, and hoped that the Sanitary Committee would “think before they will cripple the opportunities for bathing of the working and schooling population”.

d. Professional Sport

Professional rowing had long been a popular spectator sport, particularly on the Tyne and Thames, and in the mid-nineteenth century it provided a means of satisfying “the needs of many for some form of excitement and entertainment”, as well as supplying some of the first popular sporting heroes. Indeed it is suggested that in the mid-nineteenth century professional rowing contests were taking over the sport; matches that had initially been promoted by amateurs became dominated by professionals.\(^{109}\) Though by the 1880s the heyday of professional rowing was all but over,\(^ {110}\) contests took place on the Tees attracting large numbers of spectators. In early 1875 two races were held between a local rower and a competitor from Sunderland for £25 and £20. At the first race a steamboat was “literally crammed with spectators” and thousands lined the river for both races. A similar race took place later that year, which again “excited great interest”.\(^ {111}\) In 1880, the *South Durham & Cleveland Mercury* reported on a “boat handicap” which had been organised by the former professional English champion Robert Boyd “for the purpose of encouraging rowing on the Tees”. 58 competitors were watched by 250 spectators on a specially chartered steamboat, as well as thousands along the course.\(^ {112}\)

Two years later Boyd raced against the Australian champion Elias Laycock on the Tees and this contest attracted a huge amount of local interest, providing an opportunity to explore notions of local identity and expressions of civic pride. This is particularly important to note as Boyd, like much of the town’s population, was not from

\(^{110}\) Halladay, *Rowing in England*, pp. 24-26
\(^{111}\) *Daily Gazette*, 22\(^{nd}\) February, 8\(^{th}\) March, 21\(^{st}\) June 1875
\(^{112}\) *South Durham & Cleveland Mercury*, 18\(^{th}\) September 1880
Middlesbrough (having been born in Gateshead) but still ‘belonged’ to the town. Boyd was praised in the local press for insisting that the race take place in Middlesbrough rather than on the more popular Thames or Tyne courses; the *Daily Exchange* stated that “some natural jealousy has been evinced by the Tyneside people”, whilst the *North-Eastern Daily Gazette* regarded the race as the start of “a new chapter in the history of the Tees”, with the result that the town’s name “will be once more prominently brought to the front”. The editor of the *Daily Exchange* wrote that,

> The boat race to be rowed today has its intrinsic interest, but to dwellers on the banks of the Tees there is associated with that the feeling that a Teessider is one of the competitors, and that this is the first occasion on which the Tees has been honoured with, what may almost be deemed, a champion course upon its waters... It would be hypocrisy also on our part did we not own up to the hope that our townsman may carry off the honours...  

Local newspapers did not try to hide their bias for Boyd, “our own local celebrity”, in the almost daily reporting on race preparations. In contrast, the *Newcastle Courant* thought it strange that Boyd, a ‘Tynesider’, had proposed that the race be held on the Tees, and that because of the choice of river the match was “singularly deficient in interest so far as betting was concerned”.

The crowd at the race was estimated at 80,000-100,000, and included those who “would not be seen on a race course, and who certainly take no interest in [sport] as a trade or profession”. The *Newcastle Courant* conceded that there was “a more extraordinary and numerous congregation of sightseers” than had ever been seen for a

114 *Daily Exchange*, 6th May 1882. Examples of reporting on Boyd’s physical preparations, including racing and meals – *North-Eastern Daily Gazette*, 13th, 18th, 19th, 22nd, 23rd May, 23rd June 1882
115 *Newcastle Courant*, 7th July 1882. Only two years earlier the *Newcastle Daily Journal* had stated that Boyd was a product of “Tyneside’s spirit of boat rowing which is inbred with the people” – quoted in Wigglesworth, *A Social History of English Rowing*, p. 77
race on the Tyne. Special trains were arranged from as far away as London and Edinburgh, many local works were suspended and the town became “lively and gay with holiday folk”. One dockyard charged 3d to watch the race from their premises, or 6d from a stationary steamer (with proceedings being donated to charity), whilst another boat charged £1. *The Times* reported that “daring and eager spectators” utilised “ships’ masts, the tops of blast furnaces, and the roofs of works” to view the race.116

Unfortunately for the Tees, Laycock won the race by a considerable margin, and took the prize money of £200. Nevertheless it was felt that Boyd had “successfully brought the Tees to the front... and has advertised it all over the world as a suitable arena for aquatic contests”.117

Like rowing, amateur recreational cycling coexisted alongside prize-giving competitions. In 1880 a six-day contest for both amateurs and professionals was organised by George Waller, a professional cyclist. It took place on a specially built platform with a first prize of £50 and a gold medal for professionals, the winner being the cyclist who covered the greatest distance in 12 hours. The event “attracted a number of first-class bicyclists” and a large crowd including 6,000 spectators on the penultimate day. Prizes were also handed out for the amateur contest – a ten guinea clock, a tea service, and a case of knives and forks.118 Waller organised a similar event the following year, and was praised for having “done so much to encourage this which is undoubtedly the most enjoyable and fascinating sport ever taken up by the young generation”. The *North-Eastern Daily Gazette* reported that there were large numbers of

116 *Daily Exchange*, 3rd July, 4th July 1882; *Newcastle Courant*, 7th July 1882; *Northern Echo*, 3rd July 1882; *The Times*, 4th July 1882
117 *Daily Exchange*, 4th July 1882
118 *Northern Echo*, 28th September, 2nd, 4th October 1880
spectators, and proclaimed that there “may occasionally be heard some exclamation expressive at once of surprise and alarm” from the crowds as the cyclists raced around the track.\textsuperscript{119} Again, prizes were handed out to both professionals and amateurs. The amateur winners received a salad bowl, a biscuit box and a cruet stand, whilst the professional cyclists received a gold watch and £3, a gold medal and £3 and a silver medal and £2.\textsuperscript{120} With races drawing increasingly large crowds, the \textit{North-Eastern Weekly Gazette} felt able to proclaim that “there are few places in England where bicycling as a sport is so highly popular as at Middlesbrough”.\textsuperscript{121}

e. \textbf{Amateur Sports Days}

The amateur sports days held by a variety of clubs appear to have been hugely popular, offering a rare day of entertainment for many men and women. These events often attracted many competitors from Middlesbrough and further afield who were able to win prizes, and were described at length in the local press. In 1875 the \textit{Daily Gazette} reported that sports were included at three separate galas as part of the Whitsuntide festivities, which “afforded [an] opportunity of recreation for the masses” and included foot races, quoits and gathering stones.\textsuperscript{122} Middlesbrough Cricket Club first held an amateur sports day in 1878, and spectators included members of the town’s establishment. The event included hurdle, flat, walking and bicycle races, long jump and throwing a ball at a wicket, all for prizes ranging in value from £1 1s to £7 7s.\textsuperscript{123} At the club’s event two years later, it was reported that not only were there “numerous ladies” in the pavilion, but that “all points of vantage were crowded with spectators”.

\begin{itemize}
\item \textsuperscript{119} North-Eastern Daily Gazette, 19\textsuperscript{th}, 21\textsuperscript{st} September 1881
\item \textsuperscript{120} North-Eastern Daily Gazette, 19\textsuperscript{th} September 1881
\item \textsuperscript{121} North-Eastern Weekly Gazette, 13\textsuperscript{th} October 1883
\item \textsuperscript{122} Daily Gazette, 18\textsuperscript{th} May 1875
\item \textsuperscript{123} Daily Gazette, 19\textsuperscript{th} August 1878
\end{itemize}
and the races were judged by three ironmasters.\textsuperscript{124} Similarly in 1881, the sports day of Middlesbrough Bicycle Club on the cricket field saw the pavilion filled whilst one side of the field was also “uncomfortably crowded”.\textsuperscript{125} The cricket club’s two day event in 1882 attracted between 5,000 and 6,000 on the first day, and 4,000 on the second. As well as a number of bicycle, hurdle and flat races, it also included “shooting galleries, swings, round-abouts, booths, and stalls for the sale and barter of every conceivable commodity”, suggesting that the event was more than a sports day, offering a day of both leisure and entertainment for attendees. Indeed, boys from the workhouse and the industrial school were permitted to watch the cricket club’s event in 1884.\textsuperscript{126} However, such events could become too heavily influenced by the working classes. At an event in 1885, the obstacle race was viewed as “simply disgraceful”, as it left one competitor with the shirt torn off his back. Noting the range of people present, the \textit{Daily Exchange} pointed out that “the roughs quickly proved that it was more in their line than that of the occupants of the pavilion, by breaking ground so as to enjoy the performance a little closer”.\textsuperscript{127} Whilst one race was criticised when it became apparent that the object was to \textit{entertain} the spectators “without a due regard to the comparative merits of the competitors”, there were no such objections to the giving of prizes at these ‘amateur’ events. At the cricket club’s event in 1884 prizes varied from a marble clock for the winners of the 120 yards and quarter mile flat races, to £5 5s for the one mile flat race. There was also a ‘consolation race’ for those who had failed to win their own races, for which an egg stand was awarded for first place and a travelling bag for second.\textsuperscript{128}

Ironopolis Cricket Club’s first event was held in 1883 over two consecutive Saturdays.

\begin{flushright}

\end{flushright}
in April, and as well as the usual flat and bicycle races, included a sack race, a quoits handicap, a “half-hour go-as-you-please” and a metal carriers’ race\textsuperscript{129} with a prize of a pair of trousers for first place, and a ham for the runner up.\textsuperscript{130} Such days were regarded as just rewards for the hard work undertaken during the week. The editor of the \textit{Daily Exchange} remarked upon this and pointed out that sports days were attended by both workers and ironmasters,

Nowhere do people work harder than in that iron workshop, known throughout the world as Middlesbrough, and nowhere is there a stronger reason for such sports as we had on Saturday. It was a pleasant sight indeed to behold not only ‘the beauty and the chivalry’ of the capital of Cleveland, but the ironmasters, the ironworkers, and even the soft-handed quill-drivers of the counting-houses turn out for the afternoon to enjoy, with the proper manly feeling, such manly sports.\textsuperscript{131}

\textbf{f. Conclusion}

Though amateur sports days did enable the people of the town to come together, it is also clear that such inclusive events were rare. The town was referred to as a growing colony, populated by a “pleasure-loving” young population, and there was a recognition by some that a gap existed between those who were able to play sport at their leisure and those with no such opportunities. Editorials in the \textit{North-Eastern Daily Gazette} in 1881 pointed out that there was “a crowd of growing boys in our midst who are too poor to pay for their physical training”, and suggested that public facilities in the park would be invaluable to them. Such facilities would “draw poverty stricken and stunted children from their hovels”.\textsuperscript{132} In 1883 an announcement was made that a public gymnasium was to be built in Albert Park. This was met with no small amount of opposition from some

\textsuperscript{129} For which each competitor carried a pig of iron on their back.
\textsuperscript{130} \textit{North-Eastern Daily Gazette}, 30\textsuperscript{th} April 1883; \textit{Northern Echo}, 30\textsuperscript{th} April, 7\textsuperscript{th} May 1883; \textit{Weekly Exchange}, 12\textsuperscript{th} May 1883

councillors and from the *Daily Exchange* which suggested that the gymnasium acted as “such a focus for all the ‘roughs’ of the neighbourhood, that it greatly detracts from the rural simplicity which pervades nearly every other part of the park”\textsuperscript{133} In contrast, an editorial in the *North-Eastern Daily Gazette* stated that opponents to the gymnasium did not,

...really know what sort of humanity it is that hides its ill-shapen form down the courts and alleys... No cricket or football or aquatics for them. They have no money to pay for club fees, and if they had it would be all the same. The clubs would not have them.\textsuperscript{134}

There was however, a growing belief that the *right* types of sport were capable of refining the working classes, and that employers could use sport to reinforce the notion that they had the interests of the workers at heart. This idea was expressed by the *Cleveland News* in 1884,

> For some years past the love for manly out-door sports has been gradually growing in this district, as evidenced by the manner in which football or cricket matches are attended, and it is to the credit of the leading manufacturers and other wealthy gentlemen of the district that they have, by giving liberal prizes, done a good deal to elevate the character of athleticism, and to encourage young men to compete for supremacy in healthy exercises away from the influences of the gambling mania.\textsuperscript{135}

However, another underlying feature of editorials in the local press was the fear that sport also had the ability to accentuate the uncivilised nature of the workers, bringing to the fore those characteristics of sport that ran counter to the amateur ethos. This is particularly apparent in opinions on gambling. As the *Cleveland News* stated, “If football is to be made a matter of betting, and spiteful feeling, and nothing of the

\textsuperscript{133} Indeed a few months later a committee was set up to consider better ways of managing the gymnasium – Moorsom, *Middlesbrough’s Albert Park*, p. 109

chivalrous or heroic to enter into it, the game will scarcely take a hold on the public mind”.

The development of sport in Middlesbrough in the 1870s and early 1880s was heavily influenced by the class structure in the town. Middlesbrough’s small middle class dominated as sporting administrators and participants just as they did as employers and politicians. It is clear that there were an increasing number of opportunities for the town’s middle class to take part in sport, and to play and socialise together. This is in direct contrast to the decidedly limited options for participation for the poorer members of the town’s population. Given the money that was required to participate in many organised sports, and the cost associated with joining a club, it is not surprising that during the period examined here the only involvement available for most people was spectating. If the town was an infant sporting Hercules, it was one which did not favour the majority of its populace. It is evident that the role of money in sport was slowly increasing and that there was a growing audience for sporting events. The popularity of football amongst the working classes and the uneasy relationship with professionalism will be examined in the following chapter.

---

136 Cleveland News, 12th April 1884
Chapter 2. “A Noble Game Became Degraded”1: The rise and fall of professional football, 1885-1894

By the mid-1880s the popularity of football was increasing across England, and it had become the main spectator sport in Middlesbrough. Football attracted ever larger crowds but as professionalism took hold of many clubs across the country, those in charge of football in Middlesbrough hoped to stem the tide. This chapter acts as a case study of the early development of professional football. It will trace the progress of professionalism in the town, outlining the debates that took place in the local press both for and against the payment of players, will detail those involved in the town’s two principal clubs, Middlesbrough and Ironopolis, and examine the relationship between the two. Why and how did football become so popular with spectators? Why was a professional club formed and why did it fail?

By 1885 31 local associations across the country were affiliated to the Football Association, and by 1888 1,000 clubs were affiliated.2 The introduction of the FA Cup was important to the growth of football, with local associations imitating the knock-out competition with their own contests. Initially dominated by public school-based teams in London, by the early 1880s the competition was national in scope; the 1883-84 competition had 101 entrants. In 1883 the amateur team Old Etonians were beaten in the final by Blackburn Olympic (a team of working men), a result regarded as a major watershed in football’s history.3 One critic suggested in 1889 that “for better or for

---

1 Northern Echo, 4th May 1894  
3 Mason, Association Football, p. 33; Taylor, The Association Game, pp. 40-43
worse cups and cup ties are the life and soul of the Association game”, so much so that cups had “turned the game into more of a business than a sport”. Large attendances were now common place and with this came a need for teams to obtain the best players possible. Professionalism was legalised by the FA in 1885, providing “a clear and distinct line to define unpaid from paid”. Though money was becoming increasingly important to the game, at the beginning of the period “the pursuit of wealth did not characterise the game”; rather club directors and committees were willing to forego profits in exchange for results on the pitch. The Football League was formed three years later, providing a “reliable and permanent fixture list” to the 12 member clubs and producing more competitive football. The League was an immediate financial success, and the journalist James Catton stated that it had “galvanised the dry bones of club football into life”. Indeed the average attendance for each match in the Football League’s first season was 4,600. Crowds continued to increase and whilst the majority of spectators were working class, clubs recognised the need to cater for their wealthier supporters, building pavilions with more expensive reserved sections. How does football in Middlesbrough fit in with these changes to the game? How did the growing commercialism effect local football?

---

4 M. Shearman, Athletics and Football (London, 1889), pp. 360-362
5 A player was no longer an amateur if he received any remuneration above expenses; eligibility for cup games was dependent on residential or birth qualifications (players had to live within six miles of the club’s headquarters); changing clubs during the season was banned without permission from the FA; and involvement in the committees of clubs or associations by professionals was prohibited, A. Harvey, Football: The first hundred years, the untold story (Abingdon, 2005), pp. 216-217; Mason, Association Football, p. 74; Taylor, The Association Game, p. 50
a. The Growth of Middlesbrough FC

Whilst smaller clubs still thrived across Middlesbrough and Teesside (new clubs were “rapidly springing into notice and public favour” according to the Cleveland Association), they could not compete with the town’s foremost team. Middlesbrough Football Club could now frequently draw crowds in the thousands due to their ability to attract some of the better teams from England and Scotland to their ground. Expectations were growing and an increasing amount of importance was placed on winning. For example, ahead of Middlesbrough’s fourth round FA Cup tie against Old Etonians in January 1885, a letter to the Cleveland News urged the players to prepare properly to avoid defeat – “if the players leave off tobacco, reduce the liquor supply, take walking exercise in the evening, and follow the old maxim of ‘Early to bed etc’, this will go a long way towards winning the game”. Furthermore it was hoped that in order “to satisfy the desires of football supporters in the district”, “much more important engagements [would be] entered into than any which have hitherto been recorded on the Middlesbrough list of fixtures”. The club were financially secure, and with a balance in hand of over £45 in 1885 one committee member suggested that the club needed to “devise some method of spending their money”.

In the summer of 1886, Middlesbrough FC amalgamated with Middlesbrough St John’s FC, giving the club more footballers to choose from. By now Middlesbrough FC had 550 members, and with 31 fixtures arranged for the coming season, were in an “exceptionally good” financial position. So much so that the committee could afford,

12 Cleveland News, 22nd August 1885; North-Eastern Daily Gazette, 15th May 1885
and in recognising that the players were assets to the club felt it necessary, to take out insurance on the team.\textsuperscript{13} That the club could boast of such economic comforts, did not reflect the situation in the rest of the town with fluctuations in trade meaning that at times no new work was being taken on at the collieries, iron or steelworks.\textsuperscript{14} Nevertheless, at the start of the season, crowds of 3,000 still attended the first and second round FA Cup ties at the Linthorpe Road ground.\textsuperscript{15} Fixtures had been arranged with many of Britain’s foremost clubs, leading the \textit{Northern Review} to congratulate the committee “on the wise disposal of their funds”. However, by the end of the season the club had suffered a record number of defeats, and the \textit{Northern Review} now claimed that the actions of the committee were “often distinguished rather for caprice than judgement, and more for novelty than consistency”.\textsuperscript{16} At Middlesbrough’s AGM in 1887, the secretary conceded that the club’s record was poor in comparison to previous seasons, but pointed out that,

the committee had endeavoured to cater for the large body of the members by bringing, at a very large expense, some of the leading clubs of Lancashire and Scotland... he trusted [that] members would consider the high class clubs the team had met, and how in some cases they had upheld the prestige of the district by making results worthy of the foremost clubs.\textsuperscript{17}

The committee could justifiably feel that the season had been a success in other areas. Membership had increased to 750\textsuperscript{18} and subscriptions had also increased by 50% on the

\end{footnotesize}
previous year. The football ground had been improved which was “a great boon to the spectators, and had fully recompensed the club for the outlay”. Match receipts totalled more than £457, and despite expenditure of around £600, the club still had a balance of more than £77.\textsuperscript{19} In comparison, in 1883 Aston Villa’s receipts amounted to over £1,720, and in 1885 Bolton Wanderers had received over £1,630 in receipts and more than £167 in subscriptions, meaning both clubs were in a secure financial position ahead of turning professional and joining the Football League.\textsuperscript{20}

At the beginning of the 1887-88 season, supporters gathered to watch Middlesbrough players in a practice match, and the \textit{Northern Review} speculated over the composition of the team – “Was Miller likely to get a school near Middlesbro’ after Christmas? Was the Parson’s [Rev E. J. Wilson] leg strong again? Did anyone know anything about a new left wing forward who was said to have come to act as Scripture Reader at one of the churches?” Though it is difficult to identify many of the players, this quote suggests that a proportion of the players had middle class occupations. Furthermore, it was also reported that Percy Sadler\textsuperscript{21}, the son of Lieutenant Colonel Samuel Sadler (club president, alderman and chemical manufacturer) was a promising half back for the club. The occupations of four other players can be identified – a publican, a commercial traveller and two solicitors, and whilst players’ occupations were relatively varied, the educated middle classes dominated. In contrast, four players were also imported from outside of Teesside including the professional of Sheffield Cricket Club, George Waller.\textsuperscript{22}

By November 1887, membership stood at 1,100 and the FA Cup third round tie against Sunderland attracted a crowd of 5,000. Special attention had been given to the training of the team ahead of the tie, though the committee regretted that they had “found it was impossible to obtain the services of a professional trainer without destroying the amateur status of the club”. Instead, five committee members volunteered to “undertake the arduous duties of trainers”. Players were advised by this committee to have “little salt, less sugar, no pastry, no fat meat, no suppers, two meals a day... no baccy, no beer etc”. Not being paid to adhere to such demands, it was thought that “there is not one man of the lot who would bind himself to the whole of these rules”. The game ended in a draw, and the committee evidently placing a great deal of importance on the result, as they accompanied the team to the replay at Sunderland, each taking charge of a player “who will not be allowed to exert himself in the slightest degree, until placed upon the field”. 2,000 Middlesbrough supporters reportedly travelled by train to Wearside, but they arrived after half the game had already been played. Middlesbrough faced Old Foresters at home in the following round and in front of a crowd of 8,000, defeated them by four goals to nil. Defeat in the next round to Crewe Alexandra was attributed to sub-standard players, and the South Durham & Cleveland Mercury suggested that new players were required – “if this is not done, and done at once, the future of the club will be a simple history of gradual degeneracy”.

23 Northern Review, 5th November 1887
24 Northern Echo, 28th November 1887; Northern Review, 26th November 1887; For details on the role of trainers see Carter, The Football Manager, chapter 2 passim
25 Northern Echo, 5th December 1887; Northern Review, 3rd December 1887. Sunderland won the tie, but after Middlesbrough hired a private detective to investigate them, accusations were made that they had fielded ineligible players and paid a trainer. Sunderland were only found guilty of not keeping their accounts in order, but the tie was still awarded to Middlesbrough – North-Eastern Weekly Gazette, 31st December 1887; Northern Review, 17th December 1887, 7th January 1888
26 Northern Review, 14th January 1888; South Durham & Cleveland Mercury, 14th January 1888. Old Foresters complained about the state of the pitch (bark and sand having been used to improve the surface) and a replay was ordered though Old Foresters refused to travel north again to play the tie – Northern Echo, 14th, 16th, 21st January 1888
‘Off-side’ in the Northern Echo agreed, stating that in the case of two or three players, “their football days are over”.\textsuperscript{27} Furthermore, despite winning the Cleveland Cup for the sixth time in seven years in 1888, ‘Off-side’ still felt that “the team is not [the] success which the high standing of the club should demand”.\textsuperscript{28} Evidently the club agreed that improvements could be made and, reflecting the evolving but unplanned training methods of the day, it was reported that one committee member had invented the ‘Football Playing Board’, the aim being to drive a ball through a sprung door on a board. This would “teach forwards to shoot with precision, weight, and alacrity, thereby depriving backs of an advantage they have had hitherto, owing to the forwards stopping or placing the ball before shooting”. Unfortunately despite promising “a revolution in goal getting... after many vicissitudes and alterations, it has resolved itself into a bill-sticking board”.\textsuperscript{29}

\textbf{b. Amateurism v Professionalism and the Formation of Ironopolis FC}

Though the payment of players had been sanctioned by the Football Association in 1885, there was still considerable opposition to professionalism. The Saturday Review was disappointed to have to report that professionals meant “combination and passing had replaced skill and dash”,\textsuperscript{30} whilst Arthur Budd (a member of the Rugby Football Union committee) argued that the introduction of professional football had led to “corruptibility, disrepute, and sometimes absolute decay... the extinction of the amateur, the exclusion of native talent and the seduction by pecuniary inducement of players”. Opposing payment for ‘broken time’, Budd suggested that if a player “cannot afford the

\textsuperscript{28} Northern Echo, 28\textsuperscript{th} April 1888
\textsuperscript{29} Northern Review, 14\textsuperscript{th} April, 18\textsuperscript{th} August 1888
\textsuperscript{30} Quoted in Harvey, Football: The first hundred years, p. 218
leisure to play a game, he must do without it”.

In contrast William Suddell, the manager of Preston North End FC, argued that professionalism would improve football as “men who devote their entire attention to the game are more likely to become good players than the amateur who is worried by business cares”. It is suggested that the payment of players was supported by the FA in order to control professionalism but also to enable the organisation to retain its power and influence, albeit at the expense of the amateur clubs.

Tony Mason has summarised the arguments against professionalism – paid players turned sport into work; professionalism would see the end of amateurism as amateurs would not be able to compete; professional football would lead to the domination of clubs from bigger towns and undermine local rivalries; professionalism meant an over-emphasis on winning; and professionals would have too much free time on their hands. Mason states that amateurs were of the opinion that only they could be “objective, free, and able to run a game for the benefit of the game itself”. Only they were “not tainted by pecuniary interest”. It is also suggested by Dave Russell that the professional debate can be viewed as “an intra-middle-class conflict” between provincial, business and commercial classes joined with the working classes, versus the public school elite. Professionalism took time to spread from the Lancashire clubs to other regions, and Matthew Taylor points out that in many cases it was slowed down by the strength of the amateur ethos among administrators and players, a point that would seem to apply to

32 Quoted in Carter, The Football Manager, p. 18
34 Mason, Association Football, p. 76, p. 230
Middlesbrough.\textsuperscript{36} It is argued that opposition to professionals was motivated by class prejudice; the amateur ethos “was in practice frequently a means of excluding working class players from high level competition”. As Richard Holt states, “professionalism was all right provided professionals knew their place”.\textsuperscript{37} Furthermore, though money was central to arguments against professionalism, amateurism also embodied a particular set of practices and values. It was an expression of Victorian ‘manliness’ and an organising principle, representing an unwritten code of conduct and “an aesthetic of sport itself”.\textsuperscript{38}

At the start of the season in September 1888, discussions on professionalism began in Middlesbrough. In the \textit{Northern Review}, ‘Rambler’, a member of Middlesbrough FC,\textsuperscript{39} considered the merits of professionalism. Prior to this point, the issue had been mentioned very little in relation to football in the local press, other than to object to the use of professionals in the game in general. ‘Rambler’ suggested that,

It is no use disguising the fact that the clubs who are attempting to exist on purely amateur lines are seriously handicapped by the importing clubs. I do not want to see the day when the clubs in this district seek assistance from professional ranks, but I can’t help seeing that the current is turning in that direction. Will the amateurism of Middlesbrough, Stockton and Darlington stand constant beating by Sunderland, Newcastle East End, West End, and other local clubs?\textsuperscript{40}

\textsuperscript{36} Taylor, \textit{The Association Game}, p. 64
\textsuperscript{39} ‘Rambler’ openly stated that he was a member of the club on 5th February 1890
\textsuperscript{40} \textit{Northern Review}, 8th September 1888; Sunderland AFC had split over issues of professionalism early in 1888, resulting in the formation of Sunderland Albion, whilst Newcastle West End (January) and Newcastle East End (June) both turned professional in 1889 – see P. Joannou and A. Candlish, \textit{Pioneers of the North: The origins and development of football in north-east England & Tyneside, 1870-93} (Derby, 1993)
A month later ‘The Tout’, also writing in the *Northern Review*, was more vociferous in his distaste for professionalism, stating that he would “rather see the [Middlesbrough] club at the bottom of the list than win matches with the aid of foreigners, who have no sympathy with us as a club; who play for their pecuniary benefit”. However, he also called for the rules to be altered to allow a player to be refunded for loss of earnings whilst playing in a match. He reasoned that this had not been carried out already because “many of our football legislators are gentlemen, or employed in offices, therefore have never a day’s pay stopped”, and were unable to sympathise with footballers. A1 Indeed the Football Association was dominated by leisured gentlemen, members of the professions and public school alumni who subscribed to the notion that sports were played for fun. A2

When it was reported in 1888 that South Bank FC had become the first club in Cleveland to register a professional player, ‘Rambler’ reiterated his opinion on such players stating, “I feel sorry it should have been found necessary”. The writer was quick to state that the player would in fact not receive any remuneration and had already asked to be reinstated as an amateur. A3 The advantages of bringing in new players were recognised but the payment of individuals was regarded as an unfortunate side effect of this. Such was the desire for the team to succeed, that in early 1889 ‘Rambler’ suggested that Middlesbrough should begin importing players – “Seeing that we have no local talent sufficiently good, rather than let the club sink, will it not be better to look

---

A1 *Northern Review*, 20th October 1888
A2 In 1903, among the members of the FA Council there were seven schoolmasters, five accountants and five journalists. For a complete list of members, see Mason, *Association Football*, p. 44; Likewise, those that ran the Cleveland Association were also middle class. In 1889 the president and one of the vice-presidents were solicitors (William L. Carrick and Albert Borrie), and in 1887 the Earl of Zetland was chosen as honorary president – 1891 census; *North-Eastern Daily Gazette*, 6th May 1887; *Northern Echo*, 29th May 1889
A3 *Northern Review*, 8th December 1888
afield for... steady men who in return for work at their own trade, will devote Saturday afternoons to football”. However, at the same time ‘Rambler’ was also of the opinion that importation “savours too much of ‘pot-hunting’ matches to be won by hook or crook”, which would lead to a “morbid unhealthy desire to win”. Standards of play were thought to be slipping and the desire to win so great that it was suggested that the club needed to “do as our neighbours, and sink for a season the high principles which have previously guided the club” in order to ensure that the supporters did not “fall away like chaff in the hour of humiliation and defeat”. 44

Following a defeat at home to Stockton in January 1889, a series of letters were published in the North-Eastern Daily Gazette and Northern Echo, commenting on the quality of the play and the price of admission. The correspondence that was published demonstrates the ever growing interest in football as well as the debates on the pros and cons of professionalism. It also shows the role football played in the lives of many people. The first letter, from John Wilkinson and his “fellow workmen”, complained that Middlesbrough were the only club in the area that charged 6d for ‘ordinary’ matches, and the “third-rate football... [that] juniors would be ashamed of” was not worth such a steep fee. 45 Another letter agreed that it was “a shame to ask working men who are not members of the club to pay 6d”, and suggested that either prices should be lowered, or standards of play increased. The author of this letter was not opposed to importation,

Now that the game is so much thought of here, and right well patronised, if we cannot depend upon native talent, then by all means let us have some of these stray Scotchmen who can be picked up so easily by our neighbours. Has the noble game, now that it has got such a hold on the

44 Northern Review, 2nd, 9th February 1889
45 North-Eastern Daily Gazette, 31st January 1889
public, to die out, and have we to dwindle into a fourth rate club after all our grand achievements? In conjunction with hundreds of others, I say no...

Shortly afterwards, a letter was published from a member of the club pointing out the contradiction in desiring both a reduction in the cost of admission and funds for new players. However, the author did agree that it was not the cost but “the quality of the entertainment provided that has evoked the representative growl” in the newspaper. By bringing good teams to play at Middlesbrough, the committee had “educated us to a point of appreciation of the beauties of the game to which the present team... has not attained”. The author of the final letter to the Gazette reminded the committee that as “caterers for the public amusement”, they had a “duty to perform to the outsiders who contribute so largely to the financial success of the club” rather than thinking solely of the “privileges and comforts of the members”. A letter from “A Working Man” in the Northern Echo argued that “witnessing a struggle between teams worthy of each other, and who play to win, excites in the breast healthy, manly, and altogether refreshing feelings and affords an enjoyment that in this dull, weary, work-a-day time I could ill afford to lose”. Under the name “Referee”, another letter demonstrated the strength of feeling amongst those who favoured amateurism. It stated that whilst football was “a healthy, noble, manly pastime”, there were a number of aspects that should be changed,

So long as men are paid for being footballers; so long as men are imported from other parts of the country and work found for them... because they are footballers; so long as there is the ‘gate’; so long as publicans are groundkeepers [sic]; so long as the headquarters... is at a public house, and the landlord can offer inducements to win; so long as

---

46 North-Eastern Daily Gazette, 2nd February 1889; Many imported players were from Scotland as the Scottish FA did not sanction professionalism until 1893. Often referred to as ‘professors’, they were regarded as highly skilled players. In 1884 the Football Field reported that there were 55 Scots playing for 11 clubs in Lancashire alone – Taylor, The Association Game, p. 49, p. 64

47 North-Eastern Daily Gazette, 7th February 1889

48 North-Eastern Daily Gazette, 13th February 1889
there is any remuneration for playing football... so long as these palpable evils are permitted to associate themselves with football, so long will many people... condemn football and everybody associated with it.⁴⁹

The professionalism debate appeared to have come to a head in April 1889 when the *North-Eastern Weekly Gazette* reported that a handbill had been distributed amongst spectators at Middlesbrough’s last game of the season stating,

Wanted, 1,000 members to attend the annual meeting to vote for the payment of all players, and also to support the nomination for the committee of those gentlemen who intend to try and place the club in the position it once occupied in the football world, and in the North of England in particular. Support them, and by doing so you will promote good football.

The newspaper thought it probable that the majority of the membership would withdraw from the club to form a professional side, but the AGM a month later was described as “one of the liveliest, but one of the most harmonious”.⁵⁰ The first half of this statement might be regarded as something of an understatement, as the 700 attendees reportedly applauded, groaned and heckled the speakers. A proposal for the payment of players received the most attention. John Wood suggested that players be paid a fixed sum per match, larger if the game was won, in addition to expenses for matches away from home,

...the time had come for them to import a few good men into the team, and find them work in the town. They wanted respectable men, and he did not think there would be any difficulty in obtaining them and finding them work. It had become an absolute necessity for something to be done...

The proposal was seconded but others vehemently disagreed. A Mr Dodds contended that “so soon as they started paying players from a distance then would the peace and

---

⁴⁹ *Northern Echo*, 25th March 1889
⁵⁰ *North-Eastern Weekly Gazette*, 27th April, 18th May 1889
harmony of the club be broken”. William H. Thomas, the club’s treasurer, suggested that if the proposition was carried “it would result in the formation of an amateur club in the town to compete with the professionals”. A Mr Kedward agreed, arguing that the importation of players would mean the club “would at once lose their good name as gentlemanly players, for if they paid a man to win he would win at no matter what cost”. The proposal was defeated.51

As is shown in the table below, most of those running the club had professional, middle class occupations whilst others were lower-middle class. None of the officials were born in Middlesbrough, which reflected the various geographical backgrounds of the town’s population; in 1881 45% of the population were born outside of Yorkshire52

1881 census – slate merchant
Following the AGM, the *North-Eastern Weekly Gazette* advised the club’s supporters,

To work shoulder to shoulder in order that the club may be brought back to the honoured position it has occupied for years until the past disastrous season. Let no ill-feeling be harboured, but rather let the minority gracefully submit to the wishes of the majority, and assist them in making next season one of the most brilliant that we have experienced.

The newspaper was pleased that the club had retained its amateur status. Importations and payment it argued, would have led to the replacement of gentlemanly play with brute force and “the large body of ladies who weekly take up their position on the grand stand and round the ropes would... leave the field in disgust”. The *Northern Review* was also delighted with the outcome of the meeting, pleased that the “treacherous quicksands of professionalism” had been avoided, for it would have “crush[ed] our town players to the wall”. The question remained however, “Will the professionalists [sic] form a new club on their lines, or continue to endeavour to filch the Linthorpe Road Ground?”

At the start of the following season, the press was still undecided on professionalism, not helped by the statement of the Cleveland Association that “in view of the inchoate regulations of the English Association on the subject of professionalism”, they would defer any decision on professional football themselves for the following year. The quotation from Wood at the AGM, and that from ‘Rambler’ early in 1889 (which suggested acquiring men who “in return for work at their own trade, will devote

---

54 *North-Eastern Weekly Gazette*, 18\(^{th}\) May 1889
55 *Northern Review*, 18\(^{th}\) May 1889
Saturday afternoons to football”) would suggest that there had been a shift towards working class players. Alongside the middle class composition of club officials, there is evidently a distinction between working class players and their club superiors. Even though overt professionalism had been dismissed, it is apparent that there were no objections to importing players and finding them employment in the town. The Northern Review suggested that as “there is now plenty of work at Middlesbrough for steady and good workmen... I shall not be the least surprised to find the Middlesbrough team strongly reinforced”. With talk of splits and divisions seemingly behind them, the season started well, leading ‘Rambler’ to comment that the club was “still to the fore... despite the croaking and evil foreboding indulged in during the past few months” by those favouring professionalism.

At the end of September 1889, Middlesbrough were beaten at Newcastle East End. The Middlesbrough forwards were disorganised and had played “a wretchedly loose game”. A few days later, it became apparent why some of the team had played so badly when five of the forwards and one half-back sent a petition to the committee requesting that they be paid for playing (10s for a win and 7s 6d for a draw or defeat). A meeting was held to discuss the matter, and after a “protracted discussion”, it was agreed to carry on with the present arrangements. A hopeful application was to be made

---

57 However, it is difficult to identify many of the players at this time, other than Thomas Bach and Thomas Cronshaw (teacher) – 1891 census; Northern Review, 2nd February 1889
58 Northern Review, 31st August 1889; The committee were evidently not afraid of spending more money as further general improvements were made at the club. The Northern Review reported that the players were to be lent their own “football costumes, including shirts, knickers and kickers”. The ground had been fitted with wash basins and toilets, with “gas fires, easy chairs, spittoons etc to follow” – Northern Review, 14th September 1889
59 Northern Review, 21st September 1889
60 North-Eastern Weekly Gazette, 5th October 1889; Northern Echo, 3rd October 1889; Northern Review, 30th September 1889
61 Copeland, Cronshaw, Dennis, Hopewell, Taylor and Wilson
to the Football Association asking them to adopt a rule whereby players could be paid for loss of time but still retain their amateur status. Reaction in the local press was mixed. The *Northern Echo*’s ‘Observer’ suggested that the players’ proposal “cannot be regarded with either surprise or indignation” as other important clubs in the area already paid their players. Professionalism was inevitable, and ‘Observer’ pointed out that the club’s committee had no problem arranging games *against* professional teams. The *Athletic News* (a vocal supporter of professionalism) pointed out that “dissension has been rife amongst their supporters as to the advisability of strengthening their team with professional help”. In contrast, ‘Rambler’ in the *Northern Review* declared that “the whole town has been laughing at [the players] ever since” they had submitted their petition. He wondered whether the players had given enough thought to becoming professionals,

> How their private liberty, indulgences, luxuries, would be forbidden by the committee who paid them, who, naturally, would allow nothing to interfere with the getting of full value for their money. At one sweep, away would go baccy, beer, etc, and strict training insisted upon. Life would not be worth living.

The *North-Eastern Weekly Gazette* thought that it would have been better if the players “who think they have risen to such a standard... as to deserve recompense”, had left the club when professionalism had been rejected at the AGM. Instead, these “wilful schoolboys” had conspired to deliberately lose the game at Newcastle.  

---

62 *North-Eastern Daily Gazette*, 3rd October 1889; *Northern Echo*, 3rd October 1889  
63 *Northern Echo*, 5th October 1889  
64 *Athletic News*, 7th, 14th October 1889  
65 *Northern Review*, 5th October 1889  
66 *North-Eastern Weekly Gazette*, 5th October 1889
Further poor results on the field changed the dispute from one between the players and the club to a larger one involving members and spectators. A requisition signed by 80 members of the club, was presented to the committee, and another meeting was requested. It was felt that those in favour of professionalism would now find a considerable number of members in agreement as a change in results was sought, though the *North-Eastern Weekly Gazette* thought that the committee would receive “every support from the footballers of the town”. 67 Six resolutions were to be proposed at the meeting, the most significant of which were –

- That a vote of censure be passed upon the committee for mismanagement.
- That the following members of the committee be asked to resign office – Messrs R. Peel, Kedward, W. H. Thomas and A. Mattison.
- That the resolution passed at the general meeting against the payment of players be rescinded.
- That the committee in future have power to pay players providing the players wish it. 68

With 1,800 people reportedly present at the meeting, it was alleged that the committee “had failed to give them the best possible football procurable” and that the players had not been treated with “proper respect and consideration”. The proposal of censure was put to the meeting by a show of hands, and the chairman, Henry Cochrane, declared that it had not been carried, resulting in uproar; both the *North-Eastern Daily Gazette* and the *South Durham & Cleveland Mercury* suggested that judging by the show of hands, the resolution should have been passed. The two resolutions regarding the payment of players were dismissed out of hand by the chairman, “amid increasing excitement and disorder and an incessant storm of angry cries”. 69

67 *North-Eastern Weekly Gazette*, 19th October 1889; *Northern Echo*, 19th October 1889
68 *North-Eastern Weekly Gazette*, 19th October 1889
69 *North-Eastern Daily Gazette*, 24th October 1889; *North-Eastern Weekly Gazette*, 26th October 1889; *Northern Echo*, 26th October 1889; *South Durham & Cleveland Mercury*, 26th October 1889
The Athletic News thought that those present had “behaved more like lunatics at large than sober citizens”. It was hoped that “the spirit of discord would be replaced by peace... and the club would start on a fresh basis”.\(^{70}\) The Northern Echo’s ‘Observer’ reminded the committee members that although they were not paid, they were still “equally amenable to the club majority as if they were”. They had “a certain inclination to be stiff-necked, to be very wrath that any single action of theirs should be so much questioned”.\(^{71}\) Once again ‘Rambler’ was pleased that the football club would not be selling its soul to professionalism,

The Middlesbrough club is part of the town. Its duty as the town club is to encourage and help the athletic youths of the town in the fine pastime football. By knocking out local men and substituting foreigners could we feel the same pride as in a team of players bred and born amongst us?... By bringing professionals, would not the club be failing in one of its most important duties?\(^{72}\)

The emphasis on ‘local men’ is interesting to note given the absence of ‘local’ men on the committee and in this instance refers to local amateurs rather than professional ‘outsiders’. For a town such as Middlesbrough, with its large proportion of non-Middlesbrough born residents, the definition of the term ‘local’ may be more open to interpretation, particularly when it came to how people identified with the town in which they lived and worked.

The club was now irreconcilably divided and shortly after the meeting, a public announcement was placed in the local press asking 2,000 people to attend a public meeting to form a new football club.\(^{73}\) The meeting was chaired by Malcolm

MacDonald (a Scottish foreman plater) who stated that he simply wanted to “establish a club which should be carried on according to their own views which were not in accordance with the views of the committee of the existing club”. There was only one resolution – “That in the opinion of this meeting of the football going public of Middlesbrough it is desirable that a new football club be formed as early as possible for the promotion of good football”. This was seconded by one former Middlesbrough committee member who believed that the “the players had an equal right to share the money with anyone else”. The new club would be run as a limited liability for which £2,000 was required and 113 shares were subscribed to by 38 individuals at the meeting. MacDonald was asked “how the working men were to get on” (i.e. how they would afford to buy shares), to which he replied that the share capital would only be called for as it was required. He did not hide his preference for making money from the club, stating that he liked “the washers” (slang for coins; a term which quickly became the club’s nickname). Similarly, when Newcastle East End issued shares in 1890 it was hoped that the low price of shares would “make the scheme more popular and within the reach of the working classes”.

The large crowd that gathered for the meeting was felt to reflect the “perfect unanimity of feeling that existed with regard to the question of commencing a professional team to uphold the honour of the town”. The Athletic News’ Teesside

74 North-Eastern Daily Gazette, 30th October 1889; Northern Echo, 30th October 1889; South Durham & Cleveland Mercury, 2nd November 1889; All those who became shareholders were to be admitted to the ground for free, with season tickets issued to non-shareholders for 5s; The Northern Review stated two years later that MacDonald had “promised to put ‘washers’… into the pockets of all who became shareholders of Ironopolis Limited”. He was “so tickled by the expression, and the improbability of the promise being fulfilled, that he applied the term ‘Washers’ to the new club, and it stuck” – Northern Review, 17th October 1891

75 Nevertheless the cost of a share represented at least two days’ wages even for a skilled worker – N. Garnham and A. Jackson, ‘Who Invested in Victorian Football Clubs? The case of Newcastle-upon-Tyne’, Soccer and Society 4, 1 (2003), p. 59
columnist noted that those behind the new club “had not misjudged the strength of public feeling or the amount of support upon which they could calculate”. Not only did the new club have the backing of the people of the town, it was reported that “several of the Middlesbrough players have intimated to promoters their willingness to throw in their lot with them, as they are tired of playing for the love of the game”. The Northern Echo’s ‘Observer’ had little sympathy for the old club, who by ignoring the “palpable signs of the times”, had made the formation of this new club inevitable. The leaders of the new club had recognised the public’s desire for success, knowing that they “demanded higher class football, whether it emanated from Kirkcaldy, Timbuctoo or Cargo Fleet”. This highlights the relative lack of importance given to the team being composed of ‘local’ players, in comparison to the repeated desire by the old Middlesbrough club for locals. The Northern Review disagreed that the new professional team would inevitably play better football, as it would not be as “manly, straightforward, and honest as an amateur one”. The reporter suggested that if football was no longer to be played for the love of the game, “let us shun the game as a pestilence”.

Three days after the formation of the new club it was reported that applications for shares already amounted to more than £500, and that the club was to be named Middlesbrough Ironopolis Football Company Limited (Ironopolis being a frequently used term for Middlesbrough). The Memorandum of Association for the club states

76 Athletic News, 4th November 1889; North-Eastern Weekly Gazette, 2nd November 1889
77 Northern Echo, 2nd November 1889; Cargo Fleet is an area in the east of Middlesbrough.
78 Northern Review, 2nd November 1889
79 The first choice of name for the club was ‘Middlesbrough Football Company Limited’. Unsurprisingly this was objected to by the old club, and the name was changed. North-Eastern Daily Gazette, 1st November 1889; Northern Review, 16th November 1889; For an early example of Middlesbrough being
that premises and equipment were to be acquired for the playing of tennis, cricket, bicycle and tricycle riding, gymnastic and athletic exercises, matches, festivals and “assaults-at-arms”, and that money would be distributed as prizes.\textsuperscript{80} The Paradise Field on Linthorpe Road was leased (previously used by Middlesbrough Rovers Rugby Club), with invitations to tender for stands and ticket offices being submitted shortly afterwards.\textsuperscript{81} It was reported that Richard Bach, the brother of the Middlesbrough player Thomas Bach, was to be employed as the club trainer and groundsman, and even though he was a hatter and hosier, his family connection made him “just the man for the job”.\textsuperscript{82}

The high costs entailed in running professional football clubs had led many clubs to be reorganised as limited liability companies. There was little chance that shareholders and directors would see a return on their investment. Most directors were middle class and were affluent enough to be undeterred by a lack of profits. Instead, as Richard Holt suggests, investment offered “a sense of self-importance and pride at running an organisation around which so much local interest was centred”. Robert Lewis also argues that football “seldom created any profits” and therefore could hardly be regarded as “a normal commercial enterprise”.\textsuperscript{83} Though most directors did not make money directly from their position, the “privileges of the directors’ box” would have offered attractive business opportunities to those involved. Neil Carter points out that directors’ main interest was the welfare of their club, and though they wanted to “enjoy the

\item Thomas and Richard Bach’s brother Phil also went on to play for Middlesbrough, whilst their brother Frank became a director of Middlesbrough in 1892; \textit{Athletic News}, 7\textsuperscript{th} December 1889; \textit{North-Eastern Weekly Gazette}, 7\textsuperscript{th} December 1889
\end{itemize}
privileges of ownership” they regarded the selection of players as a perk of the job; directors were “not dissimilar to unpaid volunteers running a local social institution”. Mason states that the occupational composition of a club’s directorate usually reflected the economic structure of the town and this is demonstrated in Ironopolis’ directors. Whereas Middlesbrough FC’s officials represented the town’s middle classes, Ironopolis’ directors were more representative of the town’s large working class population who made up a significant proportion of football spectators. The club’s directors also included members of the increasingly important shopocracy and the lower-middle class, who, as will be demonstrated in the following chapters, became ever more visible in the administration of sports clubs. A number of directors had servants, which also indicates a degree of affluence.

Unable to locate on census, occupation taken from shareholders register
Ironopolis had 221 shareholders holding 889 shares (see Appendix 2), the vast majority of which were taken up between 1890 and 1891 (740 shares in 1890 and 83 shares in 1891). Their occupations are broadly skilled working class or lower-middle class, mirroring the class composition of the directorate. 88 shareholders can be categorised as having working class occupations, and though this is a sizeable number many only bought single shares, whilst some more affluent individuals were able to purchase a greater number of shares. The occupational and socio-economic backgrounds of the shareholders are broadly mirrored in the shareholders of the professional clubs of Newcastle West End and Sunderland Albion. Dixon et al state that most of the shareholders of the three clubs were skilled working class, but the bulk of shares were owned by members of the middle classes. They suggest that for those who had neither “the social credibility nor the financial resources” to join gentleman’s members clubs, share ownership and the “masculine camaraderie” of the football club may have offered “an alternative emotional support network”.

It is possible to identify the place of birth of 163 of Ironopolis’ shareholders. The geographical range of birthplaces reflects that of the population in the town in general, and as Dixon et al point out, the financial backing of the three north-east clubs “came disproportionately from men without the tie of birth to the town which their company, and team, represented”. Indeed, involvement with a football club gave such men “an entree to local society, or simply a measure of fellow feeling with their neighbours and workmates”.

87 P. Dixon, N. Garnham and A. Jackson, ‘Shareholders and Shareholding: The case of the football company in late Victorian England’, Business History 46, 4 (2004), p. 513, p. 520; Dixon et al only identified 70 of Ironopolis’ shareholders, but this thesis has also used the club’s Register of Members which has enabled the identification of a far greater number of shareholders (221). Therefore the comparisons with Newcastle West End and Sunderland made by Dixon et al need to be treated with a degree of caution.

88 Dixon, Garnham and Jackson, ‘Shareholders and Shareholding’, p. 514, p. 519
in Middlesbrough, and 35.6% of shareholders were born outside of County Durham, Northumberland or Yorkshire –

a Director, Arthur Camplin Richardson (Naturalised British Subject)

Similarly, it is important to note where the shareholders lived. The home addresses of 194 shareholders can be identified. Of these, 93% lived in Middlesbrough. 13 shareholders lived outside of the town; three lived in London and the remaining ten lived elsewhere in the north-east.90 Eight female shareholders can also be identified, all of whom were related to male shareholders. In comparison, Newcastle East End and Sunderland Albion each had one female shareholder, and Newcastle West End had none.91

Middlesbrough’s response to the formation of Ironopolis, despite their abhorrence for the payment of players, was to turn away from amateurism themselves. With two players (Hopewell and Taylor, who had petitioned the club for payment) already having left for Ironopolis, the committee were faced with the potential desertion of more players. The committee met to discuss whether “they ought not to yield to the recent emphatic demand of a large proportion of the members to introduce the professional element”. Professionals were to be advertised for immediately, though preference would be given to players who were already with the club.94 The club hoped that a forthcoming meeting of the Football Association would rule in favour of their proposal that players could keep their amateur status whilst being refunded for loss of wages. William H. Thomas argued that “they did not consider it fair to those amateurs in a lower sphere of life”, whilst Mattison claimed that there were hundreds of professionals who would prefer to be reinstated as amateurs if they could be refunded their expenses.95 The club’s reasoning precedes the arguments in favour of payments for ‘broken time’ in rugby, the

94 North-Eastern Daily Gazette, 26th November 1889  
95 Athletic News, 25th November 1889; Middlesbrough’s proposal to the Football Association for 5s for loss of wages was defeated by an overwhelming majority despite the “eloquence of Mr W. H. Thomas” at the meeting. The defeat of the proposal was felt to be inevitable, despite the fact that “the majority of [FA] members believe in it, and acknowledge it must become law eventually”. It was felt though that Middlesbrough’s resolution was “immature”, perhaps because they had only recently begun to favour the payment of players themselves – Athletic News, 16th December 1889; North-Eastern Weekly Gazette, 14th December 1889; Northern Review, 14th December 1889
introduction of which was intended to safeguard against professionalism and allow clubs to control wages.\textsuperscript{96}

The *Northern Echo*’s ‘Observer’ suggested that if Middlesbrough’s committee “had only bowed their stiff necks before a public feeling which was sweepingly in favour of professionalism, nobody would have dreamt of starting a new club”. ‘Rambler’ in the *Northern Review*, on the other hand, blamed Ironopolis for the unfortunate situation the old club now found themselves in – “If the Ironopolis club had been wise, no interference would have been attempted with the members of the Middlesbrough team... the taking of the old club’s players has forced it into the present position”.\textsuperscript{97} Within a few days of Middlesbrough turning professional, they had reportedly received 100 applications from professional players, whilst Ironopolis had nearly 200 applications. Five Middlesbrough players turned professional, but supporters were “waiting for an introduction to that touch of brilliancy in the form of new blood that will make the whole complete”.\textsuperscript{98} The *North-Eastern Weekly Gazette* eagerly stated that,

Already the spirit of rivalry is taking hold of the football community, and matters promise to be exceedingly lively during the remainder of the season. One thing is certain, the supporters of the game in the town will be treated to a much superior exhibition than has been the case for the past two seasons.\textsuperscript{99}

\textsuperscript{96} Collins, *Rugby’s Great Split*, pp. 105-107
\textsuperscript{97} *Northern Echo*, 30\textsuperscript{th} November 1889; *Northern Review*, 30\textsuperscript{th} November 1889
\textsuperscript{98} *Athletic News*, 2\textsuperscript{nd}, 9\textsuperscript{th} December 1889; *Northern Review*, 7\textsuperscript{th} December 1889; Members of the Ironopolis committee had reportedly been to Scotland “on a mission to secure professionals”, as well as having made approaches to many Sunderland Albion players and to one from St Augustine’s. Middlesbrough’s committee also visited Scotland, “leaving no stone unturned in order to get the best talent that it is possible to obtain” – *North-Eastern Weekly Gazette*, 7\textsuperscript{th} December 1889
\textsuperscript{99} *North-Eastern Weekly Gazette*, 30\textsuperscript{th} November 1889
Ironopolis played their first game against Gainsborough Trinity on 14th December.100 “Substantial barricades” were erected at the Paradise Ground to prevent “the encroachment of the spectators”, whilst special accommodation was provided for the press. With Middlesbrough playing at Darlington, the game attracted a large crowd,

Arriv[ing] on the scene of action, there was such pushing and crushing and scrambling as would have delighted the heart of any theatrical proprietor – hundreds, nay thousands, were hustling and bustling before the pay-boxes to exchange their modest sixpence for the ticket of admission. Meanwhile the promoters of the club looked on with satisfied feelings. At last, however, the surging tide of humanity had passed the entrance gates, and crowded the capacious stand, and there could not have been fewer than 4,000 spectators on the field...101

The North-Eastern Weekly Gazette commented that “it was a treat to witness the various directors and committee men as they strutted about the ground, prouder by far than anyone else in the capital of Cleveland that afternoon”.102 The local press continued to reflect on the affects of paying players now that professional football had come to Teesside. Despite repeated calls throughout the year for improvements to the team, an editorial in the North-Eastern Weekly Gazette now argued instead that professionalism had turned football into,

a mere medium of speculation... a rivalry between town and town, in which the one competes with the other, not in the prowess of its own sons, but in financial resources which enable it to hire paid champions from without. It is difficult, however, for an individual club to resist the widespread professional tendency... professionalism degrades every form of sport which it touches, and renders it a potent power for evil.103

100 Northern Echo, 14th December 1889; The team was as follows (their previous club in brackets) – G. Smart (Birtley), T. Anderson (Arthurlie), J. Mathew (Strathmore), J. A. Elliott (Arthurlie), R. F. Thompson (Arthurlie), W. Hopewell – captain (Middlesbrough), T. Cronshaw (Middlesbrough), J. McGregor (Strathmore), T. J. Morrisey (Dundee Harp), J. Taylor (Middlesbrough), T. Seymour (Arthurlie).
101 Northern Echo, 16th December 1889
102 North-Eastern Weekly Gazette, 21st December 1889
103 North-Eastern Weekly Gazette, 14th December 1889
In contrast, an editorial in the *South Durham & Cleveland Mercury* stated that the popularity of the game was evidence that for “the majority of people attendance at football matches is not a practice in need of defence”. The public demand for professionalism could not be denied, as spectators “grow more and more connoisseurs in the niceties of the play, and more and more exacting in their expectations from the players”. It followed that the game’s “highest exponents must be provided for by the proceeds of the game itself”.

The *Athletic News* suggested that the formation of Ironopolis had forced Middlesbrough to improve their own team, stopping their inexorable decline, whilst the *North-Eastern Weekly Gazette* had to concede that “the game is taking a deeper hold of the public than ever, and it will be many seasons before our popular winter game begins to show any signs of being on the wane”.

In February 1890 a meeting was held to discuss the prospect of the two clubs amalgamating. Albert Henry Sanderson of the Ironopolis committee stated that it was already apparent that the town did not have room for two successful clubs. The Middlesbrough committee proposed that only one club should exist in the town, and with this in mind they were “prepared to consider any proposal that may be made by the Ironopolis Club by which that club may cease to exist”. Ironopolis informed Middlesbrough that they would join with them on the payment of £650 compensation, or would buy out the old club themselves, but this proposal was considered “an absurd one”. The prospect of amalgamation was over and it would now be “a struggle to the

end, the club that can bear the strain the longest being sure to come out topmost”. 107

‘Rambler’ ridiculed the “farcical nature” of Ironopolis’ proposition”,

Whoever outside the Ironopolis ever dreamed that the Middlesbrough club would willingly burden itself with a debt so great to please a body of men who have done their best to hurt it, and failed. Ironopolis have had their best chance... the old ground will attract the bulk of the spectators, in spite of cheap tickets sold at the shipyards. 108

With any thoughts of amalgamation gone, it was announced at the first meeting of Ironopolis’ shareholders that “the working of the club had been somewhat crippled for want of capital”. A further £100 was subscribed, with an additional 100 new shares being taken up. Accommodation at the Paradise Ground was felt to be the aspect where the club was second to Middlesbrough and tenders were invited for the erection of stands to hold 2,000 spectators. 109 By March 1890 they had played 18 matches, winning 11, and club director William Easton announced that Ironopolis had “earned the approbation of the public by introducing a better exposition of the game”. 110 Eager to attract supporters and increase gate receipts, the club arranged a match to take place by lamplight resulting in a crowd of 3,000 and a 10-2 victory over Sheffield (however, the light was not bright enough to allow play to be followed across the pitch, leading much of the crowd to leave before the end). 111 This was followed by a victory over Football League side Aston Villa in front of a crowd of 3,000, with £70 in shares being taken up immediately afterwards. 112 Ironopolis sought to increase interest in football further by introducing a medals competition between local junior clubs. The aim of the

competition was the production of an Ironopolis reserve team through the discovery of “unrecognised local talent”. All matches in the contest were to be played on the Paradise Ground, ensuring that the club would also benefit monetarily.\footnote{Athletic News, 31\textsuperscript{st} March 1890; Northern Echo, 12\textsuperscript{th} April 1890. The competing teams were Britannia Rovers, Co-operative Rovers, Grange, Linthorpe Wanderers, Middlesbrough Albion, Middlesbrough Hairdressers’ Swifts, Middlesbrough Rifle Volunteers, Middlesbrough Rovers, Middlesbrough Wednesday Rovers, Milton Street Amateurs, Newport, Newport Olympic, North Ormesby, North Ormesby Amateurs, St Mary’s and Vulcan.}

c. Rivalry and the Rise of Ironopolis FC

Local enthusiasm for football was evidenced at the Cleveland Charity Cup Final, when Middlesbrough played Ironopolis for the first time. ‘Rambler’ informed his readers that “you cannot move a yard along any thoroughfare without overhearing some prophetic utterance as to the result of the great fight”.\footnote{Northern Review, 26\textsuperscript{th} April 1890. The charities to benefit from the game were the North Riding Infirmary and the North Ormesby Cottage Hospital; For more on football and charity, see J. Kay and W. Vamplew, ‘Beyond Altruism: British football and charity, 1877-1914’, Soccer & Society 11, 3 (2010), pp. 181-197} The match was played in front of around 12,000 spectators and ended 0-0.\footnote{Both teams lodged objections with the Cleveland Association. Middlesbrough argued that Chalmers of Ironopolis did not have the required membership and residential qualifications (and was barred from playing in the replay), whilst Ironopolis protested that they were the only team that had been entered in the competition by the Association’s deadline. The clubs were ordered to decide the venue for the replay by the toss of a coin. Middlesbrough objected, requesting that the Association select the venue but agreed to drawing lots instead and Ironopolis’ ground was chosen – Athletic News, 12\textsuperscript{th} May 1890; Northern Echo, 7\textsuperscript{th} May 1890; Northern Review, 17\textsuperscript{th} May 1890} The \textit{Northern Echo} was pleased to report that there had been “an almost entire absence of ill-feeling or rough play... the game was one of the pleasantest that has been seen in the town”. Having already commented that Ironopolis tickets were sold at the shipyards, ‘Rambler’ also remarked on the partisan nature of the crowd, noting that their supporters were easily identified, If emblems went for anything the Washers were strong favourites, and I should say that foremen and storekeepers must have noticed an extraordinary consumption of brass and iron washers during the past week. The nickname which I give them in jest has been adopted by the Ironopolis’ supporters in earnest, and washers from the size of a sixpence...
to almost a cart wheel, and made of almost every known metal were worn on the caps or breasts of large numbers of spectators.\textsuperscript{116}

The replay drew a crowd of 6,000 and Ironopolis won 2-0. That they had drawn the first game and won the second, led the \textit{North-Eastern Weekly Gazette} to conclude that Ironopolis were clearly the better of the two teams, particularly as they had played with “a dash that was irresistible”.\textsuperscript{117}

Middlesbrough’s balance sheet no longer looked quite as healthy as in previous years. Despite an income of over £1,800 the club were left with a balance of only £22 15s 7d. £148 15s 9d had been spent on obtaining players, with a further £420 on wages for professionals and a trainer.\textsuperscript{118} Ahead of their AGM in May it was proposed that members’ annual subscriptions be increased as a means of raising money, and the increased cost would also “keep many precocious and impertinent youngsters out of the covered stand, where they have... been a source of annoyance... [and] have taken up valuable seating room”.\textsuperscript{119}

Ironopolis were admitted to the Northern League for the 1890-91 season,\textsuperscript{120} and also arranged other fixtures with a number of strong sides. Due to the number of games Middlesbrough had played away from home, Ironopolis had previously attracted the

\textsuperscript{116} \textit{Northern Echo}, 28\textsuperscript{th} April 1890; \textit{Northern Review}, 15\textsuperscript{th} February, 3\textsuperscript{rd} May 1890; This peaceful meeting can be contrasted with the relationship between Sunderland and Sunderland Albion. When the two teams were drawn together in cup competitions, with Albion at home, Sunderland withdrew rather than see Albion benefit from a large gate. In addition, in order to have a better list of fixtures Sunderland paid greater expenses to visiting teams – Carter, \textit{The Football Manager}, pp. 34-35
\textsuperscript{117} \textit{North-Eastern Weekly Gazette}, 17\textsuperscript{th} May 1890
\textsuperscript{118} \textit{North-Eastern Daily Gazette}, 10\textsuperscript{th} May 1890
\textsuperscript{119} \textit{North-Eastern Weekly Gazette}, 26\textsuperscript{th} April, 24\textsuperscript{th} May 1890; Fees were increased from 5s to 7s 6d for seniors, and for juniors and ladies the cost would be 5s for entrance to the field and stands, and 2s 6d to the field.
\textsuperscript{120} Middlesbrough FC had been in the Northern League since its inception in 1889.
greater number of spectators for their home matches, and the older club decided not to issue a fixture list “owing to the advantages it would give the Ironopolis”. Similarly, Sunderland had also withheld publication of their fixtures so as not to give any advantage to their rivals Sunderland Albion.\textsuperscript{121} Season tickets were available for Ironopolis at the same price as those for their rivals, and the club’s captain and a number of other players were reported to have joined the athletics club, as they were “beginning to see the necessity of thorough training”.\textsuperscript{122} It was becoming increasingly evident that the two clubs had to try hard to secure the support of the football-going public. It was not uncommon that both teams would have home games on the same day. For example, an announcement in the \textit{North-Eastern Daily Gazette} advertised Ironopolis v Chirk (the Welsh champions), which kicked off at 3.45 pm, and admittance would be half price at half-time. Middlesbrough’s game against South Bank kicked off at 3 pm and therefore by the time it had finished spectators would also have time to go to the second half of Ironopolis’ match as their grounds were so close together.\textsuperscript{123}

The first Northern League match between the two sides attracted a crowd of around 10,000-12,000 to Middlesbrough’s ground. “No local event, not even royalty, has provoked so much absorbing interest”, commented ‘Rambler’. The game included “an amount of rough play that was not at all creditable”. In contrast, the crowd had been a “strong but good humoured one” and had used “less of that foul language too often to

\textsuperscript{121} \textit{Athletic News}, 1\textsuperscript{st} September 1890; \textit{Northern Echo}, 12\textsuperscript{th} August 1890; \textit{Northern Review}, 30\textsuperscript{th} August 1890; Carter, \textit{The Football Manager}, p. 35  
\textsuperscript{122} \textit{Athletic News}, 29\textsuperscript{th} September 1890; \textit{North-Eastern Daily Gazette}, 15\textsuperscript{th}, 24\textsuperscript{th} September 1890; \textit{Northern Review}, 20\textsuperscript{th} September 1890  
\textsuperscript{123} \textit{North-Eastern Daily Gazette}, 26\textsuperscript{th} September 1890; The grounds of the two clubs were around 10 minutes walk apart (see Map 2)
be met with on our football fields”. The match epitomised both the rivalry and the benefits that had arisen from having two teams in the town. There was now “a general alertness and go-ahead spirit in catering for public patronage”, as well as a “manifestly improved” standard in play “for the delectation of the... public”. In early 1891 ‘Rambler’ welcomed Ironopolis as the opposition they posed to the Middlesbrough team “helps to keep the players up to the mark”. Moreover, the rivalry between the two teams had “drawn into the football vortex thousands who never previously saw a match, and converted them into eager enthusiasts”. Football’s popularity seemed in little doubt as on the same Saturday afternoon Middlesbrough drew a crowd of 4,000, whilst 3,000 watched Ironopolis. Both teams were capable of attracting sizeable crowds, and it would appear that many spectators simply wanted to watch good football and did not necessarily associate themselves with one team or the other. For example, when Ironopolis played Blackburn Rovers in the FA Cup in mid-January, the crowd was between 8,000 and 10,000. With Middlesbrough’s game that day against Stockton postponed, some spectators “rather than be done out of a match, overcame their scruples” to watch the holders of the FA Cup instead.

Middlesbrough and Ironopolis met again in the Northern League in late March 1891, where a crowd of 10,000 at the Paradise Ground witnessed another win for Ironopolis. The South Durham & Cleveland Mercury commented that it was “most creditable to the players that, in spite of the rivalry which exists between the clubs, there should have been so few manifestations of ill-will”. This contrasted with some members of the

Ironopolis committee who “loudly condemned certain discreet tactics of the town team”. Ironopolis won the Northern League shortly afterwards, and rather than congratulate the club, ‘Rambler’ commented that with the two Middlesbrough clubs at the top of the League it could now be considered the home of northern football (despite the fact that Sunderland AFC had just completed their first season in the Football League). Though neither the FA Cup nor the Cleveland Cup rested in Middlesbrough, ‘Rambler’ was of the opinion that “the League results are more reliable” and the records of the two clubs placed the town “in a very high niche of football fame”.

Following Middlesbrough’s comparatively unsuccessful season, a resolution was passed at their AGM that members “voluntarily subscribe” towards a fund for improving the team. This decision came after their accounts showed a loss, as more than £1,097 had been spent on obtaining and keeping players. William H. Thomas stated that during the course of the club’s existence “an extraordinary claim had never been made on the members, and he thought that [this] was a fitting opportunity when some strong effort might be made” to secure new players. It was, in his opinion, “not the duty of the executive to go to any considerable amount above their means”. There had been members who “had not been shy in finding fault with the committee”, and with more money to spend on players, such accusations would be eliminated; more than £46 was subsequently promised.

---

128 South Durham & Cleveland Mercury, 4th April 1891
129 Northern Review, 25th April, 9th May 1891
130 Athletic News, 25th May 1891; North-Eastern Daily Gazette, 28th May 1891; North-Eastern Weekly Gazette, 30th May 1891; Northern Echo, 28th May 1891; It was also decided that a section of the covered stand would be reserved for which tickets would be £1 1s a year, or 10s 6d for ladies.
Details of Ironopolis’ accounts were published ahead of their AGM. Perhaps to soften the blow for the shareholders, the figures supplied covered nearly two years, making their income appear much greater than their rivals; income totalled £3,244 5s 2d, but the club recorded a considerable loss of £513 12s 10d (compared to Middlesbrough’s loss of just over £88).\textsuperscript{131} At the subsequent meeting Boolds, one of the club’s directors, stated that the club had indeed made a loss in their first year, but had made a profit during their second season, “and in the season to come, being now an established and well-known club, they hoped that they would make a still bigger profit”. Despite successes on the pitch, the secretary of the club argued that “the directors have been handicapped at every way” by, for example, their ground being “out of the way and people having to pass the other club’s ground”. Nevertheless, the Paradise Ground had been secured for another year and was to be extended, including the building of a cycle track. It was felt by ‘Milo’ in the \textit{Northern Echo} that profit and loss would be of little concern to the committee as they had “the satisfaction of knowing that the support which the public have accorded them has been even greater than that secured by the old club”\textsuperscript{132}

In January 1892 the issue of amalgamation was raised again. It was felt that this was the only way that a team from Middlesbrough would be able to compete with the best in the country. ‘Observer’, in the \textit{Northern Echo} argued that,

if there is a strong determination on both sides to sacrifice personal ideas and prejudices for the advancement of the game no doubt means will be found of surmounting all difficulties, banishing all bitterness, and joining again hand-in-hand those who for so many years were united in the one laudable object of promoting the success of the Middlesbrough club.\textsuperscript{133}

\textsuperscript{131} \textit{Athletic News}, 22\textsuperscript{nd} June 1891
\textsuperscript{132} \textit{North-Eastern Daily Gazette}, 23\textsuperscript{rd} June 1891; \textit{Northern Echo}, 16\textsuperscript{th}, 24\textsuperscript{th} June 1891
\textsuperscript{133} \textit{Northern Echo}, 26\textsuperscript{th} January 1892
The *Northern Review* attempted to gauge public reaction to amalgamation and featured two pages of interviews with “some of the shining lights in the football world”. Responses suggested that some spectators did identify with one particular team and that a rivalry existed between the supporters of the two teams. Angus Macpherson (secretary of Middlesbrough Amateur Swimming Club) favoured amalgamation, stating that the present rivalry between the two sets of supporters was “more prejudicial to the interests of the game than anything... let us get rid of the squabbling and a healthful stimulus would follow”. Edwin Thompson (an Ironopolis director) stated that there was a certain amount of “bad feeling” amongst the teams’ followers, and claimed that “a system of boycotting exists in the town. Ironopolis people won’t trade with Middlesbrough people and vice versa”. Harry Walker (secretary of the Northern League) agreed, contending that there was “dissension in families, strained relations in business, and other unpleasant matters which have been the result of the existence of two clubs”. Frederick Hardisty (acting president of the Middlesbrough Club) favoured amalgamating but also felt that gates would decrease “for there would not be the interest that now exists”. William Easton (Ironopolis director) thought that one combined club would be capable of joining the Football League, whilst Thomas Sidgwick (another director of Ironopolis) regarded amalgamation as necessary, suggesting that it would allow the club to build “one of the finest football, cricket and cycling grounds in the country”. A number of female football followers were also interviewed, none of whom were in favour of amalgamation. One stated that she would “never subscribe one penny to get the Washers out of debt; they have made their bed and let them lie on it”.

---

134 *Northern Review*, 6th, 13th February 1892
The *Northern Review*'s aversion to professionalism was further demonstrated by two essay competitions for the newspaper’s “Our Lads’ Club” section. In October 1891 members were invited to give twelve reasons why amateurism was preferable to professionalism\(^\text{135}\), whilst in January 1892 members were asked to suggest ways of encouraging amateur football. One of the winning essays for the second competition, by 16 year old office boy Arthur Mennell, argued that the payment of footballers was “something scandalous, and sooner something is done to obviate this the better”; it was “one of the evils of our country”. Before the importation of players, he suggested, a victory for the local team had given “some credit to the town”. The other winning essay, by 14 year old Humphrey Thompson, suggested that money was transforming amateur players into “regular working football machines who rise and fall in value like pig-iron or railway stocks”. He proposed however, that there also ought to be “some substantial individual prizes for amateur players”, or some “article that they might have about them” so that when they were older it would give them “sweet remembrance of their amateur football days”.\(^\text{136}\)

Two weeks before Middlesbrough and Ironopolis were due to play each other in the final of the Cleveland Cup in March 1892, they met for a friendly match which the old club won 5-1. “The decisive character of... victory”, wrote the *South Durham & Cleveland Mercury*, “sent the partisans of the senior organisation into little short of hysterical raptures”.\(^\text{137}\) Should the Middlesbrough players beat their rivals in the cup

\(^{135}\) *Northern Review*, 17\(^{\text{th}}\) October 1891  
\(^{136}\) 1891 census; *Northern Review*, 30\(^{\text{th}}\) January 1892  
\(^{137}\) *South Durham & Cleveland Mercury*, 19\(^{\text{th}}\) March 1892
they were to be “treated handsomely” by the club but they were beaten 4-0. There was a crowd of 12,000 of “the strongest-lunged individuals I have ever come across on a football ground” according to ‘The Free Critic’ in the Athletic News, whilst the game evidently caused fighting to break out in the crowd as the South Durham & Cleveland Mercury stated that there had been “more than one pugilistic exhibition between the rival teams’ supporters”. Having already won the Cleveland Amateur Cup, in April Ironopolis were confirmed as champions of the Northern League, beating Middlesbrough again to win the Charity Cup ten days later; Middlesbrough could “no longer hold any pretentions to rivalry with the younger organisation”.

The 1891-92 season had proved successful for Ironopolis, and in order to have a share of their success, it was no surprise that Middlesbrough were willing to return to amalgamation. ‘Rambler’, so often opposed to the new club but eager for success, stated that,

The differences between the two parties were settled long ago, and what remains are simply sentimental and fanciful... Why continue the struggle? Who can benefit? With one professional team of high class in the town, the football honours of the world can be bid for with every hope of success.

Middlesbrough’s minute book shows that the club decided to enter negotiations when the Football League was extended, though it is not clear whether they hoped to join

142 To comprise 16 teams in the first division and 12 in the second division in 1892 – Taylor, The Leaguers, p. 6
the First or Second division. Terms of amalgamation were agreed between the two clubs in May; the new club was to be called Middlesbrough & Ironopolis United Football & Athletic Company Limited, accompanied by the formation of a new limited liability company. It was decided that a letter would be sent to the Football League asking that the amalgamated club be admitted for the coming season, but shortly after it was reported that the negotiations between the two clubs had stalled and Ironopolis now refused to sign the application to the League. Subsequently two applications were made, one from each club, both of which were unsuccessful. Further meetings were held during the following week, with revisions being made to the conditions of amalgamation as both committees “were wishful for further enlightenment upon certain points”, but by the end of May the amalgamation had fallen through again.

At Middlesbrough’s AGM in May 1892, Albert Borrie (the club secretary) confirmed that terms had in fact been finalised, but it had proved impossible to agree on a name. Blame was placed squarely with Ironopolis for the collapse in negotiations, Middlesbrough now stating that they had only entertained the notion in order to give their rivals a “helping hand out of the position into which they had forced themselves”. The end of negotiations, according to ‘Rambler’, “enraged the members of the Middlesbrough club, as to make them thoroughly determined to do everything it is possible to do to command success” and it was therefore resolved that Middlesbrough would be conducted on limited liability principles, thus providing the funds for the

committee to strengthen the team. 302 £1 shares were taken up at the AGM which, the
club’s president stated, “spoke well for the interest that the members took in the welfare
of the club”.148 Borrie was elected as secretary of the new Middlesbrough Football &
Athletic Club Company Limited and twelve directors were either appointed or elected,
eight of whom can be identified. Only four had previous involvement in the club. In
comparison to the club’s officials detailed already, the majority of these directors were
lower-middle class, including a number of shopkeepers, and far fewer of them had
servants –

148 North-Eastern Daily Gazette, 31st May 1892; Northern Echo, 31st May 1892; Northern Review, 18th
June 1892; Payment for the shares would be spread over the year with only 5s needed initially, and season
tickets for shareholders would be priced at 2s 6d, “terms remarkable for ease and are such as every
member can tackle”.

\textsuperscript{149} 1891 census; \textit{North-Eastern Daily Gazette}, 14\textsuperscript{th} June 1892
In mid-October Middlesbrough’s shareholders were informed that the officials were “dissatisfied with the performance exhibited by some of the players, and... it would be essential to obtain some new men”. Indeed the club’s minute book records that the chairman and secretary duly went to Scotland to procure three new players.\textsuperscript{150} In November, the committee announced that only 550 shares had been taken up. A further 100 were subscribed with the directors emphasising that “one and all should do their utmost and put their shoulders to the wheel to enable the directors to be in no way hampered by financial troubles”.\textsuperscript{151} There was evidently still some uncertainty about the club’s future as just over six months after forming the limited liability company, a meeting was held at which views were expressed “upon the present position of professional football and the advisability or otherwise of continuing a professional team”, but it was decided that the club should continue.\textsuperscript{152}

Middlesbrough ended the 1891-92 season with a loss of £310 10s 3d. In comparison, Ironopolis’ loss totalled £952 12s 2d. The older club had spent £1,455 on players’ wages, their rivals £1,451. £2,149 in gate receipts had been taken at the Linthorpe Road ground, whereas Ironopolis had only received £1,756.\textsuperscript{153} The minute book for Middlesbrough gives an indication of players’ wages during this period –

The club helped new players to find work on their arrival in the town or paid them until a job could be found, which no doubt would have made the decision to join the club much easier, and would have secured players a greater income before the season commenced. It was stated that if Galbraith arrived at the club before 1st August 1892 he would be paid 25s a week until he was found work as a plater. Similarly it was recorded on 1st July that Mackay was to be paid 25s a week until he found work or until the season started, and when Blyth signed in November he was paid 20s a week until a job was found. The minute book also shows that fees were paid out by the club to agents. When Galbraith was signed, his agent was paid £5; half when the player signed and half when he played his first game. Another agent was paid £7 10s per player, whilst the club’s trainer was paid £3 a week.

---

154 Minute Book of MFC, 7th March, 4th April, 13th June, 7th November 1892; Wages would appear to have been relatively high. In 1893 the average professional’s wage was estimated at £3 a week and £2 a week in the close season, but it is also suggested that those playing in the Football League received 30s-40s a week – M. Taylor, ‘Beyond the Maximum Wage: The earnings of football professionals in England, 1900-39’, Soccer and Society 2, 3 (2001), p. 103; See also Mason, Association Football, pp. 96-97; Though we do not have directly comparable wages for workers in Middlesbrough, coal hewers and labourers in Durham were paid 30s and 22s 6d per week respectively in 1888 – Mason, Association Football, p. 103

155 Minute Book of MFC, 13th June, 1st July, 7th November 1892

156 Minute Book of MFC, 13th June, 8th August 1892; The club’s trainer, E. Stephenson, replaced Joseph Grierson who according to the minute book had “failed to report back”, and would be staying with Ironopolis (8th August 1892). The North-Eastern Daily Gazette had noted in 1890 that the standard of
Middlesbrough’s minute book also records the difficulties experienced by the club with footballers’ behaviour, and drinking in particular. As Mason has suggested, poor results on the field were often attributed to players’ excessive drinking, whilst Dixon and Garnham point out that professional footballers had both the time and money “to indulge in the pastime of drinking”. Roberts had used foul language towards the directors, had been “addicting himself to drink” and asked to leave the club. He was duly released, because of drinking and his conduct, but also in part because he had not shown “such skill and ability in his play” as had been expected. Galbraith had been drunk twice and had “stayed out [for] several nights”, and was suspended for a month. Two weeks after his last offence, Galbraith was again “hopelessly drunk”, and was suspended for two months. Stephenson was cautioned after staying out until 11.45pm and questions were raised about his sobriety, whilst McCrone was reported to have disappeared. McKnight was suspended for not playing to the best of his abilities, particularly in one match where “he did not endeavour to play in anything like the manner he can do and... did not try”.

Ironopolis were said to be hindered by the lack of shares taken up. Of the £2,000 available, in August 1892 only £844 had been subscribed, of which £192 10s remained unpaid. A bazaar was held in September 1892 to raise funds for the club, and it was

Ironopolis’ play was “due to the indefatigable attention paid to the men’s bodily welfare” by Grierson – 24th September 1890. The 1891 census lists Grierson as a brass finisher.

Minute Book of MFC, 28th February 1893

Northern Echo, 20th, 26th August 1892; At their AGM, the shareholders were informed that their debt was due to “a most unfortunate and unforeseen combination of circumstances”. For example in the Cleveland Cup they had played St Augustine’s in a snow storm resulting in a small gate with their half
hoped that the proceeds would enable the club to move to the Ayresome Park Estate where they would be able to provide facilities for cycling and athletics as well as a new football ground. The bazaar raised £450, which after expenses left £275 available for the club to spend on the ground. On opening the bazaar, Isaac Wilson (the former MP for Middlesbrough) commended the football club for giving “pleasure, health, and recreation to the inhabitants of the town”. The Marquis of Londonderry attended to present the Northern League trophy to the Ironopolis chairman, and he sang the praises of football, noting that, “It required health and strength, fixity of purpose, swiftness of foot, and that bull-dog courage which was characteristic of the British nation”.

Another Ironopolis victory over Middlesbrough was recorded in December 1892, there being “little ground for doubting as to which is now the better team”. The victories continued for Ironopolis, and by 28th January 1893 they had won the Northern League for the third consecutive season. Their status as the better of the two teams was further enhanced when they reached the quarter final of the FA Cup in February. Having attracted a crowd of 10,000 in the previous round, it was not surprising that the crowd at the next game against Preston North End was estimated to have been 14,000-15,000 (compared to 1,500 at Middlesbrough’s home game on the same day), which amounted to only 11s 8d. At the replay of this tie at the Paradise Ground, “their half of the gate barely covered the cost of cleaning the snow from the ground”. More significantly the miners’ strikes in Durham had coincided with a point in the season when the club had hoped to get good gates, and instead “had to admit hundreds of spectators free who under ordinary circumstances would have paid for admission”. The strikes are not mentioned by Middlesbrough as having affected their attendances.

Middlesbrough FC themselves built their ground, Ayresome Park, here in 1903. The Ayresome farm had also been used as a football field by Middlesbrough Imperial FC in 1888 – Northern Review, 10th November 1888

Northern Review, 8th October 1892

North-Eastern Daily Gazette, 27th, 30th September 1892; Northern Echo, 28th, 30th September 1892

South Durham & Cleveland Mercury, 10th December 1892

Only six clubs competed in the Northern League in 1892-93, therefore the title was won relatively early in the season when Ironopolis won nine of their ten League fixtures.
would have included a number of spectators who might normally have watched Middlesbrough play instead. ‘Rambler’ suggested that the committee “must have thrilled and glowed when they viewed the mighty concourse of spectators”, as the large crowd meant gate receipts of more than £470. The Athletic News commented that,

It was a ‘red letter day’ in every sense of the term, in the history of the Ironopolis club. Here, there and everywhere it was the one and only topic discussed... I never remember witnessing so much excitement over a football match as prevailed on every side during Friday or Saturday. From the north, south, east and west did the people flock in Middlesbrough...

**d. The End of Professionalism**

The death knell first sounded for professionalism in February 1893 when it was announced that Middlesbrough’s professional players had to take a pay cut or leave the club. Players had already had their pay reduced to £1 per match “owing to their indifferent performance”. The players were now informed that,

In consequence of the wretched performances of the team and the serious effect this had had on the gates and was likely to have and the consequent severe loses which would have to be met in order to carry out the season’s programme, it was unanimously resolved that all players paid by the week be informed that for the remaining part of the season they would only be paid 30s per week...

From the wage details given in table 2.7, this would have meant considerable pay cuts for many players. Five players did not agree to the reduction in wages and two subsequently joined West Bromwich Albion whilst another defected to Ironopolis. A number of local amateurs offered their services to the club, and it was “gratifying to the Middlesbrough executive to find that with six local lads among the team” they were

---

168 Athletic News, 20th February 1893; Northern Echo, 20th February 1893; Northern Review, 26th February 1893; The game ended 2-2, and Ironopolis were beaten 7-0 in the replay at Preston, to which 170 supporters had travelled from Middlesbrough – Athletic News, 27th February 1893; Northern Echo, 28th February 1893

169 Minute Book of MFC, 27th, 28th February 1893
able to win their next game against Royal Arsenal. The cut to the players’ wages effectively signalled the end of professionalism for the club, and on 23rd March it was confirmed that they would be reverting to amateurism. This was welcomed wholeheartedly by ‘Rambler’ who stated that the main problem with professionalism had been the “high rate of remuneration paid for very little work which has made so many players idle loafers on the street”, as demonstrated by the incidents of drunken behaviour above. If players had been paid less, alongside completing “an honest week’s work”, there would have been little of the “humbug and humiliations the manager and supporters of clubs have been compelled to bear”. A couple of professionals should be retained by the club however, to “keep our lads up in fast work” and to look after the ground. At the end of the season, Middlesbrough’s accounts showed that the club had made a loss of over £645, proof according to the Athletic News, that “the Iron Capital is not yet big enough to run two professional clubs”. Middlesbrough’s subscriptions had more than halved, and gate receipts totalled £400 less than the previous season despite an increase in admission prices, and the directors concluded that “interest in professional football in this district was very materially on the wane”. It was proposed that the club ask Middlesbrough Vulcan to amalgamate with them, which would “prove of the greatest benefit in forwarding amateurism”, and bring new (and free) players in to the club. Vulcan’s committee decided unanimously in favour of amalgamation.

170 Minute Book of MFC, 1st, 3rd, 13th March 1893; Athletic News, 6th, 13th March 1893; North-Eastern Daily Gazette, 3rd March 1893; Northern Echo, 4th, 7th March 1893

172 Minute Book of MFC, 4th August 1893; Athletic News, 29th May 1893; North-Eastern Daily Gazette, 26th May, 1st June 1893; Northern Review, 22nd July 1893
The relatively small crowd of 2,000 for the Cleveland Charity Cup final between Middlesbrough and Ironopolis led the *Athletic News* to claim that “the game is to all intents and purposes a dead letter”. Despite the fact that Ironopolis had not yet announced whether they would continue with professionalism, they decided to proceed with their new ground and cycle track at Ayresome Park.\(^{173}\) The club failed in an application to join the Second Division of the Football League in June 1893, and shortly afterwards the Northern League announced that they would only allow amateur teams to compete.\(^{174}\) Following Accrington’s withdrawal from the Second Division, Ironopolis succeeded in a second application to join the League. ‘Rambler’ wondered whether the club’s directors deserved “congratulation for great and wonderful boldness and foresight, or condemnation for extraordinary foolhardiness”. The *Athletic News* on the other hand, thought that their admission to the Football League had “roused the enterprise” of the club.\(^{175}\)

In a circular to shareholders, Ironopolis’ chairman promised that joining the Second Division would provide the supporters with a “better class [of] football”. However, shareholders were also asked to take up a fully-paid £1 share (which would include a season ticket), and to use their “best endeavours to induce one or two... friends to take up the same amount”. The onus was placed on the club’s supporters as it was stated that without “the necessary support they cannot carry on the club”. It was confirmed at Ironopolis’ AGM in August (at which there were only 24 people present) that the club had a debt of £246 13s 9d, though the committee were quick to point out that this was

\(^{173}\) *Athletic News*, 24\(^{th}\) April, 8\(^{th}\), 22\(^{nd}\) May 1893

\(^{174}\) *Northern Review*, 3\(^{rd}\), 10\(^{th}\) June 1893

less than the previous season. It was proposed to pay players less – £1 a week and no
bonus (considerably more than the reduction in wages to 30s that Middlesbrough had
introduced), even though they were already being paid less than professionals
elsewhere, a situation that meant that at the start of the 1893-94 season the team only
included one player from the previous season. The team had received a £35 bonus on
winning the Northern League but it was pointed out that they had done “nothing after
the money was given them”; it was agreed that it had been a mistake to award them a
bonus before the season had actually finished. In contrast to Middlesbrough’s
statements, the chairman proclaimed that “it would be utterly impossible to run an
amateur team in opposition to a professional team in the town”.176 On the opening day
of the season in September 1893, Middlesbrough played Stockton at home with a crowd
of only 700. On the same day, Ironopolis were beaten by Liverpool in their first Second
Division match at the Paradise Ground in front of a relatively modest 2,000
spectators.177

The gates for both Middlesbrough clubs remained small. The Northern Review stated
that this could be attributed to the trade depression178 suggesting that if trade did not
pick up, both clubs “will bear a big share of the paucity of funds”. However, ‘Rambler’
also suggested that if Ironopolis were in trouble, “it is of its own seeking and the blows
it may receive will be deserved”.179 In December a friendly game at the Paradise
Ground against Darlington attracted a crowd of only 200 spectators, leading the South

in inmates in the workhouse.
179 Athletic News, 4th, 11th December 1893; Northern Review, 4th, 25th November, 9th December 1893
Durham & Cleveland Mercury to wonder “how the ‘Nops’ executive manage to keep the club going”. The answer to this was that they no longer could. The North-Eastern Daily Gazette reported on 15th December 1893 that a notice had been issued to the shareholders informing them that a resolution would be submitted suggesting the club enter voluntary liquidation and it was unanimously agreed to wind up the club. The directors blamed the “very dull state of trade and the small amount of support that was being extended to the club”. This was coupled with the fact that more than £1,574 was owed to creditors, one of whom had already taken the club to court. Nevertheless the committee resolved to continue the team to the end of the season, after which it would be restructured and an “experienced working committee formed to manage the match department”. The Athletic News viewed the decline of the club as “a sample of what we may expect if the present ruinous wages are paid to players”. For ‘Rambler’, it merely confirmed that the club’s decision to stick with professionalism had been a bad one. More importantly, it had had “a bad effect on the whole of the clubs in the district... if the Nops had followed the lead of the other clubs everyone would have benefitted”.

The slump in football’s popularity continued into 1894. Ironopolis’ first round FA Cup tie at the Paradise Ground attracted only 1,500 spectators; a fraction of the crowd that had attended a year before. In contrast, for Middlesbrough’s tie against the professional club Newton Heath in Manchester, the club felt it necessary to reserve two saloons on the train across the Pennines and provide cheap hotel accommodation for

travelling supporters. Indeed, the average attendance for Ironopolis’ home League matches was 1,300, the lowest for both divisions, whereas that for Middlesbrough’s first season in the League in 1899-1900 was 5,925. The *Northern Review* felt that both of Middlesbrough’s clubs could have done more to attract bigger crowds. ‘Rambler’ suggested that it was “bad business” that games not been organised between the two. Apart from the money that would have been generated, “it might raise up the keen partisanship so frequently denounced, but which created thousands of spectators, and so help the clubs substantially”.

That professionalism could not survive in Middlesbrough was further evidenced when Ironopolis’ directors informed their players that they could no longer afford to pay them at all, offering instead, “the privilege of playing until the end of the season”. It was expected that only two or three players would immediately leave the club, with the rest staying at Ironopolis until the end of the 1893-94 season – the *Athletic News* reported that employment had been found for almost all of the players meaning that they could afford to play for nothing. The local press speculated as to whether the club would be in existence the following season. ‘Rambler’ hoped that the club would carry on “if only to do something to recoup those who have, in storm and sunshine, stuck to the club”, whilst the *North-Eastern Daily Gazette* stated that those involved with the club were “more determined than ever that they will not allow themselves to be snuffed out”. Indeed the Ironopolis committee began advertising for new players for the forthcoming

187 *North-Eastern Daily Gazette*, 20th February 1894; *Northern Review*, 24th February, 10th March 1894
Having received “numerous applications from players of good repute”, in late April, the *Northern Echo* reported that Ironopolis had acquired eight new players from Scotland to play in a game against Newcastle attended by 3,000 spectators.

Whilst Ironopolis continued their decline and drop in standards of play, at the same time Middlesbrough succeeded in winning the Northern League, the Charity Cup and the Cleveland Cup. The latter drew a crowd of only 2,000 but thankfully the “rough and rowdy lot” were absent. The decision to revert to amateurism was clearly justified. At Middlesbrough’s annual dinner, the captain (Thomas Bach) remarked that the team and directors had never before been on such harmonious terms. William H. Thomas, in congratulating the team on their successes, was delighted to have justification for his belief that “the game should be played for the benefit of the players and not for the benefit of the spectators, for when it became the latter a noble game became degraded”. The club’s accounts further vindicated the decision to abandon professionalism, as all loans had been paid off, the overdraft was reduced by £100 and a profit of more than £29 had been made – “a most satisfactory and welcome change after the depressing experience of the last few seasons” according to Borrie.

A meeting of the Ironopolis committee was held on 30th April 1894 at which it was decided that the club would continue as a professional side. The *North-Eastern Daily Gazette* stated that if a good team was brought together there seemed “little fear but that the efforts of those in authority will be heartily supported by the public, for there are

many hundreds of enthusiasts in the North who would willingly travel a few miles to see... a really good team on the Paradise ground”. However, just ten days after the committee’s announcement, a resolution was passed declaring,

That in consequence of the high rent asked for, and other demands made by the tenant of the Paradise Field, and their inability to secure another ground, the committee, with great regret, find it impossible to carry on the club for the present.

By late May Ironopolis had given up their place in the Football League. The Athletic News reported that after a storm had damaged the stands at the Paradise Ground, “the landlord came round and relieved the club of the ground”. The last mention of Ironopolis in the local press is their inclusion in the preliminary round of the FA Cup, published in the South Durham & Cleveland Mercury in August 1894. This passes by without any further comment, their place being taken by another side when the tie was played in October.

**e. Conclusion**

It is evident that the failure of professional football can be attributed in part to the strength of the amateur ethos, both amongst those running Middlesbrough FC and within large sections of very vocal newspapers. For example, when Middlesbrough were presented with the Cleveland Charity Cup in 1893 by shipbuilder Waynman Dixon, he remarked that their return to amateurism was “a great satisfaction to many of the old supporters”. He stated that when professionalism encroached on sport “it tended

195 *Athletic News*, 11th June 1894; *Northern Echo*, 30th May 1894; *Northern Review*, 19th May, 9th June 1894; The Football League told Ironopolis that “if at any time they should be in a strong position and apply for a place in the League, such application should be treated as favourably as possible” – S. Inglis, *League Football and the Men Who Made It* (London, 1988), p. 41
196 *South Durham & Cleveland Mercury*, 17th August 1894
to lower it”, and it was no longer “pursued for those health-giving and ennobling qualities which they desire to see”. At the beginning of the period examined here, professionalism was abhorred, the payment of players only being undertaken by Middlesbrough in order to avoid being swept away by Ironopolis. The *North-Eastern Daily Gazette* argued that the introduction of professional football had meant that “a vast demand has been created for the public amusement of looking on” at the game. Now, it was the ‘paymaster’ who decided whether matches would be “cunningly lost” or “deliberately thrown away”; the “bubble of the sport’s popularity” was about to burst.

It was suggested on a number of occasions that professionalism would lead to a desertion of Middlesbrough’s more respectable supporters, as a direct link was made between the professional game and a decline in the behaviour of spectators. Shortly before the formation of Ironopolis, the *North-Eastern Weekly Gazette* reported on rumours that the importation of players would mean that “the better class of people” would stop attending football matches. Likewise in 1893, the *Northern Review* suggested that the decline of professionalism would thankfully mean “the desertion of the rowdy crew” and the “hundreds of foul-mouthed blackguards” who had forced out the more respectable spectators. The “Our Lads’ Club” essays in the *Northern Review* also stated that “the spectators at professional matches generally behave in a much worse manner than do those at amateur matches”, and a few months later another member of the club noted the “rowdyism” displayed by professionals on their train

journeys to matches.\textsuperscript{201} Middlesbrough’s secretary stated in May 1893 that the club were hopeful that “many old supporters of the game who had lost their interest in it would... renew their support in the future”.\textsuperscript{202} The \textit{Northern Review} differentiated between Middlesbrough’s supporters and those favouring professionalism claiming that the majority of those who had attended the meeting to form Ironopolis were “of the callow youth type, who are never admitted into the councils of the premier club”.\textsuperscript{203} The partisanship that accompanied professional football led the \textit{Northern Review} to argue that there was a danger that the sport would “burn out owing to excess passion poured upon it”. “Howling like madmen, the shoulder-high absurdity, and general rejoicing over a victory” had no place in football.\textsuperscript{204} Nevertheless, it is also clear that the short-lived rivalry between Middlesbrough and Ironopolis did bring about an increased interest in football in the town, assisted by the amount of coverage given to football in the local press. When Ironopolis were disbanded, the \textit{Athletic News} abandoned their Teesside column, remarking that,

\begin{quote}
Teesside football does not make much of a figure in these columns, for the simple reason... that Teesside football has become such a minor quantity. Time was when Middlesbrough was the northern metropolis of the game.\textsuperscript{205}
\end{quote}

Whilst it is not possible to compare the shareholders of Middlesbrough and Ironopolis, we can contrast the directors and officials of the two clubs. It would certainly appear that the officials of the newer club were more diverse in background, some directors having working class occupations. The reasons why individuals chose to involve themselves with either club are unclear however. Ironopolis was formed

because supporters wanted to watch a higher standard of football rather than because they thought that players should be paid for doing so. There is also little evidence to suggest that most ordinary supporters or shareholders felt any particular affinity with their club, it having been suggested that many people watched whichever team was able to offer the best football. However, that there was little to differentiate the two clubs might help to explain why this attempt to establish professional football failed. The clubs’ grounds were close together and the price of admission was the same, and there was little to choose between the teams for much of the period. The town could not generate the large amounts of money necessary to maintain both clubs. Whilst Ironopolis made it as easy as possible for working people to buy shares, this left the club constantly waiting for money. The large amounts of money involved, rather than the principles of amateurism and professionalism made the downfall of one of the clubs inevitable.
Chapter 3. Amusement and Recreation: An expanding sporting culture, 1885-1900

Despite the growth of both amateur and professional football as the spectator sport from the middle of the 1880s, other aspects of Middlesbrough’s sporting culture continued to develop, embracing a variety of competitive and recreational sports. Though none attracted the same sustained level of attention from either the public or the press as football, the number of sports clubs grew throughout this period, allowing for an increase in participation. Participants were largely drawn from the town’s lower-middle and middle classes, and for those with free time and a disposable income, it was possible to be involved in a number of sports. For most working class men and women, their only contact with sport was spectating at large events or attending sports days. This chapter examines the growth of a number of sports, outlining why some thrived, others declined and some, such as baseball, proved to be passing trends. A number of clubs retained their exclusivity, and this chapter looks at how and why this was achieved. Moreover, by outlining the sheer number of clubs that were formed before the end of the nineteenth century, this chapter will demonstrate the growing popularity of sport despite the difficulties faced by some clubs.

The development of sport in Middlesbrough was defined by the growth of clubs amongst the town’s middle class groups. As well as the precarious existence of those clubs that struggled to increase membership, other clubs, new and old, flourished. In outlining the reasons behind the proliferation of clubs, Peter Clark points out that such organisations catered for “a growing plurality of interests”, often driven by
commercialism, competition, fashion and specialisation. Clark notes that religious and philanthropic organisations struggled to increase membership, whilst commercial, municipal and voluntary clubs gathered support, and it was the latter that were the most successful in Middlesbrough. Furthermore, Simon Gunn suggests that the purpose of clubs was “to provide an arena for eating, drinking and socialising for middle class men”, and Middlesbrough’s clubs offered the chance for the migrant middle class to socialise together. As John Lowerson states, within urban and suburban settings, sports clubs assisted greatly in “delineating status and social achievement”. In addition Mike Huggins suggests that the Victorian period was characterised by the numerous non-commercial and unsubsidised voluntary organisations, as was Middlesbrough’s sporting culture.

a. The Effect of the Town’s Expansion and Urbanisation

Whilst many sports grew during this period, two factors affected the development of some clubs – the continued expansion of Middlesbrough and its industries, and the popularity of football. It was reported on a number of occasions that land occupied by sports clubs was required for building purposes. Despite the inevitable damaging effect this had on clubs (particularly financially), little opposition or complaint was reported in the local press. This may have been because building and the expansion of business was unavoidable, being necessary to continue the town’s progress. Yet as the town continued to grow, it became increasingly difficult for sports clubs to find available and affordable land on which to play. Middlesbrough Cricket Club was greatly affected by

1 P. Clark, British Clubs and Societies 1580-1800 (Oxford, 2000), p. 470
2 Clark, British Clubs and Societies, p. 474; S. Gunn, The Public Culture of the Victorian Middle Class: Ritual and authority and the English industrial city, 1840-1914 (Manchester, 2000), p. 84
building plans. In August 1891 it was reported that the club would soon be required to leave their ground as the land was required for building. The *Northern Review*’s ‘Rambler’ wondered,

> Is it in vain to look to the Middlesbrough Owners for relief from dread that the thousands of pounds sunk, money spent, voluntary and paid labour, should be as nothing some day when the postman drops at the Secretary’s door the six months notice to quit [the land].

In November 1892 the club confirmed that they would have to leave their ground and the secretary (Albert Borrie) reported that “they had every reason to hope that the Middlesbrough Owners were prepared to render assistance in the matter”, whilst the club’s president assured members that the Owners would bear the cost of moving and had earmarked land for the club in the Grove Hill area. The assumption that the Owners would assist suggests that they were relied upon to help the town in difficult times. The monetary assistance that was forthcoming from local elites may also indicate the importance accorded to the sport, and indicates a desire to see the sport flourish. ‘Rambler’ called on “every member, the gentry and tradesmen of the town” to offer their assistance in the face of the indifference of the committee,

> The average individual expects to get his amusement and recreation, not only free but without any bother on his part, and who takes on the burden doesn’t trouble him in the least. He overlooks the fact that the word ‘free’ is now an absurdity, somebody pays and generally not the people who gain the advantages... It is time the apathy which exists was smashed, and the fur made to fly.

---

4 *Northern Review*, 1st August 1891, 16th April 1892; Lowerson points out that all small clubs in England’s larger towns faced a constant threat from builders and from the spread of new suburbs – Lowerson, *Sport and the English Middle Classes*, p. 81

5 *North-Eastern Daily Gazette*, 3rd November 1892; *Northern Echo*, 3rd November 1892; Polley argues that as the Owners were able to sell land as and when it suited them, they were able to control the extension of the town from the beginning – L. Polley, ‘Housing the Community, 1830-1914’, in A. J. Pollard (ed.), *Middlesbrough: Town and Community 1830-1950* (Stroud, 1996), p. 161

6 *Northern Review*, 29th April 1893
The new ground was erected at Breckon Hill Road, a location that was thought to be “as good as can be expected” as it was fifteen minutes walk from the train station and the same distance from the arterial Linthorpe Road. The Middlesbrough Owners contributed £100 to the £400 costs. When this was announced to the club’s members, Councillor John Mardon said he was sorry that “the employers of labour in Middlesbrough did not give that encouragement to sport that they might well do, but it was as little as the Middlesbrough Owners could do for a town out of which they had made so much money”. The *Northern Review* thought there would be little problem in raising the rest of the money as there were not only many who “derive much pleasure from reading the newspaper accounts” of cricket matches, but a much larger number who “in their youthful days, when the cares and ties of business were nonexistent... took part in many an exciting match, and who... still take a lively interest in the game”. This suggestion was borne out as within a few weeks, £123 6s had been promised in subscriptions. The *Northern Echo* listed some of the contributors to this fund, which included a number of industrialists and employers. That the largest donation came from a Swedish ironmaster, suggests that concern for the club was not just centred on preventing the demise of a quintessentially English game, and the club may have been ascribed a more important role in the community.

By the time the new cricket ground was opened in June 1894, £300 had been subscribed to the club.\(^9\)

As Middlesbrough Bowling Club also played at the cricket ground they were left without a green when the cricket club moved. Its secretary had asked the Middlesbrough Owners whether “they would be prepared to let the same or any portion” of the old cricket ground, or alternatively whether “they could offer us any other piece of land which would be suitable for making a bowling green”. The secretary also made enquiries about two other pieces of land, but in the summer of 1895 the club played their games in Albert Park.\(^11\) In October a sub-committee of the club visited a tennis ground in Linthorpe and the ground of Ironopolis FC to assess their suitability,\(^12\) and in

early 1896 it was agreed that the club would purchase land in Linthorpe. Subscriptions were increased from 5s to 10s to cover the costs, and a circular was sent to members to ask how many shares they were willing to purchase. A ten year lease was subsequently secured and the committee was authorised “to borrow all money necessary from the members of the club”.

When the formation of a sailing club was proposed in 1888, it was pointed out that there was an “entire lack of a suitable place to keep, or moor, small craft” on the river, and at the first dinner of the Tees Sailing Club in 1891 it was stated that “the great drawback which the club had to contend with was the want of a proper mooring place for their boats”. The lack of space on the river and the associated costs of building new premises was epitomised by the problems encountered by the Middlesbrough Amateur Boating Club. In 1897 the club were informed that Samuelson & Co ironworks (whose owner, Sir Bernhard Samuelson, was a vice-president of the club) required the land occupied by their boathouse in order to extend. That the club’s boathouse was located amongst the town’s industry was demonstrated by the Cleveland News’ description of the location “with its clouds of smoke, mountains of slag, and bad access to the river”. In February 1898 a circular was issued informing the public of Samuelson’s plans, stating that,

16 Minute Book of Middlesbrough Amateur Boating Club (hereafter Minute Book of MABC), 10th June 1897; Cleveland News, 28th March 1885; That the club would have to move so that Samuelson’s could expand had first been reported in 1876. The club raised £25 for a new boathouse but the depression in
The committee confidently hope that all the members, past and present, will realise the need of a combined effort to carry the club through this crisis in its history. The club is free from debt, and it is therefore hoped that the extraordinary difficulty now presenting itself will be overcome. It is very desirable that such a healthy pastime as rowing should not be allowed to fall through in Middlesbrough...

At a subsequent meeting of the club, it was reported that a new boathouse would cost £250. Raylton Dixon (the club’s president) donated £20, John Livingstone & Sons £7 2s, £50 was promised to the club at the meeting and a further £65 subscribed at the AGM a month later. Dixon informed the club that he had met with Sir Joseph Pease (one of the Middlesbrough Owners) who was “very anxious in any way to help so good an institution”. The club decided to proceed with a site offered by Samuelsons further down the river, stating that they “either have to accept the site offered to them or wind up the club”. However, they were informed a few months later that Samuelson’s would not in fact require them to move for one or two years. In July 1900, the club were given two months notice to move, but they were still without a suitable site four months later. Their boats were initially moved to Craggs & Sons at Stockton (Ernest and Robert H. Craggs being vice-president and deputy-lieutenant of the club respectively) and were then sold for £19, with the premises and fittings also sold for only £15 10s.

Middlesbrough Rovers Rugby Club also struggled to find a permanent home. Some reports at the start of this period state that they played at the football club’s Linthorpe trade prevented the club from raising a larger amount, and Samuelson’s allowed them to stay – Daily Gazette, 14th March 1876

Road ground, whilst it was also reported that they played at the Paradise Field, which suffering from “dirty approaches and the unhealthy smells from the manure heaps”, had deterred many from visiting the ground.  

In late 1888 the Northern Review’s ‘Rambler’ announced that the club had died “of sheer inanition, after a lingering existence”, and published a somewhat mocking notice on behalf of the club –

\[
\text{Wanted: By the members of the lately defunct Middlesbrough Rovers (Rugby) Club, something to do on Saturday afternoons. No honourable occupation refused, not even places in the best Association teams.} \]

The club’s eightieth anniversary book suggested that Rovers ceased to exist when they lost use of the Paradise Field (it being rented by Ironopolis FC in 1889). There was no further mention of the club in the local press until November 1892 when it was reported that an “influential meeting of gentlemen” had been held for the purpose of forming Middlesbrough Rugby Club. Their new field on Marton Road was further out of Middlesbrough than they would have preferred (two miles from the centre of the town) and was not served by public transport. Though the club’s second game was watched by “quite a fashionable party of spectators” and was kicked off by the Mayor, a year later the club were required to find another field as the land was required for the new asylum. The role of the Owners is demonstrated again when the club’s president (Dr John Ellerton) reported in 1893 that the committee would “wait upon the Middlesbrough Owners and the Cricket Club with a view to obtain permission to play on the old cricket club ground”. In early 1894, the club were using a field in Linthorpe Village, and the North-Eastern Daily Gazette proclaimed that “interest in the rugby

\begin{footnotes}

code at Middlesbrough has seen wonderful developments”; the number of spectators at one match being “a revelation to many of the older supporters of the game”.\textsuperscript{25} There was no further mention of the club until August 1900, when the \textit{North-Eastern Daily Gazette} published a circular from Mr A. Backhouse Fossick suggesting “the formation of a football club under Rugby Union Rules”, which “would be welcomed by a number of old public school men and others who reside in the district”.\textsuperscript{26} Another effort was made to resurrect the game in 1912, when a game was arranged between a team from Middlesbrough and district and Hartlepool Rovers.\textsuperscript{27} A further attempt was made a year later. A letter was published in the \textit{Sports Gazette} which as in 1900, linked the game to public schools. It suggested that, “there must be sufficient ‘Varsity, public school men, and other interested people in Middlesbrough” to warrant the formation of a new club. A club was not formed until 1920.\textsuperscript{28}

The shortage of land and open spaces was demonstrated again on a number of other occasions. For example when discussions took place in 1890 about the possibility of building a cycle track, the North Ormesby & Middlesbrough Cycling Club stated that not only was such a venture too costly, but that there was no suitable land on which to build.\textsuperscript{29} Six years later when Erimus Baseball Club was formed, they were forced to play their home matches in Haverton Hill (on the north side of the Tees in County

\textsuperscript{25} \textit{North-Eastern Daily Gazette}, 16\textsuperscript{th} January 1894; Though the associated costs of moving again had left the club with a debt of £7, the club joined the newly formed Cleveland Rugby League which was due to begin the following season. Durham) “owing to the scarcity of suitable grounds in Middlesbrough”.\textsuperscript{30} Furthermore in the same year, the Middlesbrough Baseball Club had to accept the “onerous, arbitrary and unfair” rental agreement with Middlesbrough FC to play their matches at the Linthorpe Road ground as there were so few suitable fields on which to play.\textsuperscript{31}

b. The Effect of Football

As well as having to contend with the difficulties of finding somewhere to play, both Middlesbrough Cricket Club and Middlesbrough Rovers Rugby Club attributed their demise partly to the popularity of football. As Tony Collins points out, by the mid-1890s rugby in the north-east had been marginalised by the success of the region’s football clubs.\textsuperscript{32} It is indicative of Rover’s problems and the popularity of football that their ground was taken over by Ironopolis Football Club. With games being played at the same time of year, it was difficult for rugby to compete with football given the growing number of football teams and leagues in Middlesbrough. Without a local rivalry to inject some excitement (as had proved important in the case of football with Middlesbrough’s cup matches against Redcar), interest in Rovers continued the decline that had begun at the start of the decade. In April 1885, the \textit{Northern Echo} reported on Rovers’ game against Halifax Free Wanderers on the Linthorpe Road football ground, and pointed out that the attendance was “far short” of the 2,000 spectators who had watched Middlesbrough FC play there the day before.\textsuperscript{33} Though the club had once been “the embodiment of rugby greatness” in the area, they only had 67 members, in comparison to Middlesbrough FC’s 550, and despite “the gallant efforts of enthusiasts

\textsuperscript{30} Northern Weekly Gazette, 7\textsuperscript{th} March 1896

of the rugby game” rugby was “slowly dying out in Middlesbro”\(^3^4\). Coupled with the difficulties in finding a field on which to play and the costs of moving grounds, it is hardly surprising that the club had disappeared by 1897.

Whilst cricket and football were played at different times of year, and were therefore not competing for the same spectators, it was becoming increasingly apparent that cricket could not compete with football in terms of enthusiasm amongst the sports enthusiasts. Moreover, it was felt that cricket lacked the excitement of football (particularly the rivalry played out in the press between Middlesbrough and Ironopolis), to which spectators had become accustomed, and when the cricket season began in the summer, the sport on display did not hold their attention. It is this aspect, more than interest in football per se, that affected cricket’s popularity. As Sandiford states, cricket’s officials felt that the sport needed to be “buttressed and preserved in the face of rapid cultural and technological growth”. Thus whilst football was blamed, cricket itself also needed to innovate. In 1885 the Cleveland & Teesside Cricket Association was formed as a means of rejuvenating local cricket. It was felt that the game “was at a very low ebb”, and a cup competition was introduced in an attempt to emulate similar successes in football. It was hoped this would be the “means of causing a little excitement and infusing more interest into the game”\(^3^5\). Neither the local Association nor the cup did little to help the fortunes of Middlesbrough’s clubs. Whilst the *Northern Review* suggested that the Ironopolis Cricket Club in South Bank were notable for an

\(^3^4\) *Daily Exchange*, 5\(^{th}\) March, 28\(^{th}\) September 1886; *Northern Echo*, 18\(^{th}\) August 1888; *Northern Review*, 12\(^{th}\) November 1887; An application was made to join the Durham County Association, and having been turned down due to the club not being in Durham, it was suggested that they move to Port Clarence in order to be in the county, a move that the members voted against – *Northern Echo*, 18\(^{th}\) August 1888

\(^3^5\) *North-Eastern Daily Gazette*, 23\(^{rd}\) April 1885; K. A. P. Sandiford, ‘Cricket and the Victorian Society’, *Journal of Social History* 17, 2 (1983), p. 310
“absence of backbone and stability in the club management”, the *Daily Exchange* blamed the committee of Middlesbrough Cricket Club for their own misfortunes, and pointed out the necessity of “a revival of interest and revival of life” in the club. After all, cricket “should not be allowed to drop into the second place” behind football. Football had “swallowed up all interest in other athletic games”, but cricket was the “older, more scientific, the more national game”. It was thought that if the members and committee “put their shoulders to the wheel, the slough of despond will soon be past”. Middlesbrough reached the final of the Cleveland Cup in 1887, and it was hoped that the tie against Redcar would cause a great deal of excitement, but the first of the three Saturdays on which the final was played drew a crowd of only 400 spectators. The popularity of football was demonstrated in January 1889 when the cricket club arranged a football match on their field to take advantage of the influx of people in the town for the visit of the Prince and Princess of Wales. It attracted a crowd of 7,000 and gate receipts of £100. The *Northern Review* commented that, “those of us who remember Middlesbrough cricket more than twenty years ago, can only sigh when we look at it now. In those days we had at Middlesbro’ one of the best town elevens... the equal of most county teams”.

The cricket club could not compete with the football club when it came to attracting spectators. Nevertheless a gate of 900-1,000 for a cup tie in July 1890 was regarded as evidence that there was “a large number of people who take an interest in cricket, and

who, if properly catered for, would follow the game in the same faithful manner as they
do football”. The spectators were described as “all vivacity and life, in marked contrast
to the apathy and listlessness generally pervading the cricket fields of the district”. The
popularity of football in the town is further demonstrated by the comment made in the
North-Eastern Weekly Gazette that the Middlesbrough cricket professional (George
Millar) would become even more popular after he expressed a willingness to play for
the football club. At the end of 1890, a piece appeared in the North-Eastern Weekly
Gazette asking whether innovations could be made in cricket to make it more exciting,

Can the conditions under which the game is played be so varied as to
render it more attractive and, therefore, more profitable to all concerned?
Some may say we don’t want to see cricket played for profit... but still
there is no reason why something should not be done to make the game
more attractive. My impression is that the larger the number of spectators
the more interest do the players take in the game... This demonstrated the recognition by some, that cricket was to be increasingly regarded
as a business, and one which should pay more attention to its finances. Though
Sandiford has stated that cricket’s administrators resolutely refused to sell the game as a
spectator sport in the way that those administering football had, there was a recognition
of the possibility that cricket was in danger of being overtaken by football. The
comparative lack of excitement at cricket matches was demonstrated by one
contemporary writer who pointed out that spectators at matches often came to the
ground “to pass away the time... solaced by tobacco and occasional ‘half-pints’”, in a
“drowsy and apathetic state”. Further efforts were made to encourage cricket in
Middlesbrough with the formation of the Middlesbrough Park Cricket League in 1891,

105; Sandiford, ‘Cricket and the Victorian Society’, p. 309
whilst the securing of a visit by the touring professional team the United All England Eleven in May 1891, led the *Northern Echo* to praise the cricket club in its “endeavours to resuscitate the interest of the Middlesbrough public in the noble game”.\(^{45}\) The novelty of a visit by a team of ‘lady cricketers’ drew a crowd of 1,500 to Middlesbrough’s cricket ground, the largest at the ground for some time, and it was suggested that “no doubt our local players would feel a twinge of envy at the greater attractive powers of the fair sex”.\(^{46}\)

**c. Successful Clubs and Fads**

Though Middlesbrough Cricket Club struggled, cricket was still favoured by many “as the game least tainted by human foibles”; indeed the *Daily Exchange* described it as “the English national game *par excellence*”.\(^{47}\) There was no other game “so suitable to every rank and station in society, or in which representatives of every class can join”.\(^{48}\)

This idea was reiterated by ‘Rambler’ in the *Northern Review*,

> Could anything be more restful for the toiler in our ironworks than a quiet afternoon at a cricket match. Would not the nerves and health of anxious iron-broker and harried masters be more readily soothed by an hour on the green field, chatting with friends over the incidents of the afternoon and the reminiscences of days when hits for six among themselves were not uncommon. What a delightful change it would be to driving along the unwilling spirit and flesh in the office or, among the more luxuriant, dawdling about the palatial club rooms of the town.\(^{49}\)

Therefore the problems encountered by Middlesbrough Cricket Club need to be compared to the development of other cricket clubs, and should also be viewed alongside the failure of baseball to replace it as the summer sport (see below). In 1894 Newport Cricket Club reported an increase in membership and stated that on some Saturdays they had been able to field three separate teams, such was their popularity.\(^{50}\) Furthermore in 1896 the Teesside Cricket League claimed that “in no way has the interest in its doings diminished... for players and club have vied with each other in a friendly and amicable spirit to reach the goal of their ambition”.\(^{51}\)

Little information is given on most of the smaller clubs, and it is often difficult to identify the individuals involved. However, the available information suggests that many of these clubs, against whom Middlesbrough Cricket Club had to compete for cricket enthusiasts, benefited from the patronage of members of Middlesbrough’s small establishment. This may explain why the town club could not manage to get the support they desired from the gentlemen and professionals of the district. In 1899 Middlesbrough’s president (John Vernon Cooper) had suggested that “greater effort should be made to get people to join the club”. It is evident that Cooper envisaged recruiting affluent members, as he suggested that if one or both of the secretaries joined him at the Royal Exchange “they might be able to get some 30 or 40 members to join the club”.\(^{52}\) A year later it was suggested again that a club official be appointed to “call upon gentleman and tradesman locally who should take in interest in the game, and in

\(^{51}\) North-Eastern Daily Gazette, 14\(^{th}\) November 1896; A few months later, the Middlesbrough Cricket League was also formed, initially only consisting of four teams: Tees Oil Works, Gilkes Street Primitive, Cambridge House and Melbourne – North-Eastern Daily Gazette, 26\(^{th}\) March 1897
\(^{52}\) Kelly’s Directory of North and East Ridings of Yorkshire 1897 (London, 1897), p. 179; Middlesbrough & Stockton Evening Telegraph, 8\(^{th}\) November 1899; Northern Echo, 8\(^{th}\) November 1899
the club as an institution”. However, some gentlemen were already involved with other clubs. North Ormesby Cricket Club’s president until 1896 was a Justice of the Peace and Lord of Ormesby Hall (James Stovin Pennyman), succeeded by his son, a barrister (James Worsley Pennyman). Newport Cricket Club’s president in 1898 was William Hanson, the managing director and partner of Newport Ironworks and president of the elite Cleveland Club. Bolckow Vaughan & Co’s Iron and Steel Works Cricket Club was formed in July 1898, with the works’ general manager appointed president. Tees Oil Works Cricket Club had the firm support of the works’ owner, the councillor and former mayor Theophilus Phillips, who had purchased a field for his employees and their families in 1898 and “placed it at the disposal of the club free of rent or any other expense”.

The popularity of cycling also increased throughout the period; as David Rubinstein has argued, it was “an ideal form of middle class self-expression” particularly for those who wanted to be at “the forefront of social behaviour at a time when values were fast changing and active forms of recreation were becoming increasingly popular”. Brad Beaven’s assertion that the bicycle was a “symbol of a widespread sense of modernity” can be applied in particular to Middlesbrough, a place that its leading citizens viewed as the epitome of modern Britain. The number of cycling clubs in

existence meant that there were organisations to suit all aspects of the sport, from racing to recreational and social cycling, helping to sustain the sport’s popularity. As ‘Rambler’ in the *Northern Review* remarked, “Who would not be [a] cyclist? To possess a steed that is swift but not hungry [sic]; to ride wherever roads lead and fancy listeth”. However, the price of bicycles still precluded many people from taking part.

Adverts in the *North-Eastern Daily Gazette* in 1889 listed bicycles for sale at Carlings from £2 to £4 10s, and a year later the same company’s prices ranged from £1 to £17 10s. In 1896 the Teesside Cycle Corporation’s prices ranged from £3 17s 6d to £8 10s for ladies’ bicycles, and £4 15s to £10 for men’s, and C. Duncan & Co’s prices ranged from £6 10s to £30. Indeed Rubinstein stated that between 1895 and 1897 the best bicycles cost £30 or more. In contrast an advert in 1889 advertised the sale of bicycles for 2s 6d a week, suggesting that some of the town’s less well off individuals could purchase bicycles.

A wide variety of cycling events and clubs were reported in the local press. In 1885 the North Ormesby Cycling Club held 51 outings, many of which were road races, and a year later the club held an up-hill race of 700 yards, and a “very fast” five miles road race for 16 participants. In 1887 300 spectators gathered to watch the finish of a race of the North Ormesby club, whilst in 1890 the *Northern Echo* reported on a race from Middlesbrough to Redcar to decide “the heavy-weight champion of Middlesbrough” (as the joint weight of the two cyclists was more than 30 stones). By 1891 the North

Ormesby & Middlesbrough Cycling Club had 110 members, but a year later the club reported that team racing had been a failure “owing to petty jealousy among the members”, and that there had been a drop in membership due to the increased cost of subscriptions. The Cleveland Temperance Cycling Corps was formed in March 1893 for “none but pledged abstainers” in Middlesbrough, Thornaby and Redcar, with branches formed across the district. This contrasts with Gunn’s statement above that clubs provided a setting for eating, drinking and socialising, and suggests that some clubs had a very particular rationale. The sheer number of cycling clubs in existence was demonstrated in 1892 when the *Northern Review* published the details for secretaries of 26 Teesside clubs (including eight in Middlesbrough and two in South Bank), and the *South Durham & Cleveland Mercury* listed 11 Middlesbrough clubs taking part in that year’s cycling parade. The formation of new clubs was also reported, for example Middlesbrough Centenary Cycling Club in connection with the Wesleyan Centenary Chapel, and Middlesbrough Rovers Cycling Club which was “to be composed of first-class artisans” (the club’s first sub-captain was a machine printer, whilst the secretary was a plumber). Many members of the Middlesbrough Wednesday Half-Holiday Cycling Club were shop assistants, and prizes were

“cannot lay claims to British origin” (the 1891 census shows that he was a British subject born in Salzburg, Austria), and that he was beaten proved that “Englishmen, in whatever pursuit they are engaged... are always a match for their friends across the Channel” – 1891 census; *Northern Echo*, 24th June 1890

distributed to those who had attended the most club runs. As Rubinstein suggests, to the lower-middle classes, cycling offered “a blessed release from the tyranny and drudgery of daily life”.69

Such was the increase in the number of cyclists in the town that an association was formed to “regulate all matters pertaining to cycling exclusive of sports and cycling club private business”, and the National Cyclists’ Union (NCU, established in 1878) formed the North Riding & South Durham Centre. Indeed Cycling commented that, “I cannot but think that for a town of its size Middlesbro’ has the most cyclists. I never saw so many machines anywhere”.70 It had been the intention of Ironopolis FC to build a cycling track at their proposed new ground which would have added greatly to the club’s income.71 The Northern Review felt it was “a great joke” that a track would in fact be laid out by the Grangetown Athletic Club on the edge of Middlesbrough first, even if it was set to be “one of the finest in England”.72 Indeed, a year later the amateur sports day held at Grangetown attracted 3,000 spectators and included the one mile race of the local NCU and the team race for the North of England Centre Championship.73

Despite the large number of local races that were reported in the press, the Northern Review’s ‘Rambler’ suggested that “the racing world is so exceedingly shady that I cannot help feeling glad that racing, pot-hunting etc... are not the pursuits of our local

cyclists”. In the same publication ‘Cyclist’ disagreed, stating that the fifty miles competition of the North Ormesby & Middlesbrough Cycling Club was “a distinct feature of the year”. Furthermore, Bury and Hillier suggested that racing was “both amusing in itself and productive of great good to the general body of cyclists who care nothing about racing”. Further evidence of an interest in racing was demonstrated by the formation of the Cleveland Roads Club in January 1894 whose purpose was to develop long-distance riding – the qualification for membership was the ability to cycle 100 miles in 12 hours. The club’s captain, J. W. Pearson, broke the record for cycling from Middlesbrough to York and back in September of the same year. ‘Cyclist’, writing in the Falcon, noted that other cyclists quickly tried to emulate Pearson’s feat and hoped that it would “continue with that true spirit of sportsmanship which characterises the fin de ciecle [sic] cyclist”. Cycling’s ability to express notions of local identity was demonstrated by two races in 1895. A mile race between two cyclists from Middlesbrough and Ferryhill, County Durham, in July attracted “tremendous interest”, the local winner being “carried shoulder high to the dressing tent” after his victory. Three months later, a “vast amount of excitement and indignation” was said to be felt by local cyclists when it was discovered that a rider from Sunderland, Lee Huntley, was to be invited to Middlesbrough to beat the 50 miles record. It was reported that “with a view to the honour and prestige [of the town] being upheld” Jack Newton of the North

74 Goodall, ‘Cycling in North Yorkshire and South Durham’, pp. 128-130; Northern Review, 27th May 1893; After 1881, a professional cyclist was defined as one who rode or taught for money, but there were also a number of competitors who were semi-sponsored by cycle manufacturers around whom there were rumours of results-fixing – Viscount Bury and G. 77 South Durham & Cleveland Mercury, 5th July 1895
Ormesby & Middlesbrough club was sought out. Even though he had apparently “been working all night, and was in bed... on the circumstances being explained he at once expressed his willingness to try his luck”. Though Huntley had retired part way through the race, the *North-Eastern Daily Gazette* wrote that, “the greatest jubilation is evinced by local wheelmen at the way in which the Wearsider was vanquished”.  

In 1896 the Cleveland Roads Club ensured that their less energetic and non-racing members were still able to take part by introducing a road race of a limited distance. Though the club had claimed to be “second to none in the North of England, not only in catering for its members, but also for possessing several of the best riders in the district”, by May the club had given up road racing with races to be held on the track instead.  

The Cygnus club was formed in 1900 for the purpose of “fostering racing and looking after the interests of wheelmen who are to be found on the track”, whilst the increase in membership of Middlesbrough Cycling Club (formerly Rovers) in 1894 was attributed not to exciting races but to their premises now possessing billiard tables, a games rooms and refreshments.

Though Derek Birley stated that cycling’s fashionable phase had ended by the late 1890s, in Middlesbrough the appeal of cycling showed no signs of decreasing. Birley suggested the future of recreational cycling lay with the lower-middle class or the

“health-conscious urbanites seeking escape”, yet ‘Velo’ in the *South Durham & Cleveland Mercury* argued that cycling was far from “a phase of fickle fashion” due to the freedom it gave to the cyclist; “as soon as one has learnt to ride one is entirely free and independent, and cycling can be enjoyed either with or without companions”. Such was the popularity of cycling in the town, that the *North-Eastern Weekly Gazette* proclaimed that, Middlesbrough could “boast of having... [a] vast army of devotees of the wheel who take an interest in racing”. By 1898 there were at least 22 cycling clubs in the town. A Cycle Agents’ Association was formed and a cycle exhibition (including cycle polo and trick riding) was included at the Middlesbrough Trades Exhibition (an event which subsequently attracted around 20,000 visitors). A demonstration of bicycle polo by an Anglo-American team at the Town Hall also proved popular. “To the most accomplished cyclist it is a revelation”, wrote the *Middlesbrough & Stockton Evening Telegraph*, “and to the non-cycling fraternity it is little short of miraculous”.

That tennis was also very much in fashion in the mid-1880s was demonstrated by the decision of Middlesbrough Cricket Club in 1886 to introduce a tennis section as a means of raising money and increasing interest in the club. The *Northern Review* agreed with this move, stating that “if the club is to make ends meet, it must look out for other

attractions to supplement cricket”, and it was reported a year later that the club’s two tennis courts were in use every evening. Adverts began to appear in the local press for tennis equipment, such as that for H. Pilcher, a hatter and hosier, selling tennis shirts, trousers and racquet cases, whilst Tom Imeson who sold boots and shoes was “ever ready to promote a popular game”, and offered to give each member of Middlesbrough Tennis Club a racquet in order to be associated with the newly popular sport. Matches were played every Saturday by most of the town’s tennis clubs and the Linthorpe Club held their own tournament in 1888, though it was described as “a social picnic with tennis thrown in”. As Helen Walker suggests, tennis was “an established favourite with the new suburbanite”, and the game would have been popular with those who had moved to the town’s suburbs, away from the working class centre. ‘Milo’ in the Northern Echo remarked that tennis was “flourishing” in Middlesbrough, there being a large number of new players, and ‘Rambler’ in the Northern Review suggested that,

The game of tennis is rapidly enfolding the whole district in its manifold charms. Not only the young, but middle-aged and elderly folk are becoming its enthusiastic votaries. There are many unbelievers yet who deride and call tennis a ladies’ game. I can only say to them: ‘Take a turn with the racquet’, and if they don’t feel foolish in five minutes, their case is hopeless... It is one of the most healthy and social games ever invented...

However, ‘Rambler’ doubted whether “the people who have leisure to devote to playing or watching throughout a three day’s tournament, are sufficiently numerous in this

---

87 Daily Exchange, 5th November 1886; Northern Review, 13th November 1886; It was suggested that a section of the cricket field be used for tennis in the summer and curling in the winter.

92 Northern Echo, 28th May 1889; Northern Review, 8th, 22nd June 1889
Indeed that the numbers of participants soon decreased would suggest that the town’s small middle class did not have sufficient time, or space in private gardens to sustain the sport. The cricket club decided to abandon its tennis section in 1890 and ‘Rambler’ stated that he had received no news of club fixtures, instead only hearing of “great jinks and high tea on the lawn every Saturday”. Very few reports of tennis matches in Middlesbrough appeared in the local press during the following decade, leading ‘Rambler’ to conclude that the “once-popular game is rapidly declining”.

Though in contrast baseball was aimed at the town’s large working class population, its popularity was also only short-lived. It was unable to find a place in the town’s sporting landscape, despite the gap in the calendar left by cricket’s wavering popularity. The sport had to win over a number of sceptics as well as those who disapproved of the American sport’s attempt to take the place of the English game of cricket. In 1889 the prominent Middlesbrough industrialist Samuel Sadler spent three months in America and returned with “a profound admiration” for the sport. A few months later, a meeting was called to discuss “the desirability of promoting the American game” in Middlesbrough. Sadler, “an ardent lover of outdoor sports”, thought the game included “all the merits of cricket, and all the excitement, earnestness and energy and the go which had made football so popular in England”. Newton Crane, the president of the English National Baseball League, stated that baseball was a “plucky, manly sport”,

93 Northern Review, 27th July 1889

95 Northern Review, 19th August 1893
96 Northern Echo, 3rd September 1889, 15th March 1890
97 This professional league was formed shortly after a tour of England by American baseball players, but lasted only a year – for further details on this and baseball in England in this period see D. Bloyce, “‘Just Not Cricket’; Baseball in England, 1874-1900”, International Journal of the History of Sport 14, 2 (1997), pp. 207-218; D. Bloyce and P. Murphy, ‘Baseball in England: A case of prolonged cultural resistance’,
and one that was ideally suited to Middlesbrough”. A circular was sent out to the secretaries of sports clubs to ascertain their interest, and following training from two visiting Edinburgh University students (from North America), baseball sides were formed in connection with football or cricket clubs in Bishop Auckland, Darlington, Eston, Middlesbrough and South Stockton.

‘Rover’ in the North-Eastern Weekly Gazette suggested that the sport would “take a fast hold upon the public” and that the “‘leisure class’ may have the game of cricket to themselves”. The game would be attractive to the “Cleveland toilers” who according to ‘Rover’ “will welcome any legitimate excuse for tearing themselves away from the attraction of the public-house”. However, the first practice game only attracted around 40 spectators, whilst the first exhibition match had a crowd of either 200 or 1,500 depending on the report. Undeterred, ‘Rover’ stated that the game could be “fast and exciting, and there is every evidence of a thirst for a proper knowledge of the game amongst the masses”. Indicating the strength of local cricket, ‘Forward’ in the Athletic News suggested that cricketers were “so enamoured with their old love, the best of all games, that they will have none of it”, but the Northern Review’s ‘Rambler’ thought that baseball was “more interesting than cricket”, and all the game needed was the right men to organise it. When the team connected with Middlesbrough FC played

their second match against St Augustine’s of Darlington, it drew a crowd of only 200, but it was pointed out that this was still “ten times the muster at a good cricket match”.

Daniel Bloyce has argued that by 1890 baseball was established in England, albeit on a relatively minor scale. The Cleveland & South Durham Baseball Association was formed in June 1890 (a year before the formation of the National Baseball Association) and a cup and medals were offered for the following season. A year later, a challenge cup had also been given to the Association by the American sports goods manufacturer Albert Spalding, and Samuel Sadler promised medals to the winners. Middlesbrough FC abandoned their baseball section, but rented out their field to the newly formed Middlesbrough Baseball Club.

Attempts to popularise the sport were no doubt hampered by there being only three clubs in the local Association’s competition (St Augustine’s of Darlington, Eston and Middlesbrough), and the Association’s secretary said that “all they asked was that the game might be given a fair an unprejudiced trial by the public”, rather than being dismissed immediately because it was an American game or rounders with another name. At the start of the 1892 season it was reported that Middlesbrough Baseball Club had hired a professional trainer, and it was proposed that matches would be played

103 Northern Review, 7th, 14th June 1890; South Durham & Cleveland Mercury, 28th June 1890
104 This is attributed to the tour by American players, the injection of money by and the power of Albert Spalding and to Americans living in England – Bloyce, “Just Not Cricket”, p. 210
105 Northern Echo, 20th June 1890; Sadler was elected president whilst the Mayor of Middlesbrough (Richard Scupham), Mayor of Darlington (Joseph Albert Pease) and Dr Francis Townsend from Eston were elected vice-presidents. Walter G. Roberts, architect and surveyor, was also elected honorary secretary and treasurer.
106 North-Eastern Daily Gazette, 11th April, 30th May 1891
107 Northern Echo, 17th, 18th August, 5th November 1891
against professional teams from the Midlands which it was hoped would result in some “rattling games”. The team was also requested to play exhibition games across the north of England to popularise the sport. In August 1892 Middlesbrough beat Derby St Thomas’s to win the English Baseball Cup in front of 3,000 spectators at the Linthorpe Road ground. “There can scarcely now be any doubt”, stated the South Durham & Cleveland Mercury, “as to the place which baseball is destined to occupy ere long in the race for popularity as a summer field sport in Middlesbrough”. Despite Middlesbrough’s success, the local Association reported that fewer clubs had been formed than they had hoped for, but the “increasing enthusiasm of players and spectators, the increased gates and the... number of games played augured well for future success”.  

However, baseball was in direct competition with cricket, a well established sport, notwithstanding the assertion by the Athletic News that baseball suited the “Yankee-like enterprise and energy of Ironopolis”. A circular was issued in January 1894 reminding sports clubs that baseball “is calculated to materially improve all those who take part in athletics, but especially football players”; it was a “splendid means of keeping players together during the summer months”, marking the game out as a rival to cricket. English Sports reported that much baseball went unreported. A game that attracted more spectators “than all the cricket matches put together over a wide district”,

received little or no coverage. New clubs were formed in Linthorpe and Grangetown, and in 1894 the Afco club was formed by the Anderston Foundry Company. A baseball team was also formed in connection with Ironopolis FC by Nathaniel Harrison and Albert Easton, with Dr John Ellerton elected president. However, when the Middlesbrough and Ironopolis clubs met there was an “unexpectedly sparse attendance”, given the rivalry that had existed between their namesake football clubs. Middlesbrough failed to win either the local or national cup competition and the *North-Eastern Daily Gazette* argued that, “considering the talented players at their disposal, the pioneer club can hardly be congratulated on the record for the season”.  

Middlesbrough Football Club placed conditions on which the baseball club were able to rent the Linthorpe Road ground, and it is clear that baseball would have boosted the football club’s income. Rent was £10 plus 10% of match receipts, and 5d a week was required for the services of the club’s groundsman. In addition, the football club’s directors were to be given free admission on all occasions. The baseball club were responsible for damages, and proper precautions had to be taken to preserve the

114 From the United States of America, brother of Richard C. Harrison, the captain of Middlesbrough Baseball Club
115 Son of Ironopolis FC director, William Easton
116 *North-Eastern Daily Gazette*, 31st March 1894; *Northern Echo*, 2nd, 29th May 1894
117 *North-Eastern Daily Gazette*, 1st, 28th September 1894; The club were awarded the Dewar Trophy by the National Convention of Baseball Clubs in Great Britain however, for the best fielding averages, which it was suggested was “the most costly ever offered for competition in this country in connection with inter-club sport”. The trophy was reportedly so large that it would not fit through any of the doors or windows of the club’s headquarters – *North-Eastern Daily Gazette*, 26th, 27th February 1895
condition of the turf. In November 1896, the baseball club requested a reduction in rent but the football club would not accommodate them.\textsuperscript{118}

The popularity of baseball rose gradually. In 1895 there were two divisions to the Cleveland & South Durham League,\textsuperscript{119} and a game at Stockton against Middlesbrough attracted a crowd of 4,000.\textsuperscript{120} A match between Middlesbrough and the newly formed Erimus club was described as drawing “a most aristocratic assemblage”, including the Mayor, Sadler and party, and Doctors Ellerton, Longbotham and Young.\textsuperscript{121} Sadler’s enthusiasm for the sport was in evidence again when he covered the costs of the medals for the winners of the Cleveland & South Durham league, donated two guineas to the Middlesbrough club and provided medals to the best baseball teams in the country.\textsuperscript{122} Middlesbrough reached the final of the national competition again in August 1897 but were beaten by Derby in front of 4,000 spectators at the Baseball Ground.\textsuperscript{123} A year later the club recorded a debt and due to the football club’s stipulations, decided to look for another field. Joseph Wright (a member of the baseball club’s committee) said, “I doubt whether we can go on this year”, and suggested that the reason for baseball’s apparent failure was that in Cleveland, they had “failed to attract a gentlemanly enough type of player”. The available players, who were mostly footballers, were “unpunctual

\textsuperscript{118} Minute Book of Middlesbrough Football & Athletic Company Limited (hereafter Minute Book of MFC), 30th March, 9th November 1896; \textit{North-Eastern Daily Gazette}, 10th April 1896
\textsuperscript{119} The teams were – Division 1: Darlington, Middlesbrough, Stockton, Thornaby; Division 2: Cleveland Amateurs, Middlesbrough Victoria, Middlesbrough 2nd, Stockton Blythwood, Stockton Social, Stockton Vulcan, Stockton 2nd, Thornaby 2nd. In early 1896 a Northern Baseball League was formed comprised of the clubs in the Cleveland & South Durham Association and the Northumberland & North Durham Association. The teams chosen to participate were Clara Vale, Middlesbrough, Stockton, Thornaby, Walker and Wallsend, \textit{North-Eastern Daily Gazette}, 27th March 1896; \textit{Northern Echo}, 25th February, 9th March 1896

and unreliable” and therefore many patrons had withdrawn their support. Bloyce suggests that there was a belief that there were already many sports to choose from in England, whilst some contemporaries regarded baseball as inferior simply because it was not English. Importantly, some journalists and cricket supporters regarded baseball as a threat to the ultimate English summer sport, whilst others thought that baseball did not adhere to the amateur ideal. As Tony Mason states, baseball was regarded as “foreign, terribly dull and no threat to cricket”. Despite the assertion of the *Middlesbrough & Stockton Evening Telegraph* in 1897 that “baseball is not dying but looking quite alive”, there was no further mention of the game until an attempted revival in 1906 (see chapter 4).

d. Exclusivity and Class

A number of sports or clubs remained socially exclusive throughout this period, with members of the town’s middle class dominating as officials and participants. R. J. Morris’ description of officials of voluntary organisations is mirrored by those running Middlesbrough’s sports clubs. Morris states that club presidents were usually high-status local leaders, secretaries were often solicitors, and the treasurer was invariably a local banker or merchant. Such a structure was “the perfect compromise between middle class people striving for self-respect and independence, and the reality of hierarchical society”. Gunn’s assertion that social clubs could act as refuges from city

---

124 *North-Eastern Daily Gazette*, 27th April 1897; *Sporting Life*, 9th April 1898  
125 Bloyce, “Just Not Cricket”, pp. 214-215; *English Sport* stated in 1894 that “baseball had shrugged off its professional and somewhat overtly commercial status... and for the present, and it must be hoped for always, baseball must be kept on purely amateur lines” – quoted in D. Benning and D. Bloyce, ‘Baseball in Britain 1874-1914’, in B. Svoboda and A. Ryachtecky (eds.), *Physical Activity for Life: East and West, South and North: The Proceedings of 9th Biennial Conference of International Society for Comparative Physical Education and Sport at the Charles University, Faculty of Physical Education and Sport, Prague, Czech Republic* (Prague, 1995), p. 399  
126 Mason, ‘When Professional Baseball Nearly Came to Britain’, p. 46  
127 *Middlesbrough & Stockton Evening Telegraph*, 18th May 1897
life, “sealed off from private cares and duties”, is also reflected in Middlesbrough’s middle class club culture which allowed for distance between employers and employees.\footnote{Gunn, \textit{The Public Culture of the Victorian Middle Class}, p. 92; R. J. Morris, ‘Clubs, Societies and Associations’, in F. M. L. Thompson (ed.), \textit{The Cambridge Social History of Britain 1750-1950} (Cambridge, 1990), p. 414} Lowerson points out that there was a hierarchy of clubs which reinforced the social structure of the town they were in. Huggins notes that sport played an important role in the formation of social relationships in increasingly urbanised environments, providing “a key source of friendship, fellowship and fraternal identity”, particularly relevant to those Middlesbrough residents who were new to the town. Similarly, Holt states that middle class clubs allowed for “the careful building of networks of neighbours, friends and acquaintances”. That Middlesbrough’s sports club provided a means by which the town’s elite could play and watch together away from the working populace, is supported by Huggins’ suggestion that such clubs could actively avoid “any undignified opportunity of defeat by social inferiors”.\footnote{R. Holt, \textit{Sport and the British: A modern history} (Oxford, 1989), p. 133; Huggins, \textit{The Victorians and Sport}, pp. 100-102; Lowerson, \textit{Sport and the English Middle Classes}, p. 22; Lowerson also suggests that the appearance of civic leaders as vice-presidents acted as another means of identifying urban oligarchies, p. 78} Details of the following clubs demonstrate the dominance of Middlesbrough’s small middle class in the town’s sporting culture.

One of the best examples of the exclusivity of many of the town’s clubs is the Middlesbrough Amateur Boating Club. The officials of the club in the late 1880s were upper-middle and middle class, including a shipbuilder and two ironmasters. A decade later, 12 members of the club’s crew can be identified, and lower-middle and middle class occupations dominate. The inclusion of two individuals from Germany demonstrates the role of clubs in socialising newcomers into the community –
Table 3.2 – Middlesbrough Amateur Boating Club crew members, 1896

The social events of this club often took precedence over rowing, and the cost of their annual ball demonstrates the money needed by members to participate. In 1895 tickets were priced at 12s 6d for a couple, 7s 6d for a single gentleman and 6s for a single lady. In contrast, the boatman engaged by the club on a month’s trial in 1896 was paid 6s a week, and his successor three months later was paid 8s a week.

In contrast to the Boating Club and its events, Middlesbrough’s first sailing regatta in 1888 was open to “yachts, cobles, pilot boats, foy boats and even sand wherries”. It was attended by thousands of spectators and the Northern Review noted, “the enthusiasm displayed, both amongst the owners of sailing craft and the general public”. Unusually, the participants were from a variety of backgrounds. For example, the competitors in the trimmers’ race (using shovels rather than oars) “came straight from their work, with faces begrimed with coal dust”, and the event also allowed those to take part who would otherwise be banned from amateur rowing events as they made their living on the river. Seven of the competitors can be identified as working on the Tees – three pilots, a boatman, a toy boatman, a mariner and a sailorman. Entrance fees were also

Halladay, Rowing in England: A social history – the amateur debate (Manchester, 1990), p. 81; W. Vamplew, Pay Up and Play the Game: Professional sport in Britain, 1875-1914 (Cambridge, 1988), p. 186
relatively low, 2s 6d, for the coble, toy, pilot and pleasure boat races, with prizes of £3, £2 and £1.¹³⁴

The players of the town’s only rugby club were similar in background to the Boating Club’s members. Indeed the vice-captain was also a rower. In the mid-1890s the playing membership of the re-formed club was firmly middle class –

¹³⁴ North-Eastern Daily Gazette, 19th September 1888; The regatta was also repeated during the following three years.

\(^b\) Information taken from 1891 census

1891 and 1901 census; *North-Eastern Daily Gazette*, 25\(^{th}\) January 1895, 10\(^{th}\) July 1896; For players in 1885, see *Cleveland News*, 3\(^{rd}\) October 1885
The middle class roots of tennis in Middlesbrough were demonstrated in one of the first descriptions of the game in the *Northern Review* in 1886, which reported on a tournament at the residence of “a wealthy legal gentleman”, where the competitors in the final match were “a lawyer and a doctor versus a doctor and a genial friend”.\(^{136}\) Robert J. Lake states that tennis became a popular game amongst the elite through exclusive clubs or the necessity of owning land if playing at home, as well as the growing popularity of Wimbledon in the social calendar; the sport became “an important vehicle for enhancing status”.\(^{137}\) Competitors at a 1888 three day tournament of the Middlesbrough Tennis Club included three doctors, two members of the clergy, a grease and oil manufacturer, an iron merchant, a solicitor and the daughter of a shipbuilder, and involvement in an exclusive sport would indeed have enhanced their status.\(^{138}\) Five of the six officials of the club can also be identified, all of whom are upper-middle and middle class –

* Unable to locate on 1891 census, information from Bulmer’s History, Topography and Directory of Yorkshire 1890 (Ashton-on-Ribble, 1890)

139 Northern Review, 5th May 1888; See also Linthorpe Tennis Club, South Durham & Cleveland Mercury, 19th May 1888
The founders of the Middlesbrough Amateur Athletic Club included a merchant and three clerks, and the first vice-presidents included an ironmaster, a doctor, a chemical manufacturer and an MP.\footnote{1881 census; \textit{Daily Exchange}, 16\textsuperscript{th} November 1886; \textit{Teesside Weekly Herald}, 17\textsuperscript{th} November 1906; See also the professional and middle class officials of the Middlesbrough Baseball Club – \textit{North-Eastern Daily Gazette}, 8\textsuperscript{th} April 1897, and the players of Middlesbrough Caledonian Curling Club which included an ironmaster – \textit{Northern Echo}, 9\textsuperscript{th}, 10\textsuperscript{th}, 12\textsuperscript{th} January 1891} The first officials of the Middlesbrough Amateur Cycling Club included more members of the lower-middle class, as well as professionals – two clerks, a solicitor, a chemist, a doctor, a fruiterer, a jeweller and a steamship broker, whilst in contrast the sub-captain was a labourer.\footnote{1891 census; \textit{North-Eastern Daily Gazette}, 8\textsuperscript{th} March 1889; \textit{Northern Review}, 27\textsuperscript{th} April 1889; See also the officials of Middlesbrough Cycling Club which was dominated by doctors, \textit{North-Eastern Daily Gazette}, 16\textsuperscript{th} January 1896, and Middlesbrough Magpies Cycling Club, \textit{North-Eastern Daily Gazette}, 28\textsuperscript{th} February 1896} In comparison, the North Ormesby & Middlesbrough Cycling Club had more of a cross-class composition. In 1896 the president was a cement merchant and vice-presidents included a doctor and a baker. A blast furnaceman was chosen as treasurer, the captain was a blacksmith and his deputy was a steelworker.\footnote{1901 census; \textit{Kelly’s Directory of North and East Ridings of Yorkshire}, 1897; \textit{North-Eastern Daily Gazette}, 23\textsuperscript{rd} December 1896}

Few clubs were explicit in their desire to remain exclusive, but the president of North Ormesby Cricket Club, James Worsley Pennyman, stated that he wanted “to keep the club a high class concern”. He claimed that, “In a place like N. O. [North Ormesby] clubs at times get into the hands of a second or third rate set of people, so that the whole thing might become low class and disreputable”. The club were prohibited from providing alcohol or allowing gambling to take place on the field, which suggests that drink and betting were sometimes a part of Middlesbrough’s sporting culture and that action needed to be taken against it. He made it clear that cricket was the only game the club were allowed to play on the ground, as football and running were “games that
might become low class”. He was insistent that the club maintain its reputation and that a clause be included in the lease stating that cricket was to be the only game played on the field – “As a great part of my object in letting the ground is to be able to exercise some pressure to keep things select, and as the omission of the provision I want might let in the very evil I am trying to guard against, I must have the clause in somehow”. 143 Pennyman had become president of the club in 1896, and despite his statements the club’s officials a year later were diverse in background, including an ironmaster, members of the lower-middle class as well as two working men –

143 Letters from J. W. Pennyman to W. Lawson and William Trevor, 29th August, 10th November 1899, 19th, 22nd January 1900, U/PEN 5/332 Teesside Archives; Pennyman did change his mind about the provision of alcohol as the club “might build a good pavilion and want perfectly proper lunches or dinner there”; Pennyman’s desire to maintain North Ormesby’s reputation confirms Lewis’ assertion that the local gentry viewed Middlesbrough “with a mixture of excitement and apprehension”, seeing opportunities for gain, but concerned over the town’s expansion – R. Lewis, ‘The Evolution of a Political Culture: Middlesbrough, 1850-1950’, in Pollard (ed.), Middlesbrough: Town and Community, p. 108; Similarly, a quoits club played their games on Middlesbrough FC’s ground and their lease stated that no drink was to be sold on the premises, the club being reminded by Middlesbrough that they should be “conducted properly in the future” – Minute Book of MFC, 29th August 1892

In contrast, Middlesbrough Cricket Club’s officials in 1889 included an ironmaster, an ironworks manager, a solicitor, an engineer and a bank manager.145

Many of those involved in the running of the Middlesbrough Amateur Swimming Club in 1898 can be identified. Their occupations were more varied than was the case for some clubs, though still lower-middle and middle class, and reflects the increasing visibility of the shopocracy in the town’s sporting and civic culture –

a 1891 census

b Details taken from *Kelly’s Directory of North and East Ridings of Yorkshire, 1897* (London, 1897)
In contrast to many of Middlesbrough’s clubs, in the early 1880s it would appear that quoits was played by men from a cross-section of society. There was certainly involvement by the middle classes in the sport as demonstrated by the presence of the mayor when Erimus played a match at Whitby in 1881. He travelled to the game “by his Worship’s yacht” with some of the players and “a few friends”.\(^{147}\) Furthermore the president of the same club, stated in 1895 that the club was one of “gentlemen” and “a happy family because there were no variances or differences between the members”.\(^{148}\)

A number of players can be identified from the Eston and Erimus clubs, and there is a noticeable difference in the occupations of the participants, Eston having two innkeepers, five miners and a labourer amongst their players,\(^{149}\) whilst those of Erimus were lower-middle class –

150 1881 census; Daily Gazette, 20th April 1881; North-Eastern Daily Gazette, 23rd August 1881, 13th July 1883
e. Non-competitive and Recreational Sport

A number of clubs and sports existed that did not involve competitions or participation in leagues. Some were also often bound up with ideas of rational recreation, emphasising the qualities that sport could instil in participants. Such clubs often had smaller memberships and were less popular, despite also holding public events. Though some members of the boating club took part in regattas, it is apparent that many members were not active rowers. At the club’s AGM in March 1885 it was reported that very few members had participated at the Tees regatta the previous summer. Despite the notion that a regatta ought to be “a picnic with boating as a leading feature”, members were informed that unless they took “a more active part in these annual races, the club cannot be expected to gain financially from them”.\textsuperscript{151} In 1885 the club had 54 members, but two years later this had dropped to 14, and the \textit{Northern Review}’s ‘Rambler’ chastised the club for lack of activity. He sarcastically remarked that the club should be “proud, very, you ought to be, for mighty deeds have been done! What trophies of might and skill ye hold!”\textsuperscript{152} However, a year later the same newspaper reported that the club had undertaken such a strict training regime that “the regulation pint of beer is the maximum any individual will allow himself to indulge in”.\textsuperscript{153} The 1891 joint regatta with the Stockton Amateur Boating Club (at which the two clubs intended to compete for the Ironmasters’ and Tees Challenge Cups) was regarded as a failure. Stockton withdrew, the committee had failed to advertise the event, neither music nor a refreshment tent were provided, and subsequently “the attendance was not extensive”.\textsuperscript{154} In contrast, the committee paid a great deal of attention to the

organisation of its first ball for which a number of meetings were called to discuss the “music, catering and style of invitation card”.  

Many cyclists did not cycle competitively, participating instead as a means of recreation, as it offered “an agreeable amount of physical labour by those who otherwise led a sedentary life”. There was a distinct line drawn between those who raced and those who did not. The mass popularity of cycling meant that it no longer attracted gentlemen, and the racing element had a rather “unsavoury reputation” as new bicycles were faster and resulted in more competition. In 1885 the Cleveland News suggested that the chief aim of the Middlesbrough Cycling Club ought to be to “get the members together for social rides into the country as frequently as possible”; track-riding and ‘pot-hunting’ on the other hand, were to be avoided at all costs. By 1891, Middlesbrough Rovers Cycling Club was the largest club in the town with 175 members. With their own premises (which unusually, were independent of a public house) they were regarded as “a proper social, as well as a cycling club”. Though there was a great deal of interest in cycle races, the Falcon’s ‘Cyclist’ stated that there were many who longed for the cycling club to return to their traditional ways of “the club ramble, the club tea, the club photo, the club ladies’ day, or the other numerous club fixtures which, before the advent of the scorcher, were so popular”. There was a “very large number of the wheel community... who care nothing for mere matters of

158 Cleveland News, 28th March 1885; Similarly, the Middlesbrough Amateur Cycling Club was formed in 1889 and their first week of six ‘journeys out’ ranged from visits to Darlington and Croft (16 miles from Middlesbrough) to Stainton (5 miles away) – North-Eastern Daily Gazette, 18th April 1889; Northern Review, 11th May 1889
159 Northern Review, 25th July 1891
speed”.\textsuperscript{160} The ‘scorcher’, increasingly associated with young male riders, conflicted with the notion that cycling could act as a diversion from the perils of city life, gambling and drink.\textsuperscript{161} An advert for bicycles in the \textit{North-Eastern Daily Gazette} informed readers that “health and cycling go hand in hand... the quickest and most economical and invigorating way of taking exercise is by cycling”,\textsuperscript{162} and the secretary of the Middlesbrough YMCA Cycling Club stated that the club “was not organised for scorching, but to provide healthy recreation and instruction for the members”. Similarly in 1893, a Fellowship of Cyclists was formed and amongst its aims were “to keep clear of scorchers and the rowdy element”.\textsuperscript{163}

The Middlesbrough Amateur Athletic Club was formed in 1885 and two years later the club had their own premises including expensive gymnasium equipment for its 80 members. In 1888 a boys’ class (25 members) was formed, and a paid instructor appointed.\textsuperscript{164} A harriers section was also formed, and 16 members took part in the first run, who “presented a very smart appearance dressed in white knickerbockers and jackets”, though the club had to concede a year later that the harriers “very seldom took runs”.\textsuperscript{165} In 1889 the secretary remarked that the club had “gone on steadily increasing year by year, but he was not yet satisfied with the position attained”. He proposed that they should not only practice athletics “pure and simple”, but also “proceed to that which would give free play to that hardness and muscular development that had been

attained in the practice room".166 A year later, the club had 155 senior members and 72 juniors, and classes were added for ladies and girls.167 Classes comprised aspects of physical culture as well as aesthetically pleasing displays, as demonstrated by this description of an exhibition,

The lady members took a prominent part in the programme, which opened with a ‘lantern maze’ executed by members of all three sections, ladies, seniors and boys. The effect of the long sinuous lines of coloured lights, whirling about apparently in inextricable confusion, but really forming geometric patterns, was very pretty, and evoked hearty applause. Dumb bell exercises by all three sections, fencing, sabre practice, boxing... quarterstaff, single stick, the flying rings and vaulting horse combine to make up a unique athletic performance...168

The Northern Review reported a lack of “public spirit” towards the Athletics Club, and the cost of subscriptions was reduced in order to increase membership.169 By 1896 the Athletics Club (now often known as Middlesbrough Gymnasium) was able to proclaim that “the keen interest and vigorous energy at present displayed by the members augured well for unprecedented success”170.

By the 1880s, swimming was not only popular with the middle classes, but was also regarded as “an important element in the development of the masses’ physical

167 North-Eastern Daily Gazette, 5th March 1891; North-Eastern Weekly Gazette, 25th July 1891; Northern Review, 21st March 1891
168 North-Eastern Daily Gazette, 19th April 1892; Frank Galligan notes that gymnastics was embued with expressive, aesthetic and cosmetic qualities, due to contemporary interest in physical culture, eugenics and health – F. Galligan, ‘The History of Gymnastic Activity in the West Midlands, with special reference to Birmingham, from 1864 to 1918: With analysis of military influences, secular and religious innovation and educational developments’, unpublished PhD thesis, Coventry University, 1999, p. 15
169 North-Eastern Daily Gazette, 26th April, 10th May 1893; Northern Review, 4th March 1893; The cost of senior membership was lowered from 10s 6d to 7s 6d; In comparison, Middlesbrough Harriers (formed in 1889) had 112 members in 1893 and were debt free, though only an average of 15 members attended each weekly run – North-Eastern Daily Gazette, 23rd September 1893; Northern Echo, 3rd October 1894
170 North-Eastern Daily Gazette, 11th February 1896
Indeed the *Daily Exchange* thought that the Middlesbrough Amateur Swimming Club offered “a most meritorious movement for the instruction of those who are unable and desirous of learning to swim”. Furthermore, a great number of public events meant that it also became popular for spectators. The *Weekly Exchange* reported on the opening night of the swimming club in March 1886 when the 30 club members demonstrated “ornamental and plain swimming”, as well as a water polo match. The newspaper suggested that the club’s instructor “will soon have as many pupils as he may reasonably be expected to wish for”. The club held its first gala in July at which “all available space was occupied”, including a “fashionable company of spectators” in the higher priced seats (in an elevated gallery so as to be “out of reach of the splashing”). At the club’s first dinner, the captain urged the members to make the club more successful and stated that,

Middlesbrough was at one time a bright and shining luminary in the cricket world, while in the football field of today she stood in the forefront par excellence. With ordinary individual interest and effort, therefore, on the part of each member, there was nothing to stop their[s] becoming one of the best clubs in the country.

Win Hayes attributes the popularity of swimming events to the location of baths in highly populated areas and to the attraction of the baths as a warm and comfortable setting, and also notes that by holding events on weekday evenings, swimming did not have to compete with weekend sports such as football. A variety of events were held

175 *Northern Review*, 5th March 1887
by the Amateur Club, some with an element of competition, and offered another form of entertainment for the paying public. In 1886 the manager of the baths, Joseph Weddell, gave “a most edifying and masterly exposition of swimming” including sleeping, walking, eating and writing under water. A year later a number of swimming events were held including a contest between two amateurs (for £6 6s) of one mile, a half mile and one hour “for the championship of Middlesbrough”, and a gala of seven swimming and diving events. The club held their first water polo match in 1886, and a separate committee was appointed two years later. A number of water polo matches were held in 1888, which were said to cause a great deal of excitement, there being “quite as much keenness exhibited over these events as is weekly the case over the football matches”. A contest for walking the greasy pole in fancy dress was included at the Amateur club’s gala in 1889, the event being won by George Snow who was dressed as “a fearsome crocodile”. There were complaints however, that another competitor was “dressed up in female attire” and “imparted an amount of vulgarity in his display which cannot be too severely condemned”. In April 1892 the gala included a team race between Middlesbrough and Darlington, whilst an event in November included a replica shipwreck and a life-saving demonstration. In 1894 the club’s gala, “in order to create a greater interest in swimming”, included the amateur champion of the England J. H.

177 Daily Exchange, 1st June 1887; Northern Echo, 7th June 1887; Weekly Exchange, 17th July 1886, 28th May 1887
178 North-Eastern Daily Gazette, 24th February 1888; North-Eastern Weekly Gazette, 28th March 1891; Northern Review, 3rd, 10th March, 2nd June 1888; Water polo matches were reported between Middlesbrough Amateur Swimming Club and Stockton and North Ormesby, and a further contest was reported between Middlesbrough Football Club and Stockton Water Polo Club – North-Eastern Daily Gazette, 29th June, 10th June 1888; Northern Review, 4th August, 1st December 1888; A year later the North-Eastern Water Polo Association was formed and a challenge cup was donated by its president Albert de Lande Long (of Dorman Long iron and steel manufacturers). The founding members were Middlesbrough, Darlington, Stockton and Sunderland – North-Eastern Weekly Gazette, 7th September 1889; Northern Echo, 28th February 1889
179 North-Eastern Daily Gazette, 5th June 1889, 9th November 1892; Northern Echo, 6th April 1892; Northern Review, 8th June 1889
The Middlesbrough Police Swimming Club held their first gala in June 1896, and prizes were presented by Mayor Theophilius Phillips who remarked that he was “glad to find that the members of the force, in addition to protecting life and property ashore, were qualifying themselves for similar noble services on the deep”. In 1899 the Seaman’s Institute also held their first gala, including an exhibition of “fancy swimming” by ‘Professor’ Thomas Hatfield and his seven and five year old sons.

By 1890, membership of the Amateur club had increased to 120, plus 26 junior members, but the *Northern Review*’s ‘Rambler’ argued that the club “does not meet with the support it deserves” given that the population of the town was now almost 80,000. In 1894 the members of the club were called upon to “place the many advantages of swimming before their friends in order that the membership might be increased”, but two years later the club reported a decline in membership. Whilst in 1897 the secretary commented that some of the galas had “not been so satisfactory

180 *North-Eastern Daily Gazette*, 27th February 1894
181 *North-Eastern Daily Gazette*, 2nd June 1896; *Northern Echo*, 2nd June 1896; After making his speech Phillips competed in a race of two lengths of the pool against the Borough Surveyor, in which “he scored a very easy victory”.
182 *North-Eastern Daily Gazette*, 5th October 1899; Hatfield, the baths superintendent, was credited for “the manifestly increased interest” in swimming, and with reference to coaching his son Jack (see chapter 4), was described as “the finest and most encouraging of all trainers” – *Northern Athlete*, 29th October 1906; *Sports Gazette*, 26th July 1913; The term ‘professor’ was used to denote an expert ‘coach’. Day points out that the use of the term advertised the individual’s expertise and showed that they were available to coach – D. Day, ‘London Swimming Professors: Victorian craftsmen and aquatic entrepreneurs’, *Sport in History* 30, 1 (2010), p. 33
183 *North-Eastern Daily Gazette*, 28th February, 21st March 1890; *Northern Review*, 8th March 1890
184 *North-Eastern Daily Gazette*, 27th February 1894; *Northern Echo*, 5th February 1896; Such calls to arms echo the statement in *The Swimming Club Directory* (1885) that the aim of clubs was to “raise the art of swimming to its former standing” and to increase the number of “gentlemen promoters of the art and respectable persons attracted to swimming” – quoted in C. Parker, ‘An Urban Historical Perspective: Swimming a recreational and competitive pursuit 1840 to 1914’, unpublished PhD thesis, University of Sterling, 2003, p. 117
financially as could be wished”, it was also reported that 1,000 spectators had watched a swimming exhibition by Thomas Hatfield in “rough seas” at nearby Coatham.\footnote{Middlesbrough & Stockton Evening Telegraph, 13\textsuperscript{th} August 1897; North-Eastern Daily Gazette, 2\textsuperscript{nd} February 1897; Northern Echo, 3\textsuperscript{rd} February 1897}

f. Professionalism and Commercialism

Apart from football, there was little professional sport in Middlesbrough during this period. Those professional contests that did take place were invariably accompanied by crowds of spectators, and the money at stake would have also have attracted gambling. Prizes were offered at a small number of foot races. On New Year’s Day in 1885 a race of 120 yards for £5 (arranged by Messrs Legge and Wood), attracted “a capital entry and a good gate”. The same promoters organised races over two weekends a month later for which the winner of the 120 yards received £5.\footnote{Daily Exchange, 2\textsuperscript{nd} January 1885; Northern Echo, 2\textsuperscript{nd}, 9\textsuperscript{th} February 1885} A race a year later drew a crowd of 300 spectators and 67 entrants, whilst another race for £15 a side between two local competitors was held in 1888. The prize money had increased to £30 the following year for a race watched by 400 spectators.\footnote{Daily Exchange, 10\textsuperscript{th} August 1886; South Durham & Cleveland Mercury, 11\textsuperscript{th} February 1888, 31\textsuperscript{st} August 1889} Pedestrian races for prizes had not been reported in the local press for some time when the Butchers’ Handicap was held in 1896, attracting a much larger crowd of 2,000 and 125 entrants for a prize of £10 for first place.\footnote{The Butchers’ Handicap had first been held in 1874 – North-Eastern Daily Gazette, 4\textsuperscript{th} April 1896; Similarly a race over a quarter of a mile was held in Grangetown in 1898 for £15 a side, between a local man and a Scottish employee of Cleveland Steelworks – Middlesbrough & Stockton Evening Telegraph, 28\textsuperscript{th} May 1898}
After the rowing race involving Robert Boyd in 1882 (see chapter 1), professional rowing did not make any further inroads in to Middlesbrough’s sporting culture. In 1886 a former world champion professional rower, the Canadian Edward Hanlan, came to Middlesbrough to visit Boyd (one of his former opponents). The *Daily Exchange* reported that thousands of people awaited his arrival and hoped that his visit would increase interest in rowing,

> It will not come amiss if his visit should revive an interest in local aquatics. It seems now that football is the sport that absorbs all interest... North countrymen in the last generation were noted for their interest in aquatics... It is a pleasant and agreeable pastime, and one which quite as much as any other affords excellent muscular training to its devotees...

In the summer of 1897 it was reported that the rowing champion of New Zealand Charles Stephenson, had moved to the Shakespeare Inn in Middlesbrough (previously run by Boyd, who had died aged 33 in 1887). In an interview with the *Middlesbrough & Stockton Evening Telegraph* he said that he thought there was “a capital chance to start a professional club” in the town. He pointed out that there was “a lot of able-bodied, healthy lads about, a good river, and, with the support from the leading men, I do not see why we should not turn out a champion”. He quickly organised a race between two local “crack oarsmen” and a keel boat handicap which produced a “capital entry”. A contest was arranged between Stephenson and William Albert Barry of London for £100 a side. There was reportedly a large gathering of people each time deposits were...
placed down at the Shakespeare Inn, and the race itself would no doubt have drawn a huge crowd. However, due to the small pox epidemic, the race never took place as Barry refused to start his training on Teesside.\textsuperscript{192}

In marked contrast to much of the amateur sport in Middlesbrough, in October 1890 it was proposed that a horse race be established. The mile long course was to be constructed at the Ayresome Grange Farm, to accommodate flat and hurdle races twice a year. The \textit{South Durham & Cleveland Mercury} applauded the proposal, arguing that “no place would better support ‘the sport of kings’ than the busy capital of Cleveland”.\textsuperscript{193} Within a week of the suggestion, £200 had been guaranteed and it was proposed to form a limited liability company as all of the £5 shares had been immediately taken up. ‘Rambler’ suggested that a race meeting for Middlesbrough would put the town “on a level with our elder and more dignified neighbours”, but in mid-November it was reported that the scheme had fallen through, as terms could not be agreed.\textsuperscript{194}

\textsuperscript{192} \textit{Middlesbrough & Stockton Evening Telegraph}, 16\textsuperscript{th} February, 18\textsuperscript{th} April 1898; \textit{North-Eastern Daily Gazette}, 29\textsuperscript{th} January 1898; Stephenson had earlier challenged Hanlan to a race on the Tees for £100-£200 a side but this did not materialise – \textit{Middlesbrough & Stockton Sporting Telegraph}, 30\textsuperscript{th} November 1897

\textsuperscript{193} \textit{Northern Echo}, 29\textsuperscript{th} October 1890; \textit{South Durham & Cleveland Mercury}, 1\textsuperscript{st} November 1890; The suggestion originated with W. Robinson (“a gentlemen well known in the district in connection with coursing”), Robert Robinson (a farmer at Ayresome), John A. Dent (a brewers traveller) and William Lambert (landlord of the King’s Head Hotel) – 1891 census; \textit{Northern Echo}, 29\textsuperscript{th} October 1890

\textsuperscript{194} \textit{Northern Echo}, 5\textsuperscript{th} November 1890; \textit{Northern Review}, 8\textsuperscript{th} November 1890; \textit{South Durham & Cleveland Mercury}, 15\textsuperscript{th} November 1890; The reference to Middlesbrough’s elder neighbours, refers to Stockton (see Map 1) where races had been held since 1855. One newspaper referred to the mid-August races as “unquestionably the most popular meeting with the masses that we have in the north” – \textit{North Star} quoted in M. Huggins, "‘Mingled Pleasure and Speculation’: The survival of the enclosed racecourses on Teesside, 1855-1902", \textit{British Journal of Sports History} 3, 2 (1986), p. 163
g. The Cleveland and Middlesbrough Athletic Institute – Rational recreation in action?

Whilst the horse race would have involved money, professionalism and a great deal of gambling, a few months later, an organisation was formed that stood for quite the opposite. The short-lived Cleveland and Middlesbrough Athletic Institute endeavoured to “raise the moral tone of football players and supporters”. Its members would be able to “attain a higher social and moral position in life”. Proponents of rational recreation endeavoured to create model citizen’s by reforming the leisure habits of the working class, using sport as “an instrument of social discipline”. However, expanding towns and cities were perceived as obstacles for the middle-class initiatives that were designed to “improve popular leisure patterns”. Beaven points out that the provision of rational alternatives was not enough; intervention in working class leisure was necessary. Furthermore, Holt states that whilst the rhetoric of socio-religious groups was often rejected, in contrast “the prospect of playing games was attractive”. John Reed jr (secretary of the Cleveland Football Association and the Cleveland & Teesside Cricket Association) proposed the formation of the Institute. It was to provide facilities to sports clubs that at present were only available at a public house, whilst bad language, gambling and intemperance would not be tolerated. The Cleveland FA and both of the town’s football clubs would be able to hold their meetings there for a fee. The proposal met with huge support in the local press. An editorial in the *North-Eastern Daily Gazette* stated that it would be “a great step in advance of the direction

\[195\] *North-Eastern Daily Gazette*, 28th February 1891
\[196\] Beaven, *Leisure, Citizenship and Working-class Men*, p. 17, pp. 27-28; Holt, *Sport and the British*, pp. 138-139; For another example of rational recreation see D. Russell, *Popular Music in England, 1840-1914 – A social history* (Manchester, 1987). Russell points out that “through its supposed capacity to touch the emotions, music was uniquely suited to the task of shaping men’s thought and actions”, p. 24

\[197\] *North-Eastern Daily Gazette*, 28th February 1891; *Northern Review*, 28th February 1891; Reed proposed that individuals be elected to “control the conduct of the house... on the lines adopted at the large public schools of Rugby and Eton” – *North-Eastern Daily Gazette*, 28th February 1891
of moral reform” and would prevent cricket and football from being tainted by gambling. The *Northern Review* also hoped that such an establishment would “grapple with a pressing social question, how to clear the streets thronged nightly by football enthusiasts”, whilst the *North-Eastern Weekly Gazette* thought the Institute would “do away with a great amount of the evil existing” in connection with football.198

The Institute would provide dressing and recreation rooms for football, cricket, cycling, harriers and other sports clubs, and would “divorce the connection that has grown up with hotels”. Subscriptions would be low “so as to be within the means of those we wish to benefit”. Donations were quickly promised by the Mayor, the Borough Accountant and Jordison’s publishers among others. Reed informed the Cleveland FA that they could not “ignore their moral obligations to those placed in their charge”, and they agreed to subscribe £15 a year, whilst Middlesbrough FC also promised £10 a year.199 ‘Cyclist’ in the *Northern Review* outlined the benefits of the Institute to cyclists, stating that it would have “a great many more advantages, which cannot be expected from the hotel or inn, and will conduce to the healthy recreation of the mind and body any time when cycling is impracticable”. By early May 1891 more than £100 had been raised.200 At the opening of the Institute in August the Mayor stated that he thought, “it

198 *North-Eastern Daily Gazette*, 28th February 1891; *North-Eastern Weekly Gazette*, 7th March 1891; *Northern Review*, 7th March 1891
199 Cleveland and Middlesbrough Athletic Institute Minute Book, undated entry, U/S/384 Teesside Archives (hereafter Minute Book of CMAI); *North-Eastern Daily Gazette*, 20th, 28th March 1891; *Northern Echo*, 7th March 1891; Ironopolis stated that they “did not at present see their way to joining the institute” – *North-Eastern Daily Gazette*, 20th March 1891; Clubs subscribing £10 or more would have the use of a committee room and a dressing room, and 30 of their members would be able to join at no further charge. Cycling clubs with less than 50 members would pay £3, whilst those with more than 50 members would pay £5. Clubs with membership of less than 20 would be charged 5s, under 50 members 10s, and more than 50 members 21s. All such clubs would have the use of committee and dressing rooms, *Northern Review*, 30th May 1891
200 Minute Book of CMAI, undated entry; *North-Eastern Weekly Gazette*, 25th April 1891; *Northern Review*, 25th April, 9th May 1891
was well to free such institutions as football clubs from the influences of public houses because most of the members were young men, and were [easily] led astray”. Within two months the Institute had 400 members. According to the *Northern Review*, it was a place where “you can combine amusement with instruction, and whilst passing a pleasant hour or two, make yourselves masters of an art which will be of value to you through life”. That the Institute was more than somewhere for sports clubs to meet is evidenced by the educational, singing and dramatic classes that were held and the inclusion of a library. A “lad’s club” was also established, to take boys “away from that ‘education of the streets’ which in a town like Middlesbrough is always a most undesirable factor in a lad’s life”. The club taught boys fretwork, joinery and athletic exercises for a subscription of 1s 6d.  

However, the Institute did not receive as much support as had been hoped for from the town’s smaller sports clubs. The committee decided to ask such clubs to hold their meetings in the Institute, whilst leaving the question of their subscription open. Efforts were also made to get individual cyclists who were not attached to a club to join. In October 1892 the Institute’s committee stated that it was with “deep reluctance [that] they feel compelled to ask their patrons to give help for another year”. The *Northern Echo* suggested that, “the work done by the Institute is so worthily commendable that no doubt football patrons will give a ready response”. However, with no further news on the progress of the Institute, the *Northern Review* reported in July 1893 that after less

than two years in existence, it would be closing.\textsuperscript{205} Given the difficulties already encountered by many clubs in raising money, the additional costs of holding meetings in the Institute no doubt proved too great.\textsuperscript{206} It might also be assumed that it proved difficult to “divorce the connection that has grown up with hotels” as the Institute had hoped to do. Perhaps the idea that the relationship between pubs and sport was an unhealthy one, was not a notion that all local sportsmen subscribed to.\textsuperscript{207}

\textbf{h. Sports Days}

Sports days flourished during this period, frequently attracting larger crowds and more members of Middlesbrough’s elite than for any other sporting events, demonstrating both an appetite for sport as well as for affordable entertainment. Such events also offered opportunities for those to take part in sporting activities who would not normally have the opportunity to do so. Whilst sports days offered an opportunity for a cross-section of the community to enjoy sport together, sports days were also “necessary to raise funds to carry on the proper functions of the club”.\textsuperscript{208} Financial returns varied. In 1889, Middlesbrough Cricket Club made £60 profit, and £87 profit in 1896, but only £32 a year later.\textsuperscript{209} In comparison, North-Ormesby & Middlesbrough Cycling Club made a loss of £3 on their sports day in 1892 as the 50 miles road race had

\textsuperscript{205} North-Eastern Daily Gazette, 28th October 1892; Northern Echo, 29th October 1892; Northern Review, 22nd July 1893; Despite the failure of the Institute, in May 1892 a meeting was held to consider the possibility of purchasing either the cricket or football field and forming a united sports club. The meeting was attended by cricket, football, athletic, cycling and baseball clubs, and it was decided that the Middlesbrough Owners should be asked to reserve sections of the cricket and football fields in order that an athletics association could be formed – North-Eastern Daily Gazette, 11th, 12th May 1892

\textsuperscript{206} For example, Ironopolis FC, whose finances were rarely healthy, had already erected their own rooms for meetings which also provided a place for the players “wherein he may pass the long evenings free from tap-room dangers” – Athletic News, 29th September 1890; North-Eastern Daily Gazette, 24th September 1890

\textsuperscript{207} Indeed Beaven states that a feature of most rational recreation schemes was their failure – Beaven, Leisure, Citizenship and Working-class Men, p. 39

\textsuperscript{208} Northern Review, 4th July 1891

\textsuperscript{209} North-Eastern Weekly Gazette, 24th June 1889; Northern Echo, 4th November 1897
“proved expensive”, but in 1899 a profit of over £76 was recorded.\textsuperscript{210} Sports days were held by a range of clubs and other organisations, and most events included the same foot and cycle races, as well as some more unusual contests. In 1885 the prizes at the sports of Middlesbrough High School were presented by the wife of Middlesbrough’s MP Isaac Wilson, and as well as flat races included a pole leaping handicap, a football dribbling race and a sack race.\textsuperscript{211} In 1888 the first sports day of Britannia Rovers Football Club included a stone gathering race for children and a bicycle race for employees of Dorman Long & Co iron and steel works. The Tees Submarine Miners’ sports the following year included entirely different events such as a duck catching contest and connecting an electro-contact mine, whilst the sports of Middlesbrough FC included a tug of war contest between seven works’ teams and a horse leaping competition. The Middlesbrough Police Cricket Club’s sports day in 1900 included a flat race for the sons of policemen and a skipping race for their daughters.\textsuperscript{212} The joint athletic sports day of the North Ormesby & Middlesbrough Cycling Club and the Grangetown Athletic Club in 1898 included professional cyclists. The number of spectators was estimated at between 7,500 and 9,000 and it was suggested that the profit be put towards either a “palatial club-house” or a “fund for ruining [the] Grangetown track by providing one at Middlesbrough”.\textsuperscript{213}

\textsuperscript{210} Middlesbrough & Stockton Evening Telegraph, 21\textsuperscript{st} January 1899; North-Eastern Daily Gazette, 1\textsuperscript{st} December 1892
\textsuperscript{211} Programme for the Athletic Sports (boys) 1885, S/M/H/3/32, Teesside Archives
\textsuperscript{212} Middlesbrough Morning Mail, 5\textsuperscript{th} September 1900; North-Eastern Daily Gazette, 15\textsuperscript{th} October 1888; North-Eastern Weekly Gazette, 31\textsuperscript{st} August 1889; South Durham & Cleveland Mercury, 23\textsuperscript{rd} August 1890; See also the sports of the friendly society of the Loyal Order of Ancient Shepherds in 1889, and the 1899 annual picnic of the employees of the Tees Oil Works – North-Eastern Daily Gazette, 8\textsuperscript{th} July 1889; Northern Echo, 4\textsuperscript{th} July 1899; For another example of sports days see S. Phillips, ‘Industrial Welfare and Recreation at Boots Pure Drug Company 1883-1945’, unpublished PhD thesis, Nottingham Trent University, 2003, pp. 179-185
\textsuperscript{213} Middlesbrough & Stockton Evening Telegraph, 2\textsuperscript{nd}, 5\textsuperscript{th} July 1898; Northern Weekly Gazette, 9\textsuperscript{th} July 1898; In contrast ‘GM’ in the Middlesbrough & Stockton Evening Telegraph, argued that the town was well-served by the Grangetown track, its only disadvantage being its close proximity to the blast furnaces, Middlesbrough & Stockton Evening Telegraph, 15\textsuperscript{th} July 1898
Attendances fluctuated at these events. Despite an attendance of 3,000 spectators for the Grangetown sports in June 1893, that of Ironopolis Cricket Club in August was small, as “the public are getting tired of sports week after week”. In comparison 1,032 passengers arrived by train alone for the sports of North Ormesby & Middlesbrough Cycling Club in 1896, an event with 200 entrants, and two years later the Grangetown sports attracted 7,500 spectators, due to the increased popularity of cycling. The joint event of the North Ormesby club and the Grangetown Athletic Club in 1899 had 8,000 to 10,000 spectators, with crowds of people unable to get into the grounds. In 1900 the biggest cycling event to have been held in Middlesbrough took place, with the championship races of the NCU. The Grangetown track saw a record crowd of 9,000-10,000 for the eight races, both professional and amateur, though the Northern Echo was eager to point out that the amateur races were “intrinsically more popular”.

The success of such events led to a proliferation of betting and an increase in the number of professional competitors; according to the Northern Review’s ‘Rambler’, “the genuine athletes who compete in a spirit of honourable emulation... [are] few and far between”. Amateur sports days were now “a matter of business” where “the betting ring determines results”. Ironopolis FC’s Highland Sports in 1890 were condemned by the North-Eastern Weekly Gazette for the presence of many “knights of the pencil”, despite it having been stated beforehand that betting was prohibited. “Bets were made in

214 Northern Echo, 19th June 1893

216 Middlesbrough & Stockton Sporting Telegraph, 26th June 1899; South Durham & Cleveland Mercury, 30th June 1899
217 Northern Echo, 25th June 1900
218 Northern Review, 29th June 1889
tones loud enough to be heard anywhere on the ground”, and as police were not present “the scum of race followers plied their nefarious practices... with impunity”. Sports days often involved a number of valuable prizes, for both professional and amateur athletes, adding to the interest in the races. In 1890 the sports of North Ormesby & Middlesbrough Cycling Club had prizes of £75, £50 worth of prizes were handed out at Middlesbrough Cricket Club’s sports, and the smaller Ironopolis Cricket Club sports also had prizes totalling £10 for professional sprint races. Six years later, the prizes of the North Ormesby & Middlesbrough Cycling Club ranged from a trophy worth 15 guineas, to a kettle and a case of fruit spoons. ‘Rambler’ argued that “but for amateur sports a large number who take part now would join the professional ranks, but not so long as amateur sports pay them better”. The “true amateur who would be content to strive for honour alone”, was becoming increasingly rare.

i. Women and Sport

Athleticism and femininity were deemed incompatible in the late Victorian period. As Catriona M. Parratt states, women’s sport had to show the acceptance of “conservative notions of appropriately ladylike behaviour”, and sport in general only served to reinforce the different roles of men and women. Women had to “project an image of moderation and becoming femininity, and her sporting experience was consequently... a

219 North-Eastern Daily Gazette, 9th August 1890; North-Eastern Weekly Gazette, 23rd August 1890  
220 North-Eastern Weekly Gazette, 5th July 1890; Northern Review, 10th May 1890; South Durham & Cleveland Mercury, 23rd August 1890  
221 North-Eastern Daily Gazette, 15th May 1896  
222 Northern Review, 4th July 1891; A rather different complaint was made in the Middlesbrough Morning Mail in 1900 which stated that the prizes at amateur sports days were always the same, and therefore once a competitor had won a prize there was no motivation to try to win again, Middlesbrough Morning Mail, 25th October 1900
liberating and constraining one”. Furthermore, competitive sport was incompatible with the ‘ideal’ Victorian woman, with recreational sport being favoured, though a small amount of physical fitness could also enhance femininity. In addition, Richard Holt has pointed out that some sports underlined the traditional view of women – outside of school, women’s sports were “rooted in a new kind of suburban culture, centred around the family garden and the private club”, and it was only in the affluent suburbs of larger cities that women’s post-school sport flourished.

There were very limited opportunities for women in Middlesbrough to partake in sport during this period, and those options that were available were not open to working class women due to constraints of time, money and space. One of the few sports that had female participants and in which men and women could play together, was tennis. For female tennis players, the game was “a social asset providing training in graceful and charming movements”, and a ladies’ championship had been inaugurated at Wimbledon in 1884. In May 1887 the tennis section of Middlesbrough Cricket Club had to provide an extra net to allow ladies to practice amongst themselves “until they get more adept at the game, when they will no doubt unblushingly join the males”. The suburban Linthorpe Tennis Club also had a number of female members, though the Northern Review suggested that many of them only joined as a means of meeting “vivacious

226 Holt, Sport and the British, p. 126; McCrone points out, the female mixed doubles player was derided nevertheless as helpless, unskilled and more concerned with flirting – McCrone, Sport and the Physical Emancipation of English Women, pp. 156-166
bachelors". By the 1880s female swimming had become a physical activity that men not only tolerated, but one which they sometimes actively and publicly promoted, and many women felt that they could participate without fear of social stigma. The medical profession were key supporters of female swimming, in fact swimming epitomised the “medically appropriate sportive exercise for the modern woman”. In September 1888 the Northern Review reported that with the approval of the town’s doctors, 30 or 40 ladies had applied to join the ladies’ branch of the town’s swimming club. At the club’s gala a year later, two women competed in the ladies’ race, the winner possessing “a powerful but graceful stroke”. There was evidently interest in swimming among a number of women as the council’s Sanitary Committee were required to extend the hours set aside for the club’s private use of the baths to “give facilities to the gentler sex for acquiring the natatory art”. Indeed by February 1891 the club had 34 female members, of which 11 were juniors, increasing to 45 members in 1894. One member proposed at a meeting of the club that they be given power to elect their own committee “to have full control of the ladies’ section during the time set apart for their practice”,

227 Northern Echo, 9th May, 28th June 1887; Northern Review, 21st, 28th May, 2nd July, 3rd December 1887; Indeed in 1890, Wilberforce suggested that such doubles matches were “an excuse for garden-parties and a vehicle for conversation” – H. W. W. Wilberforce, ‘The Four-Handed or Double Game’, in J. M. Heathcote and C. G. Heathcote, Tennis (London, 1890), p. 291
228 1891 census; Northern Echo, 17th September 1887, 14th July 1888
229 P. Vertinsky, The Eternally Wounded Woman: Women, doctors and exercise in the late nineteenth century (Manchester, 1990), p. 82; Parker points out that the health benefits of swimming were often “spurious and wide-ranging”, but they were firmly believed, despite a lack of medical evidence – Parker, ‘Swimming’, p. 680; For issues of women’s sport and health, see McCrone, Sport and the Physical Emancipation of English Women, pp. 192-215
230 North-Eastern Weekly Gazette, 1st June 1889; Northern Echo, 5th June 1889; Northern Review, 22nd September 1888
including setting rules and organising competitions.\textsuperscript{231} The \textit{Northern Review}’s ‘Rambler’ described it as “the old question of women’s rights”, suggesting that the ladies “came bravely (though perhaps with inward trembling and with a readiness to run away at the slightest provocation) to the meeting”. Their involvement in the selection of the male members of the club reportedly led to the election of Henry Horseman as captain as he was “a young man and a bachelor”, and of Thomas Brown, “a gay young bachelor”, as deputy-captain.\textsuperscript{232} The ladies gala in October 1891 drew a great deal of interest, the swimming baths being “crowded with ladies”. The participants “betrayed none of that fear of the water usually shown by ladies”. Some of the participants can be identified as the daughter of a shipyard manager, the daughter of a police officer and the daughters of a butcher.\textsuperscript{233} In contrast to the relatively sedate surroundings of the swimming baths, in 1890 the sailing regatta was brought to a close when Lilly Weddell, the six year old daughter of the swimming baths manager, swam across the Tees, being “heartily applauded for her plucky effort”.\textsuperscript{234}

In 1888 the Middlesbrough Amateur Athletic Club began a ladies’ class, and three years later the Ladies’ Athletic Club was formed “for the purpose of physical training”. The \textit{Northern Review} remarked that “the spirit in which they have taken up physical training will eventually tell very seriously”. Within a few months there were 58 members in the ladies’ section and 23 in the girls’ section, increasing to 40 in 1894.\textsuperscript{235} It is not possible to identify any of the female members of the ladies’ section of the club.

\textsuperscript{231} \textit{North-Eastern Daily Gazette}, 21\textsuperscript{st} February 1891; \textit{Northern Echo}, 28\textsuperscript{th} June 1890, 18\textsuperscript{th} February 1891

\textsuperscript{235} \textit{North-Eastern Daily Gazette}, 20\textsuperscript{th} October 1891, 7\textsuperscript{th} June 1894
though the female officials were certainly middle class. The first president was Mercy Sadler (the wife of Samuel Sadler), whilst Fanny Caddick (the wife of the Athletic Club’s secretary, a cashier) was elected as secretary, and the wife of the ironmaster Lawrence Farrar Gjers was elected treasurer. In 1897, the vice-presidents were the wives of a doctor and an ironmaster, though in contrast the captain of the girls’ club can be identified as a dress maker.²³⁶

Opinions were often expressed about the unsuitability of cycling for women. Of all sports, cycling attracting the most attention from doctors, it being described alternately as both producing and curing an array of disorders.²³⁷ In 1892 it was reported that the Middlesbrough Amateur Athletic Cycling Club had a number of female members, and the Middlesbrough Wednesday Half-Holiday Cycling Club enrolled its first female member in May 1896. A year later two female members were also elected to North Ormesby & Middlesbrough Cycling Club, and in 1899 the Middlesbrough Ladies Wednesday Club was formed.²³⁸ In the same year, the secretary of Middlesbrough Rovers stated that the introduction of ladies to the club had been “one of the secrets of its success”, and by 1900 the club were said to have the largest number of mixed members.²³⁹ Adverts appeared in the North-Eastern Daily Gazette for a ‘cycle riding school’ where ladies would be “properly taught by experienced teachers”.²⁴⁰ Kathleen E. McCrone argues that more than any other sport, cycling gave women “their most

²³⁶ 1891 and 1901 census; North-Eastern Daily Gazette, 20th October 1891, 7th June 1894, 20th January 1897
²³⁷ Cycling was thought to have a deleterious effect on reproduction and childbirth – Birley, Land of Sport and Glory, p. 80; Holt, Sport and the British, p. 124; McCrone, Sport and the Physical Emancipation of English Women, p. 201; Vertinsky, The Eternally Wounded Woman, pp. 76-80

²⁴⁰ North-Eastern Daily Gazette, 21st November 1896
significant experience of physical exercise”, and played a crucial role in breaking down conventions.\(^{241}\) However, the number of female cyclists in Middlesbrough was small despite the assertion of the *South Durham & Cleveland Mercury* that cycling gave women “a freedom which they have never previously enjoyed... It will make them freer and healthier, happier and less trammelled by the foolishness and restraints of fashion”.\(^{242}\)

**j. Conclusions**

Overall, sport continued to grow at the end of the nineteenth century. Samuel Sadler stated in 1890 that “the happiness of the people was perhaps just as well encompassed by exercising their muscle and adding to their health”, and this idea was adhered to by many members of the town’s middle classes as evidenced by the number of clubs in existence.\(^{243}\) The diverse range of sports that were played meant that a variety of tastes could be catered for. Bowling, for example, was said to be ideal “for those who are a bit too heavy and stiff for football and cricket and it at the same time affords a trial of skill and patience”, whilst there was no game like tennis “for exercising every muscle of the body”.\(^{244}\) New sports and those that were temporarily in vogue were eagerly taken up, some with more success than others. Whilst the popularity of tennis was short-lived for example, cycling rarely went out of fashion, there being a great number of clubs with varying levels of activity. The growing popularity of football, coupled with a lack of

available outdoor space, meant that some clubs were prevented from expanding. Moving grounds necessitated an outlay of money that most clubs could not afford, and some clubs were perpetually raising funds to rebuild facilities. That such circumstances should have hindered the development of some sports at a time when sport in general was growing, is an unfortunate consequence of Middlesbrough’s growth. Some sports were not capable of attracting large memberships, and it is perhaps no coincidence that many of the less popular clubs were those of less competitive or recreational sports. The most successful cycling clubs in terms of membership, for example, were those that took part in racing. Furthermore, sports such as rowing and rugby only had one club, meaning a lack of competition and thus less excitement for spectators.

Middlesbrough’s club culture offered opportunities for the town’s elite to socialise with like-minded people, away from the lower classes, and allowed newcomers a chance to integrate in new surroundings. The most elite sports clubs acted as replacements for the long-standing traditional institutions that the town lacked. The middle class make-up of the vast majority of sports clubs limited membership numbers, making it difficult for some to continue. Amateurism still dominated the sporting scene. Raylton Dixon, one of the founding members of the Boating Club, favoured the sport as there was “less money making” in rowing.\textsuperscript{245} The amateur ethos was further demonstrated for example by the Cleveland Roads Cycling Club when they handed out small prizes that would not lead to “training and undue preparation”.\textsuperscript{246} There were very few opportunities for workers to play sport, being excluded by subscription costs, a lack of free time and the exclusive nature of many clubs. Spectator sports such as football,
baseball and the increasingly popular sports days were for many, the only opportunities available.

The sports clubs of large scale employers did offer Middlesbrough’s workers a chance to play sport. These and other existing sports, alongside the development of new clubs and organisations in the early years of the twentieth century will be examined in the next chapter.
Chapter 4. “An Increasing and Often Unreasonable Demand for Pleasure”\(^1\): The diversification of an urban sporting culture, 1901-1914

By 1901 Middlesbrough’s population had reached 91,302 and following the extension of the Borough, reached 126,452 in 1914 (see Appendix 1).\(^2\) In 1911, 45.4% of the population was still employed in manufacturing, and the working population continued to be effected by patterns of boom and slump in the town’s heavy industry.\(^3\) Furthermore, in the years before the First World War, Middlesbrough experienced three periods of acute depression – following the Boer War, 1908-09 and 1911-12, the latter proving particularly damaging. However, even though the town’s economy did not return to the affluent days of the 1870s, in 1914 Middlesbrough was still manufacturing a quarter of Britain’s iron and steel output. Whilst in broad terms, working class living standards in the town had continued to increase since 1870, the gap between the best and worst paid also increased, and living conditions barely improved; almost 13% of the population lived in overcrowded housing in 1911.\(^4\) Nevertheless Middlesbrough’s sporting culture continued to grow. For some sports, the patterns of development remained the same as in the last decades of the nineteenth century, and the middle, in particular the lower-middle classes, continued to be central in both administration and participation. Whilst no other sport could compete with football in terms of popularity or crowds, it was also pointed out that “there is nothing for the working man to do on a

Saturday afternoon in summer. New games entered the sporting landscape, and older sports continued, sometimes with decreasing numbers of participants. Opportunities for participation increased through the growth of work-based clubs; employers became the most important providers of sporting facilities for the working man.

a. The Relationship Between Class and Sport

Class was still the most important factor in determining an individual’s access to sport. As in the nineteenth century, Middlesbrough’s middle classes played a crucial role in the development of sport. A large proportion of clubs had little working class involvement and this section will examine the backgrounds of the members of some of Middlesbrough’s clubs. Which clubs retained their exclusivity? Were some sports more accessible than others? Mike Huggins’ description of the motivations of various middle class groups applies to the section of Middlesbrough’s population that participated most in sport. Parts of the middle class emulated upper class sports, others saw sport as an opportunity to promote muscular Christianity, whilst another section, perhaps most prevalent in Middlesbrough, were simply more “prone to the pursuit of pleasure and personal gratification in their sports”. Huggins also points out the importance of status and respectability to the lower-middle class of shopkeepers, teachers and clerks. The role of Middlesbrough’s lower-middle class continued to grow during this period, and their involvement in clubs reflects a desire to achieve higher status. As Jeffrey Hill suggests, those involved with clubs often viewed the organisation as “a channel to social prestige rather than a training ground for competition for victory”.

---

5 North-Eastern Daily Gazette, 10th April 1906
7 J. Hill, Sport, Leisure & Culture in Twentieth-Century Britain (Basingstoke, 2002), p. 145
Lowerson states that for the lower-middle classes, sport offered an opportunity for “social bonding”, whilst for professional men, their “social ambiguity” and their need to build relationships with clients and with each other, made the organisation of sports clubs a “potent factor”. As is shown here, sport enabled local hierarchies to be “cemented, demonstrated and exploited”.  

The Middlesbrough Amateur Boating Club retained its exclusivity and middle class make-up after the turn of the century. The occupational backgrounds of the club officials in 1901 demonstrates that the club remained one of the more upper-middle and middle class clubs in the town, as it had been since its formation in 1866 –

1 Unable to locate on census
2 Kelly’s Directory of North and East Ridings of Yorkshire, 1897 (London, 1897)
The occupations of 49 of the club’s 69 members for 1899-1901 can be identified and their backgrounds were similar to the club’s officials (see Appendix 3). 29 of the members had domestic servants, and 12 were employers. Three of the members were councillors, two were MPs, one was a former MP, two were Alderman and five had been mayor of Middlesbrough.

As had been the case at the end of the nineteenth century, the continued expansion of industry along the Tees meant that the club struggled to find land for their boathouse. Having been forced to leave Newport and sell their boats in November 1900, in June 1901 the club were notified that Samuelson’s no longer required the land and would consider plans for a new boathouse. There is no indication in the minute book of the club that members felt aggrieved at having to pay to build another boathouse on the site they had just left. Instead, they were encouraged to “devote the whole of their time to the coaching, instruction and encouragement of the new members”.

At the club’s dinner in 1905 the Mayor “expressed admiration for the true spirit of sport that inspired the members of a purely amateur organisation”. The presence of the Mayor, Sir Samuel Sadler and “leading lights of finance, commerce, industry and education” at the dinner, demonstrates the standing of the club amongst

---

10 In contrast, competitors in 1901 at a quarter mile keel-boat handicap promoted by the landlord of the Cross Keys Hotel, included a river keel man, a general labourer, a sand wherry labourer and a shipyard labourer – *South Durham & Cleveland Mercury*, 31st May 1901
11 Councillors – Thomas Baker, William J. Bruce, Thomas Gibson-Poole; MPs – Samuel Sadler, Joseph Walton; former MP – Sir Bernhard Samuelson; Aldermen – Thomas Carter, Samuel Sadler; former Mayor – Thomas Baker, William J. Bruce, Thomas Carter, Sir Raylon Dixon, Samuel Sadler; See also members of the crew for 1911 and 1914 – *Sports Gazette*, 1st April 1911, 11th April, 18th July 1914
12 Minute Book of MABC, 4th June, 8th July, 8th August 1901; The new boathouse cost the club £130 – Minute Book of MABC, 15th November 1901

Middlesbrough’s elite.\textsuperscript{14} The sport’s exclusivity was evidenced by the remark by ‘Old Bird’ in the \textit{Sports Gazette} that “outside the Universities, rowing is only known as a sport among a limited number of enthusiasts”.\textsuperscript{15} Few actual races took place, so those against Middlesbrough’s only local rivals, the Tees Amateur Boating Club from Stockton, did provoke some interest. The contest for the Ironmasters’ Challenge Cup in 1907 drew a large crowd, despite the “rather colourless and dull locality in which the boathouse is situated”.\textsuperscript{16} Three years later, the \textit{Teesside Weekly Herald} remarked that the annual joint regatta of the two Teesside clubs had grown in popularity, as reflected in the large number of entries for the races which “would have done credit to Durham or any of the more notable regattas”.\textsuperscript{17} In 1914 the club was still dominated by the town’s middle class; members of the crew included an apprentice ship draughtsman, an assistant manager of a steelworks, an engineer, a clerk, an assistant schoolmaster and a Presbyterian minister.\textsuperscript{18}

With entrance fees and subscriptions of £1 1s for gentlemen and 10s 6d for ladies and men under the age of 21,\textsuperscript{19} from its inception in 1908 the Middlesbrough Golf Club also belonged to the middle classes. As \textit{Golf Illustrated} stated it was “not a poor man’s game”; it was “an expensive game suitable only for the moneyed and leisured classes”.\textsuperscript{20} Derek Birley describes golf as “a social, club activity for people with plenty of money”, whilst Hill states that there can be little doubt that golf was “a game in

which class and status was a major consideration in every aspect of its organisation”.  
Those clubs that needed to raise money to lay out a course were able to exclude those who could not afford to contribute, and as Lowerson suggests, by doing so clubs were devices for “encouraging emulation” amongst those who were unable to join.  

The first president of Middlesbrough Golf Club was the ironmaster Arthur John Dorman, replaced a few weeks later by a barrister, John James Emerson, and the other officials were undoubtedly middle class, demonstrated by the mandatory subscription by the vice-presidents of £3 3s –

b Kelly's Directory of North and East Ridings of Yorkshire, 1909; Address on 1911 census – Kenworthy's Hydropathic Establishment, Southport, Lancashire
Wray Vamplew characterises the relationship between golf clubs and professionals as “one of master and servant”. He points out that for some professionals the sport “brought economic prosperity; for none of them did it bring social equality”. As one contemporary stated, “the professional is so truly the servant of the game, and the distinction between him and his employer so clearly accepted, that he never forgets his position”.24 Claude Weastell25 was engaged as Middlesbrough’s professional for £1 a week, charging 1s per hour for teaching, 1s per hour for playing nine holes or 1s 6d for 18 holes.26 Caddies were appointed through Weastell, with their fees paid through him rather than directly to the caddie; they were paid 4d for nine holes or 7d for 18 holes.27

The golf course opened a month after the club was formed, by which time it already had 150 members. The course was said to meet “a longfelt [sic] want in Middlesbrough... [it] would enable them to come and enjoy an hour or two of sport in the middle of the day, instead of having to spend the whole day in going to and from the other courses”.28 By 1910 there were four cups to compete for,29 and it was decided that the course would be extended from nine to 18 holes; subscriptions being increased to £1

24 N. L. Jackson, ‘Professionalism and Sport’, Fortnightly Review 67 (1900), p. 156; Vamplew, ‘Successful Workers or Exploited Labour?’, p. 68
25 Weastell’s three brothers were also golf professionals, and he had already been a professional at two other clubs before joining Middlesbrough – Middlesbrough Golf Club Centenary 1908-2008 (Middlesbrough, 2010), p. 50
26 The club also employed a groundsman for 25s a week and Weastell’s wife Isabel provided bread, teacakes and jam twice a week, being paid 2s 6d per afternoon – Minute Book of MGC, 22nd January 1909, 23rd March 1911; Wray Vamplew has outlined the number of tasks golf professionals had to undertake and the fees they received – Vamplew, ‘Successful Workers or Exploited Labour?’, p. 57, p. 62
27 Minute Book of MGC, 22nd January 1909; Caddies were prevented from earning extra money when members were banned from purchasing golf balls from them, and in 1913 caddies were informed that “they must not wander about [the] course unless carrying” – Minute Book of MGC, 25th July 1910, 24th July 1913
28 Cleveland Standard, 2nd January 1909; Teesside Weekly Herald, 2nd January 1909
29 The cups were all presented by members of the club – Emerson Cup (for men over 55 years of age), Hinton Cup, Mason Cup and Poole Cup – Middlesbrough Golf Club Centenary, p. 35
10s for gentlemen and to 15s for ladies to finance it. By early 1912 membership had reached 240. A year later a profit was reported of £30, including a fee of £7 10s received from Middlesbrough Football Club to allow their players to use the course during the football season.

322 new members are listed in the club’s minute book between June 1909 and December 1914, and details can be ascertained for 217 individuals. Four members were councillors, either before or during their membership, and one member had been Mayor. 39 members were listed as an employer in the 1911 census, and 131 members had domestic servants. The occupations of 148 male members can be identified (female members will be dealt with below), the majority of which were middle class with a significant number of lower-middle class members (see Appendix 4) who may have used membership of the club to confirm their place in middle class society. Of those 206 members (male and female) for whom it is possible to identify their birthplace, only 66 were born in Middlesbrough and 30 were born elsewhere in Yorkshire. 20 members were born in Scotland, Wales or Ireland, and seven were born overseas, reflecting the variety of birth places of the town’s population in general.

---

30 *Sports Gazette*, 19th November 1910
31 Minute Book of MGC, 21st December 1911, 30th January, 19th September 1912, unspecified date for January 1913
32 It should be pointed out that were a number of resignations during the period, with members often rejoining later. Duplicates (i.e. those who left and re-joined) have been removed from this list.
33 David Almgill, Joseph Calvert, Patrick Considine and Thomas Roddam Dent; the latter had been Mayor and was an Alderman from 1907-1924.
34 A further seven male members are listed in the 1911 census as being at school – Lawrence Gjers jr at Charterhouse School, Raymond Cooper at Uppingham School, and Raymond Wilkinson at Bede Training College for Schoolmasters. The occupations of the heads of household of the four other young members were iron agent, chief draughtsman, pawnbroker, and clerk to the Guardians of the Poor Law Union.
35 Birthplaces of those born overseas – Germany (three), Cyprus, France, Trinidad and ‘At Sea’; Additionally, 24 of the 206 members who can be located on the 1911 census, did not live in Middlesbrough.
Kevin Jefferys points out that tennis was the preserve of the rich, being played “purely for pleasure, and always in a sportsmanlike way”. As one contemporary stated, “it requires a stretch of the imagination to picture a working man playing tennis”. The sport’s connection with the wealthy may have contributed to its decline in popularity in Middlesbrough, as at the turn of the century only a small number of individuals had the money and land to take part. However, in 1905 it was reported that the Grove Tennis Club were welcoming new members for their Wednesday section, there having been “such a run on the Saturday section that it has been found necessary to close the list”, and there are mentions of nine tennis clubs in Middlesbrough during this period. The Linthorpe Tennis Club was formed in 1906 and within a year had a membership of 200 and five tennis courts. The club’s first officials were undoubtedly middle class –

1901 census
Similarly, the first president of the Excelsior Tennis Club was the manager and owner of a dental surgery, and other officials included two clerks and a coal merchant.\textsuperscript{39} Though the number of tennis clubs increased, membership numbers were low. In 1910 the Linthorpe Avenue club only had 35 members, and the Grove club had 68 members.\textsuperscript{40} Robert J. Lake argues that the behavioural conduct and prestige associated with tennis meant that it “provided a means for the most socially aspirant upper middle classes to enhance their social standing and to demarcate themselves from social inferiors”.\textsuperscript{41} This notion can be applied to those members of the lower-middle and middle-middle classes participating in Middlesbrough’s tennis clubs, with aspirations of increased status.

The costs involved in playing tennis enabled clubs to retain their exclusivity. The subscriptions of the Grove Club were increased in 1913 to 17s 6d for gentlemen and 12s 6d for ladies, on top of an entrance fee of 5s. Similarly subscriptions for female members of the Linthorpe club were increased from 10s 6d to 15s in 1913.\textsuperscript{42} ‘Old Bird’ in the \textit{Sports Gazette} suggested that more land should be made available for the sport as interest was increasing. The inadequate facilities at the park meant that “clerks and others” were prevented from perfecting their game, but it did mean that they had to possess more enthusiasm than those members of clubs who were able to play on “well-tended courts and amid the luxuries of easily-obtained tea and lemon squash and basket chairs with cushions”.\textsuperscript{43} A proposal in 1914 to lay out tennis courts in Albert Park

\textsuperscript{39} \textit{North-Eastern Daily Gazette}, 16\textsuperscript{th} April 1913  
\textsuperscript{40} \textit{Sports Gazette}, 9\textsuperscript{th} April 1910; \textit{Teesside Weekly Herald}, 26\textsuperscript{th} March 1910  
\textsuperscript{42} \textit{North-Eastern Daily Gazette}, 31\textsuperscript{st} March 1913; \textit{Sports Gazette}, 4\textsuperscript{th} April 1914  
\textsuperscript{43} \textit{Sports Gazette}, 13\textsuperscript{th} April 1907
failed, and whilst it might be assumed that the increased participation this would have brought would have been welcomed, the *Teesside Weekly Herald* was pleased at the decision as the park was “intended for the people, not for small cliques and sections” of sports clubs. Tennis players should instead “pay for the ground they want”, thus sustaining the clubability of the sport.\(^4\)

Though not as elite as those clubs above, at the beginning of the twentieth century it is evident that Middlesbrough Cricket Club was also run by the town’s middle and professional class –

\(^4\) *Sports Gazette*, 21\(^{st}\) February 1914; *Teesside Weekly Herald*, 14\(^{th}\) March 1914

\textsuperscript{a}Former club professional
\textsuperscript{b}Kelly’s Directory of North and East Ridings of Yorkshire, 1909

\textsuperscript{45} 1901 census; \textit{North-Eastern Daily Gazette}, 4\textsuperscript{th} November 1903
In contrast the club’s professional (Jack Newstead) was a butcher, replaced in 1904 by a plater’s helper (J. L. Parkin). That William Fox, the club’s former professional, was able to take up the position of vice-captain would seem to confirm Hill’s assertion that league professionals had more freedom and standing in the sport than their county equivalents. They could enjoy “status, esteem and (in some cases) a wealth that was impossible to match in the first class game”. The officials of the North Ormesby Cricket Club were far more diverse when compared to those of the Middlesbrough Cricket Club, and included a number of working class men –

46 1901 census; North-Eastern Daily Gazette, 4th November 1903; South Durham & Cleveland Mercury, 22nd April 1904; Newstead joined the grounds staff at Lords in 1904

Table 4.5 – North Ormesby Cricket Club officials, 1905\(^{48}\)

\(^{48}\) 1901 census; *North-Eastern Daily Gazette*, 22\(^{nd}\) December 1905
Hockey was “contentedly and unquestionably amateur”, a sport that “retained Corinthian purity from top to bottom”, and in Middlesbrough it was another middle class sport.\(^49\) The local press first reported on the Middlesbrough Hockey Club in 1902 with games against Darlington and the Nondescripts (West Hartlepool), and players included two wine merchants, a jeweller, a teacher and a doctor.\(^50\) Though the sport received little press coverage, by 1904 ‘Old Bird’ in the *Sports Gazette* felt able to claim that “where football originally reigned supreme as the winter game hockey is rapidly coming to the fore... the games one may witness are both keen and enjoyable from all standpoints”. Though it was pointed out that the game might appear brutal to the uninitiated, it would not have been “in accordance with our British traditions to have a pastime so utterly devoid of risk”. This contrasts with Lowerson’s statement that self-control was important to this sport which had “a certain cachet of social distinction akin to bridge”.\(^51\)

Members of the lower-middle class had more involvement in cycling and swimming, and with the town’s Gymnasium. The officials of the Middlesbrough Amateur Gymnasium Society elected in 1907 had a variety of occupations, ranging from ironmaster to clerk. The affluence of some of the officials was demonstrated by the idea that the club would “try to tap” the eleven vice-presidents in order to clear their debt of £12 –

\(^{a}\) 1901 census  \(^{b}\) Kelly’s Directory of North and East Ridings of Yorkshire, 1909

\(^{52}\) 1911 census; Sports Gazette, 2\(^{nd}\) February 1907; Teesside Weekly Herald, 9\(^{th}\) February 1907
The Cleveland Roads Cycling Club’s shrinking membership (attributed in part to the popularity of motor cycling) led the captain to suggest lowering the subscription from 1s entrance fee and 5s for membership as this was “somewhat beyond the reach of the working man”. However, one committee member stated that “this would be impossible with their club, as it was a racing club, and if members’ fees be reduced the prizes would consequently not be so valuable”. Whilst this club still undertook a number of road races, in contrast the RUFS club were regarded as a “mysterious body of cyclists whose social functions can always be reckoned on to reach the high water mark of excellence”. There was rarely any reporting of clubs runs and unlike the majority of clubs, they did not hold a sports day. The club’s annual dinner on the other hand, was “one of the social events which is talked about for weeks beforehand and lingers pleasantly in the memory”. At the beginning of the century the North Ormesby & Middlesbrough Cycling Club was regarded as “the principal club” in the town, and had a lower-middle and middle class composition –

With its origins in Gjers Mills ironworks, the president of the Middlesbrough Ayresome Cycling Club was ironmaster Lawrence Farrar Gjers, and vice-presidents included three managers of the works. The committee included a foreman of the ironworks, whilst the secretary and treasurer was a commercial clerk.\textsuperscript{58}

Despite the attention that Jack Hatfield had brought to swimming in the town (see below), it was suggested that this was not a pastime that many people could partake in. In a letter to the \textit{Sports Gazette}, the headmaster of Denmark Street School, Joseph W. Wright, stated that whilst the “iron kings” provided prizes, “not one in 500 or 1,000 of his employees could be eligible to win the trophy he has given”. Membership fees were too high and long working hours prevented men attending club practices. Wright proposed that employers invite their workers to take part in galas, where events would be “the means of raising the standard right throughout the staff... what an enormous gain it would be to the community!”\textsuperscript{59} Wright’s suggestions are confirmed by the lower-middle and middle class officials of the Middlesbrough Amateur Swimming Club –

\textsuperscript{58} 1901 census; \textit{North-Eastern Daily Gazette}, 4\textsuperscript{th} March 1903; By 1911 the composition of the Ayresome club’s officials had changed entirely, moving away from the ironworks, and included a house agent, assistant schoolmaster, a clerk, a doctor and a relieving officer for the Middlesbrough Union – 1911 census; \textit{Kelly’s Directory of North and East Ridings of Yorkshire}, 1913 (London, 1913); \textit{Sports Gazette}, 25\textsuperscript{th} February 1911

Bowls proved a popular sport for those lower-middle class men whose work “left little time for sports more greedy of time and physique... offering a gentle rather than strenuous manliness”. Sir Samuel Sadler thought that bowling was “a most gentlemanly, a most philosophical, and [a] very proper and polite kind of sport”. It was a sport that had “a placidity about it that did not accompany certain other forms of sport”, and this contrasts with a sport such as professional football with its unruly spectators and associations with drink and bad behaviour. The secretary of the Cleveland & South Durham Bowling League thought that the sport should not become “a burden or a business”, but should remain “a real pleasure and recreation”. It was a sport of the working man; bowlers were “men who have to work, and arrange for our pleasure for, perhaps, a week before hand”. Lowerson contends that bowls was played by men from within and around the professional and respectable artisan classes, and the largely lower-middle class make-up of the officials of Middlesbrough Bowling Club reflects this –

The minute book of the club lists 118 members for 1901 and the occupations and/or places of birth for 98 of the members can be identified (see Appendix 5). The evidence suggests that most of the members were lower-middle and middle class, though there are a small number of members with working class occupations. Five of the members were councillors, and according to the 1901 census 40 of the members employed domestic servants, and 24 members were employers. Of those 97 members for whom it is possible to identify an occupation, 10 worked in the drinks trade. Only ten of the members were born in Middlesbrough, 24 were born elsewhere in Yorkshire and 12 were born in Scotland.

After the turn of the century steps were taken to improve standards and promote both the club and the game of bowls. The wages of the groundsman were increased in 1902 to 16s a week, rising to 18s in March 1903, followed by a further increase of 2s for “extra occasional labour” in June. In 1905 it was decided that the club would arrange to buy their ground, and in 1914 the club could afford to double the size of their pavilion. A municipal bowling green was opened in July 1914 and was thought to be “full value for the money spent”; the expense was entirely justified by “the large number of players who daily flock to the green”.

---

66 David Almgill, Thomas R. Dent, Foster Dodsworth, John H. Gunter and Thomas Gibson-Poole
67 Two hotel managers, two licensed victuallers, a brewery agent, a hotel keeper, a publican, an off beer seller, a wine and spirit merchant’s manager, a wine and spirit merchant. In comparison, none of the identifiable members of either Middlesbrough Golf Club or Middlesbrough Amateur Boating Club were employed in the drinks trade.
68 Only two of the members did not live in Middlesbrough – one in Redcar and one in Stockton-on-Tees; See also new members for 1906-07 – Minute Book of MBC, 25th April, 3rd May 1906, 23rd April, 7th May, 8th July 1907

71 North-Eastern Daily Gazette, 15th September 1914; Teesside Weekly Herald, 23rd May, 18th July 1914
Herald thought this was long overdue, arguing that, “Municipal bowling greens being a recognised institution in all parts of the country it does seem remarkable that... a town which is supposed to be governed in the most up to date progressive manner should be so woefully behind other towns”. Indeed one councillor remarked that Middlesbrough “was backward in bowling greens; other towns of its size had eight or more”.

Though there were a number of cycling clubs with working class members, bicycles remained relatively expensive during this period. In 1905, the most skilled blastfurnace worker received 60s a week, whilst the lowest paid worker received 19s. In 1914, the weekly wage of steelworkers ranged from 18s to 37s a week, whilst skilled men in shipbuilding received 36s 2d a week. Advertised prices of new cycles in 1903 ranged from £8 to £22 1s, and from £2 15s to £8 12s 6d for second-hand bicycles. A bicycle could also be purchased for payments of 3s 6d a week for 12 months (amounting to £8 8s). An advert in 1909 for the Gloria Cycle Depot, offered bicycles from £5s to £12 12s, whilst Carling & Sons sold their ‘road racer’ for £3 15s. In 1912 W. Evison’s prices started at £5 15s. In 1911 the officials of Middlesbrough Crescent Cycling Club were cross-class –

76 1911 census; *Teesside Weekly Herald*, 11th March, 16th December 1911; See also the diverse officials of Middlesbrough Tykes Cycling Club, presided over by Councillor Edwin Turner, “no mere figure head, but a real live ‘sport’” – *Teesside Weekly Herald*, 11th November 1911; *Sports Gazette*, 9th November 1912, 26th November 1914
In 1913 the subscriptions for this club were “the small sum” of 1s 6d a year, and in the same year the club held 76 runs as well as a “record number of social events”. The officers of the Middlesbrough Gasworks Cycling Club in 1906 had various positions at the gasworks – two managers, a clerk, a joiner, a foreman, a gas fitter and a maker of carburetted water gas. Despite the proliferation of clubs in this period the 1913 annual report of the North Yorkshire & South Durham Centre of the National Cyclists’ Union stated that, “attempts have been made to revive the small clubs that lapsed through the coal strike, but so far they continue to languish”, demonstrating the vulnerability of clubs to fluctuations in the economy. Robert Goodall has argued that as the bicycle became less of a novelty, “it became more a work horse”; there was no longer “a feeling of solidarity as with earlier cyclists; no more need to join a club”. This is borne out by the number of local clubs joining the Cyclists’ Touring Club – 100 in 1900 alone, but just 41 from 1912-1914. However, Kelly’s Directory for 1913 lists 27 cycle agents and dealers, three cycle manufacturers, three cycle repairers and one cycle accessories dealer in Middlesbrough. The 1893 edition of the same directory listed only two cycle agents and dealers, and two cycle manufacturers.

In contrast to many other sports in Middlesbrough, quoits had more working class involvement. In 1908 the secretary of the Ayresome Quoits Club was a lead burner at a
chemical works, the vice-president was a cooper and one of the treasurers was a grocer. The Middlesbrough & District Works Quoit League (formed in 1911), fulfilled a “long felt want” in the town for a league for “less proficient players”. All nine clubs in the league were connected to large industrial works or factories. The Erimus Quoit, Rifle & Social Club opened new premises in 1914. This club had “endeavoured with success to place healthy recreation in the way of the working-men of the district”. One member stated that “they had no blue-blooded aristocrats among their members”, instead they were “horny-handed sons of toil and business men”. The sport was evidently viewed favourably and the facilities deemed important by the town’s elite, as the Mayor (William Joseph Bruce, a former cab proprietor) opened the premises, remarking that, “it reflected great credit on the working men who mainly composed the club that they had secured such excellent facilities”. He thought that quoits should “appeal more to young people than it did. If some of them who lounged along Linthorpe Road and hung about street corners smoking cigarettes” joined such a club, “they would be much better off”.

Billiards was also played by working class men, growing in popularity during the period and becoming more of a competitive sport. Richard Holt attributes the game’s

---

83 *Sports Gazette*, 25th January 1908; This club was located on North Road in one of the poorest and unhealthiest parts of the town, condemned by the Medical Officer of Health in 1900 – L. Polley, ‘Housing the Community, 1830-1914’, in Pollard (ed.), *Middlesbrough: Town and Community*, pp. 169-170; Taylor, ‘The Infant Hercules and the Augean Stables’, pp. 73-74
84 The members of the League were Shaw’s (foundry), Sadler’s chemical works, the North-Eastern Railway Company, Dorman Long, Samuelson’s, North-Eastern Steelworks, Warners’ (steelworks), Gjers Mills and Ayresome, joined by Westgarth (engineers) and Crewdsons (tube manufacturers) a year later – *Sports Gazette*, 29th April 1911, 27th July 1912; In 1914 the vice-chairman of the League was a traffic manager at an iron and steel works, and the secretary was a chemical works clerk – 1911 census; *Sports Gazette*, 19th September 1914
85 *Sports Gazette*, 9th May 1914; *Teesside Weekly Herald*, 16th May 1914
popularity to a blend of “skill, drinking, banter and gambling”, and in 1905 the Sports Gazette commented that billiards “very largely existed in connection with hotels and drinking taverns”. Lady Florence Bell noted in ‘At the Works’ that billiards was “the most popular of all indoor games... in all the public-houses and in nearly all the private clubs tables are to be found”. Due to “very widespread demand” public billiard rooms (“which in no way rely on the sale of intoxicants”) were opened. The Teesside Catholic Billiard League was formed in 1909, to “draw together more closely the Catholics of the district and cement a friendship”, followed in the same year by the formation of the Middlesbrough & District Billiard League. That billiards could be divorced from drinking is further evidenced by the inclusion of billiards tables at the premises of a number of church organisations and other sports clubs, as well as the formation of the Church & Temperance Billiards League.

b. The Status of Cricket

For many Victorians and Edwardians, cricket was regarded as proof of their cultural supremacy. A national symbol, the sport “combined a sense of the bucolic increasingly sought after by a distinctly anti-urban industrial culture with a mode of social control of various levels of sophistication”. The notion of a desire for the ‘anti-urban’ may account for the deference accorded to cricket in an overwhelmingly urban environment in this case, but may also account for the relative lack of success (when compared to

86 Holt, Sport and the British, p. 190
87 Bell, At the Works, p. 128; Taylor, ‘The Infant Hercules and the Augean Stables’, p. 65
89 Billiards tables were included at the following – Gjers Mills, Samuelson’s, North-Eastern Railway Athletic Club, the Winter Gardens, YMCA, St Patrick’s Association, St Mary’s Association, Cambridge House, Feversham Street Boys’ Club and the Holy Cross Mission.
football) for cricket in Middlesbrough. Holt states that cricket’s attractiveness to both the middle and working classes, and to the north and south of the country meant that it was the national sport.90 As Sandiford and Vamplew contend, it “represented all that many thought was best in the English way of life”. Hill has pointed out that unlike the first class game, league cricket did not embody the “very public display of social authority and deference”, as evidenced by the relationship between gentlemen amateurs and professionals.91 This is demonstrated in the number of work-based clubs in Middlesbrough, and the greater number of opportunities these presented for working class players to take part.

Despite cricket’s status in English society, Middlesbrough Cricket Club remained in a state of decline and new ways of increasing income were sought. A hockey club was established in 1902, paying the club £8 rent per year, and Middlesbrough hosted a match between a Yorkshire 2nd XI and Durham, with another match arranged for the following year between Yorkshire 2nd and Northumberland.92 To further increase club funds, the price of admission was increased to 6d for the 1904 season.93 By 1906 it was felt that the club were improving. The Northern Athlete noted that they had once possessed a “traditional exclusiveness” (as demonstrated by the club officials above) but that this had finally been done away with. “There isn’t a shadow of doubt”, stated the newspaper, “but that cricket is on the improve”. However, the club failed to secure

---

92 North-Eastern Daily Gazette, 5th November 1902; Northern Echo, 23rd August 1902; South Durham & Cleveland Mercury, 29th August, 7th November 1902; The appearance of the Yorkshire 2nd XI was viewed as important to the club’s bank balance as the gate money was thought to account for 35% of the club’s income for the year – Teesside Weekly Herald, 20th August 1904
93 North-Eastern Daily Gazette, 29th April 1904; North Ormesby, Norton and Stockton also increased their prices to 6d
another visit by the Yorkshire 2nd team. The club complained to the county that “our ground is second to none in this part of the world... our supporters cannot understand what they consider the unfair treatment the Middlesbrough CC received from the County Club”.

However, the club’s inability to attract spectators to Yorkshire 2nd v Northumberland in 1908 led to the cancellation of another fixture. Despite the desire to have Yorkshire matches played there, and the statements in the press that the quality of the cricket currently played by the Middlesbrough club was poor, it was suggested that the county would have to “get together a much better side before North Yorkshiremen will be found willing to lose half a day’s work and plank down their nimble sixpences” to watch Yorkshire. However, it was also stated by the Teesside Weekly Herald that, “the fact remains that only a very small percentage of the large crowds who attend the football matches, extend their patronage to local cricket in the summer”. The Northern Athlete asked what the committee intended to do to make the club worthy of its old traditions,

Surely it is time you did something to save the situation, and the club from going into oblivion, because the public, who pay the piper, will soon object to your perpetual calling of their ideas, and the general fitness of their ideas, and the general fitness of things. What they want is to see good cricket, and a win or two now and again... Are you, as the responsible party, fulfilling the obligation your trust imposes on you? Are you giving us good cricket?

---

94 Northern Athlete, 28th May, 23rd July 1906
95 Teesside Weekly Herald, 19th January 1907
96 North-Eastern Daily Gazette, 19th August 1908; Northern Athlete, 24th August 1908; The newspapers’ criticism of the county club is interesting to note given Russell’s assertion that the press was “a crucial mechanism for ‘experiencing’ the game” that was played at a number of grounds across Yorkshire – D. Russell, ‘Sport and Identity: The case of Yorkshire County Cricket Club, 1890-1939’, Twentieth Century British History 7, 2 (1996), p. 212
97 Teesside Weekly Herald, 11th May 1907
98 Northern Athlete, 17th, 24th May 1909; The committee had allowed Steve Bloomer (a Middlesbrough and England footballer) to leave for the North Ormesby club, leading the Northern Athlete to comment that such a decision was “the kind of thing that has kept the Middlesbrough club in the background for 25 years” – 17th May 1909
When it was announced in 1910 that the club would have to leave their ground, the *Northern Athlete* argued that it was time that “some of the local monied men came forward and helped the committee... [to show] some little appreciation for the town in which they have made all their money, a town that has been an El Dorado for many”. It was suggested that the Middlesbrough Owners reduce the amount of money they required for the land; this would be “the least they can do after all the years they have made money at the town’s expense”. This attitude towards the Owners is rather different to the deference they had been treated with in the nineteenth century (see chapter 3). Only 20-30 people attended a public meeting to discuss the matter and Alderman Alfred Mattison commented that elsewhere, “cricket was a game to which everyone gave their active or passive support, yet in Middlesbrough they did not seem to make any effort”, which he attributed to the increasing number of works clubs in existence.

At the club’s AGM in 1911, it was announced that having been in a “perilous condition” for several years, the club would be disbanded “owing to lack of public support and loss of ground”. ‘Free Lance’ in the *Northern Athlete* asked,

> Where is that boasted spirit of sportsmanship, and that deep-dyed love of amateurism we have heard so much of in the past?... The monied men in the place ought to be ashamed of themselves to allow the national pastime of the country to die... for want of a little help. All they think of in these days of hustle is the making of money, not the giving away of it.

In contrast to the fortunes of Middlesbrough Cricket Club, North Ormesby prospered, due in no small part to the favourable terms by which they leased their field from the

Pennyman family. In 1906 the club had been able to employ a professional and a groundsman, and a year later recorded their largest receipts of over £173.\(^{103}\) However, by 1911 their income had decreased and the secretary attributed this to a lack of local competition since Middlesbrough had been disbanded. Instead, interest had to be maintained through social events and whist drives. In contrast to the complaints made about the lack of help offered to the Middlesbrough club, Pennyman stated, “in him cricket would always have a friend, and he could assure them that in the matter of the lease they would not find him hard”.\(^{104}\)

In late 1913 it was reported that North Ormesby would become ‘Middlesbrough Cricket Club’ as it was now within the borough of Middlesbrough.\(^{105}\) The club’s secretary stated that they had become “the cricket club of Middlesbrough... Middlesbrough never appreciated a town club until they lost it”.\(^{106}\) A year later the club changed its name to Middlesbrough, the secretary stating that it “had been urged upon them by many gentlemen in the town, including the Mayor”, which might suggest that this more stable club would reflect well upon the town. The *Sports Gazette* hoped that the club would now be able to attract county matches, arguing that there was “no reason why Middlesbrough should lag behind other Yorkshire towns in its patronage of the great game”.\(^{107}\)

As Mattison had already claimed, the *Northern Athlete* stated that Middlesbrough had a “superfluity of athletic clubs each with its own cricket branch attached, which has

\(^{103}\) *Sports Gazette*, 2\(^{nd}\) December 1906, 30\(^{th}\) November 1907

much to do with the present poverty” of the Middlesbrough club. The Sports Gazette’s ‘Old Bird’ suggested that the proliferation of clubs in the town was damaging to Middlesbrough Cricket Club. He argued that “many players prefer to indulge in their Saturday game with men with whom they associate in other directions during the week” where they could also be certain of getting a place in the team. ‘Old Bird’ felt that cricketers ought to feel duty-bound to play for the town club; “it should be the ambition of every player... to figure among the chosen eleven of his town”. As well as the multi-sport clubs of large employers (see below), there were a number of smaller clubs associated with places of work. New clubs formed at this time include Middlesbrough Passenger Station Cricket Club, Bolckow & Vaughan’s Middlesbrough Works Cricket Club and the Gazette Cricket Club.

Church clubs also thrived. The Middlesbrough Church Cricket League was formed in 1910 with 14 member clubs by the end of the first year. The Northern Athlete hoped that the League would not only promote the game, but also “cement good feeling between young men... and strengthen the bonds of universal brotherhood”. Indeed after the League’s first year, the secretary (Thomas Dormand Stewart, owner of Stewart’s Clothier Limited) remarked that “a most pleasing harmony existed among the teams, the

111 North-Eastern Daily Gazette, 28th May 1906
112 North-Eastern Daily Gazette, 1st February 1904; For club officials see Teesside Weekly Herald, 6th February 1904; Other work-based cricket clubs mentioned in the local press include Cleveland Asylum, Cleveland & Tees Dockyards, Middlesbrough Bank Clerks, Middlesbrough Butchers, Middlesbrough Hairdressers, Middlesbrough Police, Newhouse’s (drapers) Wednesday, North-Eastern Railway Staff, Westgarth’s Boilershop, Westgarth’s Foundry and Winterschladen’s (wine merchants).
games being fought in a spirit of friendly rivalry”. It is possible to identify some of the individuals involved in the running of such clubs, and professionals, clerks and the lower-middle class were instrumental in their administration, though there were also a number of working class men involved. For example, the captain, secretary and a committee member of South Bank St John’s Cricket Club in 1910 were all clerks, and other club officials included a member of the clergy, a chemist, an iron turner and a labourer. Linthorpe Parish Church Cricket Club’s president was the church’s vicar, the secretary was an inspector for the Board of Trade, the treasurer was a cashier and accountant, the assistant secretary and captain were both clerks, whilst the vice-captain was an inspector for the Tees Valley Water Board.

Despite the problems encountered by Middlesbrough Cricket Club, in 1912 the Middlesbrough Church Cricket League stated that interest in cricket had been “fully sustained until the last match” of the season, whilst the Cleveland Minor Cricket League maintained that it was “still progressive and popular with the minor cricket clubs in Cleveland”. In contrast, the North Yorkshire & South Durham Cricket League found it necessary to try to increase the popularity of the sport in the press, and sent a deputation to the North-Eastern Daily Gazette.

---

114 The founding members of the League were South Bank Primitive Methodist, Ayresome Street Primitive Methodist, Lackenby Wesley, West End Wesley, Park Wesley and Eston Primitive Methodist, with Middlesbrough Parish Church, Middlesbrough Baptists, St Columba’s, Thornaby St Luke’s, South Bank Brotherhood, South Bank Baptists and Linthorpe Road Primitive Methodists 2nd joining later – Sports Gazette, 15th October 1910; North-Eastern Daily Gazette, 9th April 1910; Northern Athlete, 16th May 1910; Teesside Weekly Herald, 28th October 1911

c. Work-based Clubs

Huggins argues that at the end of the nineteenth century the “paternalistic influence” of Middlesbrough’s elite decreased, leading in their absence, to a growth of commercialised leisure.\textsuperscript{119} However, the number of sports clubs attached to places of work contradicts this statement. Middlesbrough Cricket Club attributed their own demise to works’ clubs, but it was widely felt that these clubs fostered better working relationships between employers and workers. There was, according to the \textit{Northern Echo}, less of a tendency on Teesside to view the workforce merely “as ‘hands’, towards whom all responsibility ceases when their wages have been paid”. Lady Bell noted that such clubs were indeed “eagerly used by those entitled to do so”.\textsuperscript{120} Roger Munting argues that many larger employers increasingly regarded it as their duty to provide recreational facilities for their workers and the general population. The provision of such facilities was thought to help increase profits “through a contented labour force in an attractive working environment”, and was also used to recruit and retain workers, and instil a wider company culture. Munting also suggests that at many companies, the public school games ethos was passed down to workers, and that there was “a common concern with the moral welfare of the young especially, and how they spent leisure time.”\textsuperscript{121} In his work on Crewe, Allan Redfern notes that work “had a central role in determining the nature of local leisure”, whilst Simon Phillips’ research on Boots shows that sport was viewed as “a valuable means of bringing employees together”.\textsuperscript{122}

\textsuperscript{120} \textit{Northern Echo}, 27\textsuperscript{th} January 1903; Bell, \textit{At the Works}, p. 126
Huggins suggests that most employers “made only a modest contribution” to the works teams and other forms of recreation, and Holt claims that workers were cautious about efforts to provide sports, yet Middlesbrough’s works’ clubs often had large memberships.123

In 1899 the iron and steel works of Dorman Long & Co contributed £500 to the newly formed Dorman Long & Co United Athletic Club.124 Facilities for the workmen included a gymnasium, football and cricket grounds, six quoits pitches and a bowling green. At the opening of the ground Sir Arthur Dorman stated that,

> It was only right that they should do something for the benefit of the men who had done so much for them, and who by their steady and careful labour had made their firm famous throughout the world... If the men only played as well as they worked, they would soon make the name of the athletic club as famous as they had already made that of the firm.125

Arthur Dorman was elected president, and four of the vice-presidents were managers at the works. £2,500 was spent on the grounds and within a year the club had more than 1,800 members. Football teams were entered in the Northern League, the Cleveland Association, Teesside and Middlesbrough leagues, but the club found that “the objects of the club were not being carried out” and a departmental league was inaugurated instead.126 4,000 spectators attended the club’s sports day in August 1900, the prize

125 Middlesbrough & Stockton Evening Telegraph, 8th July 1899; South Durham & Cleveland Mercury, 14th July 1899
126 1901 census; South Durham & Cleveland Mercury, 23rd February 1900; The “objects of the club” are not explicitly stated. Membership of the football teams had declined, perhaps due to members preferring to watch Middlesbrough FC play, as was stated by the North-Eastern Steelworks Athletic Club in 1911.
fund of which Dorman had “subscribed [to] handsomely”. The suggestion that such organisations could lead to greater productivity was asserted when Dorman remarked that “it was no doubt owing in great measure to the club that the men were able to work so well... owing to the good work they got out of the men the directors had been encouraged to spend a big sum of money” on the Britannia Works. This statement may have been made in order to maintain productivity – greater results would be rewarded with improvements to the club.

Subscriptions were as low as possible, “it would be difficult to find another club in the country that would compare favourably with theirs”. Whilst the club’s vice-presidents all had managerial or professional positions at the works, general committees were also elected for the eleven departments of the works, which included men from a range of roles including three clerks, two stock takers, two smelters, a foreman, a galvaniser, an engineer, a labourer, an iron rougher, a draughtsman and a roll turner. In 1909 the club had 2,208 members. This accounts for a large proportion of the company’s workforce, there being 4,361 employees in 1907. In 1909 there was an increase in the number of members taking part in cricket, and a team was entered in the Cleveland Cricket League. A football team joined the Middlesbrough & District Works League and a cycling section was also formed. Membership increased again in 1910, attributed to the distribution of a pamphlet “setting forth the many privileges afforded”,

128 South Durham & Cleveland Mercury, 27th March 1903
129 1901 and 1911 census; North-Eastern Daily Gazette, 27th March 1905; Teesside Weekly Herald, 8th April 1905; Separate secretaries were elected in 1908 for the each of the activities of the club – band, bowls, cricket (12 teams), football (12 junior teams and ten senior teams), gymnasium, quoits and rifle club – Teesside Weekly Herald, 4th April 1908
131 Teesside Weekly Herald, 3rd April 1909
and by 1913 membership reached 2,694. Arthur Dorman extolled the benefits of the club, suggesting that it brought together employers and employees, “providing recreation which must be a benefit to all concerned”. Indeed the club reported that “more interest and activity was shown in the [cricket] competition than any previous season”, the position of the town’s premier club evidently not affecting interest in the sport. Moreover, the cricket section of the Dorman Long club was far less elite than Middlesbrough Cricket Club, and it would therefore have been more accessible and more appealing to many of the works’ employees. 

The North-Eastern Steelworks Athletic Club opened their recreation ground in 1903. The general manager of the company, Arthur H. Cooper, stated that “they were ambitious that their club should take the lead of all works athletic clubs... if anyone could make a club of that sort a success, it was the men employed by the North-Eastern Steel Company”. Though the company appeared benevolent in their provision of sporting facilities, they loaned rather than gave the club £200, which was repaid within two years. By 1906 the club had 1,700 members and their Linthorpe ground was regarded as “a credit to the workmen who have contributed to making it the finest recreation ground in the Cleveland District”. Furthermore it was felt that it was an “extremely creditable state of affairs when after working hours both officials and men could join together and enjoy themselves in healthgiving recreations”. In 1908, the officials of the club were middle class. The president was a managing director of the

steelworks, and vice-presidents included another managing director, two managers and two doctors. However, like the Dorman Long club, the 36 committee members elected a year later were diverse in their roles at the steelworks, ranging from clerks and assistant engineers to labourers and steelworkers.\[137\] By late 1908 the club had purchased six acres of land from the Middlesbrough Owners with space for a cricket ground, cycle track, gymnasium, rifle range and a bowling green. There would also be “tables for games so that members can pass a quiet hour who do not wish to take part in the other more active games”.\[138\] However, in 1911 certain sections of the club had proved unsuccessful. The sports day was “a great loss to the club”, the cricket section suffered from a “laxity in practice”, and the lack of success for the football team was attributed to the preference of the members for watching Middlesbrough FC.\[139\] This contrasts with the preference given to works cricket teams over the town club, and suggests a greater interest in watching rather than participating in football.

The Ayresome Athletic Club of Gjers Mills ironworks began in 1908, with the company being thanked for their “generous assistance and for the deep interest they had taken in the welfare of the club”.\[140\] The clubhouse of the re-named Gjers Mills Club was opened in November 1910, including rooms for billiards, quoits and reading, and space for air-rifle shooting. At the opening, Lawrence Farrar Gjers commented on the “good feeling which it would promote between the masters and the men”.\[141\] The Teesside Weekly Herald agreed that the existence of the club was conducive “to the

harmonious conduct of the business and strengthening that bond of sympathy which should exist between employers and men”; when the employees felt that their well-being was being cared for, they would “respond with an increased interest in the performances of their duties”.  

The Clarence Club, of Bell Brothers ironworks, was opened in 1903. Founded by Lady Florence Bell (the wife of ironmaster Sir Hugh Bell), it was “to serve as a resort, not only for the men employed at their works, but for their wives and families”. Lady Bell’s Winter Gardens was also opened in 1907. Admission was 1d and the Gardens included a billiard table, reading and writing tables, a band platform and refreshments. Lady Bell stated that it was “a public institution for the benefit of the working classes”, and as it was to be free from alcohol her husband thought that it offered “a solution of many a difficulty with which they were oppressed”. Samuelson’s ironworks opened their own social club in 1905 and the *Teesside Weekly Herald* again regarded this as further proof of the “bond of sympathy which exists between masters and men in some of the great industrial undertakings on Teesside”. This club would “brighten the leisure hours of [the] workmen”, and had reading, dining and billiard rooms, as well as a rifle range. By 1913, the club had over 1,000

---

142 *Teesside Weekly Herald*, 19th November 1910; With reference to the relationship between masters and men in Middlesbrough, Lewis states that in the later decades of the nineteenth century the iron and steel industry experienced “little sustained industrial conflict”, most disputes being resolved through arbitration. Middlesbrough’s trade unions were non-militant, and the demands of organised labour were “limited and non-ideological, fundamentally ameliorative and piecemeal” – R. Lewis, *The Evolution of a Political Culture: Middlesbrough, 1850–1950*, in Pollard (ed.), *Middlesbrough: Town and Community*, p. 115

143 *North-Eastern Daily Gazette*, 1st December 1903; *Northern Echo*, 27th January 1903

145 *North-Eastern Daily Gazette*, 25th October 1907
The North-Eastern Railway also possessed an athletic club, and a social club was added in 1907. Even though the club had been unable to secure a field, it still had 230 members paying 1d a week. In 1910 a sports club was formed for employees of Stewarts’s Clothiers Ltd. The club had their own cricket pitch, tennis court and croquet lawn, and ran football and hockey sections, the latter in order to “find amusement for the non-footballers and ladies”.

### d. Other Sporting and Recreational Organisations

J. J. Turner argues that the church did not play an active role in the town as it failed to provide charitable agencies or institutions. However, the evidence shows that a number of sporting and social organisations were formed by various churches in Middlesbrough, providing further opportunities for people to partake in rational recreation and, through forms of muscular Christianity, assist in the maintenance of a “healthy, moral and orderly work-force”. Churches were able to use recreation as a means of “facilitating evangelism, bolstering temperance and leading the battle against ‘immorality’”. Though it has been suggested that the socio-religious drive decreased at the end of the nineteenth century, Peter Stubley argues that after the building of churches and schools, the chief concern of Middlesbrough’s churches was “the

---

147 North-Eastern Daily Gazette, 23rd December 1907; Two years later, members were informed that the depression in trade “kept them from pressing the movement forward” to buy their own premises – Sports Gazette, 16th January 1909; For the club’s officials see Sports Gazette, 16th January 1909
148 North-Eastern Daily Gazette, 15th April 1910; Sports Gazette, 22nd October 1910; Other clubs also mentioned in the press included the Cargo Fleet Steel & Iron Works Athletic Club and Winterschladen’s Athletic Club – North-Eastern Daily Gazette, 20th August 1913; Sports Gazette, 3rd October 1914
149 Turner, ‘The People’s Winter Garden’, p. 30
provision of opportunities for harmless and uplifting activities out of work time”.

In the mid-1890s the Seamen’s Institute (or Tees Mission) offered a place where seamen could meet “for rational amusement and recreation”. The aim was to make the men “more provident, religious and moral”. In 1897 an athletics club was formed in connection with St Peter’s Mission Room with 175 members. Echoing the principles of muscular Christianity, members were called upon to use the facilities for religion and education, as well as for the “reasonable enjoyment of exercise and amusements so that they might have sound minds in sound bodies”.

Middle’s YMCA opened new premises in 1904, providing “a more commodious and adaptable building for its great work – the uplifting of young men, not only in their spiritual life, but their physical, social and intellectual life”. The building included a billiard room, gymnasium, reading room and a “social room”, and the club possessed cricket, swimming, harriers and cycling sections. The *Teesside Weekly Herald* commended the association as it was “free from temptations to drink intoxicants, and enveloped in a wholesome and elevating atmosphere”. As Dominic Erdozain states, the YMCA occupied a position “between the rarefied atmosphere of the

---

153 *North-Eastern Daily Gazette*, 23rd March 1897
154 *North-Eastern Daily Gazette*, 23rd October 1903; *Teesside Weekly Herald*, 17th September 1904; Donations for the new facilities were received from Sir Christopher Furness (shipbuilder and MP for Hartlepool), Wayman Dixon (shipbuilder), Thomas Westgarth (of Westgarth English & Co engineering), Samuelson’s, Dorman Long & Co and Bell Brothers – *North-Eastern Daily Gazette*, 23rd October 1903
155 *Teesside Weekly Herald*, 25th March 1905; The concern with drink at this time was emphasised by the findings of the Middlesbrough Temperance Society who stationed enumerators outside the town’s 106 public houses and 36 off-licences during the six hours they were open one Sunday in 1904. The premises were visited by 55,045 men, 21,594 women and 13,775 children – Stubley, *Industrial Society and Church*, p. 83
churches and an elemental world of popular leisure”. With many other clubs competing for membership, it is perhaps not surprising that by 1909 the YMCA had only 44 full members.

St Patrick’s Catholic Association was formed in 1906, and intended to have concerts, lectures and social gatherings “if combination with our neighbouring Associations in defence of God and our children will not engage all our attention”. In 1909 the Association joined the Teesside Catholic Billiard League and took part in rifle shooting. However, membership was disappointingly low, it being stated that “there are still a large number of men and boys who have not been moved by our attractions to do more than praise us”. The Association offered “many an hour of intellectual enjoyment and... innocent recreation”, both of which were needed by those “whose toilsome nights and toilsome days give them a special zest for such relaxation”. Fluctuations in local trade did mean that membership suffered in 1911, but the Association was still “attractive, pleasant [and] alluring” to members. The St Mary’s Catholic Association and the St Thomas’ Catholic Association were also members of the billiards league, the latter also having a quoits section and two football teams. St George’s Congregational Church also had a men’s social club and swimming section, a girls’ club and a gymnasium, as

---

157 North-Eastern Daily Gazette, 19th October 1909; In relation to County Durham, Garnham also concludes that the YMCA faced competition for members from other clubs that offered social and sporting activities – Garnham, ‘Both Praying and Playing’, p. 403

161 Teesside Weekly Herald, 20th February 1909
well as a literary society and a reading room. The objectives of the Cambridge House Club of St Paul’s were “to provide such recreation and amusement as the Committee may allow” and “to promote social intercourse and good feeling amongst men of all denominations”. Whilst the club had the patronage of some of the members of Middlesbrough establishment, the committee members of the club’s football team also included a labourer, a bolt maker and a plate layer. As well as football, activities included billiards and shooting, and whilst in 1909 the club had 99 members, a year later the existence of various works’ clubs was said to have “reduced the membership very considerably”.

Some attempts were made to provide recreational facilities for boys. The Feversham Street Boys’ Club was formed by Joseph Walton (barrister) and Councillor Walter Trevelyan Thomson (iron merchant) in 1906, and on opening had 250 members paying 2d a week. Walton stated that the club was “entirely unsectarian and open to all denominations, preference alone being given to those living on the north side of the railway” (the poorest part of the town). The club had a games room, billiard table, swimming bath, gymnasium, and the club’s football team joined the Middlesbrough Junior League in 1911. “Physical efficiency” was advanced through the gymnasium, shooting range and “in a passive sense, by the ban placed on smoking”.

166 P. Stephenson, Joe Walton Community and Youth Club (Middlesbrough, 2001), p. 4; North-Eastern Daily Gazette, 20th November 1906, 8th September 1911
167 Teesside Weekly Herald, 29th February 1908
Eastern Daily Gazette commended Walton and Thomson for their “experiment in social work”. The members would “constantly have before them an object lesson in rational recreation and rational behaviour”. Run on similar lines, the Holy Cross Mission started a boys club in 1912. The Mission was in the “very lowest district of the town... tenanted by the poorest class of labourers”. According to the Mission, this area had a great number of public houses which was “terribly demoralising to the neighbourhood... especially to the children who form an endless ragged procession of beer carriers”. The boys club possessed a billiard table, a football team was run in winter, “opportunities for reading and games are afforded, and physical culture is indulged in”.

e. Health

As demonstrated by the formation of such organisations, the health of the town’s population had remained a concern since the nineteenth century. As one contemporary stated, the town was “an example of how opportunities may be neglected, and an easy task turned into a difficult one,” as the mortality rate was markedly higher in the oldest part of the town where houses were neglected, ill-equipped and insanitary. Indeed David Taylor points out that in many ways, housing and sanitary conditions scarcely improved between 1870 and 1914. Poor health affected between one-third and a half of the town’s population, as blast furnaces and factories continued to “belch forth clouds of smoke of varied hues”. Furthermore, whilst wages increased, living and working

168 North-Eastern Daily Gazette, 20th November 1906
169 Holy Cross Mission, PR/M(P)/8/27, Teesside Archives
170 Teesside Weekly Herald, 18th January 1913
conditions did not; the rapid growth in population had exceeded facilities. Many middle class reformers believed that sport was an antidote to the poor physical health caused by urban squalor, as well as to the increased exertions of work. It was also expected to lead to both a greater number of physically fit men who were prepared for war, and to greater productivity in the workplace. As Claire Parker states, it was believed that cleanliness would lead to improved health, and with this, it was hoped that “moral behaviour” would also be improved.

Better health was referred to in relation to swimming and gymnastics in Middlesbrough, particularly with regards to the participation of children in sport. As Christopher Love states, advocates of swimming believed that water, cleanliness and swimming were clearly linked; swimming would promote cleanliness amongst the lower classes, and increase health and physical fitness throughout society. Praising swimming as a form of rational recreation, the *Sports Gazette* stated that it was,

...an art and an exercise superior to all others. It is health promoting, cleanly, recreative, mentally and morally philanthropic, and can be practised by both sexes at almost any age. It gives confidence, courage, readiness of resource, and self-reliance. No one could employ his leisure more usefully than in spreading knowledge of the art.

Furthermore, in a letter to the *Sports Gazette*, headmaster Joseph W. Wright stated that “swimming helps the growth of the strong mind in the strong body”, and in 1910, the

Amateur Swimming Club held a schools team competition and a contest for the Dent
Shield for boys.\textsuperscript{176} The Amateur Swimming Club had 166 members in 1904, and it was
felt that their galas “brought the advantages of the club and of swimming generally
before the public”.\textsuperscript{177} However, two years later membership had decreased to 95 and an
appeal was made to parents to encourage their children to take up swimming. Since its
formation, the club had been “persistently striving to stimulate public opinion in favour
of a more general adoption of swimming and life saving, and bringing about a
widespread and thorough practical knowledge of... the art of natation”. The subscription
was felt to be “nominal” – 4s for juniors and 5s 6d for adults.\textsuperscript{178} In contrast, the club of
the Middlesbrough Seaman’s Institute was said to be “of special benefit to tub-boatmen
and others whose work is near the river and whose lives are therefore frequently
dependent upon their ability to swim”.\textsuperscript{179}

In 1913, ‘Teessider’ in the \textit{Teesside Weekly Herald} noted the increased popularity of
swimming, stating that “if the pastime becomes much more popular the present Baths
will have to be enlarged or a new building erected”. The writer attributed this to the
teaching of swimming to school children but also to local champion Jack Hatfield –
“There is not one schoolboy who enters the Baths who does not mean to rival him if he
can”.\textsuperscript{180} The response of the press, civic leaders and the public to Hatfield’s success,
suggests he was a local hero. His victories offered an opportunity to express feelings of

\textsuperscript{176} \textit{Sports Gazette}, 17\textsuperscript{th}, October 1908, 16\textsuperscript{th} April 1910
\textsuperscript{177} \textit{North-Eastern Daily Gazette}, 22\textsuperscript{nd} March 1904; The gala in 1904 included a two lengths handicap for
the Mascall Cup, a two lengths handicap for the Forbes Cup, a cork race and a water polo match. This
was followed a month later by the “speed swimming championships” where 14 entrants raced over 100
yards – \textit{North-Eastern Daily Gazette}, 13\textsuperscript{th} September, 3\textsuperscript{rd} October 1904
\textsuperscript{178} \textit{Sports Gazette}, 10\textsuperscript{th}, 24\textsuperscript{th} March 1906; In comparison, the adult subscription for the YMCA club was
4s for adults – \textit{North-Eastern Daily Gazette}, 28\textsuperscript{th} April 1905
\textsuperscript{179} \textit{Sports Gazette}, 27\textsuperscript{th} April 1907

increased to 194 – \textit{Sports Gazette}, 9\textsuperscript{th} March 1912
civic pride, references being made to Hatfield’s role in enhancing the town’s sporting reputation. When Hatfield was selected to represent England at an event in 1911, the *Northern Athlete* commented proudly that, “We turn other things out of Middlesbrough besides pig-iron... Amongst some of the smart men we have turned out of the Boro [sic] is this young man... who is a credit to the town”. He was already the champion of Yorkshire for 100 yards, ¼ mile and 1 mile, the 100 yards champion of Northumberland and Durham, and had taken third place in the English 500 yards championship. Hatfield was selected to represent Great Britain at the 1912 Stockholm Olympics and won silver medals for the 400 and 1,500 metres races, and a bronze in the freestyle relay. The *Northern Echo* reported that Hatfield was “one of the principal themes of conversation in Middlesbrough”, whilst the *North-Eastern Daily Gazette* remarked that he was “a credit to his country and the town of Middlesbrough is justly proud of him”. A crowd of thousands awaited his return at the railway station, where they were able to purchase photographs of the local champion. He was “hoisted shoulder high” whilst a band played ‘See the Conquering Hero Comes’, and as the band played the ‘Ironopolis March’ he was driven to the baths for a formal reception. Councillor Edwin Turner stated that he had brought the town “to the top of the ladder”, whilst Councillor Albert Edward Forbes described him as “a credit to the town”. Later in the year Hatfield won the national mile championship, took second place in the national 100 yards competition and won the 440 yards national salt-water championship. In 1913 he was invited to play in an international water polo match but was already

182 *North-Eastern Daily Gazette*, 17th July 1912; *Northern Echo*, 16th July 1912; Hatfield also swam in the 1920 and 1924 Olympics.
183 *North Star*, 20th July 1912; *Teesside Weekly Herald*, 27th July 1912
184 *Sports Gazette*, 3rd 31st August 1912; He also broke the world record for 1,000 metres though the time did not stand as it was not swum in open water – *North-Eastern Daily Gazette*, 12th October 1912
engaged to swim in Dublin, and in “further proof of his wonderful versatility”, Hatfield won the Amateur Swimming Association long distance championship (5¼ miles) on the Thames, his first race in open water. The *Sports Gazette* reported that Teesside “rejoiced whole-heartedly for there is no more popular sportsman in the district”.185

The Middlesbrough Amateur Gymnasium Society provided similar health-giving benefits to adults and children as swimming.186 Parents were informed that “no roughness will be allowed” at classes, and “special care will be taken with boys who are in any way delicate”. The *Sports Gazette* also advised “clerks, school teachers, shop assistants and those leading sedentary lives” to join in order to restore “lost tonicity to a healthy body and mind”. By early 1905 the gymnasium had 134 members – 85 men, 21 ladies, 10 boys and 18 girls.187 At a gymnastic exhibition in 1906, Sir Samuel Sadler (evidently an adherent to muscular Christianity) remarked that the club had finally “got hold of that class of people who could appreciate the healthful exercise which it had promulgated”; the main purpose of the club was to “preach the gospel of muscle”.188

The club president (Walter G. Roberts) called on members to increase membership, and thus “not only make the competitions keener, but carry out the good work of the club, in a more emphatic manner”. Roberts suggested that young people in the town “were apt to be mere spectators rather than partakers” in sport, particularly football, and thought

185 *North-Eastern Daily Gazette*, 2nd September 1913; *Northern Echo*, 19th, 21st July 1913; *Sports Gazette*, 26th July 1913; Hatfield retained the long distance title a year later, with 15 years old George W. Leader from Middlesbrough taking fifth place – *Teesside Weekly Herald*, 1st August 1914
186 *North-Eastern Daily Gazette*, 21st, 23rd January 1903; The Middlesbrough Gymnasium had been disbanded in January 1901, and the Middlesbrough Amateur Gymnasium Society was formed in January 1903 – *Middlesbrough & Stockton Morning Mail*, 15th January 1901
187 *North-Eastern Daily Gazette*, 17th January 1905; *South Durham & Cleveland Mercury*, 20th January 1905; *Sports Gazette*, 24th September, 29th October 1904
188 *Teesside Weekly Herald*, 10th November 1906
that increased participation would “tell greatly against their physique in the future”. The *Sports Gazette* was particularly enthusiastic about the gymnasium, calling on parents to take their children to see “classes of happy-faced boys and girls, teeming with energy and health, and preparing for the arduous battle of life”. The newspaper stated that new members were being enrolled every night at this establishment that was run “for the public good”. Indeed it was stated by the club in 1910 that it “did a very great deal for the health and the community... unostentatiously, but nevertheless effectively”. The backgrounds of those captains that can be identified suggest that the members of the gymnasium were more cross-class than those who were in charge of it. In 1910 the men’s vice-captain was a steel billet dresser and the boys’ captain was an apprentice engineer. The girls’ vice-captain was the daughter of the manager of the steelwork’s baths, and in 1912 the girls’ captain was the daughter of a moulder.

f. New Sports and Fads

A number of new sports were introduced to Middlesbrough during this period, some with more success and popularity than others. Some sports proved to be mere passing fashions, mirroring national patterns. With reference to such fads, Andrew Horrall suggests that “successful events were almost casually discontinued at the first indication of waning public support”. Of the new sports, some involved elements of commercialism or were developed specifically with spectators or participants in mind, whilst others embraced technological advances.

---

189 *Sports Gazette*, 15th February 1908; Such was the gymnasium’s popularity, it could no longer accommodate all the boys who wanted to join, though there were only 35 members in the boys’ section – *North-Eastern Daily Gazette*, 23rd March 1910; *Sports Gazette*, 19th March 1910
190 *Sports Gazette*, 11th September, 16th October 1909
191 *North-Eastern Daily Gazette*, 23rd March 1910
192 1911 census; *North-Eastern Daily Gazette*, 15th March 1909; *Sports Gazette*, 19th March 1910; *Teesside Weekly Herald*, 12th October 1912
The short-lived “commercial and competitive phenomenon” of ping pong first appeared in 1902. The game had been aimed at the upper-middle classes, but had proved “too energetic and noisy” for most middle class homes. It was also too overtly commercial, there being 49 models of ping pong bat available to buy.\textsuperscript{194} Nevertheless, the \textit{Northern Echo} reported that, “as in other things, Middlesbrough has decided not to be behind in the matter of ping pong”. A tournament was held at the Majestic Cafe in March 1902 with 84 competitors including eight women.\textsuperscript{195} The Cleveland Ping Pong Club was formed a month later with a membership of 50 men and 20 women. Officials elected to the club a year later included a boot shop manager as secretary, a newspaper’s sporting editor as treasurer, and a female stationery and fancy goods dealer on the committee.\textsuperscript{196} By March 1903 the club were holding fortnightly tournaments, but it was also evident that they were keen on social events. 15 members cycled to Middleton-one-Row where “a stroll was taken through the wood and the party were photographed... a game of football by the male members of the party produced great fun, and the ladies meanwhile had a walk”. On the same day, 12 members also “had a very enjoyable outing to Redcar”. The club’s first annual picnic included a football match and a climb up Roseberry Topping. Male members competed in a cycle race, a three-legged race and a sack race, whilst the women partook in an egg and spoon race, a foot race and a blindfold race.\textsuperscript{197}

\begin{footnotes}
\item[194] Birley, \textit{Land of Sport and Glory}, p. 205; Lowerson, \textit{Sport and the English Middle Classes}, p. 25, p. 111; In contrast to ping pong, the game of table tennis was amateur and regarded its rival as frivolous – Lowerson, \textit{Sport and the English Middle Classes}, p. 110
\item[195] \textit{Northern Echo}, 11\textsuperscript{th}, 13\textsuperscript{th} March 1902; The competition was promoted by William Allan (a stationer) and W. H. Proctor (proprietor of the Cafe) – \textit{Northern Echo}, 13\textsuperscript{th} March 1902

\end{footnotes}
There was no further mention of this sport in the local press until September 1909 when it was reported that the games committee of the Middlesbrough YMCA wanted to start a league, and the Middlesbrough & District Table Tennis League was formed. However, the League received no further coverage in the press, until 1913 when “the champion player of the north” (Andrew Donaldson from Sunderland) visited Middlesbrough “to stimulate fresh interest in the game”.

The Middlesbrough & District Motor Cycling Club was formed in October 1906 with annual subscriptions set at 5s. Whilst this was relatively low, the cost of purchasing and maintaining a motorcycle would have prevented the majority of people from joining. Adverts from individual sellers in 1909 started at £6, increasing to £19 10s for a motor cycle with side-car. Olliff’s Garage’s prices ranged from £8 10s to £10, whilst in 1912 prices from a number of sellers ranged from £10 to £65. The club’s first officials were lower-middle and middle class. The first president was a doctor (succeeded by an ironmaster), the vice-president was a mineral water manufacturer, the secretary was a house painter and decorator, the treasurer was a hosier and hairdresser, and the captain was an electrical engineer. ‘Club runs’ were held on Wednesday and Saturday afternoons, and Sunday mornings, and the first hill climbing competition attracted 16 participants including one woman (Mary Considine, the wife of a doctor).

---

198 According to the North-Eastern Daily Gazette the League’s members were Linthorpe Parish, St Cuthbert’s, Thornaby St Luke’s, Woodlands Road WG and YMCA – North-Eastern Daily Gazette, 22nd September 1909; However the Sports Gazette stated that the members were Centenarians, Linthorpe, St Aidan’s, St Cuthbert’s, Thornaby St Luke’s and YMCA – Sports Gazette, 20th November 1909
199 Teesside Weekly Herald, 4th October 1913
200 North-Eastern Daily Gazette, 23rd July, 14th August 1909, 11th July, 16th August 1912
202 Sports Gazette, 10th, 17th November 1906
‘Teessider’ in the *Teesside Weekly Herald* commented that “motor cycling is a form of sport which is beyond the reach of the vast majority”, and congratulated the club on their success in spite of this fact. The members were “all united in a common bond of good fellowship which augurs well for the future prosperity of the club”. Indeed by the end of 1907 the club had 70 members.\(^{203}\) Club competitions in 1908 included a 200 miles reliability trial to Berwick-upon-Tweed and back, a flexibility hill climb and an “old crocks race”.\(^{204}\) Membership had increased to 99 by 1914. This increase may have been due to the number of events the club were now able to arrange. In July 1913 alone, the club held eight events including a tour of the Lake District and a visit was arranged to the Motorcycle Show in London.\(^{205}\)

The Middlesbrough Skating Rink Ltd was formed in 1909, with the intention of building “the finest skating rink in the country”.\(^{206}\) The Olympia rink in Linthorpe was opened by the Mayor and Mayoress (their presence showing again the importance ascribed to the town’s sports), and within a week it had become “a popular resort”. There was thankfully “an entire absence of the rowdy element and the conduct of the visitors was most orderly”. The *Teesside Weekly Herald* was keen that “every effort should be made to preserve the tone of the entertainment at its present level”.

\(^{203}\) *Sports Gazette*, 9\(^{th}\) November 1907; *Teesside Weekly Herald*, 26\(^{th}\) January 1907

\(^{204}\) Buttress, The History of the Middlesbrough & District Motor Club; The club’s summer programme in 1910 included a paper chase, team trials, a ladies’ picnic and a competition of passenger machines – *Sports Gazette*, 9\(^{th}\) July 1910

\(^{205}\) Buttress, The History of the Middlesbrough & District Motor Club; *North-Eastern Daily Gazette*, 26\(^{th}\) February 1914

\(^{206}\) *Cleveland Standard*, 13\(^{th}\) March 1909; *Sports Gazette*, 6\(^{th}\) February 1909; The company was chaired by Councillor Edwin Turner, with John Durkin (a nautical instrument maker) and Horace G. Winney (timber merchant manager) as board members – 1911 census; *Cleveland Standard*, 13\(^{th}\) March 1909
Admission to the rink was 6d, plus 1s for skating.\textsuperscript{207} A gymkhana was held at Olympia in July, and included races for boys and girls, an obstacle race for men, an egg and spoon race and a balloon race for ladies, and a couple’s race. The \textit{North-Eastern Daily Gazette} suggested that, “skating has come to stay... visitors and regular patrons are unanimous in saying that it is in every way one of the finest and best-appointed rinks”.\textsuperscript{208}

The first rink hockey match at Olympia between Middlesbrough and Cleadon (Sunderland), was described in enthusiastic terms by the \textit{North-Eastern Daily Gazette},

\begin{quote}

It was short, sharp, and strenuous. The 30 minutes were full of the fast chasing up and down the rink by eighteen perspiring young men of the diminutive football, the crash of meeting sticks, anon the tumbling about of players, the rasp of suddenly ‘braked’ skates, and the applause and shouts of encouragement of the spectators leaning over the upholstered barriers. A general whirl, in fact, of sticks and ball and limbs.\textsuperscript{209}
\end{quote}

The Middlesbrough Olympia Rink Speed Club was formed in 1910, and competitions at the club’s sports included a mile handicap, a ladies’ wool winding race, a four laps handicap for boys, a canoe race and an obstacle race.\textsuperscript{210} Another match in February 1910 between Middlesbrough and a travelling theatre company was attended by “a large company, including many of the Middlesbrough footballers”, and though it was pleasant enough, it was “marked by lustiness rather than science”.\textsuperscript{211}

\begin{footnotes}
\textsuperscript{207} \textit{Teesside Weekly Herald}, 29\textsuperscript{th} May, 5\textsuperscript{th} June 1909; Children paid 6d for admission and skating. Yorkshire Rink Hockey League was formed in March\textsuperscript{212} and Middlesbrough were challenged by York to play for the championship of the county in 1911 though a match was never reported.\textsuperscript{213}

Though a wide variety of sports were being watched and participated in at this time, the local press were not convinced that baseball would catch on again in Middlesbrough. Despite the position of Middlesbrough Cricket Club, in 1906 when baseball was being revived in London, one \textit{Northern Athlete} writer thought that to try to restart the game in this “cricketing zone of England” would be “a suicidal policy because the game is dead as the proverbial door nail”. However, in the same newspaper another writer thought that baseball was “a substitute for football, something that will be as brimful of excitement and incident as the great winter game”.\textsuperscript{214} Demonstrating the precarious position of cricket in Middlesbrough as a spectator sport, the \textit{Sports Gazette} thought that “something more interesting than much of the present day cricket” was needed in the summer and baseball was ideal as the working classes would “find this exciting game just to their tastes”.\textsuperscript{215} When the game of pushball\textsuperscript{216} was played at the ground of Middlesbrough Football Club in 1902, the \textit{North-Eastern Daily Gazette} thought that there was very little interest in the game despite the “considerable

\textsuperscript{212} The members of the League were Bishop Auckland, Cleadon, Durham, Ferryhill, Middlesbrough, Redcar, Spennymoor, Stockton, Sunderland, West Hartlepool – \textit{North-Eastern Daily Gazette}, 4\textsuperscript{th} March 1910

\textsuperscript{213} \textit{North-Eastern Daily Gazette}, 2\textsuperscript{nd}, 15\textsuperscript{th} May 1911

\textsuperscript{214} \textit{Northern Athlete}, 16\textsuperscript{th}, 23\textsuperscript{rd} July 1906; In contrast, baseball became \textit{the} summer sport in parts of South Wales. In 1906 there were 36 clubs in the South Wales & Monmouthshire Baseball Association, and the sport’s popularity continued after the First World War – M. Johnes, ““Poor Man’s Cricket”’: Baseball, class and community in South Wales, c.1880-1950’, \textit{International Journal of the History of Sport} 17, 4 (2000), p. 155

\textsuperscript{215} \textit{Sports Gazette}, 14\textsuperscript{th} April 1906

\textsuperscript{216} Pushball was invented in Massachusetts in 1894. The diameter of the ball was six feet, and it weighed between 48 and 50 pounds. Played between two teams of eleven, the aim was to push the ball to the goals at either end of the pitch – C. H. Allison, ‘Pushball, a Strenuous New Game’, \textit{National Magazine} 23, 1 (1905), pp. 47-49; F. W. Hoffmann and W. G. Bailey, \textit{Sports and Recreation Fads} (Binghamton, New York, 1991), pp. 297-298
curiosity” of the 5,000 spectators. The *North Star* stated that the crowd had “found much cause for merriment and mirth”, though “it was extremely doubtful whether it will ‘catch on’”.217 Indeed the game did not appear again until 1914 when a match between teams from Samuelson’s and Eldon Workmen’s Club was ‘pushed off’ by Jack Hatfield.218

g. **Sports Days**

A wide variety of clubs continued to hold sports days in this period, the majority of which attracted large crowds, suggesting that such events may have been regarded as social as well as sporting occasions for the community. Moreover sports days were welcomed, as “there is nothing for the working man to do on a Saturday afternoon in summer”.219 As had been the case in the late nineteenth century, some clubs were reliant on the income such events generated. The *Teesside Weekly Herald* stated that without sports days, several clubs “would assuredly fail to make ends meet”. Indeed in 1910 the profits from Middlesbrough Cricket Club’s sports day allowed them “to meet current expenses”.220 In 1901 the sports at Grangetown had 3,000 spectators and 326 entrants, and that of the North Ormesby & Middlesbrough Cycling Club had a crowd of 4,000.221 In 1905 the crowd of 4,000 at the Grangetown sports led the *Teesside Weekly Herald* to conclude that “the prospect of a good day’s sport in the athletic field still forms an irresistible attraction”. The Grangetown track was chosen by the Northern Counties’ Athletic Association for the 440 yards race in 1906, which the *Northern Echo* regarded

217 North-Eastern Daily Gazette, 5th August 1902; North Star, 5th August 1902; South Durham & Cleveland Mercury, 8th August 1902
218 North-Eastern Daily Gazette, 28th April 1914; Northern Echo, 29th April 1914
219 North-Eastern Daily Gazette, 10th April 1906
220 Sports Gazette, 9th July 1910; Teesside Weekly Herald, 11th May 1907; In 1908 the cricket club had made a profit of £104, and in 1905 the Dorman Long club made over £57 – North-Eastern Daily Gazette, 27th March 1905, 18th December 1908
221 North-Eastern Daily Gazette, 3rd May 1901; South Durham & Cleveland Mercury, 10th, 17th May 1901
as “a fitting recognition of the endeavours put forth by the Grangetown sports managers to provide [the] best sport and talent possible for the public”. 222 In 1906 Middlesbrough Football Club’s sports day attracted 7,000 spectators and resulted in a profit of £45. That of Middlesbrough Cricket Club was regarded as “one of the most popular athletic events of the year in this district”, attracting a crowd of 4,000 in 1909 with 81 entrants for the sprint race alone. 223 The North-Eastern Steelworks hosted the half-mile championship of the North Yorkshire & South Durham National Cyclists’ Union in 1909, whilst in 1913 the Sports Gazette reported a crowd of 9,000 spectators at the sports of the Middlesbrough Medical Charities Organisation. 224

The races and contests that took place, and the prizes available, varied from club to club. Competitions were open to various levels of ability, sometimes including women and children, and it is evident by the types of contests, that sports days were not always serious occasions. The sports of the RUFS cycling club in 1901 included a “tortoise race”, a costume and flag race, and an egg and spoon race, and that of the Samuelson’s club a year later included the tug of war and an old men’s race. In comparison, the championship sports of the North Ormesby & Middlesbrough Cycling Club in 1903 featured motor racing. 225 The sports of the Tees Conservancy in 1905 at the Thornaby cycling track included flat and cycling races, as well as a three legged race, throwing a cricket ball, shying at a wicket and a quoit handicap. 226 A walking race was held by the Eston Quoits Club at their sports for workmen “who had lost a leg whilst following their

employment”. The sports of the Dorman Long club included the usual foot and cycle races, as well as a “pig hunt” which “caused much amusement”, the pig being presented to the winner. The prizes at Dorman Long’s event in 1907 totalled £45 and included a threading the needle race for wives, daughters and sisters of the workmen, and an ambulance competition for teams of five men.\textsuperscript{227} Even though the event was designed to raise money, the North Ormesby Hospital Charity Sports also gave out prizes, including £6 for the mile flat race, £2 2s for the cycle parade, and prizes of 10s 6d for the best fancy costume.\textsuperscript{228}

Some sports days were outings solely for club members but were still reported at length in the local press. The Ayresome Cycling Club held their event at nearby Nunthorpe in 1905 and it was attended by 300 workmen of the Ayresome Ironworks and their wives and children. The sports of the Linthorpe Industrial School included a 120 yards foot race, boxing, the high jump, whistling, and a bun and treacle eating competition, whilst Mrs Lowthian Bell presented the prizes to the competitors at the sports of Middlesbrough High School.\textsuperscript{229} The employees of the drapers Thomas Jones, took part in a number of sporting contests at their annual picnic in 1907, including a 120 yards race for married men, a women’s 50 yards race and cricket between ladies and gentlemen.\textsuperscript{230}

h. Women and Sport – increasing opportunities?

Growing female participation in sport occurred against a background of increasingly radical action in favour of female suffrage. The campaign for the vote had escalated from the “genteel and constitutional”, to criminal damage and arson leading to arrests, imprisonment and hunger strikes, but in Middlesbrough there was little support amongst women or men for female enfranchisement.231 It has been suggested that most sporting women were more concerned with “better health, enjoyment or a marriage partner” than with advancing their political status, but Joyce Kay argues that there was no reason why the ‘average’ woman could not have been a feminist and a sportswoman.232 Nevertheless, women’s access to sport was still “constrained by the burdens of segregation and chaperonage, modesty and decorum”. Women generally found it easier to make progress in individual, gentle sports than in those involving vigorous exercise or competitiveness.233 It is evident however, that opportunities to play sport rarely existed for working class women in Middlesbrough, being restricted by free time and the cost of subscriptions to those clubs that admitted female members. Lady Bell stated that working women were unable to benefit from “the exhilaration of brisk recreative exercise in the open air”, nor did they have any “possibilities of entertainment” which would give them “change of ideas and bring some relief to the monotony of their lives”.234 Nevertheless, in 1901 the Northern Weekly Gazette commented that,

Physical culture is now a recognised part of the education of the modern girl. It is not enough that the mind should be trained and stored with knowledge; the body, too, must have a systematic course of training...

234 Bell, At the Works, p. 227, p. 236
235 Northern Weekly Gazette, 18th May 1901
One contemporary hoped that “instead of gossiping on doorsteps, or wandering... about the streets”, women “would develop an interest in... appropriate games”.\textsuperscript{236} In contrast, in 1907 the \textit{Teesside Weekly Herald} argued that sport presented “a great danger” to young women, suggesting that the sizes of shoes and gloves were increasing because of growing participation – “The dainty feet and hands which for so long have graced feminine beauty are doomed to disappear as a result of a too strenuous indulgence in athletics”.\textsuperscript{237} However, it was often reported that ladies were present at football matches, particularly in the grandstand. After complaining that “filthy epithets” had been heard in proximity to women at a Middlesbrough match, the \textit{North-Eastern Daily Gazette} remarked that ladies had “a restrictive influence over the coarser of the male sex”.\textsuperscript{238}

The \textit{Northern Weekly Gazette} thought that “it is almost as usual a thing for a girl to take lessons in swimming as it is for her to go through a course of physical exercises for the benefit of her health”. The Middlesbrough Ladies Swimming Club held a ‘water carnival’ in 1904 that included racing and diving for girls, a display by Jack Hatfield and his sisters Mabel and Bertha, and “an excellent exhibition of life-saving” by the club’s members. An event a month later also included ladies’ water polo, “the first of its kind held in the Baths”.\textsuperscript{239} In contrast, Hilda Jefferson\textsuperscript{240}, “the champion lady swimmer

Day also states that teaching professionals generated “family dynasties and the 1911 census records Thomas Hatfield as baths superintendant, his wife Hannah as manageress, whilst Jack, his sister Mabel and their uncle Septimus, were all baths attendants – D. Day, ‘London

of Middlesbrough”, swam 2¾ miles along the Tees from Newport to the Transporter Bridge in 1913. She was accompanied by two male swimmers and completed the distance in 1 hour 10 minutes. The *Teesside Weekly Herald* reported that a “considerable number of spectators lined the banks of the river, and gave her considerable encouragement by cheering her pluck effort”.241 She also appeared at a gala of the Ladies Club a month later alongside Jack Hatfield and a number of north-eastern champion swimmers.242

Peter J. Beck argues that the acceptance of women as cyclists was dependent on “the adoption of new ideas of womanliness reconciling sport and femininity in a manner preserving existing gender distinctions.”243 Though the Cleveland Roads Cycling Club stated that that the only clubs “that have good musters are those who have lady members to join in the runs”,244 it is not clear how much cycling the female members actually undertook. Whilst the Middlesbrough Crescent Cycling Club had a lady captain, and five women on the committee245, the press reports of the Middlesbrough Ladies’ Cycling Club refer mainly to social events. In 1902 it was reported that the members thought the club’s outing to Carlton-in-Cleveland had been “the most delightful picnic [they] have ever taken part in”, though members also took part in a foot race, an egg and spoon race, a blindfold race and a consolation race.246 In contrast, the female members of the Cleveland Ping Pong Club did take part in competitions; for

example in 1902 eight ladies entered the competition for a dressing case.\(^{247}\) It was reported in 1911 that Middlesbrough Bowling Club were considering forming a ladies’ section; women were reported to have “tried to find the ‘Jack’ and with a little more patience and practice they would no doubt prove useful members of the club”.\(^{248}\) The ladies section of Linthorpe Tennis Club had two female secretaries, the committee of the Avenue Tennis Club included four women, whilst in contrast the Grove Tennis Club had a tea committee of six women.\(^{249}\) This club did not start a ladies’ section until 1911 when a tournament for ladies singles and doubles was introduced, and members were asked to “practise more together than previously, so as to increase the strength of the team put forward”.\(^{250}\)

By 1911, 50,000 women had joined golf clubs in Britain.\(^{251}\) Whilst Holt describes golf as “a kind of half-shared, half-segregated suburban activity”\(^ {252}\), women gradually became increasingly active members of Middlesbrough Golf Club. In 1910 a committee was appointed to “ascertain the feeling of the ladies with regard to the competitions”, though a year later the club debated whether female members should be allowed to vote on club matters as they did not pay full subscriptions. One male member suggested that to take the vote away from them amounted to “rather ungallant treatment”, whilst another (Charles Coates, husband of Alice – see below) pointed out that the club “had

ladies attempting and nearly succeeding in beating the champion of England”. Ladies subsequently retained their voting privileges. Despite restrictions on when ladies could take to the course, in 1912 86 of the club’s 241 members were female, increasing to 101 out of 274 members a year later. The club’s minute book records the names of 94 new female members from June 1909 to December 1914, and the details for 60 women can be found. Only seven of the female members were employed and only one of these seven women was married –

Of those not employed, 28 were married and 25 were single; all of their husbands or fathers had a middle class occupation. The fathers or husbands of 27 of the female members were also members of the club. As a suffragette, golf club member Alice Schofield-Coates refused to supply information for the 1911 census. She had spent a

253 Minute Book of MGC, 16th March 1910; Sports Gazette, 18th February 1911
254 Minute Book of MGC, 30th January 1912, unspecified date for January 1913; In October 1912 it was decided that women would not be allowed to play after noon on Saturdays during the winter, amended five months later to restrict women from playing between 1pm and 2.30pm, and changed again in October 1913 asking ladies not to play before noon on Saturdays – Minute Book of MGC, 17th October 1912, 20th February, 16th October 1913; That female members were still able to vote is unusual as McCrone states that “suggestions about equalising privileges almost inevitably produced stormy meetings... and negative results” – McCrone, Sport and the Physical Emancipation of English Women, pp. 168-169
255 1911 census; Minute Book of MGC 1908-1918
256 The form stated that, “No information can be given of the female residents in this house on April 2nd as they object to give such information until women are enfranchised”; Only 70 women boycotted the census in the whole of Yorkshire, and in Middlesbrough only Schofield-Coates and her sister in law, Marion Coates-Hanson refused to comply. Amy Mahoney, the secretary of the Middlesbrough branch of
month in prison in 1909 having been arrested at Downing Street, and was the president of the Middlesbrough branch of the Women’s Freedom League.\(^{257}\) The *Suffrage Annual and Women’s Who’s Who* described her as “an active Suffragist” in the north-east, and listed her recreations as walking, cycling and golf. Schofield-Coates’ involvement with sport contradicts Birley’s statement that, “feminist politics rarely interested women golfers, who were engaged in a more traditional battle”. Similarly, Tranter has also argued that “far from being revolutionaries”, female golfers “were not even interested in challenging the subordinate status accorded to them in the sport they played”.\(^{258}\)

Though nationally there was only one cricket club for every 50 female hockey clubs, the *Cleveland Standard* thought that cricket was an ideal sport for young women to play. The newspaper preferred cricket over hockey and tennis; it had “such a number of advantages as a girls’ game that it seems odd it should be so little encouraged”. The writer felt that the sport was good “for the figure... the body, at least, is not liable to over-exertion”. It is evident that this particular writer envisaged the sport being played by middle class young ladies as he believed it was an ideal game for the summer holidays, adding “greatly to the possible list of pleasures in country homes”.\(^{259}\) Indeed the president of the Middlesbrough Ladies’ Cricket Club in 1911 was the wife of a doctor (Mary Elizabeth Hedley, Chairman of the Board of Guardians), whilst the

---

\(^{259}\) *Cleveland Standard*, 6th August 1910; Tranter, *Sport, Economy and Society*, p. 83.
treasurer was a teacher and the secretary was a stenographer. The South Durham &
Cleveland Mercury thought that hockey offered the same benefits to women as football
and cricket did to men, promoting “healthy activity, muscular development and moral
discipline”. Perhaps because of the novelty, when a ladies’ hockey match was held at
the Olympia rink in 1910 it was “lined with spectators, who gave the ladies a splendid
reception as they entered the arena”. In contrast, ‘Free Lance’ in the Northern Athlete
regarded hockey as “essentially a masculine” game. Reflecting the idea that playing
sport would make women more masculine and undermine their appearance, modesty
and femininity, he protested “against the encouragement meted out to the opposite sex
to indulge” in the sport, suggesting that,

if they would only try to realise how the majority of men detest the
‘mannish’ women, they would think twice before they venture to indulge
in games like hockey, which are entirely out of their sphere, and
calculated to unsex them in more ways than one.

Since opening, the Gymnasium had proved popular with women and girls. Female
members were trained by the same instructor as the men, and exercises were said to be
“smartly executed”. The Sports Gazette suggested that if “ladies of the town who have
respect for their physical welfare, would only look in some night, I am sure that they
would soon become members”.

A visit to the gymnasium... will show that physical training for women is
coming more and more into vogue... a series of the most graceful, light
and interesting marching and running movements are performed. The
ladies all look very agile and graceful in their attractive gymnasium

\[260\] North-Eastern Daily Gazette, 19th May 1911; In contrast to Schofield-Coates, Hedley actively

\[262\] Northern Athlete, 26th November 1906
costume... The spectator is at once struck by the intensely conscientious and interested way in which the exercises are performed.\textsuperscript{263}

The gymnasium was recommended in particular to female teachers, “who may have to drill the children at school” as they would learn “how to manoeuvre the class in a practical manner”. In contrast to the remarks about hockey above, the \textit{Sports Gazette} stated that ladies should not worry if they were “nervous, weak or have any fears about the result of moderate exercise”, as exercise was “a beautifier in itself”.\textsuperscript{264} The \textit{Middlesbrough Standard} suggested that the exercises had a refining effect on the working women that attended,

> It is to the credit of the working girl that she... chooses wisely and with discretion in her hours of recreation. After a long day in shop or factory these youthful people readily accept the opportunities offered by their clubs. There they are to be seen neatly and simply dressed, as clean and nice in their personal care as any dainty lady. Their manners, too, are pleasant, easy and gentle. That this refining influence is making its mark no one can dispute.\textsuperscript{265}

However, the number of female members of the gymnasium was never very high. In 1905 there were only 21 members in the ladies’ section, and 18 in the girls’ section. By 1909 this had only increased to 26 ladies and 26 girls.\textsuperscript{266} It was also noted that “the ladies were not so well represented” at the AGM in 1906; “they thought that in leaving business details to the men they were leaving them in good hands”.\textsuperscript{267}

i. Conclusion

Despite the sheer number of sports clubs that existed in Middlesbrough prior to the First World War, it is clear that for the majority of men and women most sports were out of reach. Huggins’ suggestion that leisure in the town was dominated by working class and less respectable forms of leisure does not appear to be true.268 Lady Bell stated that most workmen “have nowhere to go for change of thought and diversion but the streets, unless they turn into the ever-present, ever-accessible public house.” There was nevertheless “an increasing and often unreasonable demand for pleasure”.269 Given that the costs of joining most clubs were steep, it is not surprising that for many people their only involvement in sport was through spectating or betting. The Teesside Weekly Herald remarked upon the number of people who visited the racecourse at Stockton in August race week. Even though this left some works temporarily idle, “there seemed to be no diminution in the thousands of Middlesbrough folk” attending the races, due to “the slavish fascination of betting”.270 However, there was also a belief that sport could be beneficial. William James O’Neil of the Middlesbrough Church Cricket League believed that “the feeling of sportsmanship and good fellowship would spread not only among them in this town but in other towns all over the country, and thus keep England on its pedestal as a sporting nation”.271 The Teesside Weekly Herald praised the YMCA for “inducing young men to occupy their leisure hours in a manner spiritually, mentally and physically beneficial to themselves”.272 However, for the majority of sports clubs,

membership remained low considering the size of the town. Only the clubs of works retained large memberships. The reasons such clubs were formed are unclear. There was evidently a belief amongst employers that participation in and provision of these clubs would foster good relations, retain workers and increase productivity, but the reasons that so many men chose to join are not stated. That such clubs were perhaps the only ones that were affordable, was no doubt an important factor, and working men may have preferred to spend their leisure time with their fellow workers. For many men, their only contact with sport was watching football. The game’s increasing popularity and the role it played in Middlesbrough will be discussed in the following chapter.
Chapter 5. “Going Football Mad”\textsuperscript{1}: Football in Middlesbrough, 1895-1914

Whilst the number of sports played in Middlesbrough continued to expand, none could compete with football in terms of popularity amongst spectators and participants. In 1908, one alderman remarked that football so greatly held the attention of young men in Middlesbrough that there were now 100 teams in the town, whilst one councillor proclaimed that, “Middlesbrough is going football mad. I think the brains of the people are getting into their heels instead of their heads”.\textsuperscript{2} It was not difficult for football to become such a popular sport amongst much of Middlesbrough’s male population. Not only was admission relatively inexpensive, there were a great number of clubs that suited the needs and interests of players and enthusiasts. Though some smaller clubs suffered because of the town club’s success, new clubs and leagues were also formed throughout the period. Some clubs followed the same patterns of other sporting organisations in the middle class backgrounds of their officials, with a member of the local elite acting as president or patron. For many clubs however, there were far more opportunities for the working man to be involved. Relations with Middlesbrough FC’s directors were often strained, with shareholders and the local press being vocal critics, which may indicate the importance of football to those who watched the sport. This chapter examines the continued growth of football and will explain how the game came to hold such a strong position in the town’s sporting culture, following the first failure of professionalism. Why was football able to attract the interest and attention of both working class spectators and middle class directors? What role did the Amateur Cup play for Middlesbrough, as well as, perhaps more importantly, for South Bank and

\textsuperscript{1} North-Eastern Daily Gazette, 13\textsuperscript{th} January 1909
\textsuperscript{2} North-Eastern Daily Gazette, 18\textsuperscript{th} November 1908, 13\textsuperscript{th} January 1909
Eston United? Did Middlesbrough’s growth as a professional football club help or hinder other amateur clubs? Did football help Middlesbrough to find its identity with the north, north-east and Yorkshire?

a. Amateur Success

Despite the failure of Ironopolis FC and professionalism, at the beginning of 1895 the South Durham & Cleveland Mercury proclaimed that as far as amateur football was concerned, “interest in the winter pastime is not yet dead”. Indeed Middlesbrough proved the strength of the local amateur game when they reached the final of the English Amateur Cup in April, where they met the holders Old Carthusians at Leeds. A crowd of 3,000-4,000 saw Middlesbrough win 2-1. Seizing on the opportunity to celebrate both the town and the north, ‘Rover’ in the North-Eastern Daily Gazette proclaimed that the victory represented “one of the most gladsome periods in the history of our comparatively young town”. Furthermore, the “stamina and skill” on display was proof that “in the North players can be turned out who are well capable of overcoming exponents of the game in the South”. Drawing attention to the difference between supporters in the north and south, and suggesting that those in the north were more passionate, it was pointed out that the “hearty, strong-lunged northerners mode of cheering” was “in direct contrast to that adopted by the Southerners’ supporters”. The

3 South Durham & Cleveland Mercury, 4th January 1895
4 The competition had been inaugurated in 1893, in part to compensate for the professional domination of the FA Cup and to appease southern amateurs, but it attracted clubs that were composed “of the same type of men as figured in the professionals ranks” – A. Gibson and W. Pickford, Association Football and the Men Who Made It (London, 1905), p. 114; D. Porter, ‘Revenge of the Crouch End Vampires: The AFA, the FA and English football’s ‘Great Split’, Sport in History 26, 3 (2006), p. 412; D. Russell, Football and the English: A social history of association football in England 1863-1995 (Preston, 1997), p. 40
5 Prior to the match, it was reported that Old Carthusians were anxious about the game, having asked Middlesbrough’s secretary to move the game to London. The Sportsman reported that Headingley had been chosen for the final “because of the support given by the local admirers to the semi-final tie”. There had been 3,000 spectators at the semi-final in Leeds; in comparison, the crowd at Middlesbrough’s semi-final at Derby, was only 600 – North-Eastern Daily Gazette, 24th April 1895; Sportsman, 29th April 1895
Athletic News described the result as “a proud achievement for Northern as against Southern amateurism”, one which had “strengthened the position of the unpaid form of the game in Tees-side”. Indicating the importance of the match to some, ‘Rover’ also noted that many of the 500 Middlesbrough supporters present had sacrificed “a day’s work to cheer their favourites on to victory”. On their return, the players were greeted at the train station by crowds of supporters. The roads were said to be “densely packed with thousands who had congregated to do honour to the victors”, and a band led the team to the Masham Hotel, where the club captain Thomas Bach was landlord. Bach “spoke like a born orator... and champagne and congratulations flowed in a continuous stream”. The club’s chairman, Robert Forrester, remarked on the fact that the cup itself had not been brought to Leeds, suggesting that “it looks very much as though they were confident of the trophy remaining in the custody of the Southerners. Northern clubs will probably receive a little more consideration and respect in the future”.

Due in part to the greater number of matches played in cup competitions, the club recorded a profit of £125 for the season, in comparison to £26 the previous year, and gate receipts also increased by £215 (see Appendix 6). The secretary was awarded a salary of £24 a year, whilst the newly appointed match secretary, Jack Robson, received £20 and was given responsibility for the team, match correspondence, advertising, outfitting of players, and work on the football ground. Eight of the club’s directors in

<sup>a</sup> Brother of Thomas Bach

<sup>b</sup> Kelly’s Directory of North and East Ridings of Yorkshire, 1897 (London, 1897)

<sup>11</sup> 1891 census; Minute Book of MFC, meeting attendance 1894-95, 1895-96
Three years after their first success in the Amateur Cup, Middlesbrough played nearby Thornaby in the semi-final of the competition. However, the tie coincided with a small-pox epidemic, and the match was played “with closed gates”. The location of the game (at Brotton, 15 miles east of the town) remained a secret, and it was reported that though “many keen footballists had been on the alert for the past few days, those who knew the location of the match were very limited in number”. Whilst Middlesbrough played Uxbridge at Crystal Palace to win the cup again, two matches were played at the club’s Linthorpe Road ground at the same time, at which the half-time score and final result were posted. Though London’s Daily News suggested that the game lost “much of its interest” due to the final being played so late in the season, the North Star stated that in Middlesbrough,

all were on the tip-toe of excitement, and when the half-time score arrived... everyone began to congratulate everybody else, and a heavy load seemed to be lifted off their minds. The final result was late in arriving, and many anxious individuals called at various places where the result might be known... when the result arrived... once again Middlesbrough breathed freely... As in 1895, the team were greeted by a large number of supporters on their return, on this occasion by a crowd of 10,000-12,000. The North-Eastern Daily Gazette stated “the scene both inside and outside of the Middlesbrough station was one which has never been witnessed before in the history of the town”, the station yard being “filled with an excited and seething mass of humanity”. The directors and “the principal supporters of the club” were also at the station to welcome the team, as were Milburn’s Model Band

12 Middlesbrough & Stockton Evening Telegraph, 2nd April 1898; North-Eastern Daily Gazette, 2nd March 1898; North Star, 19th March 1898
13 Spectators were also able to watch some of the lacrosse final between Surbiton and Stockton on the adjoining ‘arena’ which started 30 minutes before the football – Daily News, 23rd April 1898
14 Daily News, 25th April 1898; North Star, 25th April 1898; South Durham & Cleveland Mercury, 29th April 1898
who played ‘See the Conquering Hero Comes’. The team boarded brakes and “set off around town... the whole route was lined deeply with enthusiastic supporters, who loudly cheered at the sight of the cup”. At the Masham Hotel, the chairman lifted up the cup for the crowds, who “gave vent to an ear-splitting cheer”.15 The two victories in the Amateur Cup justified the club’s decision to retain their amateur status, and also gave the town opportunities to celebrate and build a sense of civic pride. That both victories were over teams from the south also allowed the town to assert its northern identity. The coverage given to the club in the local press confirms Dave Russell’s suggestion that the press “carried much of the daily burden of boosting sporting civic patriotism”, as well as the assertion of Jeffrey Hill that the local press spoke on behalf of their local community. Furthermore, Matthew Taylor points out that by the turn of the century, clubs relied on press coverage “to generate interest and stimulate demand” and the number of column inches devoted to football in Middlesbrough supports this.16

However, the local press were also quick to point out that there were drawbacks to Middlesbrough’s latest victory. The *North-Eastern Daily Gazette* remarked that success had “only been secured at [a] heavy loss” and the club would need to attract big crowds in order to secure their financial future. The final had not attracted a very large crowd, and the *North Star* bemoaned the fact that the game had not been played in the North, where “the gate would doubtless have been considerably larger”.17 Indeed at Middlesbrough’s 1898 AGM, the directors reported that the second half of the season

15 *Middlesbrough & Stockton Evening Telegram*, 26th April 1898; *North-Eastern Daily Gazette*, 26th April 1898; *North Star*, 26th April 1898; *Northern Weekly Gazette*, 30th April 1898
17 *North-Eastern Daily Gazette*, 25th April 1898; *North Star*, 26th April 1898
“had been disastrous financially”. Furthermore, winning the cup had attracted professional agents and three players had already left the club.18

b. The Return to Professionalism, the Football League and Ayresome Park

In the 1890s professionalism was still met with a great deal of opposition. Whilst amateur football was thought to embody “health, endurance, courage, judgement and above all a sense of fair play”, 19 critics wondered whether the principles underpinning the amateur ethos could co-exist with partisan crowds that were only interested in victories for their own teams. Doubts were raised about the ability of footballers to reach the standards expected of them. As one contemporary stated, professionals played “to win at all costs... his strong desire to win... leads him to play up to the rules and to indulge in dodges and tricks which the public school man is apt to consider dishonourable”.20 Whilst N. L. Jackson (founder of the Corinthians) thought that football had become “a spectacle arranged for the enjoyment of those who pay to look on”, 21 he conceded that by the end of the nineteenth century, football was “a business, pure and simple, and as such I respect it”.22 One of the motives behind the legalisation of professionalism was the desire to control it, and remove the illegalities that pervaded the game. Tony Mason has pointed out that those members of the lower-middle and middle classes that ran many professional clubs in the north and midlands, also thought

18 North Star, 2nd June 1898
19 M. Shearman, Athletics and Football (London, 1894), p. 392
21 Quoted in R. W. Lewis, “‘Touched Pitch and Been Shockingly Defiled’: Football, class, social Darwinism and decadence in England, 1880-1914”, in J. Mangan (ed.); Sport in Europe: Politics, class, gender (London, 1999), p. 125; Jackson also proclaimed that, “It was an ill day for the game when the Northern labourer diverted his attention from quoits and rabbit coursing and pigeon flying and turned it to football” – quoted in Lewis, “Touched Pitch”, p. 133
that professionalism needed to be controlled; players were to be servants whilst the directors were their masters. Indeed, the *Athletic News*, a vocal supporter of the professional game, still believed that “money must be controlled and players must be servants”. Such statements reflect the strained relationship between employers and workmen more widely, which despite changes in legislation saw the positions of masters and servants continue into the twentieth century.23

Money was now a fundamental part of football. John James Bentley, the president of the Football League, suggested that the game was now “of such an important character as to render it compulsory that business-like methods must be absolutely observed”. So long as football attracted a crowd, the game would have to be conducted as a business.24 Nevertheless, this was not always viewed favourably. G. O. Smith was of the opinion that when sport “becomes a matter of pounds, shillings, and pence... the game must necessarily lose some of that keen enjoyment... which characterised it before the advent of such considerations”. Elite amateur teams in the south objected so much to the growing influence of professional clubs on football’s governing bodies that in 1907 it was found necessary to form the Amateur Football Association. Even by 1913 there was still a “concern that the game had been lost to monied interests”.25

---

It is clear that the reasons behind the establishment of professionalism in Middlesbrough in the late 1890s were very different to the circumstances that led to the formation of Ironopolis. In 1889 it had been the club’s supporters that had demanded better football. Now, it was the directors who recognised that if the club was to be successful they would have to join the professional ranks. Paying players would prevent them being poached by other clubs, and the attention the amateur cup victories had brought to the town could be built on by playing in the Football League. It was not until 1897 that a meeting was held in Middlesbrough to discuss the possibility of turning professional. Given the club’s experience of professionalism and the associated expenditure earlier in the decade, it is not surprising that the directors proceeded with a great deal of caution. It was decided that “as professional football is attended with so much financial risk, it would be exceedingly unwise again to enter upon it” without the assurance of support from 2,000 individuals who could immediately pay for a £1 share. Evidence of a lack of interest, or at the very least major reservations, was demonstrated at the club’s AGM when it was reported that “not one individual” intimated a willingness to subscribe to the fund towards professionalism.26 Why then, when faced with such financial risks and the success already experienced without having to pay players, would the club turn to professionalism? The club had already lost players to professional teams and when it was rumoured in early 1899 that the directors were again considering professionalism, the North Star pointed out that it would allow the club to have “the pick of the local players”; they would only need to be paid “such a remuneration as will give the committee absolute control over them”. The newspaper reported that the club were loath to make any snap decisions, in case it was revealed that

---

26 Minute Book of MFC, 22nd March 1897; Northern Echo, 1st June 1897
there was “an absurd misapprehension of the amount and of the financial value of football enthusiasm” in Middlesbrough. Unlike the calls for professionalism in 1889, there was evidently little clamour for professionals amongst supporters, but there was an increasing realisation that the club could only progress by paying players. The *Middlesbrough & Stockton Sporting Telegraph* stated that local amateur players were being “snapped up much to the disgust, annoyance and impoverishment” of their clubs. A player could not be blamed for turning away from amateurism, as “he may as well be having his share of the plums while he has yet youth and activity on his side to barter for them”. At a meeting of the directors it was decided that so long as “sufficient capital is early subscribed”, a professional team that would be “creditable to a town of the size and importance of Middlesbrough” should be formed. As the *Middlesbrough & Stockton Evening Telegraph* pointed out, the directors had “not forgotten their previous experience of professionalism and are not... disposed to take upon themselves the risk of repeating the experiment”.

A public meeting was subsequently arranged “to gauge the measure of public support”, and anyone who has “taken the slightest interest in the club and desires a better class of football”, were urged to attend. Ahead of the meeting, the directors were asked to secure “promises of support”, whilst the club’s new director Councillor Alfred Mattison (of the Zetland Hotel), was asked “to use his influence with the

Glover who tendered his resignation due to his opposition to professionalism. He agreed “not to press” his resignation immediately, though it was understood that he would “be glad to be relieved of the position at an early date” – Minute Book of MFC, 27<sup>th</sup> June 1899

310
licensed victuallers of the town”. The chairman (R. Forrester) informed those at the meeting of the directors’ aspirations for the club and consequently, for the town,

They felt that something must be done to rekindle that flame which once set the country on fire when they had two professional teams in the town... They asked the public for the money so that they would be in a position not only to put a team in the field to win the Second League, but a team that would be able to play any team in England, and to lift the name of Middlesbrough to the highest pinnacle of fame, and be a credit and satisfaction to the town and the whole district.

It was estimated that the cost of running a professional team was £2,267 7s a year, and that £1,000-1,500 would be required in subscriptions. Pointing out that 5s of each share would need to be paid within two weeks, Forrester stated that “should any working man not be able to meet the call no doubt the committee would make special arrangements”.

One member of the public (George Cathey) suggested canvassing the tradesmen of the town to take up shares, stating that “there should not be a single tradesman who was not prepared to take shares” given the “great number of people that would be brought into the town if they had good professional matches”. 244 shares were taken up at the meeting from 80 individuals, and a committee was duly appointed to canvass tradesmen and licensed victuallers.

A week later ‘Old Bird’ in the North-Eastern Daily Gazette reported that he had persuaded both the managing director (Sir James Clifton Robinson) and the chairman of the Imperial Tramway Company to take up 100 shares between them. In return, the Company would “do everything that lies in their power to facilitate traffic, so that those desirous of seeing the home matches of the club will be conveyed cheaply and speedily

to and from the ground”, demonstrating that the purchasing of shares could be beneficial to both shareholder and club.\(^{34}\) The minute book of the club states that the secretary was also requested to write to the following to ask them to take up shares – Sir Joseph Pease, Sir Christopher Furness,\(^{35}\) licensed victuallers, “large employers of labour in the district”, brewers, members of the council, and “others who might be influenced to interest themselves in the movement” such as the Marquis of Londonderry and Marquis of Zetland.\(^{36}\) Shortly afterwards ‘Old Bird’ confidently stated that “the success of the professional scheme has now been assured”, the canvassers having gone about their work in “such a thorough and painstaking manner as to set at rest all doubts on the matter”. 850 shares had been subscribed to either verbally or in writing within two weeks of the public meeting.\(^{37}\) In a further example of what was felt to be a reciprocal relationship between shareholder and club, George Cathey, who had canvassed the town with 15 others, suggested that club members should not patronise the publicans “who refused to support the team... within a week they would take up a couple of hundred shares”.\(^{38}\) On being admitted to the Second Division in May (“thanks to the influence of the Northern delegates” and the oratory skills of Henry Walker\(^{39}\), ‘Linesman’ in the

\(^{34}\) *North-Eastern Daily Gazette*, 10\(^{th}\) March 1899; The Imperial Tram Company had been involved in Middlesbrough’s trams since 1878, and James Clifton Robinson was said to have had “a long and fairly happy association” with the town. He opened Middlesbrough’s first electric tram in 1898 – W. Lillie, *The History of Middlesbrough* (Middlesbrough, 1968), pp. 242-245; Robinson had previously told ‘Old Bird’ that he was “a hearty supporter of all manly sports” and would be “pleased to do his ‘modest bit’... towards ensuring the success” of professional football in the town – *North-Eastern Daily Gazette*, 25\(^{th}\) January 1899

\(^{35}\) The MPs for Barnard Castle and the Hartlepools respectively

\(^{36}\) Minute Book of MFC, 13\(^{th}\) March 1899

\(^{37}\) Minute Book of MFC, 17\(^{th}\) March 1899; *North-Eastern Daily Gazette*, 17\(^{th}\) March 1899

\(^{38}\) The 1901 census lists Cathey’s occupation as ex trade union secretary; *North Star*, 25\(^{th}\) March 1899; *The Middlesbrough & Stockton Evening Telegraph* was disappointed that Cathey’s suggestion had not been met with “a stout remonstrance” from the directors. The newspaper stated that he was “a henchman” for the town’s MP (Joseph Havelock Wilson), “a fact which is not likely to be lost upon the tradesmen of the town” – *Middlesbrough & Stockton Evening Telegraph*, 25\(^{th}\) March 1899

Middlesbrough & Stockton Sporting Telegraph informed his readers of “the absolute necessity of loyally supporting the directorate”. Placing the game at the heart of Middlesbrough, he thought that there was “no reason why a sporting town of the size and increasing prosperity and importance of the Teesside capital should not have a team in the premier division”.  

The club already had 23 players prior to admittance to the Football League, and the Middlesbrough & Stockton Sporting Telegraph expected the signing of more players from “the Land of Cakes [Scotland], that bourne to which few football players return after they have had a sight of the money bags of England”; players were duly secured by the club’s director Jack R. Smiles on a visit to Scotland. Wages ranged from 30s to 40s per week (though local players would be paid a maximum of 35s), whilst bonuses ranged from zero to £10. It was decided that no summer wages would be paid “except in the case of prominent players”. At the start of the 1899 season the South Durham & Cleveland Mercury thought that “the cream of local amateur talent will prove equal to that which older professional clubs can provide”, but the Middlesbrough & Stockton Evening Telegraph suggested that the players would not “set the Tees on fire”. Nevertheless, it would not matter as long as “the lads play with that determination which is characteristic of the youth of the North”, confirming Mason’s statement that football reinforced “prevailing images and stereotypes”.

---

40 Middlesbrough & Stockton Sporting Telegraph, 29th May 1899; Though the criteria were not formalised, the financial strength of a club, the population of the town and surrounding area, the club’s record and pedigree, and the ability of the club to attract large crowds were all crucial factors in the election of clubs to the League – Taylor, The Leaguers, pp. 21-22
41 Minute Book of MFC, 5th, 31st May 1899; Middlesbrough & Stockton Evening Telegraph, 21st June 1899; Middlesbrough & Stockton Sporting Telegraph, 30th May 1899
Middlesbrough’s first home match in the Football League drew a crowd of 6,000. The *Middlesbrough & Stockton Sporting Telegraph* reported that from an hour before the game began, “there was a constant stream of football spectators along Linthorpe Road, anxious to gain the best points of vantage... [the money takers] were unable to take the money fast enough”. Mattison stated that many in the town benefitted from the return of professional football, arguing “from a tradesman’s point of view... the club should be beneficial to the town”, as “football enthusiasts” had previously left the town to watch matches at Sunderland or Newcastle instead. The *Middlesbrough & Stockton Evening Telegraph* stated that if the club was successful “there will be an inducement to keep football spectators in Middlesbrough on Saturdays... they will, as a matter of fact, spend their money in the town”. It is interesting to note the suggestion that spectators had been prepared to travel to see a good game, rather than watch a local amateur team, and justifies the directors’ decision to join the Football League. The financial success of the first League match led the directors to pay a 10s bonus for a win and 5s for a draw to the players, with a further bonus if the team reached ninth position in the League. It is evident that some players continued to work in other jobs as well, as it was recorded in the club’s minute book that the trainer should be informed that “some of [the] men allowed to work during [the] day were not exhibiting staying power”, and he ought to “suggest a means of overcoming the weakness”. 

43 *Middlesbrough & Stockton Sporting Telegraph*, 11th September 1899; This was less than the 7,000-8,000 that had attended the club’s first practice match, but the average home attendance of 5,925 was the highest in the Second Division – *North-Eastern Daily Gazette*, 25th August 1899; B. Tabner, *Football Through the Turnstiles Again* (Harefield, 2002), p. 96

44 *Middlesbrough & Stockton Evening Telegraph*, 20th September 1899

45 Minute Book of MFC, 18th, 25th September, 2nd, 9th October 1899; It was suggested by John Goodall that “weekend football” was the best training for footballers as “if you put him hard to work on weekdays, you make him stale and listless” – J. Goodall, *Association Football* (London, 1898), p. 20
Middlesbrough ended their first season in the Football League in 14th place and the South Durham & Cleveland Mercury hoped that the supporters would “insist upon engaging a capable manager of the team”. Had Jack Robson been allowed to take charge of selecting the team, the newspaper surmised that they would have been more successful.\footnote{South Durham & Cleveland Mercury, 30th March 1900} Mattison thanked the supporters as they “had rallied round that football club in a manner which was a credit to them, and also a lesson to the whole of England in that matter”. £2,237 18s 7d had been spent on wages, bonuses and transfer fees to players (see Appendix 6) who had kept the club “out of that ignominious position of being at the bottom of the Second League”.\footnote{Minute Book of MFC, Statement of Accounts 1899-1900; Middlesbrough & Stockton Evening Telegraph, 28th May, 1st June 1900; North Star, 1st June 1900; Northern Echo, 1st June 1900} Despite the necessity of spending money to remain competitive, North Star’s ‘Captain’ criticised the club for the large amounts they were spending. Commenting on win bonuses of £3, he stated,

> It is but another proof of the deterioration of the game from the level of a sport to that of a business... We hardly know whether to blame the Middlesbrough players for their grasping greed, or whether to blame the directors for being so foolish as to consent to such practices by showing their willingness to give big bribes to gain small ends.\footnote{North Star, 8th January 1901}

The club’s trainer, Charlie Harper, was employed at a weekly wage of £2 and players’ wages varied. These would appear to be in keeping with the national average; the typical wage in the First Division in the late 1890s was £3-£4 a week –

Enthusiasm for the club amongst spectators was demonstrated during efforts to secure promotion in 1902. 1,600 Middlesbrough supporters travelled to a game in Preston and the Northern Echo reported that many of them “displayed the club’s colours very conspicuously, and at frequent intervals ‘made the welkin ring’ with shouts of ‘Play up the borough’.”. The victorious team were welcomed back at the train station shortly after midnight by “thousands of excited and enthusiastic people”. The South Durham & Cleveland Mercury stated that the crowds divided up two different streets “each in charge [of] a number of the players, who were every now and then lifted shoulder high, to the accompaniment of ‘He’s a jolly good fellow’”. Support for the team was demonstrated again when on winning their place in the First Division a few weeks later, the team were greeted by 11,000 people at the station. A subscription list was opened “in order that some recognition may be made of the services of the players”, Robson was rewarded with an increase to his salary, whilst the players were presented with new

50 Northern Echo, 10th March 1902
51 North Star, 10th March 1902; South Durham & Cleveland Mercury, 14th March 1902
Ahead of the new season in the First Division the price of season tickets was increased, and the Linthorpe Road ground was extended to accommodate a further 8,000 spectators. The expenditure was rewarded with a crowd of 15,000 for Middlesbrough’s first practice game and an estimated crowd of 17,000-23,000 for the first League match. The *Northern Echo* also reported that 3,000 Middlesbrough supporters travelled to a match in Newcastle, but in contrast when Middlesbrough took on the elite amateur Corinthians team at the Linthorpe Road ground, the crowd totalled only 1,000, further proof of the popularity of professional, League football.

When the club were unable to extend the tenancy for their Linthorpe Road ground the existing grandstand was moved to land at Ayresome Park. A new stand for 2,000 spectators was to be erected as well, and was said to be “of an elaborate character”; it was to include a gymnasium, billiard room, rooms for the secretary and directors, rooms and baths for home and visiting teams, and a room for referees. £5,000 was needed to pay for the stand and 12 £100 shares were taken up by the directors, whilst Herbert Samuel (MP for Cleveland) took up £1,000 after a “deputation” had visited him in London. £3,000 of the total needed was soon subscribed and a month later it was reported that Sir James Clifton Robinson had also agreed to subscribe a further £1,000 worth of shares. £6,000 was spent on the 32,000 capacity Ayresome Park ground.

58 *North-Eastern Daily Gazette*, 1st July 1903; *South Durham & Cleveland Mercury*, 3rd July, 14th August 1903
leading the *Athletic News* to proclaim that “the North Yorkshiremen are ready for big business”. Charles Sutcliffe of the Football League management committee stated that prior to the First World War, there had been “an outcry for more comfortable accommodation”, and that new grandstands were erected “in answer to popular clamour”.\(^6^0\) Whilst this contributed to the building of Ayresome Park, complaints were made later about the standard of the cheapest part of the ground, indicating that it was not built with the needs of all the supporters in mind. The directors were more concerned with the income that the new ground could bring in to the club.

The first League fixture at Ayresome Park against Sunderland attracted 25,000-30,000 spectators. The *South Durham & Cleveland Mercury* suggested that the club had been taken by surprise by the number of spectators present. The press gallery was “monopolised by the onlookers, much to the inconvenience of sundry knights of the pencil”. No seats had been reserved in the grandstand, so that Herbert Pike Pease (MP for Darlington) “had a difficulty to find a seat at any price”. The importance of the match was evidenced by the fact that hundreds of men had left work early in order to attend, and “went to the field dinnerless, many purchasing a democratic pork pie en route”.\(^6^1\) The *North-Eastern Daily Gazette* reported that on the day of the match, Thomas Dent (a mineral water manufacturer) supplied “all comers with temperance drinks and sold refreshments on the ground at reasonable charges”, whilst one of the club’s directors, Arthur Barritt (a hatter), had a stock of red and white silk ties which

---

\(^{59}\) Inglis states that the total cost of building Ayresome Park and rebuilding the old grandstand from the Linthorpe Road ground was £12,000 – S. Inglis, *Engineering Archie: Archibald Leitch – football ground designer* (London, 2005), p. 66

\(^{60}\) *Athletic News*, 24\(^{th}\) August 1903; Sutcliffe quoted in Taylor, *The Leaguers*, pp. 255-256

\(^{61}\) *Athletic News*, 14\(^{th}\) September 1903; *South Durham & Cleveland Mercury*, 18\(^{th}\) September 1903
“enthusiastic supporters” could purchase for a shilling. The ground was opened by Sir James Clifton Robinson (of the Imperial Tramway Company) who remarked that it was “quite a revelation to him to see such an immense multitude gather to witness one of the finest games of football it was ever his privilege to witness”. That his involvement could benefit the club was evidenced when he stated that he would “see if it was not possible to run the electric cars to the entrance of the new field”.

Despite the large attendance at the first game at Ayresome Park, the crowds did not continue to be quite so big. Receipts for the match against Sunderland had totalled £907, but the next home game against Small Heath resulted in only £498. The fixture against Wolverhampton Wanderers was kicked-off by the mayor, Charles Dorman, and the North-Eastern Daily Gazette thought that this would be “heartily appreciated by the sportsloving [sic] public”, but the game attracted a crowd of only 8,000, the mayor evidently not being an attraction to spectators. The Gazette suggested that the directors should improve the accommodation by covering a section one of the stands; the club “would promptly get back the cost in the increased attendance... when a person pays a shilling to see a football match he should be accommodated with ample protection”. Sufficient improvements were evidently not made as a similar complaint was made seven years later when the Northern Athlete suggested that it was “a scandal and disgrace” that those in the cheapest section of the ground had to stand in “three inches of best juicy mud every time there has been a drop of rain”. After all, it was those who

62 1901 census; North-Eastern Daily Gazette, 11th September 1903
63 North-Eastern Daily Gazette, 16th September 1903; South Durham & Cleveland Mercury, 18th September 1903
64 North-Eastern Daily Gazette, 26th, 30th November 1903 – The gate receipts for the following four home games were £419 (Stoke), £405 (Manchester City), £750 (Sheffield United) and £520 (Aston Villa). The average attendance at Ayresome Park was 13,475, 10th highest in the division, but this dropped the following two seasons. The highest season average during this period was 16,425 for the 1907-08 season – Tabner, Football Through the Turnstiles Again, pp. 96-103
paid just sixpence that “season after season prove themselves to be the backbone of the club”. In 1914 it was hoped again that the club’s increased income would “enable certain required improvements” to be carried out at Ayresome Park. The *North Star* argued “on the principle that it is well to retain a strong grip on the splendid support which the team has obtained, it may be suggested that a modest outlay in this matter would be wise”.

In 1904 Middlesbrough did draw a crowd of 34,000 for a FA Cup quarter-final replay. The attendance was surprisingly big given that the game was played on a Wednesday afternoon. The *North-Eastern Daily Gazette* suggested that “applications have been made at most of the works in the district for permission to have Wednesday afternoon off... [Work] will practically be at a standstill”. Harry Walker in the *South Durham & Cleveland Mercury* suggested that there were many at the game who had never attended a football match before, and his comments indicate that a cross-section of people attended what was evidently regarded as an important event,

The artisan and labourer, of course, are always there, and constitute the genuine reliable backbone of every important club in the kingdom. Even divinity had its representatives there... Some of our manufacturing magnates were interested spectators, leading civic dignitaries from the neighbouring towns cast off the cares and worries of local government for the time being... those learned in the law looked on with critical eyes, whilst the representatives of the drama and the instruments of musical culture lent countenance to the great contest.

66 *North Star*, 28th April, 21st May 1914
67 *North-Eastern Daily Gazette*, 7th, 8th March 1904; *North Star*, 10th March 1904; This was evidently not unique to Middlesbrough as H. F. Abell complained in 1904 that large establishments were often closed during the working week because “the whole body of workmen take it into their heads that their pets on the football ground require encouragement”. If men are absent from work, “nobody asks where they are or if they are ill or dead, it being taken for granted that football somewhere has attracted them away” – H. F. Abell, ‘The Football Fever’, *Macmillan’s Magazine* 89 (1904), p. 281
68 *South Durham & Cleveland Mercury*, 18th March 1904
c. Criticism from Shareholders and Supporters

The importance of the club to supporters was demonstrated by the complaints that were made when results were poor. In November 1904 Middlesbrough had not won for eight games and the club received a requisition signed by a number of shareholders requesting a vote of censure on six of the directors.\(^69\) ‘Old Bird’ claimed that,

> Never in the history of the Middlesbrough Club... has there been such a general feeling of indignation as exists at present at the humiliating position the club has been permitted to drift into... The thousands of loyal supporters of the club are heartily sick of the puerile exhibitions that have been given this season... the fate of the club hangs in the balance by such a very slender thread that it is only by straight talking and prompt action that the great danger that threatens may be averted.\(^70\)

Whilst the *Sports Gazette* thought the players should also take a share of the blame, given that they were “handsomely paid to give of their best”, the *Teesside Weekly Herald* was keen to point out that “in spite of many loud-voiced protests”, directors had been elected “who have plainly been most unpopular amongst the general body of shareholders, and whose acquaintance with football is of the most limited character”.\(^71\)

At a shareholders meeting in December 1904 there was further criticism of the directors. Confirming Neil Carter’s suggestion that directors regarded choosing the team “as their prerogative and were unwilling to relinquish what they deemed as their duty”, it was claimed that until recent weeks, Robson “had not had a free hand in the choice of players”. Whilst Carter states that directors were often unwilling to handover the responsibility of choosing the team to “salaried officials whom they regarded as socially

\(^69\) *North Star*, 23\(^{rd}\) November 1904

\(^70\) *North-Eastern Daily Gazette*, 22\(^{nd}\) November 1904

\(^71\) *Sports Gazette*, 26\(^{th}\) November 1904 *Teesside Weekly Herald*, 3\(^{rd}\) December 1904; This was due to the large number of proxy votes at that year’s AGM. Had only the votes that were cast in the room counted, Jack R. Smiles would have been elected to the directorate – *North-Eastern Daily Gazette*, 14\(^{th}\) June 1904; The *North-Eastern Daily Gazette* asked the directors to resign en masse and not to “entrench themselves behind proxy votes” – *North-Eastern Daily Gazette*, 28\(^{th}\) November 1904; Vamplew points out that many clubs allowed proxy voting and directors were in an ideal position to collect votes – W. Vamplew, *Pay Up and Play the Game: Professional sport in Britain, 1875-1914* (Cambridge, 1988), p. 169
inferior”, Middlesbrough’s directors stated that they thought it was not fair “to throw all the responsibility on to the shoulders of one man”. One shareholder told the meeting that they wanted “men on the Board who knew a player when they saw one, who knew how to negotiate terms, and who would discourage drinking and gambling amongst the players” indicating that poor behaviour was a problem amongst the players. The vote of censure was withdrawn and a temporary “consultative committee” was duly appointed.\textsuperscript{72} The aim of this committee\textsuperscript{73} was to “improve the club’s deplorable condition”, but the directors would not comply with any of their requests for information, demonstrating that “there was no serious intention on the part of the directors to cooperate with the shareholders’ representatives”. One director retorted that they were being “hampered and bothered by meetings, letter writing etc, about their work”. The director dismissed the shareholders’ complaints and maintained that “if the squabbling is insisted upon we will go down, down in our talent, and down in our gate receipts”.\textsuperscript{74}

The report of the club in June 1905 showed that gate receipts had already decreased and a loss had been made of over £1,635 (see Appendix 6). The directors attributed this to the “scarcity of money in the district, due to bad trade and the number of men out of work”, and hoped that “better times are in store for the working classes”.\textsuperscript{75} It was pointed out that trade had been equally bad in Newcastle and Sunderland, but their balance sheets were far superior. Indeed an article in the \textit{Quarterly Review} stated that

\textsuperscript{72} North Star, 9\textsuperscript{th} December 1904; Northern Echo, 10\textsuperscript{th} December 1904; Carter, \textit{The Football Manager}, p. 26, p. 35
\textsuperscript{73} The committee was composed of James Windross (former secretary of both Middlesbrough and Ironopolis), H. Walker (former Middlesbrough secretary and director), Henry Frankland, Jack R. Smiles, James J. Fowler and John H. Gunter (all former Middlesbrough directors).
\textsuperscript{74} Sports Gazette, 4\textsuperscript{th} March 1905
\textsuperscript{75} North-Eastern Daily Gazette, 30\textsuperscript{th} June 1905; Northern Echo, 23\textsuperscript{rd} June 1905
even when trade was poor, “thousands of operatives find enough money to attend a match”. Despite previous statements about public interference, support was now requested in order to maintain “a first-class team and meet the expenses of the ground”, and it was hoped that “the enthusiasm and love of sport on Teesside will raise them to a position equal to that of their neighbours on the Tyne and Wear”. One Middlesbrough shareholder remarked that “they would not grumble so much if they had had something for their money”; there had been some “disgraceful displays by men who were receiving presumably the maximum pay”. Supporters evidently wanted to see these well-paid footballers prove that they were worth their wages, given that most players were financially better off than the spectators. The maximum wage (introduced for the start of the 1901-02 season alongside a ban on bonuses) was £4 a week and the majority of players in the First Division received the maximum. In comparison, even the best paid workers at a Middlesbrough blastfurnace received only £3 a week, whilst other blastfurnace workers were paid between 19s and 44s 2d a week. Lady Bell stated that ironworkers received between 18s and 80s a week, most of whom were paid between 20s and 40s. Shipyard labourers received just over £1 a week, and unskilled workers were paid 20s-22s a week.

36 Newcastle had finished 1st, Sunderland 5th, whilst Middlesbrough had finished in 15th place; North-Eastern Daily Gazette, 30th June 1905; Northern Echo, 23rd, 30th June 1905; Sports Gazette, 24th June 1905; Quarterly Review quoted in Tischler Footballers and Businessmen, p. 127; Another contemporary remarked that “when the misery of a long, cruel strike has settled down upon a manufacturing district, and the actual pinch of famine is being felt by nearly every one, the sums taken at the big football matches do not fall off in the same proportion as all other receipts from the starving people – E. Ensor, ‘The Football Madness’, Contemporary Review 74 (1898), p. 752
37 North-Eastern Daily Gazette, 30th June 1905
d. Transfers, Scandals and Corruption

The various scandals experienced by the club meant that the directors were in turn chastised for bringing undue attention to the club, or praised for attempting to progress the team in the League. The different types of relationships between the club and directors and their motivations, are also demonstrated. In February 1906 Middlesbrough became the first club to pay £1,000 for a footballer when Alf Common was transferred from Sunderland.\(^{80}\) Though the Middlesbrough director Lieutenant-Colonel Thomas Gibson-Poole thought that the attention on the club had had “an inspiring influence on the players”, Harry Walker in the *South Durham & Cleveland Mercury* disapproved, suggesting that the directors were “determined to risk a good deal” in order to prevent relegation.\(^ {81}\) ‘Old Bird’ in the *North-Eastern Daily Gazette* felt that Common’s transfer (alongside Green from Stockport County for £300) showed that there is “a unanimity of purpose being displayed that is almost bound to bring success in its train”.\(^ {82}\) One contemporary stated that given the part Common subsequently played in saving the club from relegation, “he was a cheap man... his purchase was one of the best investments any club ever made”, and another suggested that the transfer amounted to “a solid business arrangement”. In contrast, the *Athletic News* suggested that “as a matter of commerce ten young recruits at £100 apiece might have paid better... the Second Division would be more honourable than retention of place by purchase”.\(^ {83}\)

---

\(^ {81}\) Before Common’s transfer, the highest transfer fees were around £400. It was felt that “an uncontrollable surge” in fees might be set off and in March 1905 the Football Association decided that a maximum transfer fee would be set of £350 (though this proved impossible to control and was dropped after three months) – S. Inglis, *League Football and the Men Who Made It* (London, 1988), pp. 57-58

\(^ {82}\) Northern Echo, 28\(^{th}\) February 1905; South Durham & Cleveland Mercury, 24\(^{th}\) February 1905

\(^ {83}\) North-Eastern Daily Gazette, 15\(^{th}\) February 1905

During this time, Middlesbrough were accused of breaching the rules (“as much through mismanagement as sheer ambition”) on so many occasions that by the end of this period, they were thought to be lucky not to have been thrown out of the League. Middlesbrough were not the only club found guilty of such infringements, and the number of incidents escalated as clubs looked for ways to circumvent the restrictions of the maximum wage.84 In mid-1905, Middlesbrough’s auditor informed the shareholders that illegal payments had been made to players, and the shareholders informed the Football Association, seemingly unconcerned about the punishment the directors would incur. In November 1905, the directors admitted making illegal payments to players worth £400 (for winning or drawing cup ties and League matches) and fabricating accounts to conceal them. During the Football Association’s investigation of the club, the directors made “very strenuous efforts” to avoid being exposed. The club were fined £250, eleven of the twelve directors were suspended until January 1908, and one former player was fined £10.85

Despite this, it was suggested that the directors had acted in the best interests of the club, just as they had done when signing Common. The North Star claimed that,

...but for the sacrifices which members of the directorate, inspired by a genuine enthusiasm for the game, and a commendable desire to keep the club alive, were prepared to make, Middlesbrough would long since have ceased to exist professionally.

Indeed Mattison stated that,

It was done at a time when Middlesbrough were making a gallant fight for the English Cup... [and for their] very life in the League, and who in

85 Athletic News, 31st July 1905; North Star, 28th November 1905; Inglis, Soccer in the Dock, p. 24; For details see Athletic News, 11th December 1905 and Northern Echo, 28th November 1905;
Middlesbrough should blame us... If we had paid the men too little, if we had put the money in our own pockets, we might have deserved the severe criticism we have undergone, but who dare, amongst all our candid critics suggest that we have done anything but what any gentleman or body of gentlemen in the land would not have been tempted to do under the circumstances?  

In contrast, the *Northern Echo* reported that supporters were pleased with the punishment, “as it had been felt for some time that the directors had not done what they ought in the way of signing new players”. Furthermore, the *Sports Gazette* attributed the mismanagement of the club to the fact that the shareholders had been “denied a popular representation”. When the shareholders were called to select a new board, they were urged to choose men “whose sole qualifications are business capacity, football knowledge, and enthusiasm for the game and the club”, and that there should be “no enmities, no jealousies, no cliques, no favourites”. With a view to “increased efficiency and to the simplification of work”, an assistant secretary (George F. Allison, a *Northern Echo* journalist “well-known on Teesside”), was appointed to work with the manager. The directors remained lower-middle and middle class. Smiles was appointed vice-chairman, and Gibson-Poole chairman. Two former directors and eight new directors were elected, six of whom can be identified –

1911 census

---

90 1901 census; *Athletic News*, 18th December 1905, 8th January 1906; *North-Eastern Daily Gazette*, 15th December 1905; The directors agreed that their predecessors should remain responsible for £1,000 of the club’s debt, and were led to believe that they would pay the fine to the Football Association but it had to be paid by Gibson-Poole – *Athletic News*, 29th January 1906; *North Star*, 1st February 1906.
By March 1906, Middlesbrough had only won six times during the season. Therefore the transfers of Steve Bloomer, William Frederick Brawn and Frederick J. Wilcox “served to restore confidence in the team”. The *Sports Gazette* stated that the “purchases do not look nice, but they are lawful”, and suggested that “the niceties of pure sport have now and then to be disregarded, in view of the need for self-preservation”, whilst the *Northern Athlete* agreed that “desperate diseases require desperate remedies”. The *Athletic News* argued that the directors were “entitled to unstinted support from all [of] Teesside”, but questioned whether any club ought to “buy the services of players at the eleventh hour”. G. O. Smith argued that buying players to avoid relegation was “contrary to all ideas of sport”. A club should be “content to rise or fall on its own resources, and not owe its position to a body of men... who have and mean to have no permanent connection with it”.91 The club’s attempts at self-preservation proved expensive. The price of admission for Middlesbrough’s home matches at Easter had to be raised to pay for the transfers, but the *Teesside Weekly Herald* thought this was entirely justified; it was not fair to ask the directors “to pay for the entertainment of several thousands”.92 Unfortunately for the directors, the Football Association chose to investigate the transfers of Bloomer, Brawn and Wilcox, and the *Northern Athlete* stated that “the whole affair seems to smack of persecution”. Despite Gibson-Poole’s assertion that the directors had nothing to hide, the club were found to have paid Bloomer an improper bonus for re-signing. The club was fined £50 and had to agree to let the

91 *Athletic News*, 19th March 1906; *Northern Athlete*, 7th May 1906; *Sports Gazette*, 21st April 1906; *Teesside Weekly Herald*, 24th March 1906; Smith, ‘Origin and Benefits of the League’, p. 184; The decision to buy Bloomer was certainly vindicated as his goal in Middlesbrough’s final game of the season saw the club avoid relegation; he scored six goals in nine games – P. Seddon, *Steve Bloomer: The story of football’s first superstar* (Derby, 1999), p. 107
92 *North-Eastern Daily Gazette*, 21st April 1906; *Teesside Weekly Herald*, 14th April 1906
Football Association inspect their books at least twice over the next year. Three months later, having failed to supply the Football Association with their books, the club were fined a further £50. The club also admitted to a “lack of proper control over expenditure”, which had resulted in the loss of hundreds of pounds. Bloomer was suspended for two weeks, and the secretary and manager Alex Mackie (who had since left the club to manage the Star & Garter Hotel) was permanently suspended from football management. A year later, Gibson-Poole stated that the directors had “been very careful indeed” as regards expenditure, and assured supporters that “he knew more about the club’s affairs than any of the directors”. Gibson-Poole’s confidence was quickly shown to be misplaced as “owing to a slight error” he saw the club run out of money for hotels and other expenses whilst part way through their tour of Copenhagen, Prague and Berlin in June 1908.

The directors elevated opinions of themselves was demonstrated at the AGM in June 1909. The directors were asked by a Mr Thompson why the meeting was held at the “unseasonable hour” of 6pm. Gibson-Poole replied that “several of the directors wished to get away for their holidays”, and thought they “deserved some little consideration, seeing the time and money they devoted to the club”. He hoped that the shareholders “would not stultify themselves by trying to harass the directors”. Not surprisingly, Mr Thompson found this reply unacceptable, and suggested that more than 75% of the

---

93 North-Eastern Daily Gazette, 31st May 1906; Northern Athlete, 14th May 1906; South Durham & Cleveland Mercury, 11th May 1906; It was later stated that the payment to Bloomer was to cover the costs of moving his possessions from Derby to Middlesbrough, and that the club should have asked the Football Association for permission to pay him – Northern Athlete, 11th June 1906
94 Inglis, Soccer in the Dock, p. 26; North-Eastern Daily Gazette, 2nd November 1906; South Durham & Cleveland Mercury, 7th September 1906; For details see Sports Gazette, 3rd November 1906
95 North-Eastern Daily Gazette, 27th June 1907; Sports Gazette, 22nd, 29th June 1907; Teesside Weekly Herald, 27th June 1908; Bloomer remarked that such tours were “very much in the way of pure pleasure jaunts rather than serious footballing affairs” – Seddon, Steve Bloomer, p. 112
shareholders had been prevented from attending the meeting as the time did not fit in with their working hours.\textsuperscript{96} The relationship between supporters and directors had evidently not improved a year later as when faced with “very strong criticism”, the board threatened to resign. Gibson-Poole complained that there was “no justification for the criticism that [had] been levelled against them”. In order to emphasise the amount of money put in by the directors and to show their disregard for supporters’ criticism, a meeting was called at which shareholders and season ticket holders were asked to provide the same amount as the directors, £500, to pay summer wages. Only if the money was forthcoming, would the directors be prepared to retain their positions.\textsuperscript{97} Gibson-Poole argued that “you can’t expect us to advance football when we get such scant support”. Furthermore, the directors objected to being “talked about in every public house in the town, and called worse than murderers”.\textsuperscript{98} The Northern Athlete sympathised with the directors, reminding supporters that those that criticised the board had “nothing at stake” in comparison to those running the club.\textsuperscript{99}

It was unlikely that directors of professional football clubs took up their positions in order to make money for themselves. The limit of 5\% for the payment of dividends meant that only men “who love football for its own sake” were involved. As the Athletic News stated, “no one who is out for a business return would look at football shares”. William McGregor (the founder of the Football League) suggested that the position of director “carries with it an amount of work which, if a man looked at it through business

\textsuperscript{96} Northern Athlete, 31\textsuperscript{st} May 1909; Teesside Weekly Herald, 5\textsuperscript{th} June 1909; This complaint had also been made in 1901, when it was pointed out that by holding the AGM on a weekday evening rather than on a Saturday afternoon, 20-25\% of shareholders were unable to attend – North-Eastern Daily Gazette, 14\textsuperscript{th} May 1901
\textsuperscript{97} North-Eastern Daily Gazette, 3\textsuperscript{rd} May 1910
\textsuperscript{98} North-Star, 6\textsuperscript{th} May 1910; Sports Gazette, 7\textsuperscript{th} May 1910
\textsuperscript{99} Northern Athlete, 6\textsuperscript{th} June 1910
spectacles, would call for heavy remuneration”, whilst the secretary of the Football Association believed that there was in fact no desire amongst directors “to obtain any reward beyond the success of the club”. David Kennedy notes that the football club boardroom was “locked into a network of civic organisations through which the cohesion of middle-class urban elite was maintained”, a point which can be applied to many of Middlesbrough’s sports organisations, as well as to its football clubs. Involvement with a football club could help promote a “civic and philanthropic image”, as well as providing a means of enhancing the reputation of the town itself. Indeed, by 1899 “the potential of football had become obvious” to urban men of wealth and status. Profits could also be made from catering, building, providing the kit and from advertising. A large number of directors were brewers or builders, but only a handful of clubs banned contracting with directors.

Gibson-Poole’s motivations for continuing his position with the football club may have been rather different to the club’s other directors. In November 1910 Gibson-Poole was chosen as Middlesbrough’s Unionist candidate for the forthcoming parliamentary election. He was, even according to the Liberal Teesside Weekly Herald, one of the best-known men in the town due to “his active business life, his long association with the town, and his wide business interests”.

---

100 Quoted in Mason, Association Football, p. 48; W. McGregor, ‘The £ s d of Football’, in Leatherdale (ed.), The Book of Football, p. 60
101 Quoted in Russell, Football and the English, p. 42
103 Mason, Association Football, p. 48, pp. 241-242; Russell, Football and the English, p. 42; Taylor, The Association Game, pp. 71-72; Tischler, Footballers and Businessmen, pp. 71-75; Middlesbrough decided in 1901 that in order that the club could proceed “in a straight, honest and sound manner”, that “all those who are holding pecuniary interests in the working of the concern of the Middlesbrough Football Club shall be asked to retire from its directorate”. Mattison stated that the amendment was put in place “for the protection of people against the directors”. This was directed at Smiles (a cement merchant) who tendered successfully for work on the ground – North-Eastern Daily Gazette, 24th May 1901; North Star, 24th, 25th May 1901; Northern Echo, 24th May 1901
the civic life of the town, his honourable career as an officer of the volunteering forces and his success as the guiding spirit” of the football club. Indeed when he had become mayor three years earlier, it was noted that he had always provided “valuable assistance and encouragement” in “clean, healthy sport”. However, it was alleged that the Middlesbrough players were pressured into helping with his election campaign. One member of the team, Fred Pentland, stated that though the players had not been coerced, some had spoken on their chairman’s behalf. He believed that the players should have refrained “from any display of misguided enthusiasm” in order to prevent the football club from becoming a “political machine”. A leaflet was distributed which included photographs of Gibson-Poole and the captain Tim Williamson, alongside quotes from players. The North-Eastern Daily Gazette disapproved of the use of football for political gain, arguing that the players had “made a great mistake in appealing to their ‘patrons’ to support” Gibson-Poole; “as private individuals” the players “can do as they like... but as borough players their duty is to attend to their game”.

Two days before the election Middlesbrough played Sunderland at Ayresome Park. It was reported that “election fever was in the air”; political placards were carried around the pitch and there was “a lavish display of party colours” at the ground. When Gibson-Poole appeared in the grandstand he was reportedly greeted by “a roar of cheering that eddied its joyful way from one end of the ground to the other”. Middlesbrough’s

---

104 North-Eastern Daily Gazette, 2nd November 1907; Teesside Weekly Herald, 19th November 1910; Since the mid-1880s Gibson-Poole had been involved with eight sports clubs as well as the football club. He was a councillor from 1896-1901, an alderman from 1910-37, was mayor in 1907, 1909 and 1927, and was made an Honorary Freeman of Middlesbrough in 1932. It has also been pointed out that when Samuel Sadler was elected as MP for Middlesbrough in 1900, he frequently alluded to his connections with the football club. Lewis states that he “set himself up as the defender of the popular pastimes of the working men of the town” – R. Lewis, ‘The Evolution of a Political Culture: Middlesbrough, 1850-1950’, in Pollard (ed.), Middlesbrough: Town and Community, p. 117

105 Northern Echo, 1st December 1910; Teesside Weekly Herald, 3rd December 1910

106 North-Eastern Daily Gazette, 1st December 1910
subsequent victory over Sunderland was said to have had “a remarkable uplifting effect on the hopes” of Gibson-Poole’s supporters, and the players attended a rally held after the match. The chairman remarked that he had been particularly anxious during the second half of the match, as “so much depended on it for me”. He suggested that “the first thing my opponents would have done had the Borough not been successful would have been to say that the players were working for me the whole of the week, and they were unfit to play”. 107 Despite the team’s victory, Gibson-Poole lost the election; Penry Williams (an ironmaster) retained his seat, increasing his majority in the process. 108

A month later, a Football Association commission was appointed to investigate the match after Sunderland’s captain (Charles Thompson) alleged that Middlesbrough’s secretary and manager (Andy Walker) had offered him £30 (£10 for himself and £2 each for the other players) to lose the match, as he wanted to win it for Gibson-Poole. Thompson had refused the bribe and informed his trainer and chairman. 109 Middlesbrough FC was said to be “largely under [Gibson-Poole’s] domination”, and he was “primarily responsible for the offence”. Indeed Carter suggests that as football clubs were relatively small organisations, there was great potential for the direction of clubs to be influenced by one individual. The offer to Thompson had not been “made in the interests of, and on behalf of, the Middlesbrough club”, but instead solely to assist Gibson-Poole in the election. Both Walker and his chairman were permanently

107 Athletic News, 23rd January 1911; North-Eastern Daily Gazette, 5th December 1910; North Star, 5th December 1910
108 Gibson-Poole received 6,568 votes, whilst Williams received 10,313 – The Times, 6th December 1910
109 Even before this commission had begun their investigation, Walker was suspended for four weeks and the club fined £100 for making illegal approaches to players from Airdrieonians – North-Eastern Daily Gazette, 6th, 7th January 1911; North-Star, 7th January 1911; The Times, 17th January 1911
suspended from football. An editorial in the *North-Eastern Daily Gazette* failed to criticise Gibson-Poole, stating that the only explanation could be that “one or the other of the parties concerned lost his head” before the election. Walker stated that he was now deprived of making a living, but still defended his chairman suggesting that it was “largely due to the excellent business methods he has introduced” that the club had been successful. The *Athletic News* pointed out that somebody must have supplied Walker with the money to offer to Thompson – “who asked him to use the club as a political agency?... who prompted and suggested the scheme?” If it had not been Walker, then this writer pitied “the state of mind of those men who have so vilely, traduced him and robbed him of his character and calling”. At a public meeting, it was decided that a petition would be started to ask for Walker’s punishment to be decreased (but not that of Gibson-Poole), and it was “supported in a manner that even more than realises the sanguine anticipation of those who inaugurated it”. ‘Free Lance’ in the *Northern Athlete* claimed that “a certain high official” of the Middlesbrough Corporation interviewed an official of the Football Association “so as to avoid any further scandal, and to ‘save the honour of the town’”. However, the 12,000 signatures (including those of directors, members and supporters of Sunderland) could not persuade the Football Association to reduce Walker’s sentence as he still denied the charge of bribery.

115 North Star, 14th February, 14th March 1911
The FA’s commission also found that “there had been distinct and flagrant tampering with the books”; neither the minute books or the gate book were kept in order, wage books were badly kept and players agreements had not been signed. Walker had been engaged in football during his suspension (gate receipts having been altered in order to pay him). Having now admitted his part in the incident, Walker informed the commission that he had made the offer on Gibson-Poole’s instructions, who in turn denied all knowledge. The club was fined £300 and five of the directors were banned from holding office at any Football League club, whilst the remaining three directors were also severely censured. The North-Eastern Daily Gazette claimed that a relationship had been shown between expenditure and results that was “an inevitable product of professionalism”. It was now the duty of the shareholders to “clean the Augean stable thoroughly, and to resolve that the club shall at least be above the average in its conduct”. Harry Walker in the Northern Echo regarded the fine as “a further tax upon the loyalty and long suffering patience of the shareholders and their football supporters”.

Despite the opportunity now given to the shareholders to elect new directors of their choosing, only four nominations were received from the 450 shareholders ahead of the AGM in 1911. It was felt that the management needed to be reformed in order to “guarantee future purity and re-establish Middlesbrough as a worthy entity in connection with British sport”. Men were wanted who “will not be swayed by prejudice, or led away by partisanship; who will not treat the players as machines or merchandise

116 Middlesbrough Standard, 3rd June 1911; Northern Echo, 30th May 1911; Teesside Weekly Herald, 3rd June 1911; The Times, 30th May 1911; For full details see North Star, 30th May 1911 and Teesside Weekly Herald, 3rd June 1911

to be bought and sold”. The committee approached a number of men, “some had refused for business reasons, and some because they did not care to take a share of the liability at the bank”. No doubt the preceding scandals dissuaded some men from getting involved with the club. The following lower-middle and middle class individuals were elected –

Former directors

---

119 1911 census; North Star, 4th, 6th July 1911; Northern Athlete, 17th, 24th July 1911; Northern Echo, 1st June 1911; Sports Gazette, 17th June 1911

120 Brother of Frank and Thomas (see above), Phil Bach was a former Middlesbrough player and a member of the Football League Management committee from 1929-37 – Inglis, League Football, p. 393
That the club now wanted to proceed untainted by the worst aspects of professionalism was demonstrated during the next season. After Middlesbrough won their first home game of the new season in September 1911, the *North-Eastern Daily Gazette* was pleased to point out that the team were no longer receiving any further “incentive to exert themselves as has been the case in certain games in the past”. The directors’ determination to avoid corruption was demonstrated by the turning down of an offer from Stewarts Clothiers in November, who promised to award the players two “Famous Sovereign Overcoats” for every goal scored in the match against Newcastle. The goalscorer would receive one coat and the other would be given to “any spectator each successful player brings along with him”. Stewarts declared that they wanted “to instil a healthy, hearty spirit of emulation” in the players but the directors stated that “such offers as these are not in the best interests of the game”. The *Middlesbrough Standard* applauded the decision stating that such offers invited corruption and encouraged “individuality of that selfish nature, very despicable to the majority of spectators”.

The club’s efforts to stay free of further scandals were rewarded with the Anglo-Scottish inter-league match in February 1912. The Football League “wanted to prove to the Middlesbrough club and supporters that they had complete confidence in the gentlemen who were now managing the club’s affairs”. The game attracted a crowd of 23,000, and the *North Star* stated that the Scottish team had “a big following of sympathisers in the masses of folk” at the match due to the large number of Scots living

121 *North-Eastern Daily Gazette*, 11th September 1911
122 No such statements had been made in 1907 when it was reported in the *Northern Athlete* that Gill & Sons would give away a pair of boots (worth 10s 6d) each week to any Middlesbrough player scoring a hat-trick, *Northern Athlete*, 14th January 1907; *North-Eastern Daily Gazette*, 8th, 15th November 1911
123 *Middlesbrough Standard*, 25th November 1911
on Teesside. Middlesbrough also hosted England v Ireland two years later, having hosted the same fixture for the first time in 1905. The crowd was estimated to be between 26,000 and 30,000, and the *Northern Echo* reported that “the enthusiasm of the Teesside Irish was quite touching”; many of their supporters “wore green of some sort. Cabbage leaves and parsley were among the fantastic decorations worn”.¹²⁵

In contrast, other fixtures were affected by the state of trade in Middlesbrough. The League match against Aston Villa in 1912 drew a crowd of only 9,000 which the *Football Mail* attributed to the coal strike and its “corresponding train of disasters to the iron workers of Middlesbrough”. A month later, the game against Sheffield United had a crowd of 8,000 (9,000 after half-time). In “normal times” the match would have attracted 16,000 or 18,000 spectators, but “in such hard times... there is [not] a great deal of superfluous wealth about to satisfy the average man’s craving for the most democratic of all sports”.¹²⁶ At one match a number of “out of works” who had been admitted to the sixpence end of Ayresome Park for free “rushed across the ground” to the shilling end. They were not admitted to the next match but at half-time, smashed a gate and “swarmed into the ground”, and were excluded from future matches.¹²⁷

Middlesbrough’s average attendance for the 1913-14 season was 14,900. This was the

¹²⁴ *Football Mail*, 17th February 1912; *North Star*, 19th February 1912; *Sports Gazette*, 17th February 1912; The crowd may have been higher had an amateur international fixture not been taking place at Bishop Auckland at the same time – *Football Mail*, 17th February 1912
¹²⁵ *Northern Echo*, 16th February 1914; *Teesside Weekly Herald*, 21st February 1914; The North-Eastern Railway Company were criticised for not providing extra trains to Middlesbrough from east Cleveland on the day of the match; the train due to arrive at Middlesbrough at 1.22pm was too “early for working men who have to change and get their dinner” – *North Eastern Daily Gazette*, 12th February 1914
¹²⁶ *Football Mail*, 9th, 23rd, 30th March 1912; For the impact of the coal strike see J. J. Turner, ‘Middlesbrough and the National Coal Strike of 1912’, *Bulletin of the Cleveland & Teesside Local History Society* 43 (1982), pp. 1-12
¹²⁷ *North-Eastern Daily Gazette*, 2nd April 1912
third lowest in the First Division, the average attendance being 23,100.\textsuperscript{128} The crowd for the first home game in September 1913 was 15,000 but when Middlesbrough played Sunderland, the current champions, there was a crowd of 27,000 and three policemen had to "pacify a crowd of seven or eight thousand at the ‘tanner’ [sixpence] end".\textsuperscript{129}

e. Elite Amateur Football

Whilst some of Middlesbrough’s smaller clubs suffered because of the professional football at Ayresome Park, South Bank and Eston United football clubs were both relatively successful particularly in the FA Amateur Cup, and the status of such amateur clubs offers further evidence of the strength of a local football culture. The local press were full of praise for the two amateur teams, which contrasts with the various opinions for and against professionalism. South Bank FC had been run as a professional club for the 1891-92 season, during which time they had spent £487, and had an income of £558. As they had been unable to arrange home and home matches "in consequence of the large sums required for guarantees", professionalism was abandoned in August 1892.\textsuperscript{130} South Bank were very much in the shadow of Middlesbrough FC. In 1894 they had found it necessary to amalgamate with South Bank Blue Star as "slagdom [South Bank\textsuperscript{131}] is not sufficiently big to maintain two clubs capable of competing on level

\textsuperscript{131} South Bank was often referred to as ‘Slagdom’ or ‘Slaggy Island’ due to the large piles of slag in the area from the nearby iron and steel works.
terms with their big neighbour". South Bank did maintain a rivalry with their neighbours in the mid-1890s. For example, when the two teams met on Christmas Day in 1894 it was to decide the issue of “local supremacy”, and there was a crowd of 4,000. The club was also able to attract local football enthusiasts to their own ground when Middlesbrough were not playing at home. When South Bank played Reading in the third round of the FA Amateur Cup in 1895, kick-off was at 3.15pm “so that followers of the game in Stockton and Middlesbrough who desire to see the match will be in time”. That particular season was considered successful, the team having reached the semi-final of the Amateur Cup, won the Cleveland Charity Cup, finished second in the Northern League and reached the final of the Cleveland Senior Cup. However, two years later “they had lost every competition they had entered” and money was still owed to creditors following the club’s year long experiment with professionalism. The backgrounds of those involved in running the club at this time were diverse, and Taylor’s assertion that many smaller clubs needed “some form of patronage from local institutions, wealthy individuals or fee-paying supporters” is borne out by the role of Ward-Jackson –

* Unable to locate on census

\textsuperscript{138} 1901 census; *Kelly’s Directory of North and East Ridings of Yorkshire, 1897* (London, 1897); *Middlesbrough & Stockton Sporting Telegraph*, 23\textsuperscript{rd} July 1897
Despite the lure of the professional game, in 1899 the team remained “an exceedingly strong one”. Some players had joined Middlesbrough whilst others had left to play for Sheffield United, Millwall Athletic and Nottingham Forest, which the committee thought “spoke well for the class of South Bank football”.\textsuperscript{139} However, in 1901 the \textit{North Star} contended that “the counter attraction at Middlesbrough... has had its effect upon the patronage accorded to the club”, so much so, that it was “the wish of the club management that... the fixtures should be so arranged as not to clash with those of Middlesbrough”.\textsuperscript{140} In 1906 the \textit{Northern Athlete} stated that much of their support “is diverted into the coffers of Middlesbrough owing to the people naturally preferring League football”; Middlesbrough’s gate receipts for that season were £9,797 in comparison to just over £370 at South Bank.\textsuperscript{141}

In April 1907 the club enquired about the possibility of buying or leasing long-term the field that they rented from Bolckow Vaughan iron and steel works.\textsuperscript{142} A rumour circulated two months later that the owner of the field wished to sell the land for building. In a letter from the commercial manager and secretary of Bolckow Vaughan, Walter William Storr, to the land owner’s agent, Storr stated that the possibility of building “has caused the club a considerable amount of anxiety”. The club had spent around £500 on the grounds and were “naturally very reluctant to lose their money”. Storr wrote that, “I need scarcely say that the recreation of our workmen is a question that at all times appeals to us”. He emphasised that the field “appears to have been always properly and well conducted and the behaviour of the players and spectators is

reported to me as having been exceptionally good”. Another letter from a local land agent, stated that the club were endeavouring to get Bolckow Vaughan to buy the field for them. It is hardly surprising that the club were not in a position to buy the field themselves as it was not until mid 1907 that the club had paid off the debts from “that foolish idea of running a professional team” fifteen years earlier.

South Bank reached the final of the FA Amateur Cup in 1910. The final against RMLI Gosport was played at Bishop Auckland in County Durham (21 miles away), and the North-Eastern Railway Company estimated that 1,000 South Bank supporters would travel on ‘excursion’ trains, with a further 200 passengers accompanying the team. The crowd totalled 8,000-10,000 and as it is safe to assume that few supporters would have travelled from Hampshire, the size of the crowd at this match (and that in 1913) suggests there was a great deal of local interest in seeing a potential victory for a north-eastern team. Though South Bank were beaten, the income from the extra cup matches meant that they were able to pay for improvements to their ground. However, a year later it was pointed out that the club would have been able to achieve a great deal more “had our team been left alone by the professional clubs”. “No sooner does your committee get together a side to their liking”, stated the club’s annual report, “than round comes the professional agent and undoes all the work they had been planning”.

143 Letter from W. W. Storr to F. B. Punchard, 13th June 1907, U/STE/5/5, Teesside Archives
144 Letter from O. O. Beadle to F. B. Punchard, June 1907, U/STE/5/5, Teesside Archives
145 Northern Athlete, 29th July 1907; Teesside Weekly Herald, 27th July 1907
146 North Star, 15th, 16th, 18th April 1910; Northern Athlete, 25th April 1910; Sports Gazette, 23rd July 1910
147 North-Eastern Daily Gazette, 19th July 1911; Sports Gazette, 22nd April 1911
In 1913 South Bank reached the final of the Amateur Cup again and played Oxford City in Reading. The *Sports Gazette* remarked that since abandoning professionalism, the club’s chief aim had been to win the Amateur Cup; it had been “tantalising to officials and supporters alike that at the very height of its ambition” they had failed to win it.\textsuperscript{148} The *Northern Echo* reported on the team’s journey from London to Reading. Having spent the morning sight-seeing, the players travelled to Paddington on the tube,

They entertained the crowded ‘tube’ passengers with some of their special imported ditties and comic songs from the island of slag. They were a happy band, 40 in all, team, officials and supporters and it was impossible to hear the stations being called out by the guard at each stopping place, his voice being drowned out by the Northerners lusty voices asking him “who he was with last night”.\textsuperscript{149}

A crowd of 4,500 (including 20 South Bank supporters) attended the match which ended in a draw. The replay at Bishop Auckland drew 7,000 spectators, this time including many from South Bank, “the cheap train being extensively patronised”. South Bank’s subsequent victory was greeted with “considerable rejoicing” when the team returned. The captain was “besieged by the crowd and carried shoulder-high through the town”. Though the *Northern Echo* thought that once again “the evil of fame” would mean that “the Bankers will now be pestered by big clubs who are anxious to secure their players”, it was also felt that the win more than made up for Sunderland’s defeat in the FA Cup final on the same day.\textsuperscript{150} This points towards a sense of a regional, north-eastern identity, as those from Teesside could celebrate a victory elsewhere in the region.

\textsuperscript{148} *Sports Gazette*, 12\textsuperscript{th} April 1913
\textsuperscript{149} *Northern Echo*, 14\textsuperscript{th} April 1913
\textsuperscript{150} *Football Mail*, 26\textsuperscript{th} April 1913; *North Star*, 14\textsuperscript{th} April 1913; *Northern Echo*, 21\textsuperscript{st}, 23\textsuperscript{rd} April 1913; *Sports Gazette*, 19\textsuperscript{th} April 1913; A year later South Bank had to deny rumours that they were to turn professional. The amateur club already had considerably expenses, it being admitted that their tour to Belgium at Easter “practically accounts for the whole of the loss” on the season (£50). £280 had been spent on hotels and travelling – *Middlesbrough Standard*, 11\textsuperscript{th} July 1914; *Sports Gazette*, 11\textsuperscript{th} July 1914
and vice versa. As Russell asserts, “local rivalries were often suspended or ignored for long enough to allow various types of regional identity to emerge”.151

Eston United, formed in 1905, were said to be composed “entirely of working lads” from the immediate area. However, this is not reflected in the occupations of those club officials that can be identified – the two presidents were a doctor and an MP (Herbert Samuel), the treasurer was a hotelkeeper and the assistant secretary was an auction clerk.152 The club attempted to achieve similar levels of success as South Bank. In 1909 Eston United were beaten by Clapton in the final of the Amateur Cup, won the Northern League at the first attempt in 1910, and reached the Amateur Cup final again in 1912. Even before the semi-final, the Football Mail was ready to proclaim that their success in the competition had had the effect of “strongly reviving interest in local amateur football”. The North Star thought the selection of Ayresome Park for the final tie against Stockton was a good choice, given that “in the North of England amateur football still strongly appeals to a large following”.153 More importantly, the playing of the match in Middlesbrough resulted in a crowd of 20,000 (when the average gate at Ayresome Park that season was 14,150) surpassing the previous record for an Amateur Cup final by 8,000.154 The match ended in a draw and the replay was also played at Ayresome Park, at which there was a crowd of 8,000 at the start, increasing to 12,000 after half-time. The Teesside Weekly Herald stated that,

151 Russell, Football and the English, p. 68
152 1911 census; North Star, 12th April 1912; Sports Gazette, 20th July 1907; In 1901 the population of the parish of Eston (including Grangetown) was 9,973, increasing to 11,476 in 1911 – Kelly’s Directory of North and East Ridings of Yorkshire, 1909, p. 91; Kelly’s Directory of North and East Ridings of Yorkshire, 1913, p. 94
153 Football Mail, 9th March 1912; North Star, 12th April 1912
154 Football Mail, 13th April 1912; North Star, 15th April 1912; Tabner, Football Through the Turnstiles Again, pp. 96-103; In comparison, a crowd of only 5,000 saw Eston United beaten in the 1909 Amateur Cup final at Ilford – Northern Athlete, 19th April 1909

346
It was like old times to hear the bugles, rattles and other noisy instruments in the hands of well-meaning enthusiastic followers of the respective clubs. Thousands had walked from outlying villages and many from Stockton in order to see the contest. Many hundreds who were unable to afford even a ‘tanner’ made their appearance at the turnstiles at the popular end at half-time, and had threepenny worth.\textsuperscript{155}

These large crowds suggest that not only was there a great deal of interest in amateur football on Teesside, but also indicates that those who normally went to watch professional football at Ayresome Park also watched the amateur game. The \textit{Sports Gazette} thought that the large attendances at these games proved that “amateurism in the North has a stronger hold on the public than even in the palmy days of the past”. Though “professionalism has come to stay on Teesside... there is still a warm corner in the people’s affections for a good display by amateurs”.\textsuperscript{156} Despite losing the replay, Eston United ended the season with a profit of over £442, but two years later it was reported that “football is in a sad way at Eston”. The club’s officials had “done all they can possibly think of to bring back again the popularity and success that was once attached to the team... the future of the United is far from secure”.\textsuperscript{157} The cup success had clearly been financially beneficial, but evidently it was more usual for an amateur club to struggle to make ends meet.

\textbf{f. Local Leagues}

In 1914 Alfred Mattison noted that “it was pleasing to see the increasing number of local lads in the [Middlesbrough] side... [Whilst] he had nothing against the importation of costly players, it was better to have their own town products”.\textsuperscript{158} The ‘local lads’ that

played for Middlesbrough often began their playing careers with one of the other clubs in the town, and there was a large number of football leagues and competitions in the town and across the district, all vying for the public’s attention. It has been pointed out by Taylor that recreational football was more highly concentrated in those areas with a Football League club, and Russell states that by the turn of the century, Britain was “criss-crossed by a network of leagues professional, semi-professional and amateur, providing the competitive structure that proved such a vital dynamic to the game’s expansion”.159 It would certainly appear that the success of Middlesbrough FC was accompanied by an expansion in local clubs and leagues. Moreover, as will be demonstrated below, amateur league football involved a great deal more involvement from the lower-middle and working classes.

In 1899 the *Northern Echo* remarked that the introduction of professional football had not had a damaging effect on local amateur teams. Furthermore, the large number of amateur clubs in Middlesbrough meant that “the senior club may feel assured there are dozens of diamonds in the rough... ready to be set in and promoted to the more brilliant professional rings”.160 Whether the smaller clubs would have regarded themselves as mere nurseries for Middlesbrough is doubtful. Middlesbrough were often accused of ‘poaching’ footballers. As early as 1888, the club were said to have poached players from Middlesbrough Albion FC, leading the *Northern Review* to point out that Albion “do not want to manufacture footballers for the benefit of other clubs”.161 The effect that Middlesbrough FC could have on other clubs and leagues in the district was often stated in the press. The *North-Eastern Daily Gazette* pointed out in 1901 that Middlesbrough’s

followers included “recruits from the whole of the surrounding towns and villages”, while a year later the *Athletic News* suggested that should Middlesbrough secure promotion that season it would “cause the disbandment of certain of the Northern League clubs in the immediate vicinity”. Tischler suggests that the “aggressive business policies” of club directors “pushed aside the weaker clubs”, and it was reported that Thornaby FC disbanded “owing to the advancement of Middlesbrough”.162 Harry Walker, writing in the *South Durham & Cleveland Mercury*, stated that Middlesbrough benefitted from being more than thirty miles away from the nearest Football League club, and the club were able to draw on a “distinctly sporting” local population of half a million.163 Demonstrating the attraction of good football, the *Northern Athlete* suggested in 1906 that large numbers of people “from the surrounding district” visited Ayresome Park “in order to see the best football and the leading teams of the country – they are not particular which side wins”. Though it might be assumed therefore that the quality of football on display in Middlesbrough would have had a detrimental effect on other clubs, the *Northern Athlete* claimed that it was in fact “doing much good in fostering the game over a wide area... as it is not only stimulating local players, but likewise the public”.164 The sheer number of football clubs that continued to be formed throughout this period suggests that Middlesbrough FC’s success did not disadvantage smaller clubs.

163 The area that the club could draw from included Stockton, Thornaby, Darlington, the Hartlepool, South Bank, Redcar, Saltburn and the “numerous and thickly-populated mining villages of Cleveland”, *South Durham & Cleveland Mercury*, 25th November 1904
164 *Northern Athlete*, 28th May 1906, 25th February 1907
The number of local leagues in existence before the First World War (see Appendix 8) gives a good indication of the popularity of football. Leagues included teams from Middlesbrough and across Teesside and East Cleveland, demonstrating the spread of football in the district, the attractiveness of the non-professional game, and the necessity of properly organised and administered fixtures. Both the Teesside League and Teesside Junior League were formed in 1891, and five years later the Middlesbrough League was formed for the ‘minor’ clubs of the town. Its intention was to “improve the class of football played”, and the league was extended in 1898 to include clubs from outside of the town. It was felt that the amalgamation of the Middlesbrough and Teesside leagues a year later would garner “much greater interest”, but in 1901 the secretary “expressed regret that their class of amateur football had not flourished in the Cleveland district”. “The novelty of a professional team at Middlesbrough”, meant that “young amateur players [prefer] to go and look on”. Nevertheless the league was increased in 1904 to include two divisions of 10 teams. With a view “to fostering and developing local talent”, in 1896 Gibson-Poole donated a cup for junior teams and the first final of the Poole Cup attracted 3,000 spectators. The North-Eastern Daily Gazette pointed out the importance of such a contest, as “it is from the ranks of our junior organisations that the premier club of the town must look for its future players”. The aim of the Middlesbrough Junior League was “to purify junior football generally and to bring it under proper supervision and control”. This league had had a great deal of success “in

endeavouring to alleviate the condition of junior football”, as similar leagues were subsequently set up elsewhere in the area.  

The South Bank & District Minor League was formed in 1899. The first reported AGM was in 1903 when a joiner, was listed as president and treasurer, and the secretary was a clerk. The AGM three years later lists 15 clubs in the league, it having been extended to include teams from Stockton and across Middlesbrough. The occupations of the League’s officials were diverse, and whilst the League had the patronage of some of the town’s elite, it is unlikely that Walton and Williams would have had as much involvement as some of the other officials –

---

170 The officials of this league included a number of prominent local individuals – an Alderman and director of the Empire Theatre, an MP, an iron merchant, the owner of a concrete works, as well as an assistant harbour master, a joiner and two clerks – 1911 census; North-Eastern Daily Gazette, 28th June 1913; Teesside Weekly Herald, 8th June 1912

Curate of St Paul’s – *Kelly’s Directory of North and East Ridings of Yorkshire, 1913* (London, 1913)
The Cleveland League was formed in 1909, with “a painstaking and energetic man” as secretary (John Gibbon, a clerk). The *Middlesbrough Standard* hoped that the league would prosper and that “the winter’s sport will be enjoyed and invigorated by true amateurism”. The Eston & District League was also formed in 1914, with 17 initial applications for membership. The Cleveland Wednesday Football League (for clubs within a 14 miles radius of Middlesbrough) was established in 1910 for those men who were permitted to work a half-day on Wednesdays. Two of the founding member clubs were affiliated to Hinton’s grocers and Stewart’s clothiers, and the formation of this league suggests that some employers were keen for their workers to engage in healthy recreation in order perhaps, that they be more productive at work (see also chapter 4). Eight men were asked to take up the role of vice-president, all of whom accepted, though as with the South Bank league, some of those who took up the positions would have had little real involvement –

* Curate of St Paul’s – Kelly’s Directory of the North and East Ridings of Yorkshire 1913
* Kelly’s Directory of North and East Ridings of Yorkshire, 1909 (London, 1909); Address on 1911 census – Kenworthy’s Hydropathic Establishment, Southport, Lancashire
The Middlesbrough & District Church Football League was founded in 1906, initially comprising eleven teams.\footnote{The secretary was a joiner and the treasurer was a plumber’s clerk – \textit{North-Eastern Daily Gazette}, 13\textsuperscript{th} September 1906} In 1910 it was decided to run a second division, and those intending to join either division were reminded that they needed to have a recommendation from the minister of their church. A year later the League was pleased to report that “never before had they had so many churches interested in [the] healthy recreation of young men”, though players were also urged to remain with their teams rather than “bring their bible classes down to such a level that they would go to another place of worship because they had a better football team”. Bible classes were not always the priority of the players. With reference to YMCAs, Dominic Erdozain notes that religion became less important and more emphasis was placed on sport in order to increase membership, and when the Associations gave more prominence to prayer, membership decreased.\footnote{\textit{Football Mail}, 11\textsuperscript{th} April 1914; \textit{Sports Gazette}, 13\textsuperscript{th} June 1914} In 1914 it was noted by the League’s officials that from a playing point of view, the second division was “a failure... it had had a lengthy trial, but it had never been the success hoped for”.\footnote{The competing teams were from Barry’s Acklam Ironworks, Clarence Ironworks, Davy’s Newport Ironworks, Linthorpe Ironworks, Murray’s Newport Ironworks, Normanby Ironworks, Simpson’s Newport Ironworks – \textit{North-Eastern Daily Gazette}, 29\textsuperscript{th} March 1898} William Johnson of the Hope & Anchor Hotel organised a medal competition for blast furnace men in 1898,\footnote{The league’s secretaries can be identified as a blast furnace worker and an iron worker – 1911 census; Applications to join were received from Cargo Fleet, Dinsdale, Grangetown, Normanby, Port Clarence, Seaton Carew, Skinningrove, South Bank and Warrenby – \textit{North-Eastern Daily Gazette}, 21\textsuperscript{st} January 1908} but it was another ten years before a league was formed for blast furnace men and coke men.\footnote{The competing teams were from Barry’s Acklam Ironworks, Clarence Ironworks, Davy’s Newport Ironworks, Linthorpe Ironworks, Murray’s Newport Ironworks, Normanby Ironworks, Simpson’s Newport Ironworks – \textit{North-Eastern Daily Gazette}, 29\textsuperscript{th} March 1898} There was no further mention of this league,
possibly due to the formation of the Middlesbrough Works League in the same year. The *Northern Athlete* thought that such a league would fail as Middlesbrough’s matches at Ayresome Park would “prove too powerful a magnet for those associated with such a league”; clubs would find that many of the players would be “found absent from duty without leave” on a Saturday afternoon.\(^{182}\) It is not clear how successful this league was, there being no further mention in the press after 1909. This may indeed be attributed to the lure of football at Ayresome Park but also may be due to the number of other leagues in existence that included works’ teams. For example, members of the longer established South Bank & District Minor League included five works teams in 1910, and in 1912 the Teesside League included four works teams.\(^ {183}\)

**g. Recreational Football**

There were a huge number of other clubs in existence during this period, and whilst information is only available for a small number of them, from club names alone (see Appendix 8), we can examine the patterns of development of small amateur clubs. Prior to the establishment of the Middlesbrough Works League in 1908, there were a small number of workplace-based clubs and only a slightly greater number of church-based clubs. For example, when the Middlesbrough & Teesside League expanded to two divisions in 1904, there were 20 members – two from the workplace and four from the church. Similarly, the South Bank & District Minor League included one work-based and three church-based clubs. More common are clubs whose names locate them in specific areas of Middlesbrough – most notably South Bank, Grangetown, Newport and

\(^{182}\) *Northern Athlete*, 29\(^{th}\) June, 17\(^{th}\) August 1908; A number of other league were also in existence which included teams from Middlesbrough, for example the Waller League, the Stockton Church League, the Haverton Hill League, the Guisborough Minor League and the Marske League.

\(^{183}\) *Sports Gazette*, 1\(^{st}\) January 1910; *Teesside Weekly Herald*, 16\(^{th}\) March 1912
North Ormesby, areas with greater working-class populations. The limited evidence suggests that unlike many other sports in Middlesbrough, recreational football offered greater opportunities for working class involvement. The evidence also demonstrates the continuation and importance of the voluntary tradition in the running of football clubs, as they remained “a vital feature of community life”. \textsuperscript{184} Many of those involved with Grangetown Athletic Football Club in 1903 can be identified, and aside from the president, the officials were all working class –

185 1901 census; South Durham & Cleveland Mercury, 26th June 1903
In 1908 the club’s chairman stated that the committee had “endeavoured to do their best to keep together a gentlemanly team and play on sportsmanlike lines”, pointing out that they “had done their best to purify the team”. But three years later the club were said to be “passing through the most critical period of its somewhat chequered career”. The committee had decided that the team would be composed entirely of players from Grangetown but this “did not prove a success”.

After Middlesbrough turned professional in 1899, the chairman of Linthorpe Football Club, Rev John W. Dales (vicar of Linthorpe Parish Church), stated that he wanted to have “a really good amateur club” in Linthorpe. He emphasised that he took “great interest in amateur and not professional football”, but there was a lack of interest amongst members and players. Dales was also listed as the president of Linthorpe Parish Church Football Club seven years later, and as this club was located in a more affluent suburb, it is unsurprising that club officials included two clerks, an inspector for the Board of Trade, and a cashier and accountant. It is debatable whether players joined church teams because of religious reasons. As already stated above, players for such teams were reminded to stay with the club of their church, rather than move to a different church because it had a better football team. The Linthorpe Parish Church club decided not to join either the Middlesbrough or Stockton Church Leagues in 1907 as the rules regarding church and bible class attendance were not enforced. A year later, however, the club had to report that many members had left because of the subsequent lack of league football, suggesting that this was the priority for players rather than a

A few details can also be found on those involved in other smaller clubs, and club officials ranged from labourers and blast furnace workers to clerks and other lower-middle class occupations.\(^{193}\)

A variety of football matches were reported involving smaller clubs that were not members of any local leagues. The *South Durham & Cleveland Mercury* detailed a match between officials from Dorman Long and Moor Steel & Iron Co in 1895 and teams playing under the heading “ordinary matches” in the *Middlesbrough & Stockton Sporting Telegraph* two years later included Malleable Fitters, Millwrights and Imperial Swifts.\(^{194}\) In 1903 clubs playing “ordinary matches” included Middlesbrough Wesley Guild, Middlesbrough Park Vale, Middlesbrough St Peter’s and North Ormesby Erimus, and a match was reported on between the workmen of John Livingstone & Son’s Brass Works and Theophilius Phillips Son & Co Brass Works.\(^{195}\) In 1911 the *Sports Gazette* detailed a game between the East Otto and West Otto Coke Ovens at Samuelson’s ground, which “owing to the friendly rivalry which exists” attracted a good crowd.\(^{196}\) A number of charity matches were also held. The *North Star* reported on a match between teams representing topmen and enginemen employed at Eston jetty, “for the benefit of some of their unfortunate fellow workmen”. A match took place in 1905 between Newport and Middlesbrough railwaymen with the receipts being donated to an orphan charity, and in 1910 a match between butchers and fruiterers was held at Ayresome Park for the benefit of those who had “suffered loss” on account of a fire at the butchers’

By 1905 the main competitions of the Cleveland Association were no longer deemed interesting to spectators. The Charity Cup final (Thornaby St Patrick’s v Cambridge House) drew a crowd of only 500, whilst the Cleveland Amateur Cup final attracted only 200 spectators (Thornaby St Patrick’s v Darlington Friends’ Adults). However, it may have been the case that the size of the crowds depended on which clubs were involved or the quality of the football on display, as when the Cleveland Chemical Works played Southfield Primitive Methodists in the 1911 Charity Cup there was a crowd of 3,000. Indeed the Chemical Works team “paraded the town in a brake with the cup held aloft”.198

Colm Kerrigan has pointed out that given the concerns about the health of the urban poor and the need for exercise, it is surprising that more time was not given over to football in schools as outdoor games were of “equal educational significance” to drill and other exercises.199 One contemporary suggested that schools football provided “youthful Britons with a healthy exercise in the open air”.200 The Middlesbrough Schools Football League was established in 1896, three years after the Sunderland Schools FA was formed.201 Matches were organised between Middlesbrough schoolboys and those from Sunderland and Gateshead. It was reported in 1899 that all of the proceeds from the match against the Gateshead Schools’ League at the Linthorpe Road ground would be given to Middlesbrough FC, as they had “at all times and in all ways done their best to promote the interests of the Schools’ League”, and therefore

197 North-Eastern Daily Gazette, 19th April 1905, 21st April 1910; North Star, 2nd April 1904
198 North-Eastern Daily Gazette, 28th April 1911; Sports Gazette, 29th April 1905
201 North-Eastern Daily Gazette, 3rd September 1896; Mason, Association Football, p. 85; For more on schoolboy football see Kerrigan, Teachers and Football; Mason, Association Football, pp. 82-88; Taylor, The Association Game, pp. 79-82
also benefitted from another layer of local football. Reflecting contemporary attitudes to both health and amateurism, the 1906 report of the League reminded participants that its aim was “the development of the boy physically and morally, and not the mere acquisition of medals or honour; these were the result not the aim”. It was suggested that “it would be better both in regard to learning and sport if the means rather than the end were justly observed”, emphasising the importance of playing the game over winning the match.

h. The Role of Football in Middlesbrough

The popularity of football in Middlesbrough was hard to deny. In a 1898 piece entitled “The Good of Football” the North-Eastern Daily Gazette pointed out the appeal of the sport,

For the animated crowds who are the spectators the game... no doubt affords the means of an hour or two of pleasant, lively enjoyment. And any recreation, which without taxing the nerves and brain, takes the thoughts away from the carking cares and worries of every-day life, is not only a desirable interlude, but... a means of getting strength for the dreary battle to which we must always return... [It is] a healthy stimulating sport, and for those who look on, an exhilarating pastime.

One contemporary critic suggested that football offered an alternative to the “dull monotony of life in our large towns”, and the Northern Athlete argued that football was “the characteristic recreation of the toilers and moilers of our land. It is their 90 minutes enjoyment after a laborious weeks’ work”. The Archdeacon of Cleveland, Rev

202 North-Eastern Daily Gazette, 31st December 1896, 20th April 1897, 17th February 1899; Mason has pointed out that the large number of boys playing football provided a pool of prospective new players for clubs to choose from. However, senior clubs only occasionally offered assistance to schoolboy football – Mason, Association Football, p. 86
203 Teesside Weekly Herald, 28th July 1906
204 North-Eastern Daily Gazette, 20th September 1898
205 Ensor, ‘The Football Madness’, p. 752
T. E. Lindsay, also believed that football was “a magnificent game for men to play”. The “keenness and rapidity of thought” necessary for training, self-discipline and exercise, together with “the power of unselfish combination were elements which went to form the essence of man’s life”. 206

It was also claimed however, that on occasion, working men were prevented from attending matches. A letter in the *North-Eastern Daily Gazette* pointed that some games started before the advertised time, and “there were many tradespeople [sic] who have no time to waste and always go to reach the field at the time advertised for the kick-off”, and thus miss part of the match. Another letter complained about the times of the excursion trains for Middlesbrough’s match in Nottingham over Christmas, as it left the travelling supporters little time before returning home – “It is not fairplay to the working class, who can only support the Borough away at holiday times”. 207 There were also restrictions on where casual games of football could be played. In 1908 the sport was banned from Albert Park, it being declared that “there would be righteous indignation if they allowed football”. If the Park was “destroyed by a few footballers [it] would be a great shame”. However, at discovering that football was prohibited, one councillor wondered “where in the world were the boys to play football?” He could not imagine “such children doing any damage by playing football”. 208 In contrast, there were complaints in 1914 that the police had failed to stop the “gangs of the rougher

208 *North-Eastern Daily Gazette*, 18th November 1908, 13th January 1909
element from various works” playing football on the main approach to the North-Eastern Steelworks.209

It was often stated that playing or watching football helped to alleviate problems with alcohol in the town. Mattison stated that football had “made more men temperate and made more happy homes than all the preaching of temperance propaganda”, whilst G. O. Smith suggested that “people who otherwise would spend their afternoon in the public house, to the detriment of their pocket” went to watch football instead.210 In the Gazette’s “The Good of Football”, it was stated that the sport was “highly preferable to many other ways in which young men are apt to spend their leisure time”.211 When Rev Father Burns of Middlesbrough All Saints church complained that football was responsible for increases in drinking and poverty, ‘Free Lance’ in the Northern Athlete vociferously replied that “thousands of wives in England have good cause to be thankful for the coming of the day when their husbands took to the great national pastime, for where squalor, misery, and semi-starvation once reigned, we now have comfortable homes”. ‘Free Lance’ suggested that two-thirds of those attending football matches “would probably be sitting in a public house making themselves lower than the swine” were it not for the sport. Indeed in 1910, the Chief Constable of Middlesbrough stated

209 Teesside Weekly Herald, 21st February 1914; Football constituted 5% of all street offences from 1910-1913, whilst drunkenness made up 58% of the total – D. Taylor, Policing the Victorian Town: The development of the police in Middlesbrough c.1840-1914 (Basingstoke, 2002), p. 157

210 Sports Gazette, 2nd November 1912; Smith quoted in Lewis, “Touched Pitch”, p. 134

that a greater number of cases came before the magistrates when Middlesbrough FC were playing away on a Saturday.\textsuperscript{212}

The growth and development of football on a number of levels, from a professional Football League team to the introduction of a local schools league, demonstrates the ways in which the sport had become an important and integral part of the recreational lives of many men. The reaction and celebrations to the involvement of Middlesbrough, South Bank and Eston United in the Amateur Cup finals suggests that football could play a role in the shaping of local identities. Furthermore, the reactions of Middlesbrough FC’s shareholders and of the local press to the mismanagement of the club, and the notion that those elected to run the club needed to act in its best interests, indicates the strength of feeling towards ‘their’ football club. Expectations and support remained high, despite the scandals that affected the club, suggesting that supporters felt they had more invested emotionally and monetarily in the Middlesbrough club. The move from amateur club to a member of the national Football League allowed Middlesbrough to build their national profile, though the increased desire for success which accompanied this, also led to the breaking of the rules.

\textsuperscript{212} \textit{Football Mail}, 23\textsuperscript{rd} April 1910; \textit{Northern Athlete}, 14\textsuperscript{th} May 1906; As Brian Harrison points out, those groups that opposed drinking rarely provided alternative recreations “as attractive as those they attacked” – ‘Religion and Recreation in Nineteenth-Century England’, \textit{Past and Present} 38, 1 (1967), p. 124
Conclusion

By 1914 sport had become an integral part of Middlesbrough’s culture, providing a form of entertainment that an increasing number of people could watch or participate in. In 1914 there was a far greater number and more diverse range of clubs, input from working class and lower-middle class men had increased, and professional football had become the most popular spectator sport. However, as had been the case in 1870, the town’s middle class were still able to dominate much of the town’s sport and opportunities for women and the poorest members of the population remained limited.

This thesis has shown how sport developed in a late nineteenth and early twentieth century urban environment, and through the case study of Middlesbrough, has demonstrated the ways in which a town’s expansion and social structures impacted on its sport. By examining Middlesbrough’s sports clubs and organisations, this study shows how class influenced the growth of sport and determined participation. The study of football explains how the game changed from an amateur pastime to a professional sport capable of attracting thousands of spectators. By exploring the contemporary debates surrounding professionalism and the circumstances which led to the establishment of professional football clubs in 1889 and 1899, it is clear that patterns of development differed from place to place – parts of the north could be strongholds for amateur football. The strength of Middlesbrough’s sporting culture is evidenced by the number and diversity of clubs, organisations and leagues in existence, whilst the importance attached to sport is demonstrated by the involvement of the town’s elite as officials and by the establishment of clubs for workers by employers. Importantly, it has
been demonstrated that the history of Middlesbrough should not be limited to its industry and economy, and that an examination of its sport not only sheds light upon the town’s social and cultural history, but offers an insight into the interaction between different classes of people. In addition, the notion in existing historiography that the town was dominated by its uncivilised working class is not reflected in its sporting culture, which, for large sections of the population, was exclusive and inaccessible.

A number of interconnected themes emerge from this study, all of which played a critical role in shaping Middlesbrough’s sport – the role of class in determining access to sport, the provision of sport by employers, the popularity of football, the potential ways in which sport could help to construct local identities and the depth of the sporting culture in general. Indeed the development of Middlesbrough’s sporting culture reflects Martin Johnes’ assertion that sports were “shaped by local spatial, economic and social conditions and the influence of specific individuals”.¹ This study has also allowed for an examination of changes and continuities in women’s sport, attitudes towards professionalism and amateurism, and the recognition of the necessity of providing sport and/or recreational facilities for the working classes.

During the second half of the nineteenth century, Middlesbrough was heralded as a model Victorian town; the result of the enterprise, endeavour and hard work of its inhabitants. It was “smoke-dried, iron-bound, enterprising, wealth-making, [and] utilitarian”,² and fluctuations to its economy aside, portrayals of the expanding town changed very little during the period under examination. The town prided itself on “its

² L. Praed, History of the Rise and Progress of Middlesbrough (Newcastle, 1863), p. 4
enterprise, financial success and municipal growth”, and its identity was “rooted in its industry, its urban-ness, its novelty and its survival”.

The town was an ‘Infant Hercules’, but could it be described as a ‘sporting Hercules’? Riess states that the most influential factor on the development of sport in urban environments was economic, as changes to income, working hours and social values resulted in different leisure for different classes; sport “came to mark social boundaries and to define status”. It is evident that the development of sport in Middlesbrough was greatly influenced by the industrial setting, urban expansion and by the mass migration of workers to the district. The lack of a landed, upper class and the existence of a large working class population, with the associated problems that this brought to the town, led Middlesbrough to present itself “as a town aspiring to the values of the respectable middle and working classes”.

Yet despite the desire to create a moral and decorous society, during much of this period worker’s leisure time was not catered for, and their own efforts to fill this time often led them to the public house. Spectator sports gradually increased, which not only offered distractions from drink, but because of the strength of the amateur ethos and the characteristics that sports such as cricket and football hoped to encourage, sport offered a way of civilising the populace. The growth in sporting opportunities for the urban working class after the turn of the century confirms P. J. Waller’s assertion that their lives were not necessarily defined solely by “a friendless environment of dirt, noise, and

---

disease, an inferno of blighted homes... and banished hopes”, but that there also existed “instruments of pleasure and improvement”.  

The dominant theme in the expansion of sport in Middlesbrough is the role played by members of the middle classes as participants, administrators and providers of sport. Despite Huggins’ suggestion that “predominantly commercial or less respectable” activities dominated the town’s leisure, this study demonstrates that the majority of sports clubs were governed by the amateur ethos and the lower-middle and middle-middle classes. Football aside, the majority of the town’s inhabitants were effectively excluded from sport. Organisations such as the boating and golf clubs were dominated by the middle class, and also included members of the upper-middle class. That Middlesbrough’s clubs were characterised by the class of their members confirms Jose Harris’ assertion that class dominated society in the last quarter of the nineteenth century, and that “all other social and cultural attributes became reducible to class categories”. The relationship between sport and the town’s elite is shown explicitly on a number of occasions. In 1887 the Northern Review published a list of the “Twelve Most Popular Men in Middlesbrough”, five of whom had roles with sports clubs. For example, Raylton Dixon was the president of the boating club, and John T. Belk was president of Middlesbrough Cricket Club, vice-president of the boating club and vice-president of Middlesbrough Bicycle Club. Samuel Sadler was described as a “lover and a generous supporter of all manly sports and pastimes”, and the involvement of Arthur Dorman in the Dorman Long sports club was regarded as proof of “the interest he takes

---

7 Huggins, ‘Leisure and Sport in Middlesbrough’, p. 151
9 John T. Belk, Raylton Dixon, Henry Morton Hedley, Samuel Sadler, Isaac Wilson – Northern Review, 23rd July 1887
in the pleasures of his workpeople”. Furthermore, Sadler had roles in 16 clubs and one association during this period. Similarly, the ironmaster Charles Dorman was involved with nine clubs, Jack R. Smiles, Alfred Mattison, Thomas Gibson-Poole and Lawrence Farrar Gjers had roles with ten clubs, and John Ellerton and Walter G. Roberts had involvement with 11 clubs or leagues. Briggs argues that towards the end of the nineteenth century Middlesbrough’s employers contributed less to “the life of the community” outside of the works, and were not as familiar with “daily life” as previous generations. Involvement with a sports clubs offered a way of connecting with their employees and the wider community, even if sometimes this was in name only. The way sport could be used to connect local leaders to their community, and the necessity of being involved with sport, was further evidenced by the 1912 Sports Gazette headline, “The Tees-side Mayors – Sportsmen All” above photographs of newly elected mayors.

Whilst members of the town’s elite continued to take up both titular and active roles in leagues and clubs, the changing social structure of the town was also mirrored in sport. The growth of the socially aspirant shopocracy and lower-middle class is reflected in the increasing number of roles taken up by this group as officials and members. Their involvement in sport clubs offered a means of attaining a higher social standing and confirms the suggestion that this group were concerned with “an obsessive pursuit of status and respectability”. The number of cross-class clubs also grew from

---

10 *North-Eastern Daily Gazette*, 13th August 1900, 29th November 1911
12 *Sports Gazette*, 9th November 1912
the beginning of the twentieth century, and members of the middle classes were able to choose between membership of these clubs as well as the more elite clubs, and were therefore able to dominate Middlesbrough’s sports.  

The control of sport by the middle classes confirms Helen Meller’s assertion that the growth of sport was “not a means for promoting social integration”, but instead reflected “the socio-economic divisions in society”.  

It is evident that in the last quarter of the nineteenth century, working class leisure opportunities were limited, particularly in comparison to the number of clubs that were open to the middle classes. The working man was thought to be particularly susceptible to the “allurements of the public house... as he returns home after a hard day’s toil... how sorely he is tempted to turn in the public house”. Local cricket and football also needed to be kept free from “debasing entanglements” that were thought to result from the involvement of the working man, and the responsibility was placed on the players to ensure that sport remained untainted by the “betting mania”. Middlesbrough has been described as a mere “dormitory for the men”, indicating that its utilitarian and industrial nature left little room for the provision of facilities for the everyday comfort of its people, least of all, the provision of recreational and leisure facilities. The long working hours of many of the town’s men precluded involvement in most sports, meaning that only on a Saturday afternoon could they “surrender unconditionally to

---

14 Though Harris suggests that “snobbery, class rivalry, and social differentiation” were common amongst groups that were similar in status, this does not appear to have been the case with the sporting activities of Middlesbrough’s middle class groups – Harris, Private Lives, Public Spirit, p. 8
16 Bishop Lacy, Roman Catholic Bishop of Middlesbrough, quoted in P. Stubley, Industrial Society and Church: Middlesbrough 1830-1914 (Bognor Regis, 2001), p. 82
17 North-Eastern Daily Gazette, 28th February 1891
[the] excitement” of football. The leisure time of the working classes was often commented upon in the local press, which largely condemned the lack of provision made for their free time. It was after all, according to the North-Eastern Daily Gazette, during “the leisure hour that character is chiefly formed”, and through recreation the “manysidedness [sic] of social life and character is more clearly displayed”. However, by the end of the period the provision of leisure from larger places of work and the church, coupled with spectating at football matches, offered more respectable and controlled types of leisure. Alongside the profusion of clubs with middle class membership, this contradicts Huggins’ suggestion that Middlesbrough possessed “a very strong but predominantly less respectable pattern of working class leisure”.

Holt suggests that for those who wanted to encourage values of thrift, sobriety and respectability in the working class the task was sometimes too great. Beaven also argues that rapidly growing towns like Middlesbrough obstructed middle class initiatives to improve the leisure of the working class, and this was demonstrated by the limited attempts at recreational recreation in the town. It had been hoped that the Cleveland and Middlesbrough Athletic Institute would assist in improving the leisure of working men, but it is perhaps because of the Institute’s emphasis on altering the moral character of its members by prohibiting alcohol and gambling (and all for a membership fee), that it proved to be a failure. Beaven’s suggestion that failure was an unwelcome feature of attempts at rational recreation is confirmed by the closure of the Institute after

---

19 Sports Gazette, 12th November 1904; Thomas McKenna, the secretary of the Cleveland Association of Blastfurnacemen stated in 1912 that furnacemen worked 11 hours during the day or 13 hours at night, as well as a 24 hour long shift once a fortnight – Stubley, Industrial Society and Church, p. 32
20 North-Eastern Daily Gazette, 24th October 1907
21 Huggins, ‘Leisure and Sport in Middlesbrough’, p.128
23 B. Beaven, Leisure, Citizenship and Working-Class Men in Britain, 1850-1945 (Manchester, 2005), p. 27
less than two years. At the same time, football was encouraged by newspaper editorials and the likes of church clubs as a character-building pastime, and there are a number of examples of the role of the church in forming clubs and providing facilities, it being felt that through “amusement and recreation”, young people could become good Christians. Such organisations were met with varying degrees of success, it being unclear whether members joined to worship or to play sport. It seems likely that in a place such as Middlesbrough that sport itself was the attraction, there being only limited forms of entertainment available.

One of the most important changes in the provision of sport from the start of the twentieth century was the establishment of clubs by large employers. These organisations also allowed those in lower paid positions far greater involvement in running the club of their workplace, through the positions of secretaries. The large memberships of these clubs may suggest that these organisations offered affordable facilities that were not available elsewhere and allowed men to play sport with their fellow workers. It also suggests that membership of such organisations was something that was desired by employers, particularly as a successful and popular club provided good publicity and may have helped to retain workers. Such clubs can be viewed alongside developments in workplace paternalism in Britain in general. The provision of work-based clubs sheds light on the idea that paternalism was evidence of a reciprocal relationship between employers and workers, and that there existed “a benign regard... [amongst] capitalists for the well-being of their workforce”. It also enables an exploration of the suggestion that workers’ culture was dominated by the values of the

24 Beaven, Leisure, Citizenship and Working-Class Men, p. 39
25 North-Eastern Weekly Gazette, 1st November 1890
Whether the popularity of such organisations was due to the sporting or social aspects of the clubs is difficult to ascertain. These clubs offer an example of philanthropy by Middlesbrough’s major industrialists (though the amount of money put into the club by the works’ owners varied from club to club) and provide further evidence that the notion of elite withdrawal has been exaggerated.

Though spectators at football matches were primarily working class, the lower-middle and middle classes that were involved in clubs attempted to keep the game conducted in a respectable manner. However, Beaven has noted that much to the horror of rational recreationists, working class spectators took the “‘rational’ dimension out of the game, adopting a mindless fanaticism for their team”. To a far greater extent than any other, football proved itself to be an attractive spectator sport (meeting the need for excitement as identified by Holt), which also offered increasing opportunities for working class men to play in one of the numerous smaller teams. Matthew Taylor’s suggestion that the growth of football can be attributed less to a desire to emulate a middle or upper class game, and more to “a genuine and largely autonomous popular enthusiasm for the game”, can certainly be applied to football in Middlesbrough. In a town that offered little prospect of working class sport, football offered an outlet for their “emotions and passions”. As Waller contends, football provided a “compendium of great drama, combining cunning skill and brutal effort, in an atmosphere which joined companionship and conflict”. Furthermore, football provided “a sober entertainment for

27 Beaven, Leisure, Citizenship and Working-Class Men, p. 73
28 Holt, Sport and the British, p. 167
the working man who might otherwise adapt himself to unwholesome exercises [in] the public-house”.\(^{30}\) Particularly after the turn of the century, the growing number of smaller clubs had a great deal more involvement from members of the lower-middle and working classes. This development ran alongside an increased desire for success by those supporters of the town’s leading club. The decision by the Middlesbrough FC directors to turn professional in 1899 demonstrates a greater desire for victories, and thus large crowds and larger profits. It also suggests a rejection of the tenets of gentlemanly amateurism that had proved so strong ten years earlier, when it had been the spectators that had demanded better football.\(^{31}\) This examination of Middlesbrough’s football culture has also shown, as Taylor argues, that only “in the nature of its support and consumption rather than in the way it was organised and controlled” could football be considered a working class game.\(^{32}\)

Whilst it has been demonstrated that football was a popular form of entertainment in itself, it is also apparent that it was capable of provoking strong feeling amongst spectators and officials, and within the local press. This is evidenced most clearly in the debates surrounding the professionalisation of the sport and the breakaway formation of Ironopolis FC, as well as by the periodic criticism levelled at the officials of Middlesbrough FC. Supporters felt a sense of ownership over ‘their’ football club, and when results were poor or the directors were not thought to be acting in the club’s best interests, disapproval was vehement. Though football clearly provoked strong emotions

\(^{30}\) Sports Gazette, 12\(^{th}\) November 1904; Waller, Town, City and Nation, p. 103  
\(^{31}\) This suggests that Middlesbrough FC was governed by the ‘peculiar economics’ of football as identified by Vamplew, being somewhere between profit and utility maximiser – W. Vamplew, Pay Up and Play the Game: Professional sport in Britain, 1875-1914 (Cambridge, 1988), p. 77; See also J. Hill, Sport, Leisure & Culture in Twentieth-Century Britain (Basingstoke, 2002), pp. 24-28  
\(^{32}\) Taylor, The Association Game, p. 90
and a sense of club loyalty amongst spectators, it is unclear as to whether it played a role in the formation of local identities. Holt has argued that “the supreme appeal of football lay almost certainly in its expression of a sense of civic pride and identity”. As a spectator sport, Holt suggests, football provided “a means by which men could come to terms with the reality of the late Victorian city and clarify their relationship to it”.33 Whilst Taylor argues that football was a “unifying force within working class cultural life”,34 there was often support for more than one local team in the Middlesbrough area. During Ironopolis’ existence, loyalties for the two town clubs were not divided on any definite lines of place, religion or ethnicity, and spectators divided their time between the two clubs. Furthermore, as Middlesbrough was a new town, identities and loyalties may have been at an early stage of development as the population continued to change and grow. Middlesbrough’s identity is complicated further by being part of both Yorkshire and part of the north-east, references being made to the town’s membership of both regions throughout the period. Though victories for Middlesbrough (as well as for South Bank in the Amateur Cup) were celebrated,35 there is not enough evidence nor are there explicit references made to the direct role that football played in forming a local identity in this case.

The achievements of local sporting heroes, professional rower Robert Boyd and Olympic swimmer Jack Hatfield, provided opportunities to promote Middlesbrough and

34 Taylor, The Association Game, p. 98
35 With reference to celebrations for the FA Cup, Hill suggests that the desire to “amplify this occasional event into a more generalised image of the authentic nature of community” reveals an awareness of the “disharmonies” that existed in northern towns – J. Hill, ‘Rite of Spring: Cup finals and community in the north of England’, in J. Hill and J. Williams (eds.), Sport and Identity in the North of England (Keele, 1996), p. 108
boost civic pride. Both were celebrated as sons of the town, and that Boyd’s birthplace
was elsewhere was irrelevant to a population of migrants. The varied birthplaces of the
population as a whole is reflected in the origins of officials and members of sports
clubs. For example, only one of the first directors of Ironopolis FC was born in
Middlesbrough, whilst only six of the 18 boating club officials in 1901 were born in the
town. This indicates that not only were clubs inclusive, but that the birthplaces of club
officials were representative of those of the population in general. That the town was
composed of migrants meant that sports clubs offered a means of integration for new
arrivals, as well as opportunities to socialise with other men from their own social class.

Such was the increasing number of sports clubs in the late 1880s, that it was felt that
“every athletic want is met”. An editorial in the *Northern Review* stated that “whatever
requires the exercise of muscle and sinew is sure of a fair following”, and clubs were
formed for a wide range of sports. These comments and the column inches devoted to
sporting activities are indicative of the increasing interest in sport in the press from the
early 1880s. Whilst interest and participation in clubs increased, the effects of the
town’s continued expansion were evidenced on a number of occasions, and the lack of
available land proved particularly damaging to Middlesbrough’s cricket, rugby and
boating clubs. Cricket and rugby also suffered from the ever increasing popularity of
football, yet in contrast other sports witnessed a growth in the formation of clubs. For
example, the popularity of cycling rarely waned, assisted by the opening out of the sport
beyond the middle class. In contrast, baseball, aimed squarely at the working class and
competing directly with cricket, failed to find a place in Middlesbrough’s increasingly

---

36 Northern Review, 17th March 1888
37 Northern Review, 27th May 1893
crowded sporting culture. Furthermore, apart from football, the impact of commercialism and professionalism was small, evidence of the domination of the middle classes and attitudes towards amateur sport, and suggests a desire to encourage more respectable sports that would reflect well on a town that was perceived as tough and working class. The demand for sport as a form of entertainment is demonstrated further by the sustained popularity of sports days. From the 1870s until 1914, these events attracted considerable crowds and large numbers of participants, and sports were increasingly included at the picnics and events of places of work.

In general women’s access to sport throughout this period was constrained not only by their gender, but also by their class. Those women that did participate in sport were almost entirely middle class, and it is clear that access to sport for both men and women was determined first and foremost by their class and thus their income and free time. Lady Bell’s contention that Middlesbrough’s working class women had no opportunities for recreation is borne out by the middle class membership of those clubs that did include women, and confirms Catriona Parratt’s assertion that women’s leisure was defined by “very meagre possibilities and narrow horizons”. Lady Bell stated that Middlesbrough’s working class women were constrained by having “less health [and] less strength than her most prosperous sisters”, and thus the demands on their “mental, moral and physical” resources were greater. Middlesbrough had very low levels of female employment and those work-based clubs that were aimed at working class men

---

40 Middlesbrough had the lowest proportion of employed women of all towns with a population of 50,000 or more. As Lady Bell stated, there was “no organised women’s labour” – Bell, At the Works, p. 178; D.
inevitably excluded women as they were largely based in heavy industry where women did not work. It is unsurprising therefore that in a town dominated by its men (where at the start of twentieth century men still outnumbered women in the town), that opportunities for women’s sport were extremely limited. Moreover, gambling and drinking, often associated with the town’s working class men, were also indulged in by working class women.\textsuperscript{41} Whilst there was a perceptible change in attitudes towards women’s leisure between 1870 and 1914, most of the sports that were deemed acceptable for women to take part in involved only limited physical exertion, or revolved around opportunities to socialise.

Through an examination of Middlesbrough’s sporting history, the social and cultural history of the town has also been explored. It has illuminated the relationships between employers and employees, and has allowed for an exploration of the recreational lives of individuals. The particular way in which professional football developed in Middlesbrough demonstrates the need for a closer examination of the professionalisation of the sport in other towns and cities, and of the individuals involved. As a case study, this thesis has been able to examine in detail individual participants and officials, and explore their relationship with the town.

This thesis progresses our understanding of urban sport and urban history in a number of ways. It demonstrates how sport can be affected by urban growth, whether directly or indirectly, and equally, how sport can also affect the way in which a town develops. The time period covered in this case study allows us to trace the growth of sport alongside

\textsuperscript{41} Bell, \textit{At the Works}, pp. 254-258
the growth and an expansion of the town, taking in Middlesbrough’s exponential urban and industrial growth, to the start of the twentieth century when the sporting culture began to follow national patterns of development. We are able to examine the place of sport at particular turning points in the town’s development. This thesis has shown how the study of sport in a particular setting provides another means of examining relationships between different social groups and within a large urban landscape. As this thesis has demonstrated the ways in which sport was used by members of the elite to advance or maintain their position, this study points towards another means of examining urban elites. In addition, the detailed examinations of club involvement given here offer another means of showing the different ways people spent their free time in an industrial town. The study of sport can offer a way of shedding light upon the ways in which civic pride and identity were manifested in urban environments. The examination of Middlesbrough in this thesis demonstrates the variations in urban sporting cultures and allows for comparisons to be made with other case studies. This study demonstrates the need therefore for further research on individual towns and cities, enabling greater insight into the growth of sport. By examining sport on a local level, we can see how sport developed within a specific environment and how the particular setting impacted on the sporting culture.
